1. BACKGROUND OF THE PROJECT

The new cabinet of Gauteng lead by the honorable Premier Panyaza Lesufi pronounced that, the province has decided to elevate certain priority areas of the Growing Gauteng Together (GGT) 2030 strategy which are non-negotiable, between now and the end of the sixth administration. The GGT2030 remains the plan of action and from it emanates the **five elevated priorities** underpinning by a focus on Townships, informal settlements, and Hostels (TISH): The **five priorities** are as follows:

Priority 1: Accelerate economic recovery.

Priority 2: Strengthen the battle against crime, corruption, vandalism, and lawlessness.

Priority 3: Improve living conditions in townships, informal settlements, and hostels (TISH).

Priority 4: Strengthen the capacity of the state to deliver services.

Priority 5: Effectively communicate the government's programmes and progress.

The current state of crime-fighting technology is rapidly evolving with the advancements in research and development technology. Globally law enforcement agencies are adopting new technologies such as facial recognition, predictive policing, body-worn cameras, and forensic analysis software to enhance their crime-fighting efforts. However, these technologies also bring up new challenges for law enforcement agencies, including privacy concerns, potential biases, and technical difficulties in implementation and integration with existing systems.

The need for technological solutions in crime-fighting is growing as crimes become more complex and global in nature. Law enforcement agencies require efficient and effective solutions to keep up with the changing crime landscape. The technology solutions being sought through this **Request for Proposal (RFP)** aim to address the challenges faced by law enforcement agencies and provide them with tools to enhance their investigations, improve their decision-making process, and increase their overall effectiveness.

To this end, the department seeks to leverage the use of such technology in fighting crime to enhance the efficiency and effectiveness of law enforcement efforts, as well as to improve public safety. This can include using tools such as facial recognition software, surveillance cameras, and data analysis to identify criminal activity, track suspects, and gather evidence. Additionally, technology can help in preventing crimes by allowing for real-time monitoring of high-risk areas, facilitating communication between law enforcement agencies, and providing access to critical information.

The Department of eGovernment as the custodian of 4IR initiative delivery for the Gauteng Provincial Government will be providing Drones as a Service (DaaS) to the Gauteng Department of Community Safety and to the other relevant law enforcement agencies to increase and improve service delivery while increasing efficiency in fighting crime.

3. PROJECT OBJECTIVES

- 3.1 Improved crime investigation: The technology solutions being sought through the tender should help law enforcement agencies in their investigations by providing them with efficient and effective tools for data analysis and crime scene analysis.
- 3.2 Enhanced public safety: The implementation of these technology solutions should lead to increased public safety by helping law enforcement agencies identify and prevent crimes before they occur and respond more quickly to criminal activity.
- 3.3 Better decision-making: The technology solutions being sought should provide law enforcement agencies with real-time information, allowing them to make informed decisions more quickly and effectively.

- 3.4 Increased efficiency: The implementation of these technology solutions should result in improved efficiency in the crime-fighting process, allowing law enforcement agencies to allocate their resources more effectively.
