PREAMBLES FOR TRADES

The Model Preambles for Trades (2008 edition) as published by the Association of South African Quantity Surveyors shall be deemed to be incorporated in these bills of quantities and no claims arising from brevity of description of items fully described in the said Model Preambles will be entertained. Supplementary preambles are incorporated in these bills of quantities to satisfy the requirements of this project. Such supplementary preambles shall take precedence over the provisions of the said Model Preambles.

The contractor's prices for all items throughout these bills of quantities must take account of and include for all of the obligations, requirements and specifications given in the said Model Preambles and in any supplementary preambles.

PRICING OF PRELIMINARIES

Should the contractor select Option A in terms of subclause 32.1 in the Contract Data - Contractor to Employer (CE) for the purpose of adjustment of these preliminaries, the amount entered into the amount column in these preliminaries is to be divided into one or more of the three categories provided namely Fixed (F), Value Related (V) and Time Related (T).

SECTION A - PRINCIPAL BUILDING AGREEMENT

Definitions

- 1 Clause 1.0 - Definitions and interpretation
- 2 A1 DEFINITIONS AND INTERPRETATION
 - Clause 1.0 Clause
 - 1.1 Definition of "Commencement Date" is added:
 - "COMMENCEMENT DATE" means the date that the agreement, made in terms of the Form of Offer and Acceptance, comes into effect
- 3 Clause 1.1 Definition of "Construction Guarantee" is amended by replacing it with the following:

Item

Preliminaries
 Bill No. 1
 Preliminaries

4 "CONSTRUCTION GUARANTEE"
 means a guarantee at call obtained by the contractor from an institution approved by the employer in terms of the employer's construction guarantee form as selected in the schedule

Clause 1.1 Definition of "Construction Period" is amended by replacing it with the following:

"CONSTRUCTION PERIOD" means the period commencing on the commencement date and ending on the date of practical completion

5 Clause 1.1 Definition of "Corrupt Practice" is added:

6 "CORRUPT PRACTICE" means the offering, giving, receiving or soliciting of anything of value to influence the action of a public official in the procurement process or in contract execution

7 Clause 1.1 Definition of "Fraudulent Practice" is added:

8 "FRAUDULENT PRACTICE" means a misrepresentation of facts in order to influence a procurement process in the execution of a contract to the detriment of any tenderer and includes collusive practice among tender es (prior to or after the tender submission) designed to establish tender prices at artificial non-competitive levels and to deprive the tenderer of the benefits of free and open competition

Clause 1.1 Definition of "Interest" is amended by replacing it with the following:

"INTEREST" means the interest rates applicable on this contract, whether specifically indicated in the relevant clauses or not, will be the rate determined by the Minister of Finance, from time to time, in terms of section 80(1)(b) of the Public Finance Management Act, 1999 (Act No. 1 of 1999)

9 Clause 1.1 Definition of "Principal Agent" is amended by replacing it with the following:

Carried to Collection

Preliminaries
 Bill No. 1
 Preliminaries

R

10 "PRINCIPAL AGENT" means the person or entity appointed by the employer and named in the schedule. In the event of a principal agent not being appointed, then all the duties and obligations of a principal agent as detailed in the agreement shall be fulfilled by a representative of the employer as named in the schedule

11 Clause 1.1 Definition of "Security" is amended by replacing it with the following:

12 "SECURITY" means the form of security provided by the employer or contractor, as stated in the schedule, from which the contractor or employer may recover expense or loss

13 Clause 1.6 is amended by replacing the words "prepaid registered post, telefax or e-mail" with "prepaid registered post or telefax"

Clause 1.6.4 is amended by replacing it with the following:

The contractor shall take such precautions and security measures and other steps for the protection and security of the works as the contractor may deem necessary</p> <p>(b) The contractor shall at all times proceed immediately to remove or dispose of any debris arising from damage to or destruction of the works and to rebuild, restore, replace and/or repair the works</p>			<p style="text-align: center;">Carried to Collection</p> <p>R</p>
<p>Preliminaries Bill No. 1 Preliminaries</p>				

