PART T1: TENDERING PROCEDURES

T1.1.1: TENDER NOTICE AND INVITATION TO TENDER

The Employer seeks to appoint 2 (two) regional contractors in the North-Central Region of eThekweni Municipality to undertake road and stormwater infrastructure repairs on an as and when required basis. The work under this contract will entail rates-based contracting and work will be issued equally between the 2 (two) contractors in a form of works order as the need arises.

Subject	Description	Tender Data
Employer	The Employer is the eThekweni Municipality as represented by: Deputy Director: Roads and Stormwater Maintenance	C.1.1.1
Tender Documents	Documentation is to be downloaded from the National Treasury's eTenders website or the eThekweni Municipality Website : https://www.etenders.gov.za/ https://www.durban.gov.za/pages/business/procurement	C.1.2
CIDB Eligibility	It is <u>estimated</u> that Tenderers should have a CIDB contractor grading designation of 6 or Higher CE (or higher).	C.2.1.2
Meeting Type	Compulsory Clarification Meeting	C.2.7
Meeting Details	A Compulsory Clarification Meeting will be held on the 11 August 2026 at the Engineering Training Centre, No.8 Electron Road, Springfield, Durban 4091 at 11h00 am. Consolidated Question and Answers from clarification meeting will be uploaded on the 27 August 2026	C.2.7
Seek Clarification	Queries relating to these documents are to be addressed to the Employer's Agent's Representative whose contact details are: Smanga Gumede Tel: 031-322 6019 eMail:smanga.gumede@durban.gov.za	C.1.4
Submitting a Tender Offer	The Tender Offer (hard copy) shall be delivered to: The Tender Box in the foyer of the Municipal Building, 166 KE Masinga Road, Durban An electronic submission , via the eThekweni Municipality JDE System (ESP Module) , is also to be made. Refer to Part T1.1.2 and Tender Data: C.2.13. Notwithstanding the electronic submission , a tender offer will only be deemed valid if the "hard copy" submission has been made.	C.2.13
Closing Time	The Tender Offer (hard copy) shall be delivered, and the electronic submission completed, both on or before 04/09/2026 , at or before 11h00.	C.2.15
Evaluation of Tender Offers	Either the 80/20 or 90/10 Price Preference Point System , as specified in the SCM Policy: Section 52: Preferential Procurement will be applied in the evaluation of tenders. Tender Data: C.3.11: Evaluation of Tender Offers details the awarding of Preference Points, and other related evaluation requirements.	C.3.11

Requirements for sealing, addressing, delivery, opening, and assessment of tenders are stated in the Tender Data

CIDB B.U.I.L.D. Programme Standards

Standard for Indirect Targeting for Enterprise Development through Construction Works Contracts	Not Applicable
Standard for Developing Skills through Infrastructure Contracts	Not Applicable

T1.1.2: NOTES TO TENDERERS

These “Notes to Tenderers” are intended to provide guidance regarding tendering obligations and requirements.

Compliance requirements are stated in the relevant parts of the Tender Data: T1.2.

GENERAL

- 1) The words BID, TENDER, QUOTATION, and REQUEST FOR QUOTATION (RFQ) are interchangeable throughout this procurement document.
- 2) **JDE-ESP Module** refers to the eThekwini Supplier Portal module on the eThekwini Municipality JDE System. Refer to Part T1.1.2.

eThekwini Supply Chain Management Policy (SCMP)

The requirements as stated in the Employer's SCM Policy include, but are not limited to, the following:

1) Section 14(4): ETM Supplier Database

The eThekwini Supply Chain Management Policy requires suppliers/ service providers/ contractors to be registered on the **eThekwini Municipality's Supplier Portal**.

In the event of the Tenderer not being registered on the eThekwini Municipality's Supplier Portal, the Tenderer must register on the internet at www.durban.gov.za by following these links:

- Business
 - Supply Chain Management (SCM)
 - Accredited Supplier and Contractor Database.

The following is to be noted:

- The information for registration as in the possession of the eThekwini Municipality will apply.
- It is the Tenderer's responsibility to ensure that the details submitted to the Municipality are correct.
- Tenderers are to register prior to the submission of tenders.

2) Section 20(1)(d)(i): Audited Financial Statements

Audited Financial Statements are required to be submitted if the value of the tender offer exceeds R10 million (incl. VAT). See **Returnable Form: MBD 5** and **Returnable Form: Contracts awarded by Organs of State** in the past 5 years.

3) Section 20(1)(d)(iii): Contracts Awarded during the past 5 Years

Tenderers are to include with their submission a listing of any contracts awarded to the Tenderer during the past 5 years, including particulars of any material non-compliance or dispute concerning the execution of the contracts. Tenderers are referred to **Returnable Form: MBD 5**

4) Section 13.1(b)(vii), 20(1)(d)(ii), 28.2(d), 29.6(a), 38.1(d), and 29.14: Municipal Rates and Taxes (Fees)

Tenderers are to refer to **Returnable Form: Declaration of Municipal Fees** to certify that they have no undisputed commitments for municipal services towards any municipality. Prior to an award, a Tenderer's municipal rates and taxes cannot be in arrears. Should a Tenderer be in arrears with respect to municipal services and has formalised an agreement with the respective municipality to offset the arrears, the agreement must be in place at time of tender closing.

5) Section 21.2: Tender Validity

Tenders are to remain valid for twelve (12) months after the expiry of the **original tender validity period** as stated in the **Tender Data**, unless the Municipality is notified, in writing, of anything to the contrary.

The eThekweni Municipality reserves the right to request confirmation from Tenderers of tender validity at any time during the twelve (12) month period.

6) Section 28(2)(d), Section 28(2)(h) and Section use 29(12): Certifications and Registrations

CIDB Registration and Status, B-BBEE Certificates, and Tax Compliance Status PINs must be valid at the time of tender closing, and before final award.

The Tenderer's Tax Compliance Status, CIDB Registration and Status (if required), and B-BBEE Level Status (if required), will be verified using the National Treasury Central Supplier Database (CSD). Tenderers are referred to **Returnable Form: Compulsory Enterprise Questionnaire**.

It is the Tenderer's responsibility to ensure that their data on the CSD is kept updated and correctly reflects the status of the tendering entity.

7) Section 28(2)(f), and 52.5.13: Joint Ventures (JV)

Each party of a JV must submit separate Tax Compliance Status PINs. Unless otherwise stated, the requirements for a single entity submission in terms of documentation requirements, will apply to each member of a JV making a submission.

As proof that a JV has been formalised, or that the parties to the JV agree to formalise the JV should they be successful in being recommended for the award of this tender, Tenderers are referred to **Returnable Form: Joint Venture Agreements**.

8) Section 49.1.2: Complaints and Objections (Appeals)

A non-refundable tariff, as per the approved Council tariffs, is payable by the Complainant to the Municipality. Proof of the payment of the Fee must be attached to the complaint.

CIDB

Regulation 25(8)

- 9) It should be noted that this contract, unless otherwise stated, is not part of a **Targeted Development Programme (TDP)**. The CIDB provisions in relation to a Contractor's **Potentially Emerging (PE) status** do not apply.

Tenderers are referred to **CIDB Inform Practice Note #32: "Application of the Potentially Emerging (PE) Status"**.

B.U.I.L.D. Programme

- 10) A programme to accelerate transformation in the construction industry, increase the capacity of the construction industry to deliver infrastructure and support the growth of emerging contractors, was launched on 14 March 2024 by the Deputy Minister of Public Works and Infrastructure and the Construction Industry Development Board.

Details of the B.U.I.L.D. Programme were published in a Government Gazette in 2020 (GG 43726) and B.U.I.L.D. has gradually been phased in at various levels of government and the private sector. The CIDB, a public entity with the mandate to promote improved performance in construction, oversees the programme and manages the B.U.I.L.D Fund.

The B.U.I.L.D programme determines that public sector entities which implement construction projects, that meet certain minimum requirements, must include developmental goals to the

deliverables defined in the tenders. If applicable, Contractors are required to include these goals in the plans and pricing when they submit their tender bids.

T1.1.3: INFORMATION REGARDING THE ETHEKWINI JDE SYSTEM

This Part (T1.1.3) is for information purposes only.

Compliance requirements are stated in Part T1.2: Tender Data.

1) General

eThekwini Municipality Bids, Tenders and Quotations (hereafter referred to as Tenders) are going to be submitted using the JDE System.

This JDE System will be used for:

- Viewing of available (open) Tenders,
- Downloading procurement documentation for Tenders,
- Uploading completed and signed Tender documentation,
- Completion and submission of Tenders electronically,
- Viewing the Tender opening schedule.

2) Registrations

To be granted access to the **JDE System** prospective service providers must be registered on the **National Treasury's Central Supplier Database (CSD)**, the **eThekwini Municipality Supplier Portal**, and the **eThekwini Municipality JDE System**.

National Treasury: Central Supplier Database

- Registration can be made on <https://secure.csd.gov.za> .
- Service Providers will be issued a "MAAA" number when registered.

eThekwini Municipality Supplier Portal

- Registration can be made on <https://www.durban.gov.za> by following these links:
>Business >Supply Chain Management (SCM) >Accredited Supplier & Contractor Database.

eThekwini Municipality JDE System

- Service providers requiring access must send an email to supplier.selfservice@durban.gov.za
A copy of the **Director's ID** is required:
- On receipt of this email, the Procurement and Supply Chain Management (P&SCM) Directorate will respond with the login credentials and a link to the **JDE System**.

3) Assistance with using the JDE System

The following P&SCM Official(s) can be contacted in connection with the use of the **JDE System**:

General Queries:

- Lindo Dlamini Tel: 031 322 7153 or 031 322 7133
 Email: supplier.selfservice@durban.gov.za

Technical Queries:

- Kgopotso Maja Tel: 031 322 3808
 Email: kgopotso.maja@durban.gov.za

4) Viewing of available tenders

By following link <https://rfq.durban.gov.za/jde/E1Menu.maf> prospective Service Providers will be able to view available (open) Tender opportunities without signing into the system. However, Service Providers will not be able to respond to a Tender without being signed into the system using a JDE User ID and Password.

5) Tender documentation

By accessing the **JDE System** (using <https://rfq.durban.gov.za/>) and viewing any available Tenders, prospective Service Providers will be able to download the relevant Tender documentation.

The Tender documentation consists of the **TENDER** and **CONTRACT Parts**, as described in the INDEX, and will include any drawings and other information (if applicable). Referred to, or included in the documentation, are the **Standard Conditions of Tender (and associated Tender Data)**, and the **Conditions of Contract (and associated Contract Data)** which will govern the tendering and contract processes respectively.

6) Submission of tender offers

Reference is to be made to the **Tender Data: C.2.13** that specifies compliance requirements.

Should the **Tender Offer** be required in “hard copy” format, the submission is to be delivered to the Delivery Location as stated in the **Tender Data**.

In addition to the above, **Tender Offers are also to be SUBMITTED ELECTRONICALLY** (uploaded) on the eThekwin Municipality JDE System (eThekwin Supplier Portal (JDE-ESP) Module). Notwithstanding the **electronic submission**, a tender offer will only be deemed valid if the “hard copy” submission has been made. The “hard copy” submission will be deemed to be the ruling version.

Bidders are responsible for resolving all access rights and submission queries on the JDE System before the tender closing date/ time, as stated in the **Tender Data: C.2.15**.

7) Viewing the Tender opening schedule

Users on the **JDE System** will be able to view the **Tender Opening Schedule** for each closed Tender. The tender opening schedule will also be made available on the eThekwin Municipal website at URL: <https://www.durban.gov.za/pages/business/publication-of-received-bids>

PART T1: TENDERING PROCEDURES

T1.2: TENDER DATA

T1.2.1 STANDARD CONDITIONS OF TENDER

The conditions of tender are the **Standard Conditions of Tender** as contained in **Annex C** of the CIDB Standard for Uniformity in Construction Procurement as published in Government Gazette No 42622, Board Notice 423 of 8 August 2019, as duplicated below.

The Standard Conditions of Tender make several references to the **Tender Data** for details that apply specifically to this tender. The **Tender Data** (T1.2.2) shall have precedence in the interpretation of any ambiguity or inconsistency between it and the Standard Conditions of Tender.

Annex C

Standard Conditions of Tender

C.1	General	
C.1.1	Actions	
C.1.1.1	The employer and each tenderer submitting a tender offer shall comply with these conditions of tender. In their dealings with each other, they shall discharge their duties and obligations as set out in C.2 and C.3, timeously and with integrity, and behave equitably, honestly and transparently, comply with all legal obligations and not engage in anticompetitive practices.	2) <i>Conflicts of interest in respect of those engaged in the procurement process include direct, indirect or family interests in the tender or outcome of the procurement process and any personal bias, inclination, obligation, allegiance or loyalty which would in any way affect any decisions taken.</i>
C.1.1.2	The employer and the tenderer and all their agents and employees involved in the tender process shall avoid conflicts of interest and where a conflict of interest is perceived or known, declare any such conflict of interest, indicating the nature of such conflict. Tenderers shall declare any potential conflict of interest in their tender submissions. Employees, agents and advisors of the employer shall declare any conflict of interest to whoever is responsible for overseeing the procurement process at the start of any deliberations relating to the procurement process or as soon as they become aware of such conflict and abstain from any decisions where such conflict exists or recuse themselves from the procurement process, as appropriate.	C.1.1.3 The employer shall not seek, and a tenderer shall not submit a tender, without having a firm intention and the capacity to proceed with the contract.
		C.1.2 Tender Documents
		The documents issued by the employer for the purpose of a tender offer are listed in the <i>Tender Data</i> .
		C.1.3 Interpretation
		C.1.3.1 The <i>Tender Data</i> and additional requirements contained in the tender schedules that are included in the returnable documents are deemed to be part of these conditions of tender.
		C.1.3.2 These conditions of tender, the <i>Tender Data</i> and tender schedules which are required for tender evaluation purposes, shall form part of any contract arising from the invitation to tender.
	<i>Note:</i> 1) <i>A conflict of interest may arise due to a conflict of roles which might provide an incentive for improper acts in some circumstances. A conflict of interest can create an appearance of impropriety that can undermine confidence in the ability of that person to act properly in his or her position even if no improper acts result.</i>	

C.1.3.3 For the purposes of these conditions of tender, the following definitions apply:

- a) **conflict of interest** means any situation in which:
 - i) someone in a position of trust has competing professional or personal interests which make it difficult to fulfil his or her duties impartially;
 - ii) an individual or tenderer is in a position to exploit a professional or official capacity in some way for their personal or corporate benefit; or
 - iii) incompatibility or contradictory interests exist between an employee and the tenderer who employs that employee.
- b) **comparative offer** means the price after the factors of a non-firm price and all unconditional **discounts** it can be utilised to have been taken into consideration;
- c) **corrupt practice** means the offering, giving, receiving or soliciting of anything of value to influence the action of the employer or his staff or agents in the tender process;
- d) **fraudulent practice** means the misrepresentation of the facts in order to influence the tender process or the award of a contract arising from a tender offer to the detriment of the employer, including collusive practices intended to establish prices at artificial levels;

C.1.4 Communication and employer's agent

Each communication between the employer and a tenderer shall be to or from the employer's agent only, and in a form that can be readily read, copied and recorded. Communications shall be in the English language. The employer shall not take any responsibility for non-receipt of communications from or by a tenderer. The name and contact details of the employer's agent are stated in the **Tender Data**.

C.1.5 Cancellation and Re-Invitation of Tenders

C.1.5.1 An employer may, prior to the award of the tender, cancel a tender if-

- a) due to changed circumstances, there is no longer a need for the engineering and construction works specified in the invitation;
- b) funds are no longer available to cover the total envisaged expenditure;

- c) no acceptable tenders are received;
- d) there is a material irregularity in the tender process.

C.1.5.2 The decision to cancel a tender invitation must be published in the same manner in which the *original* tender invitation was advertised.

C.1.5.3 An employer may only with the prior approval of the relevant treasury cancel a tender invitation for the second time.

C.1.6 Procurement procedures

C.1.6.1 General

Unless otherwise stated in the **Tender Data**, a contract will, subject to C.3.13, be concluded with the tenderer who in terms of C.3.11 is the highest ranked or the tenderer scoring the highest number of tender evaluation points, as relevant, based on the tender submissions that are received at the closing time for tenders.

C.1.6.2 Competitive negotiation procedure

C.1.6.2.1 Where the **Tender Data** require that the competitive negotiation procedure is to be followed, tenderers shall submit tender offers in response to the proposed contract in the first round of submissions. Notwithstanding the requirements of C.3.4, the employer shall announce only the names of the tenderers who make a submission. The requirements of C.8 relating to the material deviations or qualifications which affect the competitive position of tenderers shall not apply.

C.1.6.2.2 All responsive tenderers or at least a minimum of not less than three responsive tenderers that are highest ranked in terms of the evaluation criteria stated in the **Tender Data** shall be invited to enter into competitive negotiations based on the principle of equal treatment, keeping confidential the proposed solutions and associated information.

Notwithstanding the provisions of C.2.17, the employer may request that tenders be clarified, specified and fine-tuned in order to improve a tenderer's competitive position provided that such clarification, specification, fine-tuning or additional information does not alter any fundamental aspects of the offers or impose substantial new requirements which restrict or

distort competition or have a discriminatory effect.	
C.1.6.2.3 At the conclusion of each round of negotiations, tenderers shall be invited by the employer to revise their tender offer based on the same evaluation criteria, with or without adjusted weightings. Tenderers shall be advised when they are to submit their best and final offer.	tendering entity (or both) or any other criteria which formed part of the qualifying requirements used by the employer as the basis in a prior process to invite the tenderer to submit a tender offer and obtain the employer's written approval to do so prior to the closing time for tenders.
C.1.6.2.4 The contract shall be awarded in accordance with the provisions of C.3.11 and C.3.13 after tenderers have been requested to submit their best and final offer.	C.2.2 Cost of tendering
C.1.6.3 Proposal procedure using the two stage-system	C.2.2.1 Accept that, unless otherwise stated in the Tender Data, the employer will not compensate the tenderer for any costs incurred in the preparation and submission of a tender offer, including the costs of any testing necessary to demonstrate that aspects of the offer complies with requirements.
C.1.6.3.1 Option 1 Tenderers shall in the first stage submit technical proposals and, if required, cost parameters around which a contract may be negotiated. The employer shall evaluate each responsive submission in terms of the method of evaluation stated in the Tender Data, and in the second stage negotiate a contract with the tenderer scoring the highest number of evaluation points and award the contract in terms of these conditions of tender.	C.2.2.2 The cost of the tender documents charged by the employer shall be limited to the actual cost incurred by the employer for printing the documents. Employers must attempt to make available the tender documents on its website so as not to incur any costs pertaining to the printing of the tender documents.
C.1.6.3.2 Option 2	C.2.3 Check documents Check the tender documents on receipt for completeness and notify the employer of any discrepancy or omission.
C.1.6.3.2.1 Tenderers shall submit in the first stage only technical proposals. The employer shall invite all responsive tenderers to submit tender offers in the second stage, following the issuing of procurement documents.	C.2.4 Confidentiality and copyright of documents Treat as confidential all matters arising in connection with the tender. Use and copy the documents issued by the employer only for the purpose of preparing and submitting a tender offer in response to the invitation.
C.1.6.3.2.2 The employer shall evaluate tenders received during the second stage, in terms of the method of evaluation stated in the Tender Data, and award the contract in terms of these conditions of tender.	C.2.5 Reference documents Obtain, as necessary for submitting a tender offer, copies of the latest versions of standards, specifications, conditions of contract and other publications, which are not attached but which are incorporated into the tender documents by reference.
C.2 Tenderer's obligations	
C.2.1 Eligibility	
C.2.1.1 Submit a tender offer only if the tenderer satisfies the criteria stated in the Tender Data and the tenderer, or any of his principals, is not under any restriction to do business with employer.	C.2.6 Acknowledge addenda Acknowledge receipt of addenda to the tender documents, which the employer may issue, and if necessary apply for an extension to the closing time stated in the Tender Data, in order to take the addenda into account.
C.2.1.2 Notify the employer of any proposed material change in the capabilities or formation of the	

C.2.7	Clarification meeting	necessary to correct errors made by the tenderer. All signatories to the tender offer shall initial all such alterations.
	Attend, where required, a clarification meeting at which tenderers may familiarize themselves with aspects of the proposed work, services or supply and raise questions. Details of the meeting(s) are stated in the Tender Data .	C.2.12 Alternative tender offers
C.2.8	Seek clarification	C.2.12.1 Unless otherwise stated in the Tender Data , submit alternative tender offers only if a main tender offer, strictly in accordance with all the requirements of the tender documents, is also submitted as well as a schedule that compares the requirements of the tender documents with the alternative requirements that are proposed.
	Request clarification of the tender documents, if necessary, by notifying the employer at least five (5) working days before the closing time stated in the Tender Data .	C.2.12.2 Accept that an alternative tender offer must be based only on the criteria stated in the Tender Data or criteria otherwise acceptable to the employer.
C.2.9	Insurance	C.2.12.3 An alternative tender offer must only be considered if the main tender offer is the winning tender.
	Be aware that the extent of insurance to be provided by the employer (if any) might not be for the full cover required in terms of the conditions of contract identified in the Contract Data . The tenderer is advised to seek qualified advice regarding insurance.	C.2.13 Submitting a tender offer
C.2.10	Pricing the tender offer	C.2.13.1 Submit one tender offer only, either as a single tendering entity or as a member in a joint venture to provide the whole of the works identified in the Contract Data and described in the scope of works, unless stated otherwise in the Tender Data .
C.2.10.1	Include in the rates, prices, and the tendered total of the prices (if any) all duties, taxes except Value Added Tax (VAT), and other levies payable by the successful tenderer, such duties, taxes and levies being those applicable fourteen (14) days before the closing time stated in the Tender Data .	C.2.13.2 Return all returnable documents to the employer after completing them in their entirety, either electronically (if they were issued in electronic format) or by writing legibly in non-erasable ink.
C.2.10.2	Show VAT payable by the employer separately as an addition to the tendered total of the prices.	C.2.13.3 Submit the parts of the tender offer communicated on paper as an original plus the number of copies stated in the Tender Data , with an English translation of any documentation in a language other than English, and the parts communicated electronically in the same format as they were issued by the employer.
C.2.10.3	Provide rates and prices that are fixed for the duration of the contract and not subject to adjustment except as provided for in the conditions of contract identified in the Contract Data .	C.2.13.4 Sign the original and all copies of the tender offer where required in terms of the Tender Data . The employer will hold all authorized signatories liable on behalf of the tenderer. Signatories for tenderers proposing to contract as joint ventures shall state which of the signatories is the lead partner whom the
C.2.10.4	State the rates and prices in Rand unless instructed otherwise in the Tender Data . The conditions of contract identified in the Contract Data may provide for part payment in other currencies.	
C.2.11	Alterations to documents	
	Do not make any alterations or additions to the tender documents, except to comply with instructions issued by the employer, or	

employer shall hold liable for the purpose of the tender offer.	C.2.15.2 Accept that, if the employer extends the closing time stated in the Tender Data for any reason, the requirements of these conditions of tender apply equally to the extended deadline.
C.2.13.5 Seal the original and each copy of the tender offer as separate packages marking the packages as "ORIGINAL" and "COPY". Each package shall state on the outside the employer's address and identification details stated in the Tender Data, as well as the tenderer's name and contact address.	C.2.16 Tender offer validity
C.2.13.6 Where a two-envelope system is required in terms of the Tender Data, place and seal the returnable documents listed in the Tender Data in an envelope marked "financial proposal" and place the remaining returnable documents in an envelope marked "technical proposal". Each envelope shall state on the outside the employer's address and identification details stated in the Tender Data, as well as the tenderer's name and contact address.	C.2.16.1 Hold the tender offer(s) valid for acceptance by the employer at any time during the validity period stated in the Tender Data after the closing time stated in the Tender Data.
C.2.13.7 Seal the original tender offer and copy packages together in an outer package that states on the outside only the employer's address and identification details as stated in the Tender Data.	C.2.16.2 If requested by the employer, consider extending the validity period stated in the Tender Data for an agreed additional period with or without any conditions attached to such extension.
C.2.13.8 Accept that the employer will not assume any responsibility for the misplacement or premature opening of the tender offer if the outer package is not sealed and marked as stated.	C.2.16.3 Accept that a tender submission that has been submitted to the employer may only be withdrawn or substituted by giving the employer's agent written notice before the closing time for tenders that a tender is to be withdrawn or substituted. If the validity period stated in C.2.16 lapses before the employer evaluating tender, the contractor reserves the right to review the price based on Consumer Price Index (CPI).
C.2.13.9 Accept that tender offers submitted by facsimile or e-mail will be rejected by the employer, unless stated otherwise in the Tender Data.	C.2.16.4 Where a tender submission is to be substituted, a tenderer must submit a substitute tender in accordance with the requirements of C.2.13 with the packages clearly marked as "SUBSTITUTE".
C.2.14 Information and data to be completed in all respects Accept that tender offers, which do not provide all the data or information requested completely and in the form required, may be regarded by the employer as non-responsive.	C.2.17 Clarification of tender offer after submission Provide clarification of a tender offer in response to a request to do so from the employer during the evaluation of tender offers. This may include providing a breakdown of rates or prices and correction of arithmetical errors by the adjustment of certain rates or item prices (or both). No change in the competitive position of tenderers or substance of the tender offer is sought, offered, or permitted.
C.2.15 Closing time C.2.15.1 Ensure that the employer receives the tender offer at the address specified in the Tender Data not later than the closing time stated in the Tender Data. Accept that proof of posting shall not be accepted as proof of delivery.	<i>Note: Sub-clause C.2.17 does not preclude the negotiation of the final terms of the contract with a preferred tenderer following a competitive selection process, should the Employer elect to do so.</i> C.2.18 Provide other material