(c) The employer shall carry the risk of damage to or destruction of the works and material paid for by the employer that is the result of the excepted risks as set out in 10.6

(d) Where the employer bears the risk in terms of this contract, the contractor shall, if requested to do so, reinstate any damage or destroyed portions of the works and the costs of such reinstatement shall be measured and valued in terms of 32.0 hereof

10.6 Injury to Persons or loss of or damage to Properties

(a) The contractor shall be liable for and hereby indemnifies the employer against any liability, loss, claim or proceeding whether arising in common law or by statute, consequent upon personal injuries to or the death of any person whomsoever arising out of or in the course of or caused by the execution of the works unless due to any act or negligence of any person for whose actions the employer is legally liable

(b) The contractor shall be liable for and hereby indemnifies the employer against any liability, loss, claim or proceeding consequent upon loss of or damage to any moveable or immovable or personal property or property contiguous to the site, whether belonging to or under the control of the employer or any other body or person, arising out of or in the course of or by reason of the execution of the works unless due to any act or negligence of any person for whose actions the employer is legally liable

(c) The contractor shall, upon receiving a contract instruction from the principal agent, cause the same to be made good in a perfect and workmanlike manner at his own cost and in default thereof the employer shall be entitled to cause it to be made good and to recover the cost thereof from the contractor or to deduct the same from amounts due to the contractor

(d) The contractor shall be responsible for the protection and safety of such portions of the premises placed under his control by the employer for the purpose of executing the works until the issue of the certificate of practical completion

Carried to Collection

Preliminaries
Bill No. 1
Preliminaries

R

(e) Where the execution of the works involves the risk of removal of or interference with support to adjoining properties including land or structures or any structures to be altered or added to, the contractor shall obtain adequate insurance and will remain adequately insured or insured to the specific limit stated in the contract against the death of or injury to persons or damage to such property consequent on such removal or interference with the support until such portion of the works has been completed

(f) The contractor shall at all times proceed immediately at his own cost to remove or dispose of any debris and to rebuild, restore, replace and/or repair such property and to execute the works

10.7 High risk insurance

In the event of the project being executed in a geological area classified as a "High Risk Area", that is an area which is subject to highly unstable subsurface conditions that might result in catastrophic ground movement evident by sinkhole or doline formation the following will apply:

10.7.1 Damage to the works

The contractor shall, from the commencement date of the works until the date of the certificate of practical completion bear the full risk of and hereby indemnifies and holds harmless the employer against any damage to and/or destruction of the works consequent upon a catastrophic ground movement as mentioned above. The contractor shall take such precautions and security measures and other steps for the protection of the works as he may deem necessary

When so instructed to do so by the principal agent, the contractor shall proceed immediately to remove and/or dispose of any debris arising from damage to or destruction of the works and to rebuild, restore, replace and/or repair the works, at the contractor's own costs

Carried to Collection

Preliminaries
Bill No. 1
Preliminaries

R

10.7.2 Injury to persons or loss of or damage to property

The contractor shall be liable for and hereby indemnifies and holds harmless the employer against any liability, loss, claim or proceeding arising at any time during the period of the contract whether arising in common law or by statute, consequent upon personal injuries to or the death of any person whomsoever resulting from, arising out of or caused by a catastrophic ground movement as mentioned above

The contractor shall be liable for and hereby indemnifies the employer against any and all liability, loss, claim or proceeding consequent upon loss of or damage to any moveable or immovable or personal property or property contiguous to the site, whether belonging to or under the control of the employer or any other body or person whomsoever arising out of or caused by a catastrophic ground movement, as mentioned above, which occurred during the period of the contract