C.2.18.1 Provide, on request by the employer, any other material that has a bearing on the tender offer, the tenderer's commercial position (including notarized joint venture agreements), preferencing arrangements, or samples of materials, considered necessary by the employer for the purpose of a full and fair risk assessment. Should the tenderer not provide the material, or a satisfactory reason as to why it cannot be provided, by the time for submission stated in the employer's request, the employer may regard the tender offer as non-responsive.	up to five (5) working days before the tender closing time stated in the Tender Data and notify all tenderers who collected tender documents.
C.2.18.2 Dispose of samples of materials provided for evaluation by the employer, where required.	C.3.1.2 Consider any request to make a material change in the capabilities or formation of the tendering entity (or both) or any other criteria which formed part of the qualifying requirements used to prequalify a tenderer to submit a tender offer in terms of a previous procurement process and deny any such request if as a consequence: a) an individual firm, or a joint venture as a whole, or any individual member of the joint venture fails to meet any of the collective or individual qualifying requirements; b) the new partners to a joint venture were not prequalified in the first instance, either as individual firms or as another joint venture; or c) in the opinion of the Employer, acceptance of the material change would compromise the outcome of the prequalification process.
C.2.19 Inspections, tests and analysis Provide access during working hours to premises for inspections, tests and analysis as provided for in the Tender Data.	C.3.2 Issue Addenda
C.2.20 Submit securities, bonds and policies If requested, submit for the employer's acceptance before formation of the contract, all securities, bonds, guarantees, policies and certificates of insurance required in terms of the conditions of contract identified in the Contract Data.	If necessary, issue addenda that may amend or amplify the tender documents to each tenderer during the period from the date that tender documents are available until three (3) working days before the tender closing time stated in the Tender Data. If, as a result a tenderer applies for an extension to the closing time stated in the Tender Data, the Employer may grant such extension and, shall then notify all tenderers who collected tender documents.
C.2.21 Check final draft Check the final draft of the contract provided by the employer within the time available for the employer to issue the contract.	C.3.3 Return late tender offers
C.2.22 Return of other tender documents If so instructed by the employer, return all retained tender documents within twenty-eight (28) days after the expiry of the validity period stated in the Tender Data.	Return tender offers received after the closing time stated in the Tender Data, unopened, (unless it is necessary to open a tender submission to obtain a forwarding address), to the tenderer concerned.
C.2.23 Certificates Include in the tender submission or provide the employer with any certificates as stated in the Tender Data.	C.3.4 Opening of tender submissions
C.3 The employer's undertakings	C.3.4.1 Unless the two-envelope system is to be followed, open valid tender submissions in the presence of tenderers' agents who choose to attend at the time and place stated in the Tender Data. Tender submissions for which
C.3.1 Respond to requests from the tenderer	
C.3.1.1 Unless otherwise stated in the Tender Data, respond to a request for clarification received	

	acceptable reasons for withdrawal have been submitted will not be opened.		tender offers and instantly disqualify a tenderer (and his tender offer) if it is established that he engaged in corrupt or fraudulent practices.
C.3.4.2	Announce at the meeting held immediately after the opening of tender submissions, at a venue indicated in the Tender Data , the name of each tenderer whose tender offer is opened and, where applicable, the total of his prices, number of points claimed for its BBBEE status level and time for completion for the main tender offer only.	C.3.8	Test for responsiveness
C.3.4.3	Make available the record outlined in C.3.4.2 to all interested persons upon request.	C.3.8.1	Determine, after opening and before detailed evaluation, whether each tender offer properly received: a) complies with the requirements of these Conditions of Tender, b) has been properly and fully completed and signed, and c) is responsive to the other requirements of the tender documents.
C.3.5	Two-envelope system	C.3.8.2	A responsive tender is one that conforms to all the terms, conditions, and specifications of the tender documents without material deviation or qualification. A material deviation or qualification is one which, in the Employer's opinion, would: a) detrimentally affect the scope, quality, or performance of the works, services or supply identified in the Scope of Work, b) significantly change the Employer's or the tenderer's risks and responsibilities under the contract, or c) affect the competitive position of other tenderers presenting responsive tenders, if it were to be rectified.
C.3.5.1	Where stated in the Tender Data that a two-envelope system is to be followed, open only the technical proposal of valid tenders in the presence of tenderers' agents who choose to attend at the time and place stated in the Tender Data and announce the name of each tenderer whose technical proposal is opened.		Reject a non-responsive tender offer and not allow it to be subsequently made responsive by correction or withdrawal of the non-conforming deviation or reservation.
C.3.5.2	Evaluate functionality of the technical proposals offered by tenderers, then advise tenderers who remain in contention for the award of the contract of the time and place when the financial proposals will be opened. Open only the financial proposals of tenderers, who score in the functionality evaluation more than the minimum number of points for functionality stated in the Tender Data , and announce the score obtained for the technical proposals and the total price and any points claimed on BBBEE status level. Return unopened financial proposals to tenderers whose technical proposals failed to achieve the minimum number of points for functionality.	C.3.9	Arithmetical errors, omissions and discrepancies
C.3.6	Non-disclosure	C.3.9.1	Check responsive tenders for discrepancies between amounts in words and amounts in figures. Where there is a discrepancy between the amounts in figures and the amount in words, the amount in words shall govern.
	Not disclose to tenderers, or to any other person not officially concerned with such processes, information relating to the evaluation and comparison of tender offers, the final evaluation price and recommendations for the award of a contract, until after the award of the contract to the successful tenderer.	C.3.9.2	Check the highest ranked tender or tenderer with the highest number of tender evaluation points after the evaluation of tender offers in accordance with C.3.11 for: a) the gross misplacement of the decimal point in any unit rate; b) omissions made in completing the pricing schedule or bills of quantities; or c) arithmetic errors in:
C.3.7	Grounds for rejection and disqualification		
	Determine whether there has been any effort by a tenderer to influence the processing of		

- (i) line-item totals resulting from the product of a unit rate and a quantity in bills of quantities or schedules of prices; or
- (ii) the summation of the prices.

C.3.9.3 Notify the tenderer of all errors or omissions that are identified in the tender offer and either confirm the tender offer as tendered or accept the corrected total of prices.

C.3.9.4 Where the tenderer elects to confirm the tender offer as tendered, correct the errors as follows:

- a) If bills of quantities or pricing schedules apply and there is an error in the line-item total resulting from the product of the unit rate and the quantity, the line-item total shall govern and the rate shall be corrected. Where there is an obviously gross misplacement of the decimal point in the unit rate, the line-item total as quoted shall govern, and the unit rate shall be corrected.
- b) Where there is an error in the total of the prices either as a result of other corrections required by this checking process or in the tenderer's addition of prices, the total of the prices shall govern and the tenderer will be asked to revise selected item prices (and their rates if bills of quantities apply) to achieve the tendered total of the prices.

C.3.10 Clarification of a tender offer

Obtain clarification from a tenderer on any matter that could give rise to ambiguity in a contract arising from the tender offer.

C.3.11 Evaluation of tender offers

The Standard Conditions of Tender standardize the procurement processes, methods and procedures from the time that tenders are invited to the time that a contract is awarded. They are generic in nature and are made project specific through choices that are made in developing the **Tender Data** associated with a specific project.

Conditions of tender are by definition the document that establishes a tenderer's obligations in submitting a tender and the employer's undertakings in soliciting and evaluating tender offers. Such conditions

establish the rules from the time a tender is advertised to the time that a contract is awarded and require employers to conduct the process of offer and acceptance in terms of a set of standard procedures.

The CIDB Standard Conditions of Tender are based on a procurement system that satisfies the following system requirements:	
Requirement	Qualitative interpretation of goal
Fair	The process of offer and acceptance is conducted impartially without bias, providing simultaneous and timely access to participating parties to the same information.
Equitable	Terms and conditions for performing the work do not unfairly prejudice the interests of the parties.
Transparent	The only grounds for not awarding a contract to a tenderer who satisfies all requirements are restrictions from doing business with the employer, lack of capability or capacity, legal impediments and conflicts of interest.
Competitive	The system provides for appropriate levels of competition to ensure cost effective and best value outcomes.
Cost effective	The processes, procedures and methods are standardized with sufficient flexibility to attain best value outcomes in respect of quality, timing and price, and least resources to effectively manage and control procurement processes.

The activities associated with evaluating tender offers are as follows:

- a) Open and record tender offers received
- b) Determine whether or not tender offers are complete
- c) Determine whether or not tender offers are responsive
- d) Evaluate tender offers
- e) Determine if there are any grounds for disqualification
- f) Determine acceptability of preferred tenderer
- g) Prepare a tender evaluation report
- h) Confirm the recommendation contained in the tender evaluation report .

C.3.11.1 General	The employer must appoint an evaluation panel of not less than three persons conversant with the proposed scope of works to evaluate each responsive tender offer using the tender evaluation methods and associated evaluation criteria and weightings that are specified in the Tender Data.	f) is able, in the opinion of the employer, to perform the contract free of conflicts of interest.
C.3.12 Insurance provided by the employer	If requested by the proposed successful tenderer, submit for the tenderer's information the policies and / or certificates of insurance which the conditions of contract identified in the Contract Data, require the employer to provide.	C.3.14 Prepare contract documents
C.3.13 Acceptance of tender offer	Accept the tender offer; if in the opinion of the employer, it does not present any risk and only if the tenderer: a) is not under restrictions, or has principals who are under restrictions, preventing participating in the employer's procurement; b) can, as necessary and in relation to the proposed contract, demonstrate that he or she possesses the professional and technical qualifications, professional and technical competence, financial resources, equipment and other physical facilities, managerial capability, reliability, experience and reputation, expertise and the personnel, to perform the contract; c) has the legal capacity to enter into the contract; d) is not; insolvent, in receivership, under Business Rescue as provided for in chapter 6 of the Companies Act No. 2008, bankrupt or being wound up, has his/her affairs administered by a court or a judicial officer, has suspended his/her business activities or is subject to legal proceedings in respect of any of the foregoing; e) complies with the legal requirements, if any, stated in the Tender Data; and	C.3.14.1 If necessary, revise documents that shall form part of the contract and that were issued by the employer as part of the tender documents to take account of: a) addenda issued during the tender period, b) inclusion of some of the returnable documents and c) other revisions agreed between the employer and the successful tenderer. C.3.14.2 Complete the schedule of deviations attached to the form of offer and acceptance, if any.
		C.3.15 Complete adjudicator's contract
		Unless alternative arrangements have been agreed or otherwise provided for in the contract, arrange for both parties to complete formalities for appointing the selected adjudicator at the same time as the main contract is signed.
		C.3.16 Registration of the award
		An employer must, within twenty-one (21) working days from the date on which a contractor's offer to perform a construction works contract is accepted in writing by the employer, register and publish the award on the cidb Register of Projects.
		C.3.17 Provide copies of the contracts
		Provide to the successful tenderer the number of copies stated in the Tender Data of the signed copy of the contract as soon as possible after completion and signing of the form of offer and acceptance.
		C.3.18 Provide written reasons for actions taken
		Provide upon request written reasons to tenderers for any action that is taken in applying these conditions of tender but withhold information which is not in the public interest to be divulged, which is considered to prejudice the legitimate commercial interests of tenderers or might prejudice fair competition between tenderers.

T1.2.2 TENDER DATA

Each item of data given below is cross-referenced to the clause in the **Standard Conditions of Tender** to which it mainly applies.

C.1: GENERAL

C.1.1 The employer:

The Employer for this Contract is the **eThekwini Municipality** as represented by:
Deputy Director: Roads and Stormwater Maintenance

C.1.2 Tender documents:

The Tender Documents issued by the Employer comprise:

- 1) The Procurement Document comprising of the PARTS as listed in the "INDEX" on page 1.
- 2) EXCEL Bill of Quantities file, if issued separately.
- 3) **Drawings**, issued separately from this document, or bound in Section C3.4: "Particular Specifications".

Electronically downloaded documentation is obtainable from the National Treasury's **eTenders Website** and/ or the **eThekwini Municipality Website** at URL:

- <https://www.etenders.gov.za/>
- <https://www.durban.gov.za/pages/business/procurement>

Tenderers are to regularly check both web sites for the downloadable documentation.

C.1.4 Communication and employer's agent:

The Employer's Agent is:

Name: Shan Govender
Tel: 031-311-7427
eMail: name@durban.gov.za

The Employer's Agent's Representative is:

Smanga Gumede
Tel: 031-322 6019
eMail: smanga.gumede@durban.gov.za

The Tenderer's contact details, as indicated on **Returnable Document "Compulsory Enterprise Questionnaire"**, shall be deemed as the only valid contact details for the Tenderer for use in communications between the Employer's Agent and the Tenderer during tender evaluation.

C.1.6 Procurement procedures:

The following Sections of the **Standard Conditions of Tender** are not applicable to this tender:

- **C.1.6.2: Competitive negotiation procedure**, and
- **C.1.6.3: Proposal procedure using the two-stage system**.

C.2: TENDERER'S OBLIGATIONS

C.2.1 Eligibility:

Entities may only submit one (1) tender offer, either as a single tendering entity or as a partner of a joint venture. Should a tendering entity submit more than one (1) tender, all submissions by that tendering entity, including submissions where the entity is a partner of a joint venture, will be deemed not to be eligible.

C.2.1.1 Eligibility: General

A Tenderer will not be eligible to submit a tender if:

- (a) In the event of a Compulsory Clarification Meeting:
 - i) the Tenderer fails to attend the Compulsory Clarification Meeting, or
 - ii) the Tenderer fails to have **Returnable Document "Certificate of Attendance at Clarification Meeting / Site Inspection"** signed by the Employer's Agent or their representative at the meeting.
- (b) At the time of tender closing, the Tenderer is not registered on the **National Treasury Central Supplier Database (CSD)** and the **eThekweni Municipality Supplier Portal**. In the case of a Joint Venture, this requirement will apply individually to each party in the Joint Venture. Tenderers are to reference **Returnable Document "Compulsory Enterprise Questionnaire"** (section 1.5) and **Returnable Document "CSD Registration Report"**.
- (c) In the case of Joint Venture (JV) submissions, two or more JV entities have common directors/ shareholders or common entities tendering for the same works.
- (d) The following documentation is not completed in full, signed, and returned with the tender submission. **Failure to comply will result in the tender offer being deemed non-responsive.**
 - T2.2.1: Compulsory Enterprise Questionnaire.
 - T2.2.5: MBD 4: Declaration of Interest.
 - T2.2.6: MBD 5: Declaration for Procurement Above R10 Million.
 - T2.2.8: MBD 8: Declaration of Bidder's Past SCM Practices.
 - T2.2.9: MBD 9: Certificate of Independent Bid Determination.
 - T2.2.10: Declaration of Municipal Fees
- (e) The certificates listed in the **Tender Data: C.2.23: Certificates** are to be included with the tender submission. **Failure to comply will result in the tender offer being deemed non-responsive.**
 - T2.2.1: SARS Tax Compliance Status - PIN Issued (submitted with the Compulsory Enterprise Questionnaire).
 - T2.2.12: Central Supplier Database (CSD) Report.
 - T2.2.13: CIDB Registration and Status.

C.2.1.2 Eligibility: CIDB

Tenderers are to reference the provisions of **Tender Data: C.2.23 “Certificates, and Returnable Document “Verification of CIDB Registration and Status”** with respect to CIDB registration.

Only those Tenderers who are registered (as “Active”) with the CIDB (at time of tender closing), in a contractor grading designation equal to or higher than a contractor grading designation determined in accordance with the sum tendered, or a value determined in accordance with Regulation 25(1B) or 25(7A) of the Construction Industry Development Regulations, for a **6 CE or Higher** class of construction work, are eligible to have their tenders evaluated.

Joint ventures are eligible to submit tenders provided that:

- (a) Every member of the joint venture is registered (as “Active”) with the CIDB (at time of tender closing),
- (b) The lead partner has a contractor grading designation in the **6 CE or Higher** class of construction work and has a grading designation of not lower than one level below the required grading designation, and
- (c) The combined contractor grading designation calculated in accordance with the Construction Industry Development Regulations (2013) is equal to or higher than a contractor grading designation determined in accordance with the sum tendered for a **6 CE or Higher** class of construction work or a value determined in accordance with Regulation 25 (1B) or 25(7A) of the Construction Industry Development Regulations.

C.2.1.3 Eligibility: Tenderer’s Experience

Only those Tenderers that can provide proof of verifiable experience, in works of a similar nature, within the past 10 years, will be eligible to have their tenders evaluated in terms of Clause C.3.11.

Tenderers are to complete and sign the submission forms for each experience submission, as included in **Returnable Form: “Eligibility: Experience of Tenderer”**.

Failure to comply will invalidate the associated experience submission.

- **Table 1:** The **Experience Requirement** is specified on this table.
- **Table 2:** The experience is to be **Similar in Nature** to that specified on this table. Tenderers are to note the exclusions (if any) stated on this table.
- **Table 3:** The **Documentation/ Information** that may be used for verification of the experience submission is specified on this table (which includes the Notes below the table).
The non-submission of this **Documentation/ Information** may jeopardise the verification of the experience submission and render the submission invalid.
- Tenderers may submit experience gained as **Sub-Contractors or Main Contractors**.
- **Guidance** on the completion of the **Experience Submission Form** is provided on the first page of **Returnable Document “Eligibility: Experience of Tenderer”**.

Tenderers are to indicate the documentation/ information that has been included in the tender submission, in support of each experience submission, in the shaded column on Page **51**.

Should there be insufficient verified evidence for any specific submission that experience submission may be deemed invalid.

Table 1: Experience Requirement

A minimum **of 3 contracts** of a similar nature and **each** contract with a minimum value of **R5 million rand** where **1 contract was** gained as a **Main Contractor from Organs of State** within the past **10 years**.

Table 2: Works of a Similar Nature

Provision of Roads, Stormwater, Protection maintenance work repairs

- Projects of a similar nature that will be considered will be one, or a combination of, the following types of projects:
 - Stormwater infrastructure upgrades and / or repairs
 - Asphalt / brick / concrete paving surface construction or repairs
 - Protection works construction and / or repairs
 - Road construction or upgrade
 - Sidewalk construction or repairs
 - Road rehabilitation
 - Road infrastructure maintenance repairs
- Each project must consist of **at least two** of the following elements:
 - Reinstatements, backfills and earthworks
 - Road markings: Retro reflective or Thermoplastic
 - asphalt surface repairs
 - kerbing / channelling
 - sidewalk / walkway construction
 - stormwater drainage infrastructure repairs and / or upgrades
 - retaining structures
 - Supply & installation of road infrastructure related precast products
 - Paving all types

Table 3: Documentation / Information Requirements

Note: an "X" in this table indicates that the associated documentation should be provided, if applicable.	Works as Sub-Contractor		Works as Main Contractor	
	Current Contracts	Completed Contracts	Current Contracts	Completed Contracts
Proof of Sub-Contract Agreement See Note 1.	X	X	-	-
Letter of Award OR Form of Offer & Acceptance See Note 2.	-	-	X	X
Most recent Payment Certificate (with Schedule of Quantities or/ and Quantities <u>summary schedule</u>), OR Invoice (with Schedule of Quantities or/ and Quantities <u>summary schedule</u>). See Note 3.	X	-	X	-
Final Payment Certificate (with Schedule of Quantities or/ and Quantities <u>summary schedule</u>), OR Invoice (with Schedule of Quantities or/ and Quantities <u>summary schedule</u>). See Note 4.	-	X	-	X
Completion Certificate. See Note 5.	-	-	-	X
Scope of Work See Note 6.	To be indicated on individual experience submission form			

NOTES (for Table 3)

1. To include the names of the parties, the managing entity's name, the effective dates, and the signature(s) page, all pertaining to the agreement.

2. Issued by the Client / Employer.
3. Proof of the most recent payment received from the Main Contractor or Client/ Employer, OR the most recent submitted INVOICE. Whichever of these documents is submitted, a summary breakdown of quantities is to accompany that document.
4. Proof of the final payment received from the Main Contractor or Client/ Employer, OR the most recent submitted INVOICE. Whichever of these documents is submitted, a summary schedule or a full schedule breakdown of quantities is to accompany that document.
5. Issued by the Client/ Employer.
6. If executed as a Sub-Contractor, the Scope-of-Work should be indicative of only the works carried out by the Sub-Contractor, and not the overall Scope-of-Work of the main contract.
If executed as a Main Contractor, the overall contract Scope-of-Work is to be indicated.

C.2.2.2 The cost of the tender documents:

Replace this paragraph with the following:

“Documents are to be downloaded, free of charge, from the **National Treasury’s eTenders website** or the **eThekwini Municipality’s Website**.”

C.2.5 Reference documents:

Tenderers are to obtain their own copies of:

- 1) The **Conditions of Contract** identified in Section C1.2.1.1.
Tenderers/ Contractors are required to obtain their own copies.
- 2) The **Specifications** identified in Section C3.3.1.
Tenderers/ Contractors are required to obtain their own copies.
- 3) The following acts, regulations, policies, and standards referred to in this document, including but not limited to:
 - The Employer’s Supply Chain Management Policy (as at advertising date).
 - The Occupational Health and Safety Act No 85 and Amendment Act No 181 of 1993, and the Construction Regulations (2014).
 - The Construction Industry Development Board Act No 38 of 2000 and the Regulations issued in terms of the Act (July 2013 as amended).
 - The Preferential Procurement Policy Framework Act (PPPFA), and the PPPFA Regulations (November 2022).
 - The Amended Construction Sector Code (Government Gazette No.41287) applicable to B-BBEE compliance measurement.
 - SANS 1921:2004 – Construction and Management Requirements for Works Contract, Parts 1-3.
 - South African Road Traffic Signs Manual - Vol 2: Chapter 13: Roadworks Signing.
 - CIDB Standard for Developing Skills Through Infrastructure Contracts, published in Gazette Notice No. 48491 of 28 April 2023.
 - CIDB Standard for Indirect Targeting for Enterprise Development through Construction Works Contracts, published in Gazette Notice No. 36190 of 25 February 2013.
 - Any other eThekwini Policy documents referenced in the Tender Documents.

C.2.6 Acknowledge addenda:

Add the following paragraphs:

“Addenda will be published on the **eThekwin Municipality website** as stated in **Tender Data: C.1.2**. Tenderers are to ensure that this website is consulted for any published addenda pertaining to this tender up to three days before the tender closing time as stated in the **Tender Data**.”

“Acknowledgement of receipt of the addenda will be by the return of the relevant completed, dated, and signed portion of the addenda, to the physical or email address as specified on the addenda.”

Failure of the Tenderer to comply with the requirements of the addenda will result in the tender submission being made non-responsive.

C.2.7 Clarification meeting:

Clarification Meeting Type: **Compulsory Clarification Meeting**

A Compulsory Clarification Meeting will be held on the 11 August 2026 at the Engineering Training Centre, No.8 Electron Road, Springfield, Durban 4091 at 11h00 am. Consolidated Question and Answers from clarification meeting will be uploaded on the 27 August 2026

In the event of a Compulsory Clarification Meeting the Tenderer's representative(s) must be able to clearly convey the discussions at the meeting to the person(s) responsible for compiling the entity's tender offer.

If an attendance register is applicable, Tenderers must sign the attendance register and provide the name of the tendering entity.

Tenderers are referred to Clause C.2.1.1(a).

C.2.10.2 Pricing the tender offer:

The following is to be noted in terms of Tenderers being **VAT Registered**, or being a **Non-VAT Vendor** (ie. not VAT registered).

If the Tenderer is **VAT registered**, the Tenderer's Rates in the Bill of Quantities (BoQ) are to exclude VAT. VAT is to be shown separately on the BoQ summary page, and on the Form of Offer (Part C1.1.1).

If the Tenderer is a **Non-VAT Vendor**, the Tenderer's Rates in the Bill of Quantities are to include VAT. VAT is not to be shown separately on the BoQ summary page, or on the Form of Offer (Part C1.1.1). VAT will not be added to, or deducted from, rates or prices submitted from **Non-VAT Vendors**. The tendered priced will be deemed to include all VAT, taxes, and any applicable excise duties.

Tenderers are to refer to Part C2.1: PRICING ASSUMPTIONS / INSTRUCTIONS prior to pricing the tender offer.

C.2.12 Alternative tender offers:

No alternative tender offers will be considered.

C.2.13 Submitting a tender offer:

The signed Tender Offer (“hard copy”) is to be sealed in an envelope, addressed to the City Manager, marked with the **identification details** and be delivered to the **delivery address**, both as stated below.