10.7.3 It is the responsibility of the contractor to ensure that he has adequate insurance to cover his risk and liability as mentioned in 10.7.1 and 10.7.2. Without limiting the contractor's obligations in terms of the contract, the contractor shall, within twenty-one (21) calendar days of the commencement date but before commencement of the works, submit to the employer proof of such insurance policy, if requested to do so

10.7.4 The employer shall be entitled to recover any and all losses and/or damages of whatever nature suffered or incurred consequent upon the contractor's default of his obligations as set out in 10.7.1; 10.7.2 and 10.7.3. Such losses or damages may be recovered from the contractor or by deducting the same from any amounts still due under this contract or under any other contract presently or hereafter existing between the employer and the contractor and for this purpose all these contracts shall be considered one indivisible whole

Carried to Collection			R
<p>Preliminaries Bill No. 1 Preliminaries</p>			

14.2 In respect of contracts with a contract sum above R1 million, the contractor shall have the right to select the security to be provided in terms of 14.3, 14.4, 14.5, 14.6, or 14.7 as stated in the schedule. Such security shall be provided to the employer within twenty-one (21) calendar days from commencement date. Should the contractor fail to select the security to be provided or should the contractor fail to provide the employer with the selected security within twenty-one (21) calendar days from commencement date, the security in terms of 14.7 shall be deemed to have been selected.

14.3 Where security as a cash deposit of ten per cent (10%) of the contract sum (excluding VAT) has been selected:

14.3.1 The contractor shall furnish the employer with a cash deposit equal in value to ten per cent (10%) of the contract sum (excluding VAT) within twenty-one (21) calendar days from commencement date

14.3.2 Within twenty-one (21) calendar days of the date of practical completion of the works the employer shall reduce the cash deposit to an amount equal to three per cent (3%) of the contract value (excluding VAT), and refund the balance to the contractor

14.3.3 Within twenty-one (21) calendar days of the date of final completion of the works the employer shall reduce the cash deposit to an amount equal to one per cent (1%) of the contract value (excluding VAT) and refund the balance to the contractor

14.3.4 On the date of payment of the amount in the final payment certificate, the employer shall refund the remainder of the cash deposit to the contractor

14.3.5 The employer shall be entitled to recover expense and loss from the cash deposit in terms of 33.0 provided that the employer complies with the provisions of 33.4 in which event the employer's entitlement shall take precedence over his obligations to refund the cash deposit security or portions thereof to the contractor

14.3.6 The parties expressly agree that neither the employer nor the contractor shall be entitled to cede the rights to the deposit to any third party

14.4 Where security as a variable construction guarantee of ten percent (10%) of the contract sum (excluding VAT) has been selected:

14.4.1 The contractor shall furnish the employer with an acceptable variable construction guarantee equal in value to ten per cent (10%) of the contract sum (excluding VAT) within twenty-one (21) calendar days from commencement date

14.4.2 The variable construction guarantee shall reduce and expire in terms of the Variable Construction Guarantee form included in the invitation to tender

14.4.3 The employer shall return the variable construction guarantee to the contractor within fourteen (14) calendar days of it expiring

14.4.4 Where the employer has a right of recovery against the contractor in terms of 33.0, the employer shall issue a written demand in terms of the variable construction guarantee

14.5 Where security as a fixed construction guarantee of five per cent (5%) of the contract sum (excluding VAT) and a five per cent (5%) payment reduction of the value certified in the payment certificate (excluding VAT) has been selected:

14.5.1 The contractor shall furnish a fixed construction guarantee to the employer equal in value to five per cent (5%) of the contract sum (excluding VAT)

14.5.2 The fixed construction guarantee shall come into force on the date of issue and shall expire on the date of the last certificate of practical completion

14.5.3 The employer shall return the fixed construction guarantee to the contractor within fourteen (14) calendar days of it expiring

14.5.4 The payment reduction of the value certified in a payment certificate shall be in terms of 31.8 (A) and 34.8

14.5.5 Where the employer has a right of recovery against the contractor in terms of 33.0, the employer shall be entitled to issue a written demand in terms of the fixed construction guarantee or may recover from the payment reduction or may do both

**SECTION C - SPECIFIC PRELIMINARIES-
HEALTH AND SAFETY**

108 The contractor shall comply with all the requirements set out in the Construction Regulations, 2014 issued under the Occupational Health and Safety Act 1993 (Act no 85 of 1993)

It is required of the contractor to thoroughly study the Health and Safety Specification as set out in the Section

Carried to Collection

Preliminaries
Bill No. 1
Preliminaries

R

C2.2, it must be read together with and deemed to be incorporated under this section of the Bills of Quantities / Lump sum document

The Contractor must take note that compliance with the Occupational Health and Safety Act, Construction regulations and Health and Safety Specification is compulsory. In the event of partial or total non-compliance, the principal agent Notwithstanding the provision of Clause A31.0 of Section A (Preliminaries) or any other clause to the contrary, reserves the right to delay issuing any progress payment certificate until the contractor provides satisfactory proof of compliance. The contractor shall not be entitled to any compensation of whatsoever nature, including interest, due to such delay of payment.

Provision for pricing of the Occupational Health and Safety Act, Construction Regulations and Health and Safety Specification is made under this clause and it is explicitly pointed out that all requirements of the aforementioned are deemed to be priced hereunder including for the SMME Subcontractors, domestic & nominated Subcontractors. No additional claims in this regard shall be entertained.

The Legal requirements contemplated in Construction Regulation CR (1) (g)
“A client must ensure that potential principal contractors submitting tenders, have made adequate provision for the cost of health and safety measures”
And CR 5(1) (h)
“A Client must ensure that the principal contractor to be appointed has the necessary competencies and resource to carry out the construction work safety”
Shall apply and failure to price the Health and Safety items will result in the tender being deemed non - responsive
The contractors attention is further drawn to Section 41 of the OCCUPATIONAL HEALTH AND SAFETY ACT NO.85 1993 : THIS ACT NOT AFFECTED BY AGREEMENT Subject to the provisions of section 10 (4) and 37 (2), a provision of this Act or a condition specified in any notice or direction issued there under or subjects to which exemption was granted to any person under section 40, shall not be affected to any condition of any agreement whether such agreement was entered into before or after the commencement if this Act or before or after the imposition of any such condition, as the case may be.
Prior to pricing the Contactor MUST FAMILIARIZE HIM / HERSELF WITH THE OCCUPATIONAL HEALTH AND

Rates

Heads of screws and nails in exposed faces of joinery shall be countersunk and pelleted. All pelleting shall be done with material to suit the exposed face of the component in which it occurs.

Prices for plugging are to include for approved patent wall plugs in brickwork or concrete.

Prices for eaves covering, ceilings, floors, joinery, etc. are to include for notching and square metre and waste.

Prices for material items such as skirtings, cornices, cover strips, edge strips, etc. given in linear metre are to include for mitres, fitted intersections, stopped ends, etc.

Prices for labour items such as rounded angles, rebates, grooves, chamfers, moulded edges, etc. given in linear metre are to include for angles, ends, etc.

Fittings are measured net and prices for all joinery work are to include for all labours in planing, rebating, moulding, square cutting and waste, mitres, etc. and for all work in connecting by mortice and tennon, housing flush, pinning, etc. as may be required and for all screws, nails, etc. and glueing together

Trades Names

All trade names deemed to mean "or similar approved" (prior to tender closing date)

Pre-fabricated timber roof trusses

Roof trusses shall be manufactured, erected and braced in accordance with SABS 0243

Contractor is to allow for the design, supply, fabrication, delivery, erection as well as to provide a full set of shop drawings which must be checked and signed for approval by the Consultant Structural Engineer prior to commencement of fabrication.