The **Tender Offer** (hard copy) is to be delivered to the following **delivery address**:
the Tender Box in the foyer of the Municipal Building, 166 KE Masinga Road, Durban

Identification details to be shown on the hard copy package are:

- Contract No. : **1M-35901**
- Contract Title : **RATES BASED CONTRACT FOR MAINTENANCE REPAIRS TO ROADS AND STORMWATER INFRASTRUCTURE ON AN AS AND WHEN REQUIRED BASIS IN AREAS LOCATED WITHIN NORTH CENTRAL REGION OF ETHEKWINI MUNICIPALITY FOR 36 MONTHS**

Tender Offers are also to be **SUBMITTED ELECTRONICALLY** (uploaded) on the eThekwini Municipality **JDE System** (Ethekeini Supplier Portal (ESP Module)). For information pertaining to the JDE System, Tenderers are referred to **Section T1.1.2**.

Notwithstanding the **electronic submission**, a tender offer will only be deemed valid if the “hard copy” submission has been made. The “hard copy” submission will be the governing submission.

The Tender documentation, issued by the eThekwini Municipality (refer to **Tender Data: C.1.2**), is to be printed in its entirety. Printing should be done on white A4 paper, with printing on only one side of the paper. (It is suggested that the Tender documentation is not stapled, or punched for filing, prior to scanning, as this could affect the scanning process.)

After completion and signature (using **BLACK INK**), the entire Tender document is to be scanned to a single PDF (Portable Document Format) document, at a resolution of 300 DPI (dots per inch). The PDF document is to be uploaded via the (Tender specific) upload option on the JDE System (ESP Module). Tenderers are responsible for resolving all access rights and submission queries on the JDE System before the tender closing date/ time (**Tender Data: C.2.15**).

Tender Offer delivery, and the electronic submission on the JDE System, are both to be completed on or before the closing date/ time stated in the **Tender Data: C.2.15**.

The submission of Tender Offers via any means other than that stated above will not be accepted, and those that are will be deemed invalid.

C.2.15 Closing date and time:

The closing time is:

- **Date: Friday, 04 September 2026**
- **Time: 11h00**

11h00

--

The **delivery of the hard copy AND** the completion of the requirements on the **JDE System (ESP Module)** are to be completed prior to the Tender **closing date and time** as stated above. Any Tender Offer submitted thereafter will not be considered.

C.2.16 Tender offer validity:

The Tender Offer validity period is **120 Days** (original validity period) from the closing date for submission of tenders.

In terms of the SCM Policy (Cl.21.2) tenders must remain valid for acceptance for a period of twelve

(12) months after the expiry of the original validity period, unless the Municipality is notified in writing of anything to the contrary by the tenderer.

The eThekwin Municipality reserves the right to request confirmation from Tenderers of tender validity at any time during the twelve (12) month period.

C.2.23 Certificates:

Refer to **T2.1: “List of Returnable Documents”** for a listing of certificates that must be provided with the tender. All certificates must be valid at the time of tender closing.

Tenderers are to include a printout of the required documents/ certificates at the back of their tender submission.

1) SARS Tax Compliance Status – PIN Issued

Reference is to be made to **Returnable Document “Compulsory Enterprise Questionnaire”** which requires the “SARS Tax Compliance Status – PIN Issued” to be included with this returnable document.

2) Central Supplier Database (CSD)

Reference is to be made to **Returnable Document “CSD Registration Report”**.

The entities **CSD Registration Report**, obtained from the National Treasury Central Supplier Database (CSD), is to be included in the tender submission (<https://secure.csd.gov.za>).

Separate **CSD Registration Reports** are required for each party to a Joint Venture.

3) CIDB Registration (if applicable)

Reference is to be made to **Returnable Document “Verification of CIDB Registration and Status”**.

Tenderers are to include with their submission a printout of their **CIDB Registration**, obtained from the CIDB website (<https://portal.cidb.org.za/RegisterOfContractors/>).

Separate **CIDB Registration printouts** are required for each party to a Joint Venture.

The **Joint Venture Grading Designation Calculator** printout should be included when making a submission as a Joint Venture:

(<https://registers.cidb.org.za/PublicContractors/JVGradingDesignationCalc>)

The date of obtaining the CIDB printout(s) is to be indicated on the printout and should be on or after the date of advertising of this tender. The Tenderer’s registration with the CIDB must be reflected as “Active” as at the date of tender closing.

Failure to comply with 1), 2), and 3) above will result in the tender offer being deemed non-responsive.

4) B-BBEE Status Level of Contribution Certificate

Tenderers are referred to **Returnable Document “MBD 6.1: Preference Points Claim”** for the B-BBEE Certificate requirements. **Notwithstanding the completion of Returnable Document “MBD 6.1: Preference Points Claim”, should a B-BBEE Status Level of Contribution Certificate not be returned no points for Preferential Procurement will be deemed to have been claimed.**

The Amended Construction Sector Code (Government Gazette No.41287) is applicable to the B-BBEE compliance measurement of all entities that fall within the Construction Sector (Built Environment Professionals (BEP) and Contractors). The requirements for measurement and verification of entities are contained in the "Amended Code Series CSC000: Framework for Measuring Broad Based Black Economic Empowerment in the Construction Sector", as published in Notice 931 of 2017, Government Gazette No.41287 of 01/12/2017.

An EME Contractor with a Total Annual Revenue of less than R3 million, or a BEP with a total annual revenue of less than R1.8 million, may present an affidavit OR a certificate issued by the CIPC, OR an authorised B-BBEE verification certificate by a SANAS accredited Verification Agency.

Any B-BBEE Certificate where the entity has been assessed using **Generic Codes** will not be accepted.

C.3: THE EMPLOYER'S UNDERTAKINGS

C.3.1.1 Respond to requests from the tenderer:

Replace the words "five working days" with "three working days".

C.3.2 Issue addenda:

Add the following paragraph:

"Addenda will be published on the National Treasury's **eTenders-Website** and/ or the **eThekwini Municipality Website**." (Refer to **Tender Data: C.1.2**).

C.3.4 Opening of Tender Submissions:

Tenders will be opened immediately after the closing time for tenders. The public reading of tenders will take place in the P&SCM Boardroom, 6th Floor, (Municipal Building), 166 KE Masinga Road, Durban.

The tender opening schedule will also be made available on the eThekwini Municipal website at URL: <https://www.durban.gov.za/pages/business/publication-of-received-bids>

C.3.9 Arithmetical errors, omissions and discrepancies:

Add the following Clause:

"C.3.9.5 Reject a tender offer if the Tenderer does not accept the correction of the arithmetical error in the manner described in C.3.9.4."

Any interactions between the Tenderer and the Employer in terms of this clause will be conducted through the Employer's Agent (or Representative) as identified in **Tender Data C.1.4**.

C.3.11 Evaluation of Tender Offers:

Eligibility

Tenders will be checked for compliance with the ELIGIBILITY requirements, as specified in the **Tender Data: C.2.1**. Tenders not in compliance will be deemed non-responsive.

Preference Point System

The procedure for the evaluation of responsive tenders is **PRICE AND PREFERENCE**, in accordance with the Employer's **SCM Policy: Section 52: Preferential Procurement**.

It is unclear (at the time of advertising) which of the two preference point systems applies, either the **80/20 or 90/10** preference point system will apply, determined by the price offered by the lowest acceptable tender.

Price Points

A maximum of 80 or 90 points is allocated for price on the following basis:

80/20 Procurement System

or

90/10 Procurement System

$$P_s = 80 \left(1 - \frac{P_t - P_{\min}}{P_{\min}} \right)$$

$$P_s = 90 \left(1 - \frac{P_t - P_{\min}}{P_{\min}} \right)$$

Where: Ps = Points scored for comparative price of bid under consideration
Pt = Comparative price of bid under consideration
Pmin = Comparative price of lowest acceptable bid

Preference Points

Reference is to be made to **Returnable Form: MBD 6.1: Preference Points Claim**.

The Basket of Preference Goals (SCM Policy Section 52.7)

The provisions of the SCM Policy: **Section 52.7: The Basket of Preference Goals** shall apply. Reference is to be made to **Returnable Form: MBD 6.1: Preference Points Claim**.

The Preference Points (either 20 or 10) will be derived from points claimed for **Specific Goals** as indicated in the table(s) below, according to the specified **Goal/ Category Weightings**.

- **Ownership Goal**

Goal Weighting: 50%

The tendering entity's **Percentage Ownership**, in terms of the **Ownership Category(s)** listed below, is to be used in the determination of the tenderer's claim for **Preference Points**.

Ownership Categories	Criteria	80/20	90/10
Race: Black (w1)	Equals 0%	0	0
	Between 0% and 51%	4	2
	Greater or equal to 51% and less than 100%	7	3.5
	Equals 100%	10	5
Maximum Goal Points:		10	5

The **Weightings** of the **Ownership Categories** will be:

- w1 = 100%

Proof of claim as declared on MBD 6.1 (1 or more of the following will be used in verifying the tenderer's status)

- Companies and Intellectual Property Commission registration document (CIPC)
- CSD report.
- B-BBEE Certificate of the tendering entity.
- Consolidated BBBEE Certificate if the tendering entity is a Consortium, Joint Venture, or Trust (Issued by verification agency accredited by the South African Accreditation System).
- Agreement for a Consortium, Joint Venture, or Trust.

• **RDP Goal: The promotion of South African owned enterprises**

Goal Weighting: 50%

The tendering entity's **Address** (as stated on the National Treasury Central Supplier Database (CSD) or on the eThekweni Municipality Vendor Portal) is to be used in the determination of the tenderer's claim for **Preference Points** for this Specific Goal.

Location	80/20	90/10
Not in South Africa	0	0
South Africa	4	2
Kwa Zulu Natal	7	3.5
eThekweni Municipality	10	5
Maximum Goal Points:	10	5

Proof of claim as declared on MBD 6.1 (1 or more of the following will be used in verifying the tenderer's status)

- CSD report

C.3.13 Acceptance of tender offer:

In addition to the requirements of **Tender Data: C.3.13** of the **Standard Conditions of Tender**, tender offers will only be accepted if:

- The Tenderer's municipal rates and taxes are not in arrears, or they have made arrangements to meet outstanding municipal fee obligations.
- The Tenderer's tax compliance status has been verified, or they have made arrangements to meet outstanding tax obligations.
- If applicable, the Tenderer is **registered**, and **"Active"**, with the **Construction Industry Development Board** in an appropriate contractor grading designation.

- (d) The Tenderer or any of its directors/ shareholders are **not listed on the Register of Tender Defaulters**, in terms of the Prevention and Combating of Corrupt Activities Act of 2004, as a person prohibited from doing business with the public sector.
- (e) The Tenderer has not:
 - i) Abused the Employer's Supply Chain Management System; or
 - ii) Failed to perform on any previous contract and has been given a written notice to this effect.
- (f) The Employer is reasonably satisfied that the Tenderer has in terms of the Construction Regulations (2014), issued in terms of the Occupational Health and Safety Act (1993), the **necessary competencies and resources to carry out the work safely**.

The Municipality does not bind itself to accept the lowest or any tender. It reserves the right to accept the whole or any part of a tender to place orders. Bidders shall not bind the Municipality to any minimum quantity per order. The successful Tenderer(s) shall be bound to provide any quantities stipulated in the specification.

The municipality has a firm intention to proceed with the work, subject to funding being identified. Notwithstanding the **Standard Conditions of Tender: C.1.1.3** of, the municipality reserves the right to award or not award the tender based on the municipalities available budget.

C.3.15 Complete adjudicator's contract:

Refer to the **Conditions of Contract** and the **Contract Data**.

C.3.17 Copies of contract:

The number of paper copies of the signed contract to be provided by the Employer is **ONE (1)**. Tenderers are referred to the requirements as stated in the **Tender Data: C.2.13**.

T1.2.3 ADDITIONAL CONDITIONS OF TENDER

T1.2.3.1 Complaints and Objections (Appeals)

Reference is to be made to Clause 49 of the eThekwini Supply Chain Management Policy.

In terms of Section 49 of the eThekwini SCM Policy any person aggrieved by decisions taken in the implementation of the SCM System may lodge, within 14 days of notification thereof, a written objection against the decision. The objection with regard to the decision is to be directed to:

The City Manager
Attention Ms S. Pillay eMail: Simone.Pillay@durban.gov.za
P O Box 1394
DURBAN
4000

Any objection will only be processed upon receipt of a non-refundable administration fee of **R6,131.00** including VAT as stipulated in the municipality's SCM Policy approved on 30/09/2025 as well as the municipal budget for the financial year 2026/27. An objection will only be considered upon receipt of proof of payment of this fee which must be paid into the following bank account as a real-time payment:

EThekwini Metropolitan Municipality
First National Bank (FNB)
Account Number: 631-6574-6331
Reference Number: **35901-1M**

T1.2.3.2 Prohibition on awards to persons in the service of the state

Clause 44 of the Supply Chain Management Regulations states that the Municipality or Municipal Entity may not make any award to a person:

- (a) Who is in the service of the State;
- (b) If that person is not a natural person, of which a director, manager, principal shareholder or stakeholder is a person in the service of the state; or
- (c) Who is an advisor or consultant contracted with the municipality or a municipal entity.

Should a contract be awarded, and it is subsequently established that Clause 44 has been breached, the Employer shall have the right to terminate the contract with immediate effect.

T1.2.3.3 Code of Conduct and Local Labour

The Tenderers shall make themselves familiar with the requirements of the following policies:

- Code of Conduct;
- The Use of CLOs and Local Labour.

PART T2: RETURNABLE DOCUMENTS

T2.1 LIST OF RETURNABLE DOCUMENTS

T2.1.1 General

The Tender Submission Documentation must be submitted in its entirety. All forms must be properly completed and signed as required.

The Tenderer is required to complete and sign each and every Schedule and Form listed below to the best of their ability as the evaluation of tenders and the eventual contract will be based on the information provided by the Tenderer.

Failure of a Tenderer to complete the Schedules and Forms to the satisfaction of the Employer will inevitably prejudice the tender and may lead to rejection on the grounds that the tender is non-responsive.

T2.2.6 **MBD 6.1: PREFERENCE POINTS CLAIM**

(SCMP 52.7: Basket of Preference Goals)

This form serves as a claim form for preference points according to **The Basket of Preference Goals**.
Reference is to be made to the Tender Data: C.3.11.

1.0 **GENERAL CONDITIONS**

- 1.1 The relevant **Preference Points System (80/20 or 90/10)** applicable to this bid is stated in the **Tender Data: C.3.11**.
- 1.2 Failure on the part of the Tenderer to submit the required proof or documentation, in terms of the requirements in the Tender Data for claiming specific goal preference points, will be interpreted that **Preference Points for Specific Goals** are not claimed.
- 1.3 The purchaser reserves the right to require of a bidder, either before a bid is adjudicated or at any time subsequently, to substantiate any claim in regard to preferences, in any manner required by the purchaser.

2.0 **ADJUDICATION USING A POINT SYSTEM**

- 2.1 The bidder obtaining the highest number of total points will be recommended for the award of the contract.
- 2.2 Preference points shall be calculated after prices have been brought to a comparative basis taking into account all factors of non-firm prices and all unconditional discounts.
- 2.3 Points scored will be rounded off to the nearest 2 decimal places.
- 2.4 In the event that two or more bids have scored equal total points, the successful bid must be the one scoring the highest number of preference points for B-BBEE.
- 2.5 However, when functionality is part of the evaluation process and two or more bids have scored equal points including equal preference points for B-BBEE, the successful bid must be the one scoring the highest score for functionality.
- 2.6 Should two or more bids be equal in all respects the award shall be decided by the drawing of lots.

3.0 **POINTS AWARDED FOR PRICE**

A maximum of 80 or 90 points is allocated for price on the following basis:

80/20 Procurement System

or

90/10 Procurement System

$$P_s = 80 \left(1 - \frac{P_t - P_{\min}}{P_{\min}} \right)$$

$$P_s = 90 \left(1 - \frac{P_t - P_{\min}}{P_{\min}} \right)$$

Where:

P_s	=	Points scored for comparative price of bid under consideration
P_t	=	Comparative price of bid under consideration
$P_{\min}$	=	Comparative price of lowest acceptable bid

4.0 POINTS ALLOCATED FOR THE BASKET OF PREFERENCE GOALS

4.1 Preference points may be claimed for the **Specific Goals** stated in the **Tender Data: C.3.11**.

For the purposes of this tender, the Tenderer may claim points based on the goal(s) stated in the table below, as supported by proof/ documentation specified in the Tender Data.

80/20 Preference Points System The Specific Goals to be allocated points in terms of this tender:	Maximum Number of points ALLOCATED	Tenderer's Number of points CLAIMED
Ownership Goal: Race (black)	10	
RDP Goal: The promotion of South African owned enterprises.	10	
Total CLAIMED Points (maximum 20)	20	

90/10 Preference Points System The Specific Goals to be allocated points in terms of this tender:	Maximum Number of points ALLOCATED	Tenderer's Number of points CLAIMED
Ownership Goal: Race (black)	5	
RDP Goal: The promotion of South African owned enterprises.	5	
Total CLAIMED Points (maximum 10)	10	

5.0 REMEDIES FOR THE SUBMISSION OF FALSE INFORMATION

5.1 The remedies for the submission of false information regarding claims for specific goals are stated in the **SCM Policy: Section 52.9**.

Tenderers are to include, at the back of their tender submission, the required proof/ documentation in support of their Preference Goal claims (reference is to be made to the Specific Goals stated in the Tender Data: C.3.11).

I, the undersigned, who warrants that they are authorised to sign on behalf of the Tenderer, confirms that the information contained in this form is within my personal knowledge and is to the best of my belief both true and correct, and, if required, that the requested documentation has been included in the tender submission.

NOTES

- ¹ Includes price quotations, advertised competitive bids, limited bids and proposals.
- ² Bid rigging (or collusive bidding) occurs when businesses, that would otherwise be expected to compete, secretly conspire to raise prices or lower the quality of goods and / or services for purchasers who wish to acquire goods and / or services through a bidding process. Bid rigging is, therefore, an agreement between competitors not to compete.
- ³ Joint venture or Consortium means an association of persons for the purpose of combining their expertise, property, capital, efforts, skill and knowledge in an activity for the execution of a contract.

- 1.0 This Municipal Bidding Document (MBD) must form part of all **bids**¹ invited.
- 2.0 Section 4 (1) (b) (iii) of the Competition Act No. 89 of 1998, as amended, prohibits an agreement between, or concerted practice by, firms, or a decision by an association of firms, if it is between parties in a horizontal relationship and if it involves collusive bidding (or **bid rigging**).² Collusive bidding is a *pe se* prohibition meaning that it cannot be justified under any grounds.
- 3.0 Municipal Supply Regulation 38 (1) prescribes that a supply chain management policy must provide measures for the combating of abuse of the supply chain management system, and must enable the accounting officer, among others, to:
- a. take all reasonable steps to prevent such abuse;
 - b. reject the bid of any bidder if that bidder or any of its directors has abused the supply chain management system of the municipality or municipal entity or has committed any improper conduct in relation to such system; and
 - c. cancel a contract awarded to a person if the person committed any corrupt or fraudulent act during the bidding process or the execution of the contract.
- 4.0 This MBD serves as a certificate of declaration that would be used by institutions to ensure that, when bids are considered, reasonable steps are taken to prevent any form of bid rigging.
- 5.0 In order to give effect to the above, the below **Certificate of Independent Bid Determination** must be completed and submitted with the bid.

CERTIFICATE OF INDEPENDENT BID DETERMINATION

I, the undersigned, in submitting the accompanying bid for: Contract **1M-35901**

Enter the Contract Title: multiple lines allowable

in response to the invitation for the bid made by: **ETHEKWINI MUNICIPALITY**

do hereby make the following statements that I certify to be true and complete in every respect.

I certify, on behalf of:

that:

(continued on next page)

1. I have read and I understand the contents of this Certificate.
2. I understand that the accompanying bid will be disqualified if this Certificate is found not to be true and complete in every respect.
3. I am authorized by the bidder to sign this Certificate, and to submit the accompanying bid, on behalf of the bidder;
4. Each person whose signature appears on the accompanying bid has been authorized by the bidder to determine the terms of, and to sign, the bid, on behalf of the bidder;
5. For the purposes of this Certificate and the accompanying bid, I understand that the word "competitor" shall include any individual or organization, other than the bidder, whether or not affiliated with the bidder, who:
 - (a) has been requested to submit a bid in response to this bid invitation.
 - (b) could potentially submit a bid in response to this bid invitation, based on their qualifications, abilities or experience.
 - (c) provides the same goods and services as the bidder and/or is in the same line of business as the bidder.
6. The bidder has arrived at the accompanying bid independently from, and without consultation, communication, agreement, or arrangement with any competitor. However, communication between partners in a joint venture or consortium³ will not be construed as collusive bidding.
7. In particular, without limiting the generality of paragraphs 6 above, there has been no consultation, communication, agreement or arrangement with any competitor regarding:
 - (a) prices.
 - (b) geographical area where product or service will be rendered (market allocation).
 - (c) methods, factors or formulas used to calculate prices.
 - (d) the intention or decision to submit or not to submit, a bid.
 - (e) the submission of a bid which does not meet the specifications and conditions of the bid.
 - (f) bidding with the intention not to win the bid.
8. In addition, there have been no consultations, communications, agreements, or arrangements with any competitor regarding the quality, quantity, specifications and conditions or delivery particulars of the products or services to which this bid invitation relates.
9. The terms of the accompanying bid have not been, and will not be, disclosed by the bidder, directly or indirectly, to any competitor, prior to the date and time of the official bid opening or of the awarding of the contract.
10. I am aware that, in addition and without prejudice to any other remedy provided to combat any restrictive practices related to bids and contracts, bids that are suspicious will be reported to the Competition Commission for investigation and possible imposition of administrative penalties in terms of section 59 of the Competition Act No 89 of 1998 and or may be reported to the National Prosecuting Authority (NPA) for criminal investigation and or may be restricted from conducting business with the public sector for a period not exceeding ten (10) years in terms of the Prevention and Combating of Corrupt Activities Act No 12 of 2004 or any other applicable legislation.

Failure to complete this form in full, sign, and return with the tender submission will result in the tender offer being deemed non-responsive.

T2.2.10 DECLARATION OF MUNICIPAL FEES

Reference is to be made to the **Tender Data: C.2.23 and C.3.13(a)**.

I, the undersigned, do hereby declare that the Municipal fees of:

.....
(full name of Company / Close Corporation / partnership / sole proprietary/Joint Venture)

(hereinafter referred to as the TENDERER) are, as at the date hereunder, fully paid or an Acknowledgement of Debt has been concluded with the Municipality to pay the said charges in instalments.

The following account details relate to property of the said TENDERER:

<u>Account</u>	<u>Account Number: to be completed by Tenderer</u>											
Consolidated Account												
Electricity												
Water												
Rates												
JSB Levies												
Other												

- If applicable, a copy of a recent (within the past 3 months) Metro Bill is to be provided.

I acknowledge that should the aforesaid Municipal charges fall into arrears, the Municipality may take such remedial action as is required, including termination of any contract, and any payments due to the Contractor by the Municipality shall be first set off against such arrears.

- Where the Tenderer's place of business or business interests are outside the jurisdiction of eThekweni municipality, a copy of the accounts/ agreements from the relevant municipality are to be provided.
- Where the Tenderer's Municipal Accounts are part of their lease agreement, then a copy of the agreement, or an official letter to that effect, is to be provided.
- Where a Tenderer's place of business or business interests are carried out from premises as part of any other agreement, then a copy of the agreement, or an official letter to that effect, is to be provided.

Tenderers are to include, at the back of their tender submission, copies of the above-mentioned account's, agreements signed with the municipality, lease agreements, or official letters.

Failure to complete this form in full, sign, and return the required documents with the tender submission will result in the tender offer being deemed non-responsive.

*I, the undersigned, who warrants that they are authorised to sign on behalf of the Tenderer, confirms that the information contained in this form is within my personal knowledge and is to the best of my belief both true and correct, **and that the requested documentation has been included in the tender submission.***

T2.2.11 CONTRACTOR'S HEALTH AND SAFETY DECLARATION

Reference is to be made to Clauses C.2.1(e) and C.2.23 of the Tender Data.

In terms of Clause 5(1)(h) of the OHSA 1993 Construction Regulations 2014 (referred to as "the Regulations" hereafter), a Principal Contractor may only be appointed to perform construction work if the Client is satisfied that the Principal Contractor has the necessary competencies and resources to carry out the work safely in accordance with the Occupational Health and Safety Act No 85 of 1993 and the OHSA 1993 Construction Regulations 2014.

To that effect, a person duly authorised by the Tenderer, must complete and sign the declaration hereafter in detail.

Declaration by Tenderer

- 1 I, the undersigned, hereby declare and confirm that I am fully conversant with the Occupational Health and Safety Act No 85 of 1993 (as amended by the Occupational Health and Safety Amendment Act No 181 of 1993), and the OHSA 1993 Construction Regulations 2014.
- 2 I hereby declare that my company has the competence and the necessary resources to safely carry out the construction work under this contract in compliance with the Construction Regulations and the Employer's Health and Safety Specifications.
- 3 I propose to achieve compliance with the Regulations by one of the following **(Tenderers are to Circle Applicable - Yes or No)**:

(a) From my own competent resources as detailed in 4(a) hereafter.

(b) From my own resources still to be appointed or trained until competency is achieved, as detailed in 4(b) hereafter:

(c) From outside sources by appointment of competent specialist Subcontractors as detailed in 4(c) hereafter:

Circle Applicable	
Yes	No
Yes	No
Yes	No

- 4 Details of resources I propose:

(Note: Competent resources shall include safety personnel such as a construction supervisor and construction safety officer as defined in Regulation 8, and competent persons as defined in Regulations 9, 10, 11, 12, 13, 14, 16, 17, 20, 21, 22, 23(1), 24, 25, 26, 27, 28 and 29, as applicable).