The setting out, spacing and overall dimensions of the roof trusses which are at approximately 760mm centres and have a 18° pitch are shown on the drawings. All truss dimensions must conform with these requirements and all relevant details of the roof construction

Carried to Collection

Builders Work
 Bill No. 6
 Carpentry and Joinery

R

The materials and design of the roof construction must allow for:

1. 'Marley' double roman concrete roof tiles and "Sisalation" insulation on 38 x 50mm battens at approximately 320mm centres
2. 600 x 1200mm Drop in ceiling tiles in suspended ceiling grid system and / or rhino board ceilings
3. 6mm 'Nutech' fibre cement eaves soffit coverings on 38 x 50mm softwood brandering at 450mm centres
4. 250 x 15mm 'Nutech' fibre cement fascias and 150 x 150mm seamless aluminium eaves gutters
5. Sundry services

The dimensions in the descriptions of the trusses are nominal and actual measurements are to be obtained from the architect and/or the site before design or fabrication commences

Prefabricated timber roof truss construction

- 1 Roof truss construction to hipped double pitched roof to Main Building approximately 2,0m high overall including roof ventilators, wall plates, trusses, permanent bracing, purlins, valley boards, tilting purlin at eaves with all purlins fixed to rafters with approved hurricane clips and trusses fixed to wall plates with approved roof ties. All exposed timbers at eaves, verges etc are to be wrot and including painting with two coats "ABE Provonite", installed com.

m² 326

EAVES, VERGES, ETC

Tempered Fibre-cement

- 2 15 x 225mm Fascia board countersunk screwed to roof timbers (elsewhere) with two brass screws at maximum 1200mm centres and jointed with and including standard aluminium halfround cover strips at all joints

ALUMINIUM GENERALLY

Carried to Collection

R

Builders Work
 Bill No. 9
 Metalwork

(WORK GROUP 140)

All Architectural aluminium work ie. doors, windows, louvres, etc must carry the certification seal of the Association of Architectural Aluminium Manufacturers of South Africa and no items which are not certified will be accepted on site Safety and security glazing materials shall comply with SABS 1263

SUPPLEMENTARY PREAMBLES

Aluminium sections

Flimsy sections which are easily bent or damaged in normal use will not be acceptable and the window units must be capable of withstanding public use for the life of the building. Window frames shall be unequal leg allowing for plastered finish on the inside Aluminium alloy for powder coating is to be produced to British Standard Specification 1470, 1471 or 1474

Corners, joints and glazing beads should be accurately mitred or notched and there must be no sharp edges or unsightly gaps when viewed from a distance of 3 metres Window frames are to be prepared for glazing from the outside and fixed with extruded snap-on type aluminium glazing beads which are to be powder coated to the same colour and specification as the window frames themselves

The frames to be formed perfectly flat, truly square and properly jointed at angles and intersections. Opening sections must fit perfectly on all faces and must open and close freely without binding at any point. Windows are to be fitted with felt inserts to provide a perfect seal when closed All necessary fittings are to be attached to the frames and sashes in the strongest possible manner and they shall retain the sashes rigidly in the open or closed position The manufacturers' own methods of construction may be used throughout provided that all joints are the strongest of their kind and are neatly formed to give the best possible appearance. All windows are to be left in perfect working order on completion of the project

Powder coating

The powder coating to be applied to all doors and window is to be colour Burgundy and is to be finished with a gloss finish All powder coating is to be subject to a 15 year guarantee which is to be provided by the applicator in writing The thickness of the powder coating is to be a minimum 60 microns The work is to be undertaken in accordance with British Standard 6496 or SABS 1578. The powder coating shall also be applied by an approved applicator who is able to comply with the requirements of the required standards and who must be registered by the manufacturers of the guaranteed products

Waterproofing

Window frames generally are to be waterproof and this shall also apply when they are installed and closed

Because the windows are being built into plastered walls, they are to be sealed using a dymonic nt polyurethane elastometric uv resistant flexible joint sealant on the two reveal sides as well as the cill suitable for painting.