- (a) Details of the competent and qualified key persons from my company's own resources, who will form part of the contract team:

NAMES OF COMPETENT PERSONS	POSITIONS TO BE FILLED BY COMPETENT PERSONS

(b) Details of training of persons from my company's own resources (or to be hired) who still have to be trained to achieve the necessary competency:

(i) By whom will training be provided?

(ii) When will training be undertaken?

(iii) Positions to be filled by persons to be trained or hired:

(c) Details of competent resources to be appointed as subcontractors if competent persons cannot be supplied from own company:

Name of proposed subcontractor:

Qualifications or details of competency of the subcontractor:

5 I, the undersigned, hereby undertake, if this tender is accepted, to provide, before commencement of the works under the contract, a suitable and sufficiently documented Health and Safety Plan in accordance with Regulation 7(1) of the Construction Regulations, which plan shall be subject to approval by the Client.

6 I, the undersigned, confirm that copies of this company's approved Health and Safety Plan, the Client's Safety Specifications as well as the OHSA 1993 Construction Regulations 2014 will be provided on site and will at all times be available for inspection by the Principal Contractor's personnel, the Client's personnel, the Employer's Agent, visitors, and officials and inspectors of the Department of Labour.

7 I, the undersigned, hereby confirm that adequate provision has been made in the tendered rates and prices in the Bill of Quantities to cover the cost of all resources, actions, training and all health and safety measures envisaged in the OHSA 1993 Construction Regulations 2014, and that I will be liable for any penalties that may be applied by the Client in terms of the said Regulations (Regulation 33) for failure on the Principal Contractor's part to comply with the provisions of the Act and the Regulations.

8 I, the undersigned, agree that failure to complete and execute this declaration to the satisfaction of the Client will mean that this company is unable to comply with the requirements of the OHSA 1993 Construction Regulations (2014) and accept that this tender will be prejudiced and may be rejected at the discretion of the Client.

I, the undersigned, who warrants that they are authorised to sign on behalf of the Tenderer, confirms that the information contained in this form is within my personal knowledge and is to the best of my belief both true and correct.

T2.2.13 CIDB REGISTRATION AND STATUS

Reference is to be made to the **Tender Data: C.2.1.2, C.2.23, and C.3.13(c)**.

The **Tender Data: C.2.1.1: Eligibility**, requires a Tenderer to be registered, as “Active”, with the CIDB (at time of tender closing), in a contractor grading designation equal to or higher than a contractor grading designation determined in accordance with the sum tendered, or a value determined in accordance with Regulation 25 (1B) or 25(7A) of the Construction Industry Development Regulations.

The required class of construction work is specified in the **Tender Data: C.2.1.2**.

CIDB Registrations can be obtained from the CIDB website at:

<https://portal.cidb.org.za/RegisterOfContractors/>

The following is an example of the printout obtained from the above website using the provided “Print” button.
Note: the printout may contain more than one page.

The screenshot shows the CIDB (Construction Industry Development Board) logo at the top left, with the tagline 'DEVELOPMENT THROUGH PARTNERSHIP'. Below the logo is the text 'construction industry development board'. The form is titled 'Contractor Details' and contains several input fields: 'CRS Number', 'Contractor Name *', 'Trading Name', 'Current Contractor Grading Designation', 'Enterprise Status', 'Type of Enterprise', 'Expiry Date', 'Contractor Grades', 'Approved Grade', 'Class of Work Type', and 'Active From'. A 'Print' button is located at the bottom left of the form.

Tenderers are to include, at the back of their tender submission, a printout of their CIDB Registration and Status. The date of obtaining the CIDB Registration and Status printout is to be indicated on the printout and should be on or after the date of advertising of this tender.

Failure to comply will result in the tender offer being deemed non-responsive.

*I, the undersigned, who warrants that they are authorised to sign on behalf of the Tenderer, confirms that the information contained in this form is within my personal knowledge and is to the best of my belief both true and correct, **and that the requested documentation has been included in the tender submission.***

T2.2.16 ELIGIBILITY: EXPERIENCE OF TENDERER

Reference is to be made to the **Tender Data: C.2.1.3**.

Only those Tenderers that can demonstrate verifiable experience, in works of a similar nature, within the past 10 years, will be eligible to have their tenders evaluated in terms of **Tender Data: C.3.11**.

- The **Eligibility Criteria Requirement** is as stated on **Table 1: “Experience Requirement”**.
- The experience is to be **“Similar in Nature”** to that specified on **Table 2: “Works of a Similar Nature”**. Tenderers are to note the exclusions (if any) stated on this table.
- The **Documentation/ Information** that may be used for verification of the experience submission is specified on **Table 3: “Documentation/ Information Requirements”** (which includes the Notes below the table). The non-submission of this Documentation/ Information may jeopardise the verification of the experience submission and render the submission invalid.
- Tenderers may submit experience gained as **Sub-Contractors or Main Contractors**.

It is the responsibility of the Tenderer to ensure that the experience submissions comply with the requirements as stated in the Tender Data: C.2.1.3.

Guidance to Tenderers: Experience Submission Form

Client / Employer Details

- Provide details for whom the works were carried out (works owner).
- Provide **Contact details of the Client or Main Contractor** (if experience was gained as a sub-contractor) is required to be provided.
The contact details may be used by the Employer to verify the information, pertaining to the experience submission. Should the Employer’s reasonable attempts to make contact with the Client or Main Contractor fail (for whatever reason), that specific experience submission may be considered invalid.

Contract Details

- Provide the **Contract Reference Number** and **Contract Title**.
- Indicate if this contract has been completed or is still in progress.
- Provide **Contract Dates**.
- Provide **Contract Values** - Where works are still in progress, provide the value of works that have been completed as detailed on the most recent payment to the Contractor / Sub-Contractor. If the works are complete, provide the Final Value of the sub-contract or Final Contract Price.

Scope of Works

- Indicate the **Works Type(s)** that best describe the works included in the project.
Select the most applicable option (only 1).
- Indicate the **Works Elements(s)** that were included in the project.
Select any elements that were included in the contract.

Joint Ventures

In the event of a Joint Venture (JV) tendering for this contract, experience gained by the separate entities making up the JV may be used as experience, provided that the experience complies with the requirements, as stipulated in **Table 1**, and that the required documentation/ information is provided.

(T2.2.16 is continued on the next page)

Confirmation of submission of Information/ Documentation

The Tenderer is to indicate (by marking with an "X" in the shaded column) the documentation that has been included in this tender submission, in support of each experience submission.

		If submitted, mark with an "X"
SUBMISSION #1	Experience Submission Form (completed and signed)	
	Proof of Sub-Contract Agreement (if experience was gained as a sub-contractor)	
	Letter of Award OR Form of Offer & Acceptance	
	Most recent Payment Certificate (with schedule of Quantities or Quantities <u>summary schedule</u>), OR most recent INVOICE (with schedule of Quantities or Quantities <u>summary schedule</u>)	
	Final Payment Certificate (with schedule of Quantities or Quantities <u>summary schedule</u>), OR most recent INVOICE (with schedule of Quantities or Quantities <u>summary schedule</u>)	
	Completion Certificate	
SUBMISSION #2	Experience Submission Form (completed and signed)	
	Proof of Sub-Contract Agreement (if experience was gained as a sub-contractor)	
	Letter of Award OR Form of Offer & Acceptance	
	Most recent Payment Certificate (with schedule of Quantities or Quantities <u>summary schedule</u>), OR most recent INVOICE (with schedule of Quantities or Quantities <u>summary schedule</u>)	
	Final Payment Certificate (with schedule of Quantities or Quantities <u>summary schedule</u>), OR most recent INVOICE (with schedule of Quantities or Quantities <u>summary schedule</u>)	
	Completion Certificate	
SUBMISSION #3	Experience Submission Form (completed and signed)	
	Proof of Sub-Contract Agreement (if experience was gained as a sub-contractor)	
	Letter of Award OR Form of Offer & Acceptance	
	Most recent Payment Certificate (with schedule of Quantities or Quantities <u>summary schedule</u>), OR most recent INVOICE (with Quantities <u>summary</u>)	
	Final Payment Certificate (with schedule of Quantities or Quantities <u>summary schedule</u>), OR most recent INVOICE (with schedule of Quantities or Quantities <u>summary schedule</u>)	
	Completion Certificate	

Note: Should there be insufficient evidence for verification of the information submitted for any specific experience submission, that experience submission will be deemed invalid.

I, the undersigned, who warrants that they are authorised to sign on behalf of the Tenderer, confirms that the information contained in this form is within my personal knowledge and is to the best of my belief both true and correct, and that the requested documentation has been included in the tender submission.

PART C1: AGREEMENT AND CONTRACT DATA
C1.1: FORM OF OFFER AND ACCEPTANCE

C1.1.1: OFFER

The Bill of Quantities in Part C2.2 will be used as the **Tender Assessment Schedule** mentioned in C.3.11 of Tender Data. The “**OFFER**” below is to be the **TOTAL** of the **Bill of Quantities** (incl. VAT).

The Offer will be used as the basis for the calculation of the “**Price Points**” in terms of the **Preference Points System** specified in C.3.11 of the Tender Data.

Notes:

*** Indicates what information is mandatory.**

Failure to complete the mandatory information and sign this form will invalidate the tender.

The Employer, identified in the Acceptance signature block, has solicited offers to enter into a contract in respect of the following works:

Contract No: **1M-35901**

Contract Title: **RATE BASED CONTRACT FOR MAINTENANCE REPAIRS TO ROADS AND
STORMWATER INFRASTRUCTURE ON AN AS AND WHEN REQUIRED BASIS IN AREAS
LOCATED WITHIN NORTH CENTRAL REGION OF ETHEKWINI MUNICIPALITY FOR 36
MONTHS**

The Tenderer, identified in the Offer signature block below, has examined the documents listed in the Tender Data and addenda thereto as listed in the Tender Schedules, and by submitting this Offer has accepted the Conditions of Tender.

By the representative of the Tenderer, deemed to be duly authorised, signing this part of this Form of Offer and Acceptance, the Tenderer offers to perform all of the obligations and liabilities of the Contractor under the Contract including compliance with all its terms and conditions according to their true intent and meaning for an amount to be determined in accordance with the Conditions of Contract identified in the Contract Data.

*** The offered total of the prices inclusive of Value Added Tax is:**

R..... (In words)

.....)
This Offer may be accepted by the Employer by signing the Acceptance part of this Form of Offer and Acceptance and returning one copy of this document to the Tenderer before the end of the period of validity stated in the Tender Data, whereupon the Tenderer becomes the party named as the Contractor in the Conditions of Contract identified in the Contract Data.

C1.1: FORM OF OFFER AND ACCEPTANCE

C1.1.2: FORM OF ACCEPTANCE

This Form will be completed by the Employer

By signing this part of the Form of Offer and Acceptance, the Employer identified below accepts the Tenderer's Offer. In consideration thereof, the Employer shall pay the Contractor the amount due in accordance with the Conditions of Contract identified in the Contract Data. Acceptance of the Tenderer's Offer shall form an agreement between the Employer and the Tenderer upon the terms and conditions contained in this Agreement and in the Contract that is the subject of this Agreement.

The terms of the contract are contained in:

- Part C1 : Agreement and Contract Data, (which includes this Agreement)
- Part C2 : Pricing Data, including the Bill of Quantities
- Part C3 : Scope of Work
- Part C4 : Site Information

and the schedules, forms, drawings and documents or parts thereof, which may be incorporated by reference into Parts C1 to C4 above.

Deviations from and amendments to the documents listed in the Tender Data and any addenda thereto listed in the Tender Schedules as well as any changes to the terms of the Offer agreed by the Tenderer and the Employer during this process of offer and acceptance, are contained in the Schedule of Deviations attached to and forming part of this Agreement. No amendments to or deviations from said documents are valid unless contained in this Schedule, which must be duly signed by the authorised representatives of both parties.

The Tenderer shall within two weeks after receiving a completed copy of this Agreement, including the Schedule of Deviations (if any), contact the Employer's agent (whose details are given in the Contract Data) to arrange the delivery of any bonds, guarantees, proof of insurance and any other documentation to be provided in terms of the Conditions of Contract identified in the Contract Data at, or just after, the date this Agreement comes into effect. Failure to fulfil any of these obligations in accordance with those terms shall constitute a repudiation of this Agreement.

Notwithstanding anything contained herein, this Agreement comes into effect on the date when the Tenderer receives one fully completed original copy of this document, including the Schedule of Deviations (if any). Unless the Tenderer (now Contractor) within five days of the date of such receipt notifies the Employer in writing of any reason why he cannot accept the contents of this Agreement, this Agreement shall constitute a binding contract between the parties.

C1.2: CONTRACT DATA

C1.2.1 CONDITIONS OF CONTRACT

C1.2.1.1 GENERAL CONDITIONS OF CONTRACT

The Conditions of Contract are the General Conditions of Contract for Construction Works (2015 3rd Edition) (GCC 2015) published by the South African Institution of Civil Engineering. Copies of these conditions of contract may be obtained from the South African Institution of Civil Engineering (Tel: 011-805-5947, Fax: 011-805-5971, E-mail: civilinfo@saice.org.za).

The Contract Data (including variations and additions) shall amplify, modify, or supersede, the GCC 2015 to the extent specified below, and shall take precedence and shall govern.

Each item of data given below is cross-referenced to the clause in the GCC 2015 to which it mainly applies.

C1.2.1.2 SPECIAL CONDITIONS OF CONTRACT

1. GENERAL

The Special Conditions of Contract (SCC) form an integral part of the contract. The Special Conditions of Contract shall amplify, modify or supersede, as the case may be, the General Conditions of Contract 2015 to the extent specified below, and shall take precedence and shall govern.

The Clauses of the Special Conditions hereafter are numbered "SCC" followed in each case by the number of the applicable clause or sub clause in the General Conditions of Contract 2015, and the applicable heading, or (where a new special condition that has no relation to the existing clauses is introduced) by a number that follows after the last clause number in the General Conditions, and an appropriate heading.

2. SCC 9.2 TERMINATION OF CONTRACTS (in addition to clause 9.2.4)

Should it appear to the Head of the Department concerned that the contractor is not executing the contract in accordance with the true intent and meaning thereof, or that he is refusing or delaying to execute the contract or that he is not carrying on the contract at such rate of progress as to ensure delivery by the date of delivery or that the time has expired within which delivery should have taken place or in the event of any other failure or default by the contractor, then in any such events, the Head of the Unit, may give notice in writing to the contractor to make good the failure or default, and should the contractor fail to comply with the notice within the period specified therein, then and in such case report the matter to the Bid Adjudication Committee.

The terminations of contracts awarded via the Bid Adjudication Committee are to be approved by the Bid Adjudication Committee. The contractor shall be responsible for any loss the Council may sustain by reason of such action as may be taken in terms of this clause.

3. SCC 5 CONTRACT PERIOD (clause 5.14.8)

The contract period is intended to be 36 months or the tendered sum, whichever comes first.

4. SCC 5.4.4 SITE LOCATION (in addition to clause 5.4)

The head of the department reserves the right to interchange or transfer the successful contractor to any of the various regions within eThekwin Municipality to undertake work of the same nature at the tendered rates should there be a need for the successful contractor to undertake work.

C1.2.2 CONTRACT DATA

C1.2.2.1 DATA TO BE PROVIDED BY THE EMPLOYER

- 1.1.1.13 The **Defects Liability Period**, from the date of the Certificate of Completion, is **1 Year**.
- 1.1.1.14 The **time for achieving Practical Completion**, from the Commencement Date is **36 months**. The period as stated in 5.3.2, and the 7 days referred to in 5.3.3, are included in the above time for achieving Practical Completion. The special non-working days as stated in 5.8.1 are excluded from the above time for achieving Practical Completion.
- 1.1.1.15 The Employer is the eThekwin Municipality as represented by:
Deputy Head: **Roads & Stormwater Maintenance**
- 1.2.1.2 The address of the Employer is: Manqoba Shange
Physical: Engineering Unit, 166 K.E. Masinga Road, DURBAN, 4001
Postal: Engineering Unit, P O Box 680, DURBAN, 4000
Telephone: 031 311 2736 (t)
Fax: 031 311 7691 (f)
E-Mail: manqoba.shange@durban.gov.za
- 1.1.1.16 The **name of the Employer's Agent** is Shan Govender
- 1.2.1.2 Physical: Engineering Unit, 166 K.E. Masinga Road, DURBAN, 4001
Postal: Engineering Unit, P O Box 680, DURBAN, 4000
Telephone: 031 311 7427 (t)
E-Mail: shan.gvender@durban.gov.za
- 1.1.1.26 The **Pricing Strategy** is by **Re-measurement Contract**.
- 3.2.3 The Employer's Agent shall obtain the **specific approval of the Employer** before executing any of his functions or duties according to the following Clauses of the General Conditions of Contract:
- 6.3: Council approval in order to authorize any expenditure in excess of the Tender Sum plus **15%** contingencies.
- 4.11.1 To carry out and complete the works, the Contractor shall employ a competent Contract Manager, Site Agent and Foreman as part of the key staff. It is a requirement for the Contractor's Contract Manager to have accredited degree in Civil Engineering with ECSA professional registration, Site Agent to have accredited diploma in Civil Engineering and ECSA candidate registration and Foreman to have a minimum of 3 years relevant experience including experience on projects of a similar nature. The CVs of the Contract Manager, Site Agent and the Foreman should be submitted to the Employer's Agent's Representative for acceptance by the Division (reference is made to Cl.5.3.1 of the Contract Data).
- Note:
- i) "similar nature" implies to maintenance repairs of roads and stormwater infrastructure and / or road construction related projects and those who have a comparable Scope of Work in terms of technical requirements and operations.
 - ii) "experience" implies experience on projects of a similar nature.
 - iii) "accredited degree / diploma" implies a minimum 3-year qualification within the built environment, from a registered University or Institute of Technology.
- 5.3.1 The **documentation required** before commencement with Works execution are:
- Health and Safety Plan (refer to Clause 4.3)
 - Initial Programme (refer to Clause 5.6)
 - Security (refer to Clause 6.2)

- Insurance (refer to Clause 8.6)
- CV(s) of Key Site Staff (refer to Clause 4.11.1)
- Sub-Contracting Implementation Plan
- If required to be registered, in terms of the Occupational Injuries and Diseases Act (130 of 1993 as amended), the Contractor is to supply proof of being registered and in good standing with the compensation fund by submitting a valid Letter of Good Standing from the Compensation Commissioner. Should the Contractor's Letter of Good Standing be expired, but an application for renewal has been made, the Contractor is to submit the expired Letter of Good Standing AND proof of an application for renewal.

5.3.2 The **time to submit the documentation** required before commencement with Works is **21 Days**.

5.3.3 Add the following paragraph:

"If a construction work permit, in terms of Clause 3(1) of the Construction Regulations (2014), is applicable, the instruction to commence carrying out of the works may only be issued once the construction work permit has been obtained by the Employer's Agent. If a construction work permit is applicable, the contractor shall allow for a minimum period of 37 days, after the submission (or re-submission) of the documentation referred to in Clause 5.3.1., for the issuing of the construction work permit."

5.8.1 The **non-working days** are **Saturdays and Sundays**.

(5.1.1) The **special non-working** days are:

- All statutory holidays as declared by National or Regional Government.
- The year-end break:
 - Commencing on the first working day after 15 December.
 - Work resumes on the first working day after 5 January of the next year.

5.8.1 Delete the words "sunset and sunrise" and replace with "17:00 and 07:00".

5.12.2.2 **Abnormal Climatic Conditions (Rain Delays)** - The numbers of days per month, on which work is expected not to be possible as a result of rainfall, for which the Contractor shall make provision, is given in the table below. During the execution of the Works, the Employer's Agent's Representative will certify a day lost due to rainfall only if at least 75% of the work force and plant on site could not work during that specific working day.

Extension of time as a result of rainfall shall be calculated monthly being equal to the number days certified by the Employer's Agent's Representative as lost due to rainfall, less the number of days allowed for as in table below, which could result in a negative figure for certain months. The total extension of time for which the Contractor may apply, shall be the cumulative algebraic sum of the monthly extensions. Should the sum thus obtained be negative, the extension of time shall be taken as NIL.

<u>Month</u>	<u>Days Lost</u>	<u>Average Rainfall</u>	<u>Month</u>	<u>Days Lost</u>	<u>Average Rainfall</u>
January	4*	134	July	1	39
February	3	113	August	2	62
March	3	120	September	2	73
April	2	73	October	3	98
May	2	59	November	3	108
June	1	28	December	1*	102
TOTAL	27	1009mm	* = The number of working days lost allows for the annual statutory Construction holiday in December and January of each year.		

5.13.1 The **penalty for delay** in failing to complete the Works is **R 25,000.00** (per Day).

5.14.1 The **requirements for achieving Practical Completion** will be determined by the Employer's Agent (in consultation with the Contractor) and recorded in the minutes of the first Site Meeting / Handover Meeting. (Refer to 1.1.1.24 for a generic definition.) The requirements are to be regularly reviewed with respect to any variations to the Contract.

5.16.3 The **latent defect liability** period is **10 Years**.

6.2.1 **Security (Performance Guarantee)**: Delete the word "selected" and replace it with "stated".

The liability of the Performance Guarantee shall be as per the following table:

Value of Contract (incl. VAT)	Performance Guarantee Required
Less than or equal to R 1m	Nil
Greater than R 1m and less than or equal to R 10m	5% of the Contract Sum
Greater than R 10m	10% of the Contract Sum

6.5.1.2.3 The **percentage allowance** to cover overhead charges for daywork are as follows:

- **80%** of the gross remuneration of workmen and foremen actually engaged in the daywork;
- **20%** on the net cost of materials actually used in the completed work.

No allowance will be made for work done, or for materials and equipment for which daywork rates have been quoted at tender stage.

6.8.2 **Contract Price Adjustment Factor**: The value of the certificates issued shall be adjusted in accordance with the Contract Price Adjustment Schedule (GCC 2015 - page 86) with the following Indices / Descriptions / Coefficients:

- The proportion not subject to adjustment: **x = 0.10**.
- The base month will be the month prior to the month in which tenders close.
- The Index for, **Plant, Materials, and Fuel** shall be based on **2023 = 100**.
- The Index for **Labour** shall be based on **2024 = 100**.

	STATS SA Statistical Release	Table	Description	Coefficient
• "L" is the "Labour Index"	P0141	Table A	Geographic Indices; CPI per Province; Kwa-Zulu Natal	a = 0.28
• "P" is the "Contractor's Equipment Index"	P0151.1	Table 4	Plant and Equipment	b = 0.28
• "M" is the "Materials Index"	P0151.1	Table 6	Civil Engineering Material (excluding bitumen)	c = 0.38
• "F" is the "Fuel Index"	P0142.1	Table 1	Coke, petroleum, chemical, rubber and plastic products; Coal and petroleum products; Diesel	d = 0.06

6.8.3 Price adjustments for **variation in the cost of the special material(s)** listed below, will be allowed.

Bitumen - escalation will be calculated using the "Rise and Fall" method as determined by the Employer. The base price for bitumen on this contract shall be the ruling price of 50/70 grade bitumen based on the **RUBIS Asphalt South Africa List Selling Price** for Penetration Grade Bitumen, seven (7) days prior to the closing date of tenders.

6.10.1.5 The **percentage advance** on materials not yet built into the Permanent Works is **80%**.

6.10.3 The **percentage advance** on Plant not yet supplied to Site: **Not Required**
Retention Money: Delete the word "selected".

The percentage retention on the amounts due to the Contractor is 10%.

The limit of "retention money" is 5% of the Contract Sum.

Should the Contract Price exceed the Contract Sum then the limit of "retention money" is 5% of the Contract Price.

Interest will not be paid on retention withheld by the Employer.

8.6.1.1.2 The **value of Plant and materials** supplied by the Employer to be included in the insurance sum: **Not Required.**

8.6.1.1.3 The **amount to cover professional fees** for repairing damage and loss to be included in the insurance sum: **Not Required.**

8.6.1.2 **SASRIA Coupon Policy** for Special Risks to be issued in joint names of Council and Contractor for the full value of the works (including VAT).

8.6.1.3 The limit of indemnity for **liability insurance**: **R 10,000,000.00.**

8.6.1.4 **Ground Support Insurance:**

- Minimum amount for any one occurrence, unlimited as to the number of occurrences, against any claim for damages or loss caused by vibration and / or removal of lateral support: **R NIL**
- Maximum first excess: **R NIL.**

8.6.1.5 Furthermore, the insurance cover effected by the Contractor shall meet the following requirements:

Third Party Insurance (Public Liability)

- Minimum amount for any one occurrence, unlimited as to the number of occurrences, for the period of the contract, inclusive of the maintenance period: **R 1,000,000.00**
- Consequential loss to be covered by policy: **Yes**
- Liability section of policy to be extended to cover blasting: **Nil**
- Maximum excess per claim or series of claims arising out of any one occurrence: **R20,000.00.**

Principal's own surrounding Property Insurance

- Minimum amount for any one occurrence unlimited as to the number of occurrences against any claim for damage which may occur to the Council's own surrounding property: **R500,000.00**
- Maximum first excess: **R 10,000.00.**

Insurance of Works

- Minimum amount for additional removal of debris (no damage): **Nil.**
- Minimum amount for temporary storage of materials off site, excluding Contractor's own premises: **Nil.**

- Minimum amount for transit of materials to site: **Nil**.

8.6.5 **Approval by Employer:** At the end of the sub-clause, add the following paragraph:

"Except where otherwise provided in the Special Conditions of Contract, the insurance cover effected by the Contractor in terms of this clause shall not carry a first loss amount greater than those set out below:

Contract Price	First Loss
Less than R 100,000	R 5,000
R 100,000 to R 500,000	R 10,000
R 500,000 to R 1,000,000	R 20,000
R 1,000,000 to R 2,000,000	R 30,000
R 2,000,000 to R 4,000,000	R 40,000
Greater than R 4,000,000	R 50,000

The insurance policy shall contain a specific provision whereby cancellation of the policy prior to the end of the period referred to in Cause 8.2.1 cannot take place without the prior written approval of the Employer. "

10.7.1 Failing ad-hoc adjudication, the determination of disputes shall be by arbitration.

C1.2.2.2 DATA TO BE PROVIDED BY CONTRACTOR

1.1.1.9 The legal name of Contractor is:

.....
.....
.....
.....

1.2.1.2 The Physical address of the Contractor is:

.....
.....
.....
.....

The Postal address of the Contractor is:

.....
.....
.....
.....

The contact numbers of the Contractor are:

Telephone:

Fax:

The E-Mail address of the Contractor is:

.....

C1.2.3 ADDITIONAL CONDITIONS OF CONTRACT

C1.2.3.1 COMMUNITY LIAISON OFFICER

The Ward Councillor(s) in whose ward(s) work is to be done will, collectively, identify a community liaison officer (CLO) for the project and make the person known to the Contractor within two days of being requested to do so. The Contractor will be required to enter a written contract with the CLO that specifies:

- The hours of work and the wage rate of the CLO (200% of the Civil Engineering Industry minimum wage).
- The duration of the appointment.
- The duties to be undertaken by the CLO which could include:
 - Assisting in all respects relating to the recruitment of local labour.
 - Acting as a source of information for the community and councillors on issues related to the contract.
 - Keeping the Contractor advised on community issues and issues pertaining to local security.
 - Assisting in setting up any meetings or negotiations with affected parties.
 - Keeping a written record of any labour or community issue that may arise.
 - Any other duties that may be required by the Contractor.

Responsibility for the identification of a pool of suitable labour shall rest with the CLO, although the Contractor shall have the right to choose from that pool. The Contractor shall have the right to determine the total number labourers required at any one time and this may vary during the contract.

The Contractor shall have the right to replace labour that is not performing adequately. Should such occasion arise, it must be done in conjunction with the CLO.

Payment: The CLO will be reimbursed from the PC Sum item in the Preliminary & General Section of the Bill of Quantities.

C1.2.3.2 EMPLOYMENT OF LOCAL LABOUR

It is a condition of contract that the contractor will be required to employ local labour as specified in eThekwin Council Policy "The use of CLOs and Local Labour". The contractor will be required to ensure that a minimum of 50% of the labour force is made up of local labour. For the purposes of this contract, "Local labour" will be deemed to be any **persons who reside within Ward(s) where work will be undertaken**. The contractor will be required to provide proof of authenticity of local labour. Signed confirmation by the appointed CLO will suffice for this.

No additional costs will be entertained due to this Particular Specification. The contractor will remain responsible for providing proper supervision of all labour and will be responsible for the quality of work produced.

C1.2.3.3 SUB-CONTRACTING

It is a condition of contract that the contractor must allow for a minimum of **30%** of the contract value (excluding PC Sum items and Fixed Cost allowances) to be subcontracted to contractors who are **>51%** owned by Black People. Proof of payment to the subcontractors will be required to verify that the minimum has been achieved.

The penalty for not achieving the specified Sub-Contracting Goal will be 0.5% of the contract value (excluding PC Sum items and Fixed Cost allowances) for every 1% not achieved.

C1.2.3.4 FTE (Full Time Equivalent) EMPLOYMENT INFORMATION

It is a condition of contract that the Contractor supplies the Employer's Agent's Representative with information in respect of the employment of all foremen, artisans and Labour (skilled and unskilled) employed to work on this contract. The information required is:

- Initials (per ID doc)
- Last Name (per ID doc)
- ID Number
- Disability (y / n)
- Education Level

Level 1 Unknown	Level 2 No Schooling	Level 3 Grade 1-3	Level 4 Grade 4	Level 5 Grade 5-6
Level 6 Grade 7-8	Level 7 Grade 9	Level 8 Grade 10-11	Level 9 Grade 12	Level 10 Post Matric

- Category of Employment

Category A: Employed as Local Labour for this contract only Category B: Temporarily employed by the Contractor Category C: Permanently employed by the Contractor
--

In addition, the following information is required in respect of each person listed above, on a monthly basis:

- Number of days worked during the month;
- Daily wage rate;
- Number of training days during the month.

The information is to be forwarded in a format acceptable to the Employer's Agent's Representative, but preferably in the form of an emailed EXCEL file (an original file, to be used as a template, will be issued to the Contractor). Contractors without computer facilities will be required to submit a hard copy of the information in a format as agreed to between the Contractor and the Employer's Agent's Representative.

In addition to the tax invoice, to be submitted by the Contractor with his monthly statement, mentioned in Clause 6.10.4 of GCC 2015, the Employer reserves the right to withhold payment until the monthly FTE information has been forwarded to the Employer's Agent's Representative. No additional payment for complying with the above will be made and the Contractor is to make allowance for complying through the time related P & G items (sum) under Part AA: Preliminaries, of the Bill of Quantities.

C1.2.3.5 PERFORMANCE MONITORING OF SERVICE PROVIDERS

[For contract awards over R10m] The Contractor shall be subjected to "Performance Monitoring" assessments in terms of the applicable Section (S.53) of the Employer's Supply Chain Management Policy.

Key Performance Indicators (KPIs) are specified in the C3: Scope of Works, or will be discussed and agreed with the Contractor before commencement of the contract.

C1.2.3.6 EXCEPTED RISKS (Clause 8.3)

Pursuant to Clause 8.3 of the Conditions of Contract (GCC 2015), the Employer shall not be liable for the payment of standing time costs as a result of the occurrence of any of the "Excepted Risks" as defined under Clause 8.3.

However, the Employer shall reimburse the Contractor in respect of plant de-establishment and re-establishment costs as a result of "Excepted risks" when a written instruction to de-establish is issued to the Contractor.

C1.2.3.7 WORK ALLOCATION METHODOLOGY

It will be the conditions of this contract that work distribution or method of assigning work to service providers shall be as follows

- There will be two (2) Service Providers per region.
- The budget allocation for this contract will be shared equally between the two (2) service providers.
- Issuing of works / job cards / site instructions will be on an as and when required basis.

C2.1: PRICING ASSUMPTIONS / INSTRUCTIONS

**USE THIS VERSION IF GCC2015 and the STANDARD ENGINEERING SPECIFICATIONS
ARE USED**

C2.1.1 GENERAL

The Bill of Quantities forms part of the Contract Documents and must be read and priced in conjunction with all the other documents comprising the Contract Documents (refer to C.1.2 of the Tender Data).

C2.1.2 PRICING INSTRUCTIONS AND DESCRIPTION OF ITEMS IN THE SCHEDULE

Measurement and payment shall be in accordance with the relevant provisions of Clause 8 of each of the Standard Engineering Specifications referred to in the Scope of Work. The Preliminary and General items shall be measured in accordance with the provisions of C2.1.8.

The descriptions of the items in the Bill of Quantities are for identification purposes only and comply generally with those in the Standard Engineering Specification.

Clause 8 of each Standard Engineering Specification, read together with the relevant clauses of the Scope of the works, set out what ancillary or associated work and activities are included in the rates for the operations specified. Should any requirements of the measurement and payment clause of the applicable Standard Engineering Specification, or the Scope of the works, conflict with the Bill of Quantities, the requirements of the Standard Engineering Specification or Scope of the work, as applicable, shall prevail.

C2.1.3 QUANTITIES REFLECTED IN THE SCHEDULE

The quantities given in the Bill of Quantities are estimates only, and subject to re-measuring during the execution of the work. The Contractor shall obtain the Employer's Agent's detailed instructions for all work before ordering any materials or executing work or making arrangements for it.

The Works as finally completed in accordance with the Contract shall be measured and paid for as specified in the Bill of Quantities and in accordance with the

General and Special Conditions of Contract, the Specifications and Project Specifications and the Drawings. Unless otherwise stated, items are measured net in accordance with the Drawings, and no allowance has been made for waste.

The validity of the contract will in no way be affected by differences between the quantities in the Bill of Quantities and the quantities finally certified for payment.

C2.1.5 MONTHLY PAYMENTS

Unless otherwise specified in the Specifications and Project Specifications, progress payments in Interim Certificates, referred to in Clause 6.10.1 of the General Conditions of Contract, in respect of "sum" items in the Bill of Quantities shall be by means of interim progress instalments assessed by the Employer's Agent and based on the measure in which the work actually carried out relates to the extent of the work to be done by the Contractor.

C2.1.4 PROVISIONAL SUMS / PRIME COST SUMS

Where Provisional Sums or Prime Cost sums (PC Sum) are provided for items in the Bill of Quantities, payment for the work done under such items will be made in accordance with Clause 6.6 of the General Conditions of Contract. The Employer reserves the right, during the execution of the works, to adjust the stated amounts upwards or downwards according to the work actually done under the item, or the item may be omitted altogether, without affecting the validity of the Contract.

The Tenderer shall not under any circumstances whatsoever delete or amend any of the sums inserted in the "Amount" column of the Bill of Quantities and in the Summary of the Bill of Quantities unless ordered or authorized in writing by the Employer before closure of tenders. Any unauthorized changes made by the Tenderer to provisional items in the schedule, or to the provisional percentages and sums in the Summary of the Bill of Quantities, will be treated as arithmetical

errors.

C2.1.6 PRICING OF THE BILL OF QUANTITIES

The prices and rates to be inserted by the Tenderer in the Bill of Quantities shall be the full inclusive prices to be paid by the Employer for the work described under the several items, and shall include full compensation for all costs and expenses that may be required in and for the completion and maintenance during the defects liability period of all the work described and as shown on the drawings as well as all overheads, profits, incidentals and the cost of all general risks, liabilities and obligations set forth or implied in the documents on which the Tender is based.

Each item shall be priced and extended to the "Total" column by the Tenderer, with the exception of the items for which only rates are required (Rate Only), or items which already have Prime Cost or Provisional Sums affixed thereto. If the Contractor omits to price any items in the Bill of Quantities, then these items will be considered to have a nil rate or price.

All items for which terminology such as "inclusive" or "not applicable" have been added by the Tenderer will be regarded as having a nil rate which shall be valid irrespective of any change in quantities during the execution of the Contract.

All rates and amounts quoted in the Bill of Quantities shall be in Rands and Cents and shall include all levies and taxes (other than VAT). VAT will be added in the Summary of the Bill of Quantities.

C2.1.7 "RATE ONLY" ITEMS

The Tenderer shall fill in rates for all items where the words "Rate Only" appear in the "Total" column. "Rate Only" items have been included where:

- (a) an alternative item or material is contemplated;
- (b) variations of specified components in the make-up of a pay item may be expected; and
- (c) no work under the item is foreseen at tender stage but the possibility that such work may be required is not excluded.

For "Rate Only" items no quantities are given in the "Quantity" column but the quoted rate shall apply in the event of work under this item being required. The Tenderer shall however note that in terms of the Tender Data the Tenderer may be asked to reconsider any such rates which the Employer may regard as unbalanced.

C2.1.8 PRELIMINARY AND GENERAL

The Preliminary and General Section is provided to cover the Contractor's expenses incurred in complying with the requirements of the tender documents and consists of the following parts:

- Part AA: Preliminaries
- Part AB: General Specifications
- Part AH: Occupational Health and Safety

Fixed Charge Items: Each item should be priced separately and, subject to the Engineer certifying in terms of **Clause 6.7 of the General Conditions of Contract** that the work has been done, payment will be made as follows:

- (i) the total amount due when the certified value fixed charge items in this section is less than 5% of the net contract price;
- (ii) when the certified value of fixed charge items in this section is greater than 5% of the net contract price, payment will be limited to 5% of the net contract price. The remainder will be paid when the value of the work done under the contract, excluding the value of fixed charge items in this section, is greater than 50% of the net contract price, excluding the value of fixed charge items in this section.

Time Related Items: Any Time Related items not priced shall be deemed to be covered by the prices of other items in the section.

Payment of Time Related items in this section will be made throughout the contract period, the amount per month being the value of the item divided by the completion in months or, if specified in weeks, the equivalent number of months, in terms of **Clause 5.5 of the General Conditions of Contract**. The final monthly increment will only be paid upon the issue of a completion certificate.

C2.1: PRICING ASSUMPTIONS / INSTRUCTIONS

USE THIS VERSION IF GCC2015 and the COTO SPECIFICATIONS ARE USED

C2.1.1 GENERAL

The Bill of Quantities forms part of the Contract Documents and must be read and priced in conjunction with all the other documents comprising the Contract Documents (refer to C.1.2 and C.2.5 of the Tender Data).

C2.1.2 PRICING INSTRUCTIONS AND DESCRIPTION OF ITEMS IN THE SCHEDULE

Measurement and payment shall be in accordance with the relevant provisions of Part C of the Committee of Transport Officials (COTO) – Standard Specifications for Road and Bridge Works for South African Road Authorities – Draft Standard, referred to in the Scope of Work. The Preliminary and General items shall be measured in accordance with the provisions of C2.1.8.

The descriptions of the items in the Bill of Quantities are for identification purposes only and comply generally with those in the Standard Specification.

Part C of the Standard Specification, read together with the relevant clauses of the Scope of the works, set out what ancillary or associated work and activities are included in the rates for the operations specified. Should any requirements of the measurement and payment clause of the applicable Standard Specification, or the Scope of the works, conflict with the Bill of Quantities, the requirements of the Standard Specification or Scope of the work, as applicable, shall prevail.

C2.1.3 QUANTITIES REFLECTED IN THE SCHEDULE

The quantities given in the Bill of Quantities are estimates only, and subject to re-measuring during the execution of the work. The Contractor shall obtain the Employer's Agent's detailed instructions for all work before ordering any materials or executing work or making arrangements for it.

The Works as finally completed in accordance with the Contract shall be measured and paid for as specified in the Bill of Quantities and in accordance with the

General and Special Conditions of Contract, the Specifications and Project Specifications and the Drawings. Unless otherwise stated, items are measured net in accordance with the Drawings, and no allowance has been made for waste.

The validity of the contract will in no way be affected by differences between the quantities in the Bill of Quantities and the quantities finally certified for payment.

C2.1.5 MONTHLY PAYMENTS

Unless otherwise specified in the Specifications and Project Specifications, progress payments in Interim Certificates, referred to in Clause 6.10.1 of the General Conditions of Contract, in respect of "sum" items in the Bill of Quantities shall be by means of interim progress instalments assessed by the Employer's Agent and based on the measure in which the work actually carried out relates to the extent of the work to be done by the Contractor.

C2.1.4 PROVISIONAL SUMS / PRIME COST SUMS

Where Provisional Sums or Prime Cost sums (PC Sum) are provided for items in the Bill of Quantities, payment for the work done under such items will be made in accordance with Clause 6.6 of the General Conditions of Contract. The Employer reserves the right, during the execution of the works, to adjust the stated amounts upwards or downwards according to the work actually done under the item, or the item may be omitted altogether, without affecting the validity of the Contract.

The Tenderer shall not under any circumstances whatsoever delete or amend any of the sums inserted in the "Amount" column of the Bill of Quantities and in the Summary of the Bill of Quantities unless ordered or authorized in writing by the Employer before closure of tenders. Any unauthorized changes made by the Tenderer to provisional items in the schedule, or to the provisional percentages and sums in the Summary of the Bill of Quantities, will be treated as arithmetical errors.

C2.1.6 PRICING OF THE BILL OF QUANTITIES

The prices and rates to be inserted by the Tenderer in the Bill of Quantities shall be the full inclusive prices to be paid by the Employer for the work described under the several items, and shall include full compensation for all costs and expenses that may be required in and for the completion and maintenance during the defects liability period of all the work described and as shown on the drawings as well as all overheads, profits, incidentals and the cost of all general risks, liabilities and obligations set forth or implied in the documents on which the Tender is based.

Each item shall be priced and extended to the "Total" column by the Tenderer, with the exception of the items for which only rates are required (Rate Only), or items which already have Prime Cost or Provisional Sums affixed thereto. **If the Contractor omits to price any items in the Bill of Quantities, then these items will be considered to have a nil rate or price.**

All items for which terminology such as "inclusive" or "not applicable" have been added by the Tenderer will be regarded as having a nil rate which shall be valid irrespective of any change in quantities during the execution of the Contract.

All rates and amounts quoted in the Bill of Quantities shall be in Rands and Cents and shall include all levies and taxes (other than VAT). VAT will be added in the Summary of the Bill of Quantities.

C2.1.7 "RATE ONLY" ITEMS

The Tenderer shall fill in rates for all items where the words "Rate Only" appear in the "Total" column. "Rate Only" items have been included where:

- (a) an alternative item or material is contemplated;
- (b) variations of specified components in the make-up of a pay item may be expected; and
- (c) no work under the item is foreseen at tender stage but the possibility that such work may be required is not excluded.

For "Rate Only" items no quantities are given in the "Quantity" column but the quoted rate shall apply in the event of work under this item being required. The Tenderer shall however note that in terms of the

Tender Data the Tenderer may be asked to reconsider any such rates which the Employer may regard as unbalanced.

C2.1.8 PRELIMINARY AND GENERAL

The Preliminary and General Section is provided to cover the Contractor's expenses incurred in complying with the requirements of the tender documents and consists of the following parts:

- Part C1.2: General Requirements and Provisions
- Part C1.4: Facilities for the Engineer
- Part C1.5: Accommodation of Traffic

Fixed Charge Items: Each item should be priced separately and, subject to the Engineer certifying in terms of **Clause 6.7 of the General Conditions of Contract** that the work has been done, payment will be made as follows:

- (i) the total amount due when the certified value fixed charge items in this section is less than 5% of the net contract price;
- (ii) when the certified value of fixed charge items in this section is greater than 5% of the net contract price, payment will be limited to 5% of the net contract price. The remainder will be paid when the value of the work done under the contract, excluding the value of fixed charge items in this section, is greater than 50% of the net contract price, excluding the value of fixed charge items in this section.

Time Related Items: Any Time Related items not priced shall be deemed to be covered by the prices of other items in the section.

Payment of Time Related items in this section will be made throughout the contract period, the amount per month being the value of the item divided by the completion in months or, if specified in weeks, the equivalent number of months, in terms of **Clause 5.5 of the General Conditions of Contract**. The final monthly increment will only be paid upon the issue of a completion certificate.

Value Related Items: Value Related Items are not included in the Bill of Quantities. The Tenderer shall include any costs associated with Value Related Items under the relevant Fixed Charge Items or Time Related Items.

C2.2: BILL OF QUANTITIES

The Bill of Quantities follows and comprises of 09 pages.

C3.1: PROJECT DESCRIPTION AND SCOPE OF CONTRACT

C3.1.1 Description of Works

The Employer seeks to establish 2 (two) regional contractors in the NORTH Central Region of eThekweni Municipality to undertake road and stormwater infrastructure repairs on an as and when required basis. The work under this contract will entail rates-based contracting and issuing of works will be in a form of works order as the need arises.

The works involves the maintenance and repairs of roads, sidewalks and pavements, stormwater infrastructure, the construction and/or repair of access hardenings, cleaning of stormwater infrastructure, repairs on protection structures, erection and re-instatement of fencing and guardrails within the NORTH Central Region of eThekweni Municipality. The work will be carried out (under vehicular and pedestrian traffic) where necessary and where ordered by the Engineer and includes the following:-

1. Preparation work as requested by the Engineer.
2. Raising or lowering of services where necessary.
3. Major and minor road patching repairs in roadways and sidewalks, including pothole repairs and holding/maintenance measures.
4. Supply and repair existing stormwater infrastructure precast products.
5. Repair and supply of steel guardrail elements
6. Cleaning of the site on completion of each works order.
7. Cleaning of the stormwater catch pits, outlets and pipes.
8. Repair minor protection structures
9. Re-instate existing or repair fencing
10. Provision of plant and labour

C3.1.2 Description of Site and Access

The roads and stormwater infrastructure to be repaired are located within the NORTH Central Region of eThekweni Municipality. The work will be spread throughout the various zones at random/various locations.

C3.1.3 Nature of Ground and Subsoil Conditions

N/A

C3.1.4 CIDB B.U.I.L.D. Programme (Employer's objectives)

N/A

C3.2: PROJECT SPECIFICATION

PREAMBLE

In the event of any discrepancy between a part or parts of the Standard or Particular Specifications and the Project Specification, the Project Specification shall take precedence. In the event of a discrepancy between the Specifications, (including the Project Specifications) and the drawings and / or the Bill of Quantities, the discrepancy shall be resolved by the Employer's Agent before the execution of the work under the relevant item.

C3.2.1 GENERAL

PS.1 PROGRAMME, METHOD OF WORK, AND ACCOMMODATION OF TRAFFIC

This Clause is to be read in conjunction with the provisions and obligations as contained in **SANS 1921-1 and SANS 1921-2**.

PS.1.1 Preliminary Programme

The Contractor shall include with his tender a preliminary programme on the prescribed form (**see T2.2: Preliminary Programme**) to be completed by all Tenderers. The programme shall be in the form of a simplified bar chart with sufficient details to show clearly how the works will be performed within the time for completion as stated in the Contract Data.

Tenderers may submit tenders for an alternative Time for Completion in addition to a tender based on the specified Time for Completion. Each such alternative tender shall include a preliminary programme similar to the programme above for the execution of the works, and shall motivate his proposal clearly by stating all the financial implications of the alternative completion time.

The Contractor shall be deemed to have allowed fully in his tendered rates and prices as well as in his programme for all possible delays due to normal adverse **weather conditions** (**refer to Clause 5.12.2.2**) and special non-working days (**refer to Clause 5.1.1.1**) as specified in the in the Contract Data.

PS.1.2 Programme in Terms of Clause 5.6 of the General Conditions of Contract

It is essential that the construction programme, which shall conform in all respects to **Clause 5.6 of the General Conditions of Contract**, be furnished within the time stated in the Contract Data (**refer to Clause 5.3.1/2**).

The preliminary programme to be submitted with the tender shall be used as basis for this programme.

The Tenderer's attention is drawn to the fact that a number of factors will affect the programming of and method of carrying out the works. The more important of these are:

- (1) **Time required for service relocations.**
- (2) **Time allowances to be made for the ordering of special items.**

- (3) Notification required by service organisations.
- (4) Any special sequence in which work must be carried out. Must certain areas of work be finished before work commences on others?
- (5) If delays are anticipated with service relocations the contractor should be asked to allow time.
- (6) Is work required out of normal hours? (eg. to accesses).
- (7) Vehicular access to private property is to be maintained.
- (8) Traffic restrictions.

Those known, existing services in the area of the works have been depicted on the contract drawings. It is evident, however, that the status of existing service records as far as can be ascertained might not reflect the actual situation in the field. As such, due allowance has been made in the Bill of Quantities for the proving of services where directed by the Engineer.

PS.1.3 Requirements for Accommodation of Traffic

PS.1.3.1 General

Accommodation of traffic, where applicable, shall comply with **SANS 1921-2: 2004: Construction and Management Requirements for Works Contracts, Part 2: Accommodation of Traffic on Public Roads occupied by the Contractor**. The Contractor shall obtain this specification from Standards NORTH Africa if accommodation of traffic will be involved on any part of the construction works.

Clause 4.10.4 of SANS 1921-2: 2004 shall be replaced with the following:

“Road signs and markings shall comply with the requirements of the **“SADC Road Traffic Signs Manual - Volume 2: Roadworks Signing”**.”

PS.1.3.2 Basic Requirements

The travelling public shall have the right of way on public roads, and the Contractor shall make use of approved methods to control the movement of his equipment and vehicles so as not to constitute a hazard on the road.

The Contractor shall ensure that all road signs, barricades, delineators, flagmen and speed controls are effective, and that courtesy is extended to the public at all times.

Failure to maintain road signs, warning signs or flicker lights, etc, in a good condition shall constitute ample reason for the Employer's Agent to suspend the work until the road signs, etc, have been repaired to his satisfaction.

The Contractor may not commence constructional activities affecting existing roads before adequate provision has been made to accommodate traffic in accordance with the requirements of this document and the NORTH African Road Traffic Signs Manual.

The Contractor shall construct and maintain all temporary drainage works necessary for temporary deviations. The Contractor shall ensure that the existing property accesses are maintained at all times. Where necessary the Contractor shall make allowance in the rates for completing the work required to the accesses out of normal hours.

PS.1.3.3 Traffic Safety Officer

Where warranted by traffic conditions on or near the site, the Contractor shall nominate a suitable member of his staff as traffic safety officer to be responsible for the arrangement and maintenance of all the measures for the accommodation of traffic for the duration of the project. Duties of the traffic safety officer shall be in compliance with the Occupational Health and Safety Act 1993 and the Construction Regulations 2014.