Protection

All windows are to be protected against damage during handling, transport to site, building in and final completion. This will require that they are fully wrapped or taped to protect the powder coating throughout the construction process. Protective wrapping is to be fully removed on completion It is recommended that the Contractor liaise with the Supplier regarding protection of windows and glass from the time that they have been installed until completion of the project

Fixing

The frames shall be fitted with the manufacturer's standard type of fixing lug which is to be no less than 19 x 3 x 150mm long which is to be screwed to the frame. These are to be placed one near to each corner and intermediately not more than 450mm apart to sides, top and bottom

Carried to Collection

Builders Work
Bill No. 9
Metalwork

R

Sample

Once the order has been placed for the windows, the Contractor will be required to provide a full size example of a window incorporating an opening section with burglar bars. This will be subject to scrutiny by the Architects who will check the window for compliance with the specifications. Various amendments could be called for but in any event, the approved sample is to be left on site as an example of the requirements for all windows to be provided as part of this project. Any windows brought to site which do not comply with the sample will be required to be removed and replaced

Drawings

NOTE: Tenderers are referred to Architect's drawings included at the end of these Bills of Quantities for tender purposes

S10 - Neutral (min) 6.38mm laminated safety glazing or similar approved. Thickness and structural character to be specified, approved and reported on by competent person. All glazing to adhere to the requirements of SANS 10137 Glazing to be intruder proof. All Aluminium must comply with AAAMSA minimum design standards

Window specification : aluminium window with stainless steel concealed friction stays, complying with AAAMSA performance criteria A3, glazed in accordance with SANS 10160, SANS 10137, SANS 10400.(part n of section 3) and SANS 1263 with clear, fitted with clip-on glazing, fitted with clip-on glazing beads with gasket seals with lugs plugged and screwed to brickwork or concrete, all in accordance with AAAMSA selection guide for glazed aluminium architectural aluminium products - June 2008.

Carried Forward to Summary of Section No. 3

External Works
 Bill No. 2
 Stormwater Drainage, etc

R

Item No	Quantity	Rate	Amount R
<p><u>SECTION NO. 3</u></p>			
<p><u>BILL NO. 3</u></p>			
<p><u>SOIL DRAINAGE</u></p>			
<p>Unless otherwise described, the preambles and full descriptions of the items in the proceeding Bills are to apply equally to this Bill</p>			
<p><u>(WORK GROUP 146 UNLESS OTHERWISE STATED)</u></p>			
<p><u>PREAMBLES</u></p>			
<p>For preambles see "Model Preambles for Trades 2008" as issued by The Association of South African Quantity Surveyors</p>			
<p>For additional preambles see "SABS 1200" as issued.</p>			
<p><u>uPVC pipes and fittings:</u></p>			
<p>Sewer and drainage pipes and fittings shall be jointed and sealed with butyl rubber rings. Soil, waste and vent pipes and fittings shall be solvent weld jointed or sealed with butyl rubber rings.</p>			
<p><u>uPVC pressure pipes and fittings:</u></p>			
<p>Pipes of 50mm diameter and smaller shall be plain ended with solvent welded uPVC loose sockets and fittings. Pipes of 63mm diameter and greater shall have sockets and spigots with push-in type integral rubber ring joints. Bends shall be uPVC and all other fittings shall be cast iron, all with similar push-in type joints.</p>			
<p><u>Reducing fittings:</u></p>			
<p>Where fittings have reducing ends or branches they are described as 'reducing' and only the largest end or branch size is given. Should the contractor wish to use other fittings and bushes or reducers he may do so on the understanding that no claim in this regard will be entertained.</p>			
<p>Carried to Collection</p>			
<p>External Works Bill No. 3 Soil Drainage</p>			
			R

Fixing of pipes:

Unless specifically otherwise stated, descriptions of pipes shall be deemed to include fixing to walls, etc, casting in, building in or suspending not exceeding 1m below suspension level.