PS.1.3.4 Payment

The Contractor's tendered rates for the relevant items in the Bill of Quantities shall include full compensation for all possible additional costs which may arise from this, and no claims for extra payment due to inconvenience as a result of the *modus operandi* will be considered.

PS.1.3.5 Pedestrian Movement

The Contractor shall make provision for accommodating all pedestrian movements in the area of the works. Allowance shall be made in the relevant rates for any barricades and signs required.

PS.1.3.6 Temporary Reinstatement

Provided always that if in the course or for the purpose of the execution of the works or any part thereof any road or way shall have been broken up, then notwithstanding anything herein contained:

- (a) if the permanent reinstatement of such road or way is to be carried out by the appropriate authority or by some person other than the contractor (or any subcontractor to him), the contractor shall at his own cost and independently of any requirement of or notice from the Engineer be responsible for the making good of any subsidence or shrinkage or other defect, imperfection or fault in the temporary reinstatement of such road or way, and for the execution of any necessary repair or amendment thereof from whatever cause the necessity arises, until the end of the period of maintenance in respect of works beneath such road or way until the authority or other person as aforesaid shall have taken possession of the site for the purpose of carrying out permanent reinstatement (whichever is the earlier), and shall indemnify and save harmless that Council against and from any damage or injury to the Council or to third parties arising out of or in consequence of any neglect or failure of the Contractor to comply with the foregoing obligations or any of them and against and from all claims, demands, proceedings, damages, costs, charges and expenses whatsoever in respect thereof or in relation thereto.
- (b) where the authority or person as aforesaid shall take possession of the site as aforesaid in sections or lengths, the responsibility of the contractor under paragraph (a) of this sub-clause shall cease in regard to any such section or length at the time possession thereof is so taken, but shall during the continuance of the said period of maintenance continue in regard to any length of which possession has not been taken and the indemnity given by the contractor under the said paragraph shall be construed and have effect accordingly.

PS.2 SERVICES

This Clause is to be read in conjunction with the provisions and obligations as contained in **SANS 1921-1 and SANS 1921-2**.

PS.2.1 Existing Services

The Tenderer's attention is drawn to the numerous existing services in the area. Although every effort has been made to depict these services accurately the positions shown must be regarded as approximate.

[If you think necessary, draw special attention to major services.]

PS.2.2 Proving Underground Services

This clause must be read in conjunction with **Clause DB.5.1.2**, the requirements of which shall be extended to cover all earthworks operations whether for trenching or bulk earthworks, in the vicinity of underground services.

It is stressed that all services in a particular area must be proven before commencing work in that area.

Insofar as bulk earthworks are concerned, where services are indicated on the drawings or where from site observations can reasonably be expected that such services are likely to exist where excavations are to take place, the Contractor shall without instructions from the Employer's Agent carefully excavate by hand to expose and prove their positions.

The cost of the proving trenches is to be included in the work covered by **Clause DA.8.3**.

When a service is not located in its expected position the Contractor shall immediately report such circumstances to the Employer's Agent who will decide what further searching or other necessary action is to be carried out and shall instruct the Contractor accordingly. The cost of this additional searching shall be to the Council's cost and shall be paid for under **DB.8.19 - Proving Existing Services**.

Should any service be damaged by the Contractor in carrying out the works and should it be found that the procedure as laid down in this clause has not been followed then all costs in connection with the repair of the service will be to the Contractor's account.

When electrical cables are not in the positions shown on drawings of eThekweni Electricity and cannot be found after proving trenches have been put down, assistance may be obtained by calling an official of the **Works Branch on Telephone No. 311-1111** during office hours, or by contacting **Control on Telephone No. 305-7171** after hours.

It should be noted that 33,000 Volt and 132,000 Volt cables may only be exposed by the eThekweni Electricity's personnel. The cables are usually protected by concrete covering slabs, and therefore if the slabs are inadvertently exposed, excavation work must stop, and the eThekweni Electricity shall be contacted immediately on the above telephone numbers.

Proving of services shall be completed at least two weeks in advance of the actual programmed date for commencing work in the area. The position of these services located must be co-ordinated and levelled by the Contractor, and the information given in writing to the Employer's Agent's Representative.

The requirements of this clause do not relieve the Contractor of any obligations as detailed in the Conditions of Contract or under **Clause 4.17 of SANS 1921-1**.

PS.2.3 New Services and Relocation of Existing

This clause shall be read in conjunction with **Clause PS.1**.

New services are either to be installed by the Contractor as part of the contract or by others during the contract period. In the latter case excavation and subsequent backfilling of the trench from the top of the bedding layer shall generally be carried out by the Contractor.

Relocation of services shall generally be carried out by the relevant services organisation. Generally their work shall include the excavating and bedding the service which will include backfilling to a depth of approximately 300 mm above the service. The remainder of the backfilling shall be carried out by the Contractor.

Generally work shall only commence on the installation of new services once the bulk earthworks have been completed and roughly trimmed to level along a substantial portion of the services route. In addition no sidewalk, verge, median or island shall be surfaced or topsoiled until all work on the services has been completed.

Services affected by the contract are described as follows:

- **PS.3: Watermains;**
- **PS.4: Sewers;**
- **PS.5: Stormwater;**
- **PS.6: Electrical Cables / Lighting;**
- **PS.7: Telkom / Neotel;**
- **PS.8: CCTV;**

Further to the above, Tenderers are referred to the services drawing and are to note that several minor cables / pipes may be encountered during excavation works which may require to be relocated to some extent. It is anticipated that the two week period required under **PS.2.2** will allow sufficient time for these relocations.

PS.2.4 Accommodation of Services

Further to **Clauses PS.1 and PS.2** of this specification, Tenderers are to note that allowance must be made under this item and / or the appropriate rates, for all costs incurred as a result of complying with these clauses. It shall also cover liaison with the services organisations and accommodation of their work gangs / contractors on site.

PS.3 WATERMAINS

PS.3.1 General

Tenderer's attention is drawn to the following points regarding the watermains to be installed as part of this contract.

[Note: It is important to briefly describe the work envisaged and the time required for this work where other organisations are involved. Particular attention should be paid to tie-ins to the existing live mains which normally have to be done by the Water Supply Branch even if the installation of the new main is included in the contract.]

PS.3.2 Water Main Valve Access

Due to the dangerous situation occurring when water main valves are covered over, the Contractor shall maintain access to all water main valves at all times. During asphalt layer work, after each pass by the paving machine, the valves shall be exposed and access maintained in a safe condition.

Whatever method the Contractor chooses to use for this work, the cost of raising the valves from existing level to ultimate level shall be paid only once, irrespective of the number of times the valve is uncovered. Spacer rings required for the height adjustment of valve covers shall be supplied by the Ethekwini Water Services Directorate. Tolerances on valve cover levels shall be as specified in clause PH.6.5. Before final setting in position of valve covers the Contractor shall liaise with the Employer's Agent regarding the direction in which covers shall be placed.

PS.3.3 Restriction on Compaction Equipment

The Contractor is to note that existing watermains traverse the site of the works and special care is to be taken in close proximity to these mains and connections. The existing mains and connections shall be proved on site by the Contractor prior to any construction work commencing in the vicinity of the watermains.

Under no circumstances will heavy road-making equipment, other heavy plant or vibratory compaction equipment be permitted to operate within 800 mm vertically or horizontally of the existing mains or connections. The permissible compaction plant within this restricted area shall be the equivalent of a "Bomag 90" under static compaction, or similar approved plant. When the roadworks are far enough advanced to provide a minimum of 800 mm cover to the existing mains, the above restriction will fall away.

The Contractor is to take cognisance of the above requirements when entering rates in the Bill of Quantities and in the programming of the works. No claim for additional payment based on the inability to use plant as a result of the requirements of this clause will be accepted. The Contractor will be held liable for any costs should the watermain or electrical cables be damaged during construction of the road.

PS.4 SEWERS

PS.4.1 Blockage of Foul Water Sewers

The Contractor shall be responsible for ensuring that cementitious sludge, sand and rubble from the works do not enter the foul water reticulation system. The Contractor shall be liable for any costs incurred by the Council or others as a result of blockages in the reticulation system attributed to failure to comply with the above requirement.

PS.5 STORMWATER

PS.5.1 Blockage Stormwater Sewers

The Contractor shall be responsible for ensuring that cementitious sludge, sand and rubble from the works do not enter the stormwater reticulation system. The Contractor shall be liable for any costs incurred by the Council or others as a result of blockages in the reticulation system attributed to failure to comply with the above requirement.

PS.6 ELECTRICAL PLANT

PS.6.1 General

Various types of electrical cables including high voltage, low voltage, street lighting and domestic connection cables are affected by the contract. The laying, relocation and jointing of all cables will be carried out by eThekweni Electricity's work gangs, or agents appointed by them, whilst the excavation and backfilling forms part of this contract. Close liaison will therefore be necessary with eThekweni Electricity throughout the contract.

PS.6.2 Street Lighting

The existing lighting will be removed in stages and replaced in the centre median / intersection corners. Relocation will take place during this contract and be executed by eThekweni Electricity or their agents. It is a requirement that the street lighting be operational at all times.

PS.6.4 Relocation of Existing Services

Should it be necessary to adjust the line, level and / or position of any service not catered for in the contract to enable the construction to proceed the Contractor shall on no account effect such adjustment himself but shall notify the Engineer who will arrange for the work to be carried out at no cost to the Contractor.

PS.7 TELKOM S.A. LIMITED / NEOTEL PLANT

[Briefly describe the work noting all special conditions].

[No work to Telkom / Neotel Plant is envisaged, but the Tenderers attention is drawn to the fact that Telkom / Neotel copper cables and fibre optic cables are existing in the contract area.]

PS.8 CCTV PLANT

[Briefly describe the work noting all special conditions].

[No work to CCTV Plant is envisaged, but the Tenderers attention is drawn to the fact that CCTV cables and fibre optic cables are existing in the contract area.]

PS.9 MANAGEMENT OF THE ENVIRONMENT

The Contractor shall pay special attention to the following:

PS.9.1 Natural Vegetation

The Contractor shall confine his operation to as small an area of the site as may be practical for the purpose of constructing the works.

Only those trees and shrubs directly affected by the works and such others as the Employer's Agent may direct in writing shall be cut down and stumped. The natural vegetation, grassing and other plants shall not be disturbed other than in areas where it is essential for the execution of the work or where directed by the Engineer.

PS.9.2 Fires

The Contractor shall comply with the statutory and local fire regulations. He shall also take all necessary precautions to prevent any fires. In the event of fire the Contractor shall take active steps to limit and extinguish the fire and shall accept full responsibility for damages and claims resulting from such fires which may have been caused by him or his employees.

PS.9.3 Environmental Management Plan

In addition to the above, all requirements according to the Environmental Management Plan as detailed in **C3.4: Particular Specifications**, will be adhered to.

PS.10 OCCUPATIONAL HEALTH AND SAFETY

PS.10.1 General Statement

When considering the safety on site the Contractor's attention is drawn to the following:

Describe issues relating to OH&S and the Regulations

It is a requirement of this contract that the Contractor shall provide a safe and healthy working environment and to direct all his activities in such a manner that his employees and any other persons, who may be directly affected by his activities, are not exposed to hazards to their health and safety. To this end the Contractor shall assume full responsibility to conform to all the provisions of the Occupational Health and Safety Act No 85 and Amendment Act No 181 of 1993,

and the OHS Act 1993 Construction Regulations 2014 issued on 7 February 2014 by the Department of Labour.

For the purpose of this contract the Contractor is required to confirm his status as mandatory and employer in his own right for the execution of the contract by entering into an agreement with the Employer in terms of Section 37(2) of the Occupational Health and Safety Act.

PS.10.2 Health and Safety Specifications and Plans to be submitted at tender stage

PS.10.2.1 Employer's Health and Safety Specification

The Employer's Health and Safety Specification is included in **C3.4: Particular Specifications**.

PS.10.2.2 Tenderer's Health and Safety Plan

At tender stage only a brief overview of the Tenderer's perception on the safety requirements for this contract will be adequate. This will be attached to **T2.2: Contractor's Health and Safety Plan**.

Only the successful Tenderer shall submit a separate Health and Safety Plan as required in terms of Regulation 7 of the Occupational Health and Safety Act 1993 Construction Regulations 2014, and referred to in **T2.2: Contractor's Health and Safety Plan**.

The detailed safety plan will take into consideration the **site specific risks as mentioned under PS.10.1** and must cover at least the following:

- (i) A proper risk assessment of the works, risk items, work methods and procedures in terms of Regulations 9 to 29;
- (ii) Pro-active identification of potential hazards and unsafe working conditions;
- (iii) Provision of a safe working environment and equipment;
- (iv) Statements of methods to ensure the health and safety of subcontractors, employees and visitors to the site, including safety training in hazards and risk areas (*Regulation 7*);
- (v) Monitoring health and safety on the site of works on a regular basis, and keeping of records and registers as provided for in the Construction Regulations;
- (vi) Details of the Construction Supervisor, the Construction Safety Officers and other competent persons he intends to appoint for the construction works in terms of Regulation 8 and other applicable regulations; and
- (vii) Details of methods to ensure that his Health and Safety Plan is carried out effectively in accordance with the Construction Regulations 2014.

The Contractor's Health and Safety Plan will be subject to approval by the Employer, or amendment if necessary, before commencement of construction work. The Contractor will not be allowed to commence work, or his work will be suspended if he had already commenced work, before he has obtained the Employer's written approval of his Health and Safety Plan.

Time lost due to delayed commencement or suspension of the work as a result of the Contractor's failure to obtain approval for his safety plan, shall not be used as a reason to claim for extension of time or standing time and related costs

A generic plan will not be acceptable.

PS.10.3 Cost of compliance with the OHSA Construction Regulations

The rates and prices tendered by the Contractor shall be deemed to include all costs for conforming to the requirements of the Act, the Construction Regulations and the Employer's Health and Safety Specification as applicable to this contract. Should the Contractor fail to comply with the provisions of the Construction Regulations, he will be liable for penalties as provided in the Construction Regulations and in the Employer's Health and Safety Specification.

Items that may qualify for remuneration will be specified in the Employer's Health and Safety Specification.

PS.11 SITE SECURITY

The contractor shall, for the duration of the contract, provide sufficient security and watchmen to adequately ensure the safety and protection of works, the Contractor's staff, including local labour and subcontractors, and all site plant and construction equipment required for the works.

Site security, in conjunction with the SAPS (where necessary), shall be responsible for removal of destructive elements, that may interrupt the progress of the contract through acts such as, but not limited to, intimidation, threats of disruption, violent disruption, or criminal and illegal activities by the local community or independent organisation or entities that may result in showing down or partial or total stoppage of the works.

The contractor is to take notes of the prevailing security rate in the eThekweni area together with the allowable PSIRA rates for security when pricing this item

The process of negotiation will not be deemed as work stoppage.

Payment for this item shall be made under Section 1- Preliminary General.

PS.12 PERFORMANCE MONITORING OF SERVICE PROVIDERS

The performance of service providers that have been selected to provide assistance in the provision of a municipal service, otherwise than in circumstances where Chapter 8 of the Municipal Systems Act applies, is required, by Section 116 of the Municipal Finance Management Act, to be monitored and reported on (see Cl.53 of the SCM Policy).

Appropriate key performance indicators (KPIs) for the contract must be set by the Municipality as a yardstick for measuring performance.

Key Performance Indicators (KPIs) will be discussed and agreed with the Contractor before commencement of the contract.

C3.3: STANDARD SPECIFICATIONS

C3.3.1 The Specifications on which this contract is based are the **eThekiwini Municipality's (City of Durban) Standard Engineering Specifications (hereafter referred to as the Standard Engineering Specifications)**. This document is obtainable separately, and Tenderers shall obtain their own copies of the applicable Sections.

Part	Description	Date of Issue	
AB	General Specifications	July	1992
B	Site Clearance	March	1990
C	Concrete Work	February	1987
DA	Earthworks: Bulk	January	1985
DB	Earthworks for Pipe Trenches	July	1992
DC	Earthworks for Concrete Lined Canals		
EB	Graded Crushed Stone	December	1988
ED	Road Asphalt	July	1992
EF	Kerbs and Haunches	July	1992
EG	Sidewalks, Footpaths and Median Areas	July	1992
EH	Steel Guardrails & Conc. Median Barriers		
EJ	Concrete Interlocking Block Surfaces		
F	Protection Works	July	1992
PH	Manholes and Appurtenant Drainage Works	July	1992
S	Reinstatement	March	1993
TA	Road Signs	October	1989
TB	Road Markings	October	1989

C3.3.2 AMENDMENTS TO THE STANDARD SPECIFICATIONS

INTRODUCTION

In certain clauses the standard, standardized and particular specifications allow a choice to be specified in the project specifications between alternative materials or methods of construction and for additional requirements to be specified to suit a particular contract. Details of such alternative or additional requirements applicable to this contract are contained in this part of the project specifications. It also contains additional specifications required for this particular contract.

The number of each clause and each payment item in this part of the project specifications consists of the prefix **PS** followed by a number corresponding to the number of the relevant clause or payment item in the standard specifications. The number of a new clause or payment item, which does not form part of a clause or a payment item in the standard specifications and which is included here, is also prefixed by PS, but followed by a new number which follows on the last clause or item number used in the relevant section of the standard specifications.

PS AB	General Specifications
PS B	Site Clearance
PS C	Concrete Work
PS DA	Earthworks: Bulk
PS DB	Earthworks for Pipe Trenches
PS DC	Earthworks for Concrete Lined Canals
PS DD	Earthworks for Structures
PS EB	Graded Crushed Stone
PS ED	Road Asphalt
PS EF	Kerbs and Haunches
PS EG	Sidewalks, Footpaths and Median Areas
PS EH	Steel Guardrails & Conc. Median Barriers
PS EJ	Concrete Interlocking Block Surfaces
PS F	Protection Works
PS PH	Manholes and Appurtenant Drainage Works
PS S	Reinstatement
PS TA	Road Signs
PS TB	Road Markings

PAYMENT CLAUSES

N.B: Tenderer is to note that it is a requirement that photographic evidence/pictures are provided as proof of works undertaken. These are to include before and after pictures as well as pictures of the works being undertaken and completed works. Tenderers are to include for this requirement in the rates tendered.

1. **PROJECT PHOTOS**

The project photos must be of high-quality (copied onto a flash drive) and must accurately reflect the works being undertaken. It is imperative that photographs are taken prior, during and after completion for each job as per the **job number**. The photographs shall contain the GPS locations, the date and time information stamped on the photo. Only photos with all the information will be recognized. Each photograph is to be labelled and described for ease of reference as part of the portfolio of evidence for each job in the prescribe template.

SECTION 1: PRELIMINARY AND GENERALS

PS.AA.8 Contractors Fixed Obligations

To cover contractors fixed obligations to undertake the said work. Payment shall be made as follows:

50% - on the first payment certificate (provided the contractor has established on site and commenced work to the engineer satisfaction).

35% - When the contract has reached 50% of its duration.

15% - on the final payment certificate (end of contract).

PS.AA.9 Contractor's time related Obligations

To cover contractors time related obligations to undertake the said work. Payments shall be made on an as and when required basis i.e. the contractor must have been issued with an instruction and executed work.

PS.AA.12 Provision for a Community Liaison Officer

As per C1.2.3.1. Payment shall be processed upon submission of the time sheet/register that has been signed and indicating hours worked by the CLO or submission of proof of payment to the CLO for hours worked. The unit of measurement shall be PC sum.

PS.AB.10 Contractors Superintendence

The tendered rate shall include full compensation for the provision of suitable, adequate, and continuous site supervision (qualified site agent and foreman), transportation, and communication requirements for the month that the contractor is physically on site.

PS.11 Provide Security

The tendered rate shall include full compensation for the provision of suitable, adequate, and continuous site supervision (qualified site agent and foreman), transportation, and communication requirements for the month that the contractor is physically on site.

SECTION 2: ASPHALT SURFACE REPAIRS

PS.ED.9. Repair of existing surface (patching and pothole repairs)

(a) *Category B*

The existing asphalt surface (160mm) and crusher run (150mm) layer to be saw cut vertically and removed to spoil, a new layer of crusher run (G2) shall be laid and compacted to 98% Mod AASHTO to a final thickness of 150mm (i.e. compacted thickness). The formation will be compacted prior to placing of the crusher run layer.

The surface of this newly laid crusher layer to be swept of all loose material, a 60% anionic stable emulsion grade track coat applied at an application rate of 0,6l/m² to the bottom and the sides and then patched with minimum two layers of the wearing course layer to a final thickness of 160mm. After compaction the surface of the patch shall be flush with the adjacent road surface.

(b) *Category C*

The existing wearing course (80mm) and crusher run (150mm) layer to be saw cut vertically and removed to spoil. A new layer of crusher run (G2) shall be laid and compacted to 98% Mod AASHTO to a final thickness of 150mm (i.e. compacted thickness). The formation will be compacted prior to placing of the crusher run layer.

The surface of this newly laid crusher run layer to be swept of all loose material, a 60% anionic stable emulsion grade track coat applied at an application rate of 0,6l/m² to the bottom and the sides and then patched with a 80mm layer of asphalt wearing course. After compaction the surface of the patch shall be flush with the adjacent road surface.

(c) *Category D*

The existing wearing course (50mm) and crusher run (150mm) layer to be saw cut vertically and removed to spoil. A new layer of crusher run (G2) shall be laid and compacted to 98% Mod AASHTO to a final thickness of 150mm (i.e. compacted thickness). The formation will be compacted prior to placing of the crusher run layer.

The surface of this newly laid crusher layer to be swept of all loose material, a 60% anionic stable emulsion grade track coat applied at an application rate of 0,6l/m² to the bottom and the sides and then patched with a 50mm layer of asphalt wearing course. After compaction the surface of the patch shall be flush with the adjacent road surface.

(d) *Category E*

The existing wearing course (25mm) and crusher run (100mm) layer to be saw cut vertically and removed to spoil. A new layer of crusher run (G2) shall be laid and compacted to 98% Mod AASHTO to a final thickness of 100mm (i.e. compacted thickness). The formation will be compacted prior to placing of the crusher run layer.

The surface of this newly laid crusher layer to be swept of all loose material, a 60% anionic stable emulsion grade track coat applied at an application rate of 0,6l/m² to the bottom and the sides and then patched with a 25mm layer of asphalt wearing course. After compaction the surface of the patch shall be flush with the adjacent road surface.

(e) *Extruded Asphalt Haunch*

Asphalt to comply with Clause EG.3.1 of the Ethekwini Municipality Standard Departmental Engineering Specification. Standard 150mm high mould to be used with extrusion machine.

The tendered rates shall include for removal of the existing haunch/kerbing to spoil, supplying, processing, laying and compacting 150mm high extruded asphalt haunch, applying prime/tack coat as required. The unit of measurement shall be in metres (m)

PS.ED.10. Repair Surface (Asphalt Only)

(a) *Patching/Pothole*

In the areas to be patched the existing asphalt sides shall be saw cut vertically to the specified depth, be swept of all loose material, a 60% anionic stable emulsion grade track coat applied at

an application rate of 0,6l/m² to the bottom and the sides and then patched with asphalt in layers (as per category specified in bill of quantity) . After compaction the surface of the patch shall be flush with the adjacent road surface.

The existing asphalt pavement which requires patching will be marked by the Engineer. Tendered rates shall include for removal of the insitu layers to spoil and trimming of all sides by any acceptable method of trimming (eg. saw cutting), supplying, applying prime/tack coat as required and supplying and laying of asphalt surface(as per thickness specified in bill of quantity) to the patch or pothole . The unit of measurement shall be in square metres (m²)

PS.ED.11. Saw cutting on asphalt.

Where instructed by the Engineer the contractor shall be required to saw cut by mechanical means on asphalt surfaces between 50 to 100mm on both sides of the kerb and channel. The unit of measurement shall be in metres (m) with each side measured separately.

Tendered rates shall include for the trimming of all sides by any acceptable method of trimming (eg. saw cutting) , the removal of the insitu layers to spoil and transportation to approved dump site.

PS.ED.12. C.P.M.” trench reinstatement

The above work falls under the Department’s “Capacity Process Management” (C.P.M.) initiative. The work involves the reinstatement of trenches excavated by the eThekweni Water Services (EWS) or Water Department or any other services provider that are given permission to trench, in roads and sidewalks throughout the eThekweni Municipality.

The trenches that require reinstatement under this item would be found backfilled to finished road level (by the EWS) with 2 x 150 mm layers of compacted G2 crusher run, as the uppermost construction. The sequence of patching activity therefore under this section will be as follows:-

- (i) Remove compacted crusher run as per asphalt thickness required in terms of road category and remove from site.
 - (a) Category ‘A’ remove 240 mm crusher run.
 - (b) Category ‘B’ remove 160 mm crusher run.
 - (c) Category ‘C’ remove 80 mm crusher run.
 - (d) Category ‘D’ remove 50 mm crusher run.
 - (e) Category ‘E’ remove 25 mm crusher run.
- (ii) Recompact top of crusher run surface.
- (iii) Remove all loose material by sweeping.
- (iv) Trim all sides of the existing asphalt surface to a true vertical line.
- (v) Paint (apply) the vertical sides of the existing asphalt surface and top of existing crusher run with bitumastic emulsion @ 0.6l/m²
- (vi) Supply, place and compact asphalt in layers not exceeding 80 mm thick (after compaction) to 98% Mod. AASHTO as required per road category.
- (vii) Remove spoil and clean up site.

The Unit of measurement shall be in square metres (m²)

PS.ED.14. Supply of cold mix & hot asphalt for repairs

In the areas where temporary patches to existing asphalt is required, the contractor will be required to use cold mix asphalt to undertake the necessary temporary repair works. Tendered rates shall include for removal of the insitu layers to spoil and trimming of all sides by any acceptable method of trimming (eg. saw cutting), supplying and laying of asphalt surface. The unit of measurement shall be in square metres (m²)

PS.ED.5.1.1 Weed killer

The unit of measurement shall be square metres (m²) of the area to be paved and the rate shall cover the supply and two applications of weed killer as instructed by the engineer.

MEASUREMENT AND PAYMENT.

PS.ED. 9 The tendered rates shall Include for removal of the existing haunch/kerbing to spoil, supplying, processing, laying and compacting 150mm high extruded asphalt haunch, applying prime/tack coat as required. The unit of measurement shall be in metres (m)

PS.DD.8.11.1 Supply, Backfilling and Compaction of trenches, reinstatements, undermining using G2, G5 material supplied by the Contractor

The unit measurement for backfilling and compaction shall be the **cubic metre (m³)**
The quantity measured shall be calculated from within the neat outlines of the length, width and height over which the backfilling is constructed. The backfill material shall be supplied by the contractor.

The unit rates shall include for:-

- (1) Supply, loading, hauling, deposition and spreading of backfill material;
- (2) Preparing, shaping, watering, mixing and compacting in layers not exceeding 300mm loose thickness to a minimum density of 95% Mod. A.A.S.H.T.O.

The tendered rate shall include for preparing the work areas, placing and compaction of the following materials:-

(a) G5: The G5 must be placed to cover the whole length and width or as instructed by the engineer, and compacted to a thickness of 1000mm each layer not exceeding 300mm.

(b) G2: The G2 must be placed to cover the whole length and width or as instructed by the engineer, and compacted to a thickness of 150mm.

Items shall be priced for separately in the Bill of Quantities.

SECTION 3: CONCRETE PAVING REPAIRS

PART EG SIDEWALK, FOOTPATHS AND MEDIANS AREAS

EG.5 CONSTRUCTION

EG.5.2 Precast Concrete Slabbed Areas

Precast concrete slabs shall be laid on a 50 mm mat of 5 MPa cement mortar with a fall as indicated on the drawings with joints positioned to match those of the adjacent concrete kerbs tones where applicable. When the area to be paved is curved, the slabs shall be laid in the such a manner that the transverse joints shall be radial from the centre of the curve. When applicable, suitable expansion joints 13 mm wide must be left at ± 18,0 m centres to coincide with expansion

joints left in the kerbs. The joint shall consist of a compressible material and polysulphide filler. When necessary, the concrete slabs shall be cut to size and fitted neatly around existing surface boxes, guard rail posts, etc. Alternatively, for slabs other than exposed aggregate slabs and at the discretion of the Engineer, in-situ concrete, coloured to match adjacent paving slabs, may be used. Where directed by the Engineer the Contractor shall fill in narrow strips etc., not exceeding 100 mm in width, unless otherwise approved by the Engineer, with granolithic concrete 50 mm thick, which shall be compacted and trowelled smooth and flush with the adjoining slabs.

EG.5.2.1 Butt Jointed

Joints between the slabs shall not exceed 3 mm and shall be filled by brushing in a Class II mortar complying with S.A.B.S. 0145 as the work proceeds. All surplus mortar shall be carefully cleaned from the surface of paving, kerbs, etc., before it sets hard. The cement mortar shall be cured for a period of 3 days.

EG.5.2.2 Gap Jointed

Joints shall be neatly lined up in both directions and shall have a uniform width of 8 mm. When precast concrete slabs are laid in conjunction with brick paving to form an overall paving pattern, joints shall have a uniform width of 10 mm.

EG.5.2.2 Gap Jointed (Cont'd)

Grouting shall be by the wet grouting method. The slabs shall be saturated prior to the application of the grout. The wet sand/ cement grout (mortar class II complying with S.A.B.S. 0145) shall be placed into joints using a combination of brush and/or squeegee. A fine hose spray shall be used to remove the excess grout from the surface as the work proceeds. Grouted joints shall be finished to a depth of 2 mm to 5 mm below the paved surface. Each days production shall be grouted that same day unless approved otherwise by the Engineer.

EG.5.3 Brick Paved Areas

Pavers shall be laid to the pattern specified on a bedding of clean coarse sand of nominal compacted thickness 25 mm. Cut edging for adjoining patterns and brick margins shall be achieved by over paving and cutting back with a diamond saw to a neat line. Brick margins shall be laid on a unreinforced grade 20/19 concrete foundation 220 mm x 100 mm. This foundation shall be laid prior to any placing of surface bed or paving to the interior of the margin.

EG.5.3.1 Butt Jointed

Pavers shall be laid as close together as possible with a maximum gap of 3 mm and shall be compacted into position using a flat plate vibrator before the gaps are sealed by brushing in clean coarse sand. Pavers shall be compacted again after the application of the sand and thereafter shall be treated with an approved weedkiller.

EG.5.3.2 Gap Jointed

The bedding shall be treated with an approved weedkiller before the laying of bricks. Pavers shall be laid with a uniform width of joint of between 8 mm and 10 mm in both directions. Grouting shall be by the wet grouting method. The bricks shall be wet prior to application of the wet grout in order to prevent cement absorption. The sand/cement grout (mortar class II complying with S.A.B.S. 0145) shall be placed into the joints using a combination of brush and/or squeegee. A fine hose spray shall be used to remove the excess grout from the brick paved surface as the work proceeds. Grouted joints shall be finished to a depth of 2 mm to 5 mm below the paved surface. Each day's production shall be grouted that same day unless otherwise approved by the Engineer.

EG.8 MEASUREMENT AND PAYMENT

EG.8.2 Precast Concrete Areas

The unit of measurement shall be square metres (m²) of completed area. The rate shall cover formation preparation, all necessary compaction, supplying and laying of the precast slabs on the cement mortar foundation, cutting slabs to size, filling joints with cement mortar and filling with granolithic concrete.

EG.8.3 Expansion Joints

Measurement shall be per metre (m) and shall cover the compressible filler and sealer.

EG.8.4 Brick Paved Areas

The unit of measurement shall be square metres (m²) of completed area and metre (m) of header course. The rate shall cover formation preparation, all necessary compaction, supply and application of weed killer, supply and screeding of sand and supply and placing of bricks, supply and application of wet sand/cement grout. The Contractor must include for any cutting of bricks and for filling irregular areas.

EG.8.5 Asphalt Access Hardening and Scoops

The unit of measurement shall be square metres (m²) of completed area, and the rate shall cover formation preparation, all necessary compaction, supply and application of weed killer, graded crushed stone, protection of adjacent areas and asphalt laid and compacted.

EG.8.6 Concrete Access Hardening and Scoops The unit of measurement shall be square metres (m²) of the completed area. The rate shall cover formation preparation, all necessary compaction, supply and application of weed killer, supply, laying and compaction of grade 20/13 concrete, V-jointing where necessary and wood float finish.

EG.8.6 Concrete Access Hardening and Scoops

The unit of measurement shall be square metres (m²) of the completed area. The rate shall cover formation preparation, all necessary compaction, supply and application of weed killer, supply, laying and compaction of grade 20/13 concrete, V-jointing where necessary and wood float finish.

PS.ED.13. Saw cutting on concrete.

Where instructed by the Engineer the contractor shall be required to saw cut by mechanical means on concrete surfaces between 50 to 100mm on both sides of the kerb and channel. The unit of measurement shall be in metres (m) with each side measured separately. Tendered rates shall include for the trimming of all sides by any acceptable method of trimming (e.g. saw cutting), the removal of the insitu layers to spoil and transportation to approved dump site.

PS.ED.14. Cast insitu concrete paving to suite precast concrete paving.

Refer clause EG.8.6 of the eThekweni Municipality Civil Engineering specifications. The rate shall also include removal of existing material to spoil at an approved tip site.

PS.ED.15. Supply and lay new figure 6 barrier Kerbs.

The unit of measurement shall be in meters (m) and the rate shall cover the supply of all precast (figure 6 barrier kerb items), including transporting, loading, laying and jointing (including all

expansion joints, cast insitu concrete foundation, including mixing, laying, float finishing, setting out kerb and channel haunches, including the construction of the channel haunch, all supervision, plant, testing, labour, equipment, materials, protection and incidentals to complete the work as specified.

PS.ED.16. Supply and lay new figure 8 mountable Kerbs.

Same as (PS.ED.15.) above but for figure 8 mountable kerb.

EG.8.3 Expansion joints

Where existing expansion joints in concrete and brick paved areas are removed or damaged during reinstatement works, and then these are to be replaced. The joint is to consist of the following elements: -

The sealer used in the expansion joints shall be polysulphide conforming to SABS.110/1973. The joint filler shall be of compressible material approved by the Engineer. The joint is to extend through the sand/cement bedding. Expansion joints shall be at ± 7 m centres or in positions as indicated by the Engineer on site.

NOTES:

- (1) All joints to be between 12 and 15 mm wide x 100 mm deep.
- (2) Make good where paving is damaged by cutting, viz. chips, spalling, loose paving etc.
- (3) A 2 mm recessed finish to the sealer is required.
- (4) All cutting residue must be cleaned off paving surfaces before it dries out (i.e. all hardened surfaces, including concrete channels, sidewalks, median areas etc., must be hosed down directly behind the cutting operation). NO residue is to be left to dry out.
- (5) Sealing of open joint is to be completed within 24 hours of cutting.
- (6) Minimum thickness of sealer to be 10 mm.

PS.ED.17. Reset existing paving brick

The unit of measurement shall be in square meters (m²) of completed area. The rate shall cover formation preparation, all necessary compaction and materials, resetting of bricks to original level, cutting of bricks to size, filling joints with cement mortar and filling granolithic concrete. (Rate excludes supply of bricks)

PS.ED.18. Precast concrete barriers

The tendered rate shall include for the supply and placing of each of the precast concrete barriers as per the attached drawing. The unit of measurement shall be per unit supplied and placed.

SECTION 4: ACCESS HARDING

EG. 5.4 The specification shall comply with the requirements of clause EG.5.1 with the exception that the pavement layer shall be as follows:

- a) Pedestrian: Graded crushed stone 100 mm thick with an asphalt layer 25 mm thick.
- b) Residential: Graded crushed stone 150 mm thick with an asphalt layer 50 mm thick.
- c) Commercial: Graded crushed stone 150 mm thick with an asphalt layer 80 mm thick.
- d) Industrial: Graded crushed stone 150 mm thick.

The unit of measurement shall be square metres (m²) of completed area, and the rate shall cover formation preparation, all necessary compaction, supply and application of weed killer, graded crushed stone, protection of adjacent areas and asphalt laid and compacted.

EG.5.5 Concrete Access Hardening and Scoops

Concrete access hardening and scoops shall consist of cast insitu grade 20/13 concrete laid either directly onto the compacted subgrade or onto a graded crushed stone base. The concrete mix, mixing, batching, transporting, placing compaction and curing shall comply with the requirements of part C Concrete Work. The surface of the concrete shall have a wood float finish.

Pavement layer for the various scoop types shall be:

- a) Pedestrian and Residential: Concrete 100 mm thick.
- b) Commercial: Graded crushed stone 150 mm thick with concrete 100 mm thick.
- c) Industrial: Concrete 225 mm thick.

The unit of measurement shall be square metres (m²) of the completed area. The rate shall cover formation preparation, all necessary compaction, supply and application of weed killer, supply, laying and compaction of grade 20/13 concrete, V-jointing where necessary and wood float finish

As per standard engineering specification EG 5.4 and EG5.5.

SECTION 5: STORMWATER INFRASTRUCTURE REPAIRS

PART PH: MANHOLES AND APPERNANT DRAINAGE

PS PH.5.12 Remove damaged covers, splay, inlet lids, kerbs, support beams and bollards to spoil (incl polymer items)

The work shall include the removal, hauling and disposal of 1200x1200 and 750x750 concrete cover, splays, kerbs, support beams and bollards (incl polymer items) to the designated dump site.

PS PH.5.13 Remove and Reset existing Pre-cast and or Polymer Products

The tendered rate shall include for the removal of the existing pre-cast component and reset it to suit the original position including any brick or mortar work.

PS PH.5.14 Supply and Place new Precast Concrete Element to Existing or Modified Stormwater Inlets

The tendered rate shall include for the supply and placing of each item as described in the bill including reinstating and making good the surrounding surfaces. Where existing kerbs up to 5m on either side of the inlet are damaged, the contractor is to replace the kerbs accordingly to match the existing (Including 150mm x 150mm concrete haunching behind kerbing at joints only).

PS PH.5.15 Supply and Place new Precast Polymer Elements to Existing or Modified Stormwater Inlets

The tendered rate shall include for the supply and placing of each item as described in the bill including reinstating and making good the surrounding surfaces. Where existing kerbs up to 5m

on either side of the inlet are damaged, the contractor is to replace the kerbs accordingly to match the existing (Including 150mm x 150mm concrete haunching behind kerbing at joints only).

PS PH.5.16 Brickwork

The contractor shall include for the supply and laying of the Brickwork including mortar were necessary.

PS PH.5.17 Supply and Place new Grid Inlet to Existing or Modified Stormwater Inlets

The tendered rate shall include for the supply and placing of each grid inlet as described in the bill including reinstating and making good the surrounding surfaces.

PS PH.5.18 Supply and Install 100mm cast iron pipes

The tendered rate shall include for the supply and placing of each grid inlet as described in the bill including reinstating and making good the surrounding surfaces.

PS PH.5.19 Supply and Install cast iron couplers for 100mm cast iron pipe

The tendered rate shall include for the supply and placing of each grid inlet as described in the bill including reinstating and making good the surrounding surfaces.

MEASUREMENT AND PAYMENT

PS PH.8.10. Remove damaged covers, splay, inlet lids, kerbs, support beams and bollards to spoil (incl polymer items)

The unit of measurement shall be the number of light duty or heavy duty covers, splays, lids, beams and bollards removed. The contractor is to ensure that all manholes being repaired are cleared off any debris and damaged infrastructure (damaged precast lids, splays and covers).

PS PH.8.11 Remove and Reset existing Pre-cast and or Polymer Products

The unit of measurement shall be per component removed and reset. The contractor is to ensure that all manholes being repaired are cleared off any debris and damaged infrastructure.

PS PH.8.12 Supply and Place new Precast Concrete Element to Existing or Modified Stormwater Inlets

The unit of measurement shall be per unit supplied and placed.

PS PH.8.13 Supply and Place new Precast Polymer Elements to Existing or Modified Stormwater Inlets

The unit of measurement shall be per unit supplied and placed.

PS PH.8.14 Brickwork

The unit of measurement shall be number of bricks used (No). The tendered rate for brickwork shall include for the supply and laying of the Brickwork including mortar were necessary.

PS PH.8.15 Supply and Place new Grid Inlet to Existing or Modified Stormwater Inlets

The unit of measurement shall be per unit supplied and placed.

PS PH.8.16 Supply and Install 100mm cast iron pipes

The unit of measurement shall be per unit supplied and placed.

PS PH.8.17 Supply and Install cast iron couplers for 100mm cast iron pipe

The unit of measurement shall be per unit supplied and placed.

SECTION 6: STORMWATER CLEANING

PART PH: MANHOLES AND APPERNANT DRAINAGE

PS PH.5.20 Clearing of Blockages in Manholes and Inlets

The contractor shall be required to clear blockages in the stormwater manhole/s and inlet/s. The tendered rate shall allow for the cleaning/unblocking of manholes and inlets as per depth category of such structure. It shall also include the cleaning of the immediate (2m either side) incoming and outgoing sections of the connection pipe to ensure free and unobstructed flow of stormwater. The rate shall also include cleaning of the kerb inlet area (10m either side) of any sand, encroachments, weeds, litter, illegal dumping and debris.

PS.PH.5.21 Clearing of Blockages in pipes

The contractor shall be required to clear blockages in the stormwater pipes. The tendered rate shall include for the clearing/cleaning (in both soft or hard material) the full length of the blockage in the pipe using pressure jetting and shall be measured per meter per pipe size cleaned and unblocked from manhole to manhole (i.e the length between manhole inlets). Specialised vehicle and equipment to clear pipes and manholes. High Pressure capacity should be a MINIMUM 262 litres per minute with pressure of 120 to 200 bars with a tank of 5000 litres. It will also include the removal of all loosened material and debris from the closest manhole interconnecting manholes/catch pits/inlets. The rate shall also include for the cleaning, removal, loading, transportation and disposal of silt, debris etc. To an approved tip site. All spoil shall be removed immediately (by end of shift) off site within 24 hours of same being surfaced

PS. PH.5.22 Clearing of Stormwater Pipe Culvert

The contractor shall be required to clear the blockages in the stormwater pipe culvert/s. The tendered rate shall include for the clearing/cleaning of the blocked box/portal culverts using pressure jetting or any other method approved by the Engineer.

PS.PH.5.23 Clearing of Stormwater Box/Portal Culverts

The contractor shall be required to clear the blockages in the stormwater box/portal culvert/s. The tendered rate shall include for the clearing/cleaning of the blocked box/portal culverts using pressure jetting or any other method approved by the Engineer. All spoil shall be removed by the end of the day/shift.

PS.PH.5.24 Clearing of Concrete Lined Open Drains (U drains, V drains, Canals, Chambers and under driveway slabs)

The tendered rate shall include for the clearing/cleaning of lined open drains. All spoil shall be removed by the end of shift/day. All blocked stormwater lined open drains shall be jointly pre and post inspected by the Contractor and the Engineer/Engineers representative for acceptance and

payment purpose. Quantities of all material to be removed shall be measured and agreed with the Engineer before disposal.

PS.PH.5.25 Clearing of Earth Drains

The contractor shall be required to clear earth drains, earth canals. This work will be undertaken manually or by mechanical means (TLB, excavator, bob cat). It will also include the removal of all loose material. All spoil shall be removed by the end of shift/day. All blocked stormwater earth drains/canals shall be jointly pre and post inspected by the Contractor and the Engineer/Engineers representative for acceptance and payment purpose. Quantities of all material to be removed shall be measured and agreed with the Engineer before disposal.

PS PH.5.26 Cleaning of the Concrete Lined Canal (entire canal)

All litter, illegal dumping, bottles, plastic, paper, all rubble, sand silt and foreign material including but not limited to car parts, metal objects, tree stumps as well as hyacinth, overgrowth and other vegetation found in the canal must be removed and disposed of to the approved municipal dump site. The contractor must also clean all culverts, pipes, open and closed drains entering and exiting the canal to ensure no blockages 300mm from the outlet and removal of blockages, debris and all rubble for a maximum of 2m from the centre point to expose the outlet pipe as well as remove any silt that is obstructing the flow of the water.

PS PH.5.27 Vegetation control Clearance Grass Cutting

Clearance of the site must be from the edge of the canal or other designated point as specified by the Engineer to the boundary wall, road edge or sidewalk (including the sidewalk), including all over passes, verges, and foot bridges passing over the canal/stormwater infrastructure. All grass must be cut and trimmed up to 10mm (grass cutting) and to be removed.

The unit of measurement is in square meters of the grass cut and shall include that all grass cut must be raked and removed to an approved municipal dump site at the end of each day on site.

PS PH.5.28 Vegetation control Clearance Bush Cutting

Clearance of the site must be from the edge of the canal or other designated point as specified by the Engineer to the boundary wall, road edge or sidewalk (including the sidewalk), including all over passes, verges, and foot bridges passing over the canal/stormwater infrastructure. All bush with a stem less or equal to 100mm diameter to be cut or trimmed, all bush to be cut down and removed. Extra precaution must be taken when cutting trees, to not remove indigenous trees. All spoil must be removed to an approved municipal dump site at the end of each day on site.

The unit of measurement is in square meters (m²) of the grass cut and shall include that all grass cut must be raked and removed to an approved municipal dump site at the end of each day on site

PS PH.5.29 CCTV Inspection and Reporting of Blockages in Pipes, Culverts, Chambers

The contractor shall be required to undertake CCTV footage of requested pipes, culverts and/or chambers as requested by the Engineer. A report with footage is to be submitted by the contractor within 5 days.

The unit of measurement shall be per meter (m) and shall include full compensation for all labour, equipment and transport required to undertake this activity. Payment for this item shall only be made upon successful completion to the satisfaction and acceptance of the Engineer.

PS PH.5.30 Spraying of the hyacinth/weeds

The canal must be sprayed with suitable hyacinth/weeds control chemicals for each cyclic cleaning. The spray must be environmental as well as aquatic friendly and to be approved by the Engineer. Spraying must be applied on the canal wall cracks/joints including wall edges at a distance of 500 from both walls edge. The contractor or contractor appointed service provider must have a valid Scheduled Trade and Occupations Bylaws permit and valid Pest Control Operators Licence to apply herbicide.

PS PH (S6-15) Remove sand from road channels and edges

The contractor shall remove sand/silt from the road reserve to the approved dump site.

The unit of measurement shall be in meters (m) of road channel cleaned. The tendered rate shall include for removal to an approved municipal dump site at the end of each day on site. All road channel and edges shall be jointly pre and post inspected by the Contractor and the Engineer/Engineers representative for acceptance and payment purpose. Quantities of all material to be removed shall be measured and agreed with the Engineer before disposal.

MEASUREMENT AND PAYMENT

PS PH.8.17 Clearing of Blockages in Manholes and Inlets

The unit of measurement shall be per unit cleaned manhole (as described in PS PH.5.20) and shall include removal, loading, transportation and disposal of silt, debris etc. All spoil shall be removed by the end of shift/day. All manholes and inlets shall be jointly pre and post inspected by the Contractor and the Engineer/Engineers representative for acceptance and payment purposes.

The unit measurement is per meter of pipe cleaned/unblocked per pipe size from manhole to manhole (i.e the length between manhole inlets):-

- 0mm – 450mm diameter pipe
- <450mm – 600mm diameter pipe
- <600mm – 900mm diameter pipe

PS.PH.8.18 Clearing of Blockages in pipes

The unit of measure shall be per cleaned/unblocked length of pipe per pipe size using pressure jetting. The rate shall also include for the cleaning, removal, loading, transportation and disposal of silt, debris etc. to an approved tip site. All blocked stormwater pipes shall be jointly pre and post inspected by the Contractor and the Engineer/Engineers representative for acceptance and payment purpose.

The unit measurement is per meter of pipe cleaned/unblocked per pipe size from manhole to manhole (i.e the length between manhole inlets):-

- 0mm – 450mm diameter pipe
- <450mm – 600mm diameter pipe
- <600mm – 900mm diameter pipe

S. PH.8.19 Clearing of Stormwater Pipe Culvert

The unit of measure shall be per cubic meter removed/cleared and the rate shall also include for the cleaning, removal, loading, transportation and disposal of silt, debris etc. to an approved tip site. A pipe culvert is defined as any round pipe with a diameter of 900mm or more. All spoil shall be removed by the end of shift/day. All blocked stormwater pipe culverts shall be jointly pre and post inspected by the Contractor and the Engineer/Engineers representative for acceptance and payment purpose. Quantities of all material to be removed shall be measured and agreed with the Engineer before disposal.

PS.PH.8.20 Clearing of Stormwater Box/Portal Culverts

The unit of measure shall be per cubic meter removed/cleared and the rate shall also include for the cleaning, removal, loading, transportation and disposal of silt, debris etc. to an approved tip site. All spoil shall be removed by the end of shift/day. All blocked stormwater box/portal culverts shall be jointly pre and post inspected by the Contractor and the Engineer/Engineers representative for acceptance and payment purpose. Quantities of all material to be removed shall be measured and agreed with the Engineer before disposal.

PS.PH.8.21 Clearing of Concrete Lined Open Drains (U drains, V drains, Canals, Chambers and under driveway slabs)

The unit of measure shall be per cubic meter removed/cleared and the rate shall also include for the cleaning, removal, loading, transportation and disposal of silt, debris etc. to an approved tip site. All spoil shall be removed by the end of shift/day. All blocked stormwater lined open drains shall be jointly pre and post inspected by the Contractor and the Engineer/Engineers representative for acceptance and payment purpose. Quantities of all material to be removed shall be measured and agreed with the Engineer before disposal.

PS.PH.8.22 Clearing of Earth Drains

The unit of measure shall be per cubic meter removed/cleared and the rate shall also include for the cleaning, removal, loading, transportation and disposal of silt, debris etc. to an approved tip site. All spoil shall be removed by the end of shift/day. All blocked stormwater earth drains/canals shall be jointly pre and post inspected by the Contractor and the Engineer/Engineers representative for acceptance and payment purpose. Quantities of all material to be removed shall be measured and agreed with the Engineer before disposal.

PS PH.8.23 Cleaning of the Concrete Lined Canal (entire canal)

The unit of measure shall be per cubic meter removed/cleared and the rate shall also include for the cleaning (labour intensive or mechanical means), removal, loading, transportation and disposal of silt, debris etc. to an approved tip site. All spoil shall be removed by the end of shift/day. All blocked stormwater concrete lined canals shall be jointly pre and post inspected by the Contractor and the Engineer/Engineers representative for acceptance and payment purpose. Quantities of all material to be removed shall be measured and agreed with the Engineer before disposal.