Disinfection of water pipework:

Water pipework is to be disinfected at completion in accordance with SABS 1200L (provision for disinfection elsewhere).

Laying, backfilling, bedding, etc., of pipes:

Pipes shall be laid and bedded in accordance with manufacturers' instructions or in accordance with engineers details and trenches shall be carefully backfilled.

Where no manufacturers' instructions exist, pipes shall be laid in accordance with Clauses 5.1 and 5.2 of each of the following: SABS 1200L :

Medium-pressure pipelines SABS 1200 LD

: Sewers SABS 1200 LE :

Stormwater drainage Pipe trenches, etc shall be backfilled in accordance with Clauses 3, 5.5, 5.6, 5.7 and 7 of SABS 1200DB : Earthworks (Pipe trenches).Pipes shall be bedded in accordance with Clauses 3.1 to 3.4.1, 5.1 to 5.3 and 7 of SABS 1200LB : Bedding (Pipes)Unless otherwise described bedding of rigid pipes shall be Class B bedding

General:

Descriptions of pipes laid in and including trenches and of inspection chambers, catchpits, etc shall be deemed to include excavation, bedding, backfilling, compaction to a minimum of 98% Mod AASHTO density and disposal of surplus material on site.

As-built drawings:

Where required, the contractor shall prepare an updated set of as-built drawings. At completion of the contract the contractor shall hand these drawings to the principal agent for reproducing onto the originals for handing over to the employer (provision for allowance of as-built drawings elsewhere).

R

SABS 1200 C

EXCAVATIONS

Excavate in all materials for trenches, compact the trench bottom to 90 % MOD AASHTO density, backfill by hand in layers of not exceeding of 150 mm in thickness using excavated material unless otherwise instructed by the Engineer in writing, compact the layers to 90 % MOD AASHTO density, dispose of all surplus and / or unsuitable material within free haul distance at a place as shall be instructed by the Engineer for pipe sizes of 50 mm to 315 mm diameter for depths as described below (any changes and / or deviations from the designs are to be agreed upon, confirmed by the Engineer on site and recorded in the site instruction book

1	Excavation exceeding 0.5 m up to and including 1.0 m.	m ³	23
2	Excavation exceeding 1.0 m up to and including 1.5 m.	m ³	89
3	Excavation exceeding 1.5 m up to and including 2.0 m.	m ³	51

BEDDING

Provision of bedding and covering material from commercial source

4	Selected fill material for flexible pipe bedding cradle of granular material, compacted uniformly in layers with light compaction directly over pipes, ensuring that no stones are amongst the blanket materials, the Engineer must inspect, approve and record each section of 300 mm thick covering fill in the site instruction book and each approval must accompany the certificates for payment purposes	m ³	39
5	Selected fill material for blanket as specified compacted uniformly in layers with light compaction directly over pipes, ensuring that no stones are amongst the blanket materials, the Engineer must inspect, approve and record each section of 300 mm thick covering fill in the site instruction book and each approval must accompany the certificates for payment purposes	m ³	26

			R

The following provisional sums are for work to be executed by selected contractors which will be regarded as sub-contractors to the Contractor. For Selected sub-contracts, the Contractor will call for quotations selected by the Employer and contractor on documents prepared by the Employer or the relevant Consultant, in accordance with the Principal Building Agreement and in conjunction with the Project Manager.

The Project Manager and the Contractor shall in consultation with the relevant Consultant adjudicate the tenders. The Contractor shall, upon the final decision consult with the client, then appoint the successful tenderer who shall become a sub-contractor to the Contractor.

Privity of the contract shall not be created between the Employer and the Sub-contractor by the method of selection, tender enquiry, adjudication and appointment.

Loss of profit Should any of the specialist items listed in this Bill be substantially reduced or omitted, no claim for "loss of profit" on any of the specialists listed, will be considered