PS PH.8.24 Vegetation control Clearance Grass Cutting

The unit of measurement is in square meters of the grass cut and shall include that all grass cut must be raked and removed to an approved municipal dump site at the end of each day on site.

PS PH.8.25 Vegetation control Clearance Bush Cutting

The unit of measurement is in square meters (m²) of the grass cut and shall include that all grass cut must be raked and removed to an approved municipal dump site at the end of each day on site

PS PH.8.26 CCTV Inspection and Reporting of Blockages in Pipes, Culverts, Chambers

The unit of measurement shall be per meter (m) and shall include full compensation for all labour, equipment and transport required to undertake this activity. Payment for this item shall only be made upon successful completion to the satisfaction and acceptance of the Engineer.

PS PH.8.27 Spraying of the hyacinth/weeds

The measurement unit used for spraying shall be in square meters (m²) and shall include compensation for all labour, PPE, safety requirements, material, chemicals, equipment, haulage and dumping of waste as well as communication, submissions and all related costs to complete the works.

PS SM.8.1 Remove sand from road channels and edges

The unit of measurement shall be in meters (m) of road channel cleaned. The tendered rate shall include for removal to an approved municipal dump site at the end of each day on site. All road channel and edges shall be jointly pre and post inspected by the Contractor and the Engineer/Engineers representative for acceptance and payment purpose. Quantities of all material to be removed shall be measured and agreed with the Engineer before disposal.

SECTION 7: ROAD MARKING

PS TB 1. FAULTY WORKMANSHIP OR MATERIALS

If any material which does not comply with the requirements is delivered to the site, or is used in the works, or if any work of an unacceptable quality is carried out, such material or work shall be removed, replaced or repaired as required by the Engineer at the contractor's own cost.

Rejected traffic markings and paint which has been splashed or dripped onto the pavement, Kerbs, structures or other such surfaces, shall be removed by the contractor at his own cost, in an approved manner so that the markings of spilt paint will not show up at all.

PS TB 2. PROTECTION

After the paint has been applied, the traffic markings shall be protected against damage by traffic or other causes. The contractor shall be responsible for erecting, placing and removing all warning boards, flags, cones, barricades and other protective measures which is necessary in terms of any statutory provisions and/or as may be recommended in the NORTHERN African Development Community Road Traffic Signs Manual, Vol.2 Chapter 13. Paint which has been damaged splashed or dripped onto the pavement or other surfaces shall be removed, to the satisfaction of the Engineer, by the Contractor at his own expense.

PS TB 3. SUPPLY OF PAINT

All paint shall comply with SABS 731. The paint shall be delivered at the site in sealed containers bearing the name of the manufacturer and the type of paint and the contractor shall at his own expense provide samples for testing as required by the Engineer.

PS.TB.2. WEATHER LIMITATIONS

Road-marking shall not be applied to a damp surface or at temperatures lower than 10° or when the relative humidity exceeds 90% or when, in the opinion of the Engineer, the wind strength is such that it may adversely affect the painting operation.

PS.TB.3. MECHANICAL EQUIPMENT FOR PAINTING

The equipment shall consist of an apparatus for cleaning the surfaces, a mechanical road-painting machine and all additional hand-operated equipment necessary for completing the work. The mechanical road-marking machine shall apply the paint to a uniform film thickness at the rates of application specified hereinafter, without the paint running or splashing. The machine shall further be capable of painting lines of different widths by adjusting the spray jets on the machine or by means of additional equipment attached to the machine.

PS.TB.4. SETTING OUT THE ROAD MARKINGS

The lines, symbols, figures or marks shall be premarked by means of paint spots of the same colour as that of the final lines and marks. These paint spots shall be at such intervals as will be final lines and markings.

PS TB.5 REMOVAL OF EXISTING ROAD MARKINGS

Existing road markings shall be removed where required by the Engineer. The method shall be by using black painting, grit blasting or similar approved method which will not permanently damage the road surface. The contractor shall, before commencing with the removal of the markings submit details and if called upon to do so arrange for a test section to be carried out.

The contractor shall take all necessary precautions to avoid damage to the public traffic during the removal of existing road markings by using a screen.

All loose material remaining on the road after obliteration of markings shall be suitably swept up and removed from site by 16:00 on the day that it is deposited on the road, to prevent clogging up the drainage systems.

CONSTRUCTION/MEASUREMENT AND PAYMENT

Add the following clauses:

PS TB.8.4 Remove existing lane, edge and painted island lines by grit blasting

The contractor shall remove existing lane lines and painted islands by sandblasting. The contractor shall ensure that the method of sandblasting used will not damage the road surface permanently

The contractor shall take necessary precautions to avoid damage to the public traffic during the removal of existing markings.

All loose material remaining on the road after obliteration of markings shall be suitably disposed of to avoid clogging the drainage systems.

The unit of measurement shall be the area in square metres(m²) of markings removed to the satisfaction of the Engineer.

The rate shall include for all the successful removal of the paint on the road surface, the continual sweeping and removal of grit and screening of the sand blasting apparatus to ensure that the dust from the operation does not become a hazard and the disposal of all loose material from the road.

PS TB.8.5 Setting out and pre-marking the lines

The unit of measurement for setting out lines shall be the metre (m) of lines set out and marked. Where two or three lines are to be painted next to each other, the setting out of lines shall be measured only once.

The tendered rate shall include full compensation for setting out and premarking the lines as specified, including materials.

PS.TB.8.6 Removal of existing road markings by black painting

The works undertaken shall be in accordance with PS.TB.5. The unit of measurement shall be the area in square metres(m²). The rate shall include for the successful removal of existing road markings by the use of black paint.

PS TB.8.1.1 Lines

The unit of measurement shall be the metre (m). Separate items will be scheduled for each specified width, type of material, and colour of line and the quantity paid for shall be the actual length of line painted in accordance with the instructions of the Engineer, excluding the length of gaps in broken lines. The rates shall include for procuring and furnishing all material, including the retro-reflective beads in the case of retro-reflective paint, and the necessary equipment, and for painting, protecting and maintenance as specified, including the setting-out and premarking of the lines.

SECTION 8: RETAINING STRUCTURES

PART F: PROTECTION WORKS

PS F.5.8 Supply and Lay Geotextile Blanket

The tendered rate shall include full compensation for excavating and preparing the work areas, supplying and laying Geotextile blanket.

PS.F.5.9 Loffelstein Blocks -TB300

The contractor shall be required to supply and lay stackable TB300 loffelstein blocks (or approved equivalent) inclusive of sand filling as per detail 12:1 cement stabilised geofabric extended into fill and laid under 3rd row. Kaymatt U44 or approved weepholes at 1.0m c/c. Base type B including Mesh Ref 245, excavation and compaction of subgrade to 95% MOD A.A..S.H.T.O

PS.F.5.10 Loffelstein Blocks – TB500

The contractor shall be required to supply and lay stackable TB500 loffelstein blocks (or approved equivalent) inclusive of sand filling as per detail 12:1 cement stabilised geofabric extended into fill and laid under 3rd row. Kaymatt U44 or approved weepholes at 1.0m c/c. Base type B including Mesh Ref 245, excavation and compaction of subgrade to 95% MOD A.A..S.H.T.O

PS.F.5.11 Dismantle Gabion Structure and recover Stone

The contractor shall be required to salvage gabion stone from collapsed gabion structure/s (failed structures) and set aside for re-use. The failed gabion structure will require the contractor to undo the baskets and remove all stone from the baskets. The stone is to be set aside for re-use. Should all the stone not be re-used, the contractor is to deliver the unused stone to a location as specified by the Engineer for storage.

PS.F.5.12 Supply and Lay Dumprock

The contractor shall supply and lay dumprock as specified by the Engineer to create a level base with which to construct the retaining structure.

MEASUREMENT AND PAYMENT

PS F.8.9 Supply and Lay Geotextile Blanket

The unit of measurement shall be in square metre (m²).

PS.F.8.10 Loffelstein Blocks -TB300

The unit of measurement shall be the metre square (m²). The rate shall cover the supply and installation of TB300 blocks as specified in PS.F.5.9

PS.F.8.11 Loffelstein Blocks – TB500

The unit of measurement shall be the metre square (m²). The rate shall cover the supply and installation of TB500 blocks as specified in PS.F.5.10

PS.F.8.12 Dismantle Gabion Structure and recover Stone

The unit of measurement shall be cubic meter (m³). The rate shall cover the recovering of the

stone to stockpile for reuse. Where specified by the Engineer, stone is to be moved to a storage location. Quantities of all material(stone) shall be measured and agreed with the Engineer before any re-use and/or storage.

PS.F.8.13 Supply and Lay Dumprock

The unit of measurement shall be cubic meter (m³). The quantity measured shall be calculated from within the neat outlines of the length, width and height over which the backfilling is constructed. The tendered rate shall include for supplying the material, preparing the work areas and placing.

SECTION 9: FENCING

PS B.8.5.1 Remove existing damaged sections of diamond mesh wire fencing or barb wire

The tendered rate shall include full compensation for removing damaged sections of existing diamond mesh wire fence (including razor coil and or flat wrap) or barb wire and spoiling at an approved tip site. The unit of measurement shall be in meters (m).

PS B.8.5.2 Remove existing damaged sections of concrete panel fencing

The tendered rate shall include full compensation for removing damaged sections of existing concrete panel fence and spoiling at an approved tip site. The unit of measurement shall be per number of panels removed (no.).

PS B.8.5.3 Remove existing damaged sections of concrete palisade fencing

The tendered rate shall include full compensation for removing damaged sections of existing concrete palisade fence and spoiling at an approved tip site. The unit of measurement shall be in meters (m)

PS B.8.5.4 Remove existing damaged sections of Nylofor 3-M galvanised, PVC coated fencing

The tendered rate shall include full compensation for removing damaged sections of existing Nylofor 3-M galvanised, PVC coated fence and spoiling at an approved tip site. The unit of measurement shall be in meters (m).

PS B.8.5.5 Remove existing damaged diamond mesh wire fence concrete posts

The tendered rate shall include full compensation for removing existing damaged diamond mesh wire fence concrete posts (major posts, intermediate posts and stays), and spoiling at an approved tip site. The unit of measurement shall be per number (no.).

PS B.8.5.6 Remove existing damaged concrete posts for palisade fence

The tendered rate shall include full compensation for removing existing damaged concrete posts for palisade fence and spoiling at an approved tip site. The unit of measurement shall be per number (no.).

PS B.8.5.7 Remove existing damaged concrete posts for concrete panel fence

The tendered rate shall include full compensation for removing existing damaged concrete posts for concrete panel fence and spoiling at an approved tip site. The unit of measurement shall be per number (no.).

PS B.8.5.8 Remove existing damaged Bekafix posts for Nylofor 3-M fence

The tendered rate shall include full compensation for removing existing damaged Bekafix posts for 3-M Nylofor fence and spoiling at an approved tip site. The unit of measurement shall be per number (no.).

PS F Protection Works

Add the following clauses:

PS F.8.9 Supply all material and fix 2m high plastic-coated diamond mesh wire fence

The tendered rate shall include full compensation for supplying all material and fixing 2m x 63mm x 3.15mm plastic coated diamond mesh fence including straining wire, excluding the posts. The fence shall be properly fixed against plum concrete major posts, intermediate posts and stays using straining wire. The unit of measurement shall be meters (m).

PS F.8.10 Supply all material and fix 1.8m high plastic-coated diamond mesh wire fence

The tendered rate shall include full compensation for supplying all material and fixing 1.8m x 63mm x 3.15mm plastic coated diamond mesh fence including straining wire, excluding the posts. The fence shall be properly fixed against plum concrete major posts, intermediate posts and stays using straining wire. The unit of measurement shall be meters (m).

PS F.8.11 Supply all material and fix 1.8m high 50mm x 50mm Class A diamond mesh wire fence

The tendered rate shall include full compensation for supplying all material and fixing 1.8m high 50mm x 50mm Class A diamond mesh fence including straining wire, excluding the posts. The fence shall be properly fixed against plum concrete major posts, intermediate posts and stays using straining wire. The unit of measurement shall be meters (m).

PS F.8.12 Supply all material and erect 3000mm x 2430mm Nylofor 3-M fence

The tendered rate shall include full compensation for supplying all material and erecting 3000mm x 2430mm Nylofor 3-M galvanised, PVC coated fence, excluding the posts. The fence shall be erected as per Drawing No. IPR.8212cd. The unit of measurement shall be meters (m).

PS F.8.13 Supply and erect pre-stressed major concrete posts (3100mmx 100mm x 100mm)

The tendered rate shall include full compensation for supplying and erecting pre-stressed (3100mmx 100mm x 100mm) major concrete posts including excavation and concreting as per Drawing No. 38 583. The posts shall be plum, and the excavated material shall be disposed of at an approved tip site. The unit of measurement shall be per number (no.).

PS F.8.14 Supply and erect pre-stressed major concrete posts (2900mmx 100mm x 100mm)

The tendered rate shall include full compensation for supplying and erecting pre-stressed (2900mm x 100mm x 100mm) major concrete posts including excavation and concreting as per Drawing No. 38 583. The posts shall be plum, and the excavated material shall be disposed of at an approved tip site. The unit of measurement shall be per number (no.).

PS F.8.15 Supply and erect 75mm x 75mm x 2700mm concrete stays

The tendered rate shall include full compensation for supplying and erecting 75mm x 75mm x 2700mm concrete stays including excavation and concreting as per Drawing No. 38 583. The stays shall be plum, and the excavated material shall be disposed of at an approved tip site. The unit of measurement shall be per number (no.).

PS F.8.16 Supply and erect 75mm x 75mm x 2700mm concrete intermediate posts

The tendered rate shall include full compensation for supplying and erecting 75mm x 75mm x 2700mm concrete intermediate posts including excavation and concreting as per Drawing No. 38 583. The stays shall be plum, and the excavated material shall be disposed of at an approved tip site. The unit of measurement shall be per number (no.).

PS F.8.17 Supply and erect 75mm x 75mm x 3100mm concrete intermediate posts

The tendered rate shall include full compensation for supplying and erecting 75mm x 75mm x 3100mm concrete intermediate posts including excavation and concreting as per Drawing No. 38 583. The stays shall be plum, and the excavated material shall be disposed of at an approved tip site. The unit of measurement shall be per number (no.).

PS F.8.18 Supply all material and erect galvanised and PVC coated Bekafix posts

The tendered rate shall include full compensation for supplying all material and erecting 3200mm galvanised, PVC coated Bekafix posts, including cap, metal fixators, excavation and concreting as per Drawing No. IPR.8212cd. The posts shall be plum, and the excavated material shall be disposed of at an approved tip site. The unit of measurement shall be per number (no.).

PS F.8.19 Reset existing fencing posts for diamond mesh wire fence

The tendered rate shall include full compensation for resetting undamaged concrete posts or stays for diamond mesh wire fence back into position and reinstating the fence onto the post. The unit of measurement shall be per number (no.).

PS F.8.20 Reset existing fencing posts for concrete palisade fence

The tendered rate shall include full compensation for resetting undamaged concrete palisade fence posts back into position. The unit of measurement shall be per number (no.).

PS F.8.21 Reset existing fencing posts for concrete panel fence

The tendered rate shall include full compensation for resetting undamaged concrete panel fence posts back into position. The unit of measurement shall be per number (no.).

PS F.8.22 Reset existing fencing Bekafix posts for Nylofor 3-M fence

The tendered rate shall include full compensation for resetting undamaged Bekafix posts for Nylofor 3-M fence back into position. The unit of measurement shall be per number (no.).

PS F.8.23 Supply and place 2.5mm galvanised barbed wire

The tendered rate shall include full compensation for supplying and placing 2.5mm galvanised barbed wire into position. The unit of measurement shall be per meter (m).

PS F.8.24 Supply and fix fully galvanised razor coil (500mm outside diameter)

The tendered rate shall include full compensation for supplying and fixing fully galvanised 500mm outside diameter razor coil. The unit of measurement shall be per meter (m).

PS F.8.25 Supply and fix fully galvanised razor coil (700mm outside diameter)

The tendered rate shall include full compensation for supplying and fixing fully galvanised 700mm outside diameter razor coil. The unit of measurement shall be per meter (m).

PS F.8.26 Supply and fix fully galvanised razor coil (900mm outside diameter)

The tendered rate shall include full compensation for supplying and fixing fully galvanised 900mm outside diameter razor coil. The unit of measurement shall be per meter (m).

PS F.8.27 Supply and fix fully galvanised razor wire (500mm flat wrap)

The tendered rate shall include full compensation for supplying and fixing fully galvanised 500mm flat wrap razor wire. The unit of measurement shall be per meter (m).

PS F.8.28 Supply and fix fully galvanised razor wire (700mm flat wrap)

The tendered rate shall include full compensation for supplying and fixing fully galvanised 700mm flat wrap razor wire. The unit of measurement shall be per meter (m).

PS F.8.29 Supply and fix fully galvanised razor wire (900mm flat wrap)

The tendered rate shall include full compensation for supplying and fixing fully galvanised 900mm flat wrap razor wire. The unit of measurement shall be per meter (m).

PS F.8.30 Supply and erect 2.4m high concrete palisade fence

The tendered rate shall include full compensation for supplying and erecting 2.4m high concrete palisade fence including posts, pales, rails, excavation and concreting as per Drawing No. 38 582. The unit of measurement shall be per meter (m).

PS F.8.31 Supply and erect concrete posts (2.4m x 125mm x 135mm) for concrete panel fence

The tendered rate shall include full compensation for supplying and erecting 2.4m x 125mm x 135mm concrete posts for concrete panel fence including excavation and concreting as per Drawing No. 38 582. The unit of measurement shall be per number (no.).

PS F.8.32 Supply and erect concrete panels for concrete panel fence

The tendered rate shall include full compensation for supplying and erecting standard concrete panels for concrete panel fence. The unit of measurement shall be per number (no.).

PS F.8.33 Supply and erect pedestrian gates

The tendered rate shall include full compensation for supplying and erecting pedestrian gates, including posts and stays, complete, as per Drawing No. 38 583. The unit of measurement shall be per number (no.). All gates are to be fully galvanised.

PS F.8.34 Supply and erect vehicular gates

The tendered rate shall include full compensation for supplying and erecting vehicular security gates, including posts and stays, complete, as per Drawing No. 38 583. The unit of measurement shall be per number (no.). All gates are to be fully galvanised.

SECTION 10: SUBSOIL

B: Site Clearance

Add New Clause

PS B.8.3.1 Removal of excess spoil

The contractor shall remove excess spoil on site after the work is completed. This shall include the removal and disposal of the excess spoil to the approved tip.

DB: EARTHWORKS FOR PIPE TRENCHES

Add new clause

PS DB.5.3.1.1 Excavate to stockpile 0-1M

Excavation shall be undertaken in all material encountered and to such levels and widths as indicated in the specification or as instructed by the engineer. The contractor shall not wastefully dispose of excavated material, the material shall be stockpiled for re-use when backfilling. The stockpile should be away from the road, or any property access route where it might cause disturbances. Excavations will be measured by volume as indicated.
in the Schedule of Quantities, in cubic meters.

PS DB.5.3.1.1 Excavate to stockpile 0-1M Hard materials

Excavation shall be undertaken in all material encountered and to such levels and widths as indicated in the specification or as instructed by the engineer. The contractor shall not wastefully dispose of excavated material, the material shall be stockpiled for re-use when backfilling. The stockpile should be away from the road, or any property access route where it might cause disturbances. Excavations will be measured by volume as indicated.
in the Schedule of Quantities, in cubic meters.

PS. DB.5.6.1 Stockpile to Backfilling

Backfilling of pipe trenches shall only commence after the pipe has been laid and firmly bedded

in the river sand specified on the Schedule of Quantities and the selected fill blanket placed and compacted as specified around and over the top of the pipe. No filling shall be placed in water. Unless the contractor is authorised by the engineer to use other material, material for backfilling shall be obtained from trench excavations and compacted firmly. This will be done once the engineer has inspected and is satisfied that the works have been completed and are ready for backfilling the unit of measurement shall be cubic metre (m³).

PS. DB.5.6.2 Stockpile to Spoil

All surplus material to be discarded must be removed to the municipal dump site. This will be done once the engineer has inspected and is satisfied that the works have been completed and are ready for the spoil material to be moved. The unit of measurement shall be cubic metre (m³) removed to the municipal dump.

DB.3.8 Sand for sub-soil drains

Sand for sub-soil drains shall be coarse clean sand with a fineness modulus between 2.8 and 3.5. The unit of measurement shall be for the supply, lay and compacted as per the required specification in cubic meters.

MEASUREMENT AND PAYMENT

B: Site Clearance

Add New Clause

PS DB.8.3.1 Removal of excess Spoil

The unit measurement shall be the cubic metre (m³) and shall be measured the length, width and height. The rate shall include clearing and loading, transporting, disposal to the approved tip regardless of distance travelled, Weighbridge slips, all supervision, plant, labour, equipment, materials, safety, protection and incidentals necessary to complete the work as specified, as well as all communication and submissions required

DB: EARTHWORKS FOR PIPE TRENCH

Add new clause

PS DB.8.1.1 Excavate to stockpile

Excavations shall be measured in volume (m³) as indicated in the Schedule of Quantities shall be measured the length, width, and height of excavation to stockpile. The rate shall include and excavation, stockpile, all supervision, plant, labour, equipment, materials, safety, embankment protection works, shuttering and incidentals necessary to excavate the site for a pipe trench to stockpile, as well as all communication and submissions required.

Ammend DB.8.5

PS DB.8.5.1 From Stockpile to Backfilling

The unit of measurement shall be the cubic metre (m³). The unit rate shall include for backfilling with material from the trench excavation, compacting backfill to 93% Mod. A.A.S.H.T.O. density. The rate shall include backfilling of the stockpiled material, testing, all supervision, plant, labour, equipment, materials, safety, protection and incidentals necessary to excavate the site for a pipe trench to stockpile, as well as all communication and submissions required.

Add New Clause

PS DB.8.5.2 From Stockpile to Spoil

The unit of measurement shall be the cubic metre (m³) and the volume (length x breadth x height) of material measured shall be disposed off to an approved municipal dump site. The rate shall include loading of the stockpiled material, transporting, disposal to the approved tip regardless of distance travelled, Weighbridge slips, all supervision, plant, labour, equipment, materials, safety, protection and incidentals necessary to complete the work as specified, as well as all communication and submissions required

Add new clause

PS DB.8.13.1 Supply and lay coarse river sand for sub-soil drain.

The measurement for supplying and laying of the river sand shall be the cubic metre (m³). The rate for river sand used as a bedding from a commercial source shall include for the cost of acquisition of the material, transportation costs regardless of the distance and laying the coarse river sand as per the engineer's instruction, all supervision, plant, labour, equipment, materials, safety, protection and incidentals necessary to complete the work as specified, as well as all communication and submissions required

Add new clause

PS DB.8.13.2 Saw cutting

The measurement for saw cutting shall be the linear metre (m). The contractor is required to saw cut on asphalt/concrete for a maximum width of 400mm to accommodate the width of the trench. The department will pay according to the length saw cut on the necessary location as per the instruction given by the engineer or his representative. The rate shall include saw cutting, all supervision, plant, labour, equipment, materials, safety, protection and incidentals necessary to complete the work as specified, as well as all communication and submissions required

Add new clause

PS DB.8.2.1 De-watering of Excavations

The excavation shall be kept dry by pumping and/or dewatering. The rate shall include for the hiring of a pump and disposing the water to a suitable outlet that shall not interfere with the excavation taking place, all supervision, plant, labour, equipment, materials, safety, protection and incidentals necessary to complete the work as specified, as well as all communication and submissions required. The unit of measurement shall be pump per day (no.)

Add new clause

EB.8.1 Graded Crushed Stone Base (19mm)

The completed graded crushed stone layer shall be measured in cubic metres (m³) compacted in place. The rate shall cover the supply, loading, transportation costs regardless of the distance, dumping, spreading, and all processing of the layer, testing, all supervision, plant, labour, equipment, materials, safety, protection and incidentals necessary to complete the work as specified, as well as all communication and submissions required. The stone has to be 19mm in size.

PG: NON-PRESSURE PIPELINES AND PRECAST CONCRETE CULVERTS

PG.8.12.1 Geofabric Blanket

The unit of measurement shall be square metres (m²). The rate for geofabric blanket shall include for its supply, laying, joining, cutting and waste, all supervision, plant, labour, equipment, materials, safety, protection and incidentals necessary to complete the work as specified, as well as all communication and submissions required.

PG.8.12.2 Sub-Soil Pipes

The unit of measurement shall be linear metre (m). The tendered rate for sub-soil pipes shall include for the supply of all pipes, laying, and jointing, all supervision, plant, labour, equipment, materials, safety, protection and incidentals necessary to complete the work as specified, as well as all communication and submissions required. The pipe shall be 110mm in diameter.

PG.8.6.1 Connect to New/Existing Stormwater Manhole

The unit of measurement shall be number (no). The length of the solid pipe built into a manhole shall not exceed 1m. The tendered rate shall cover for the supply, laying and joining of the pipe into the manhole, all supervision, plant, labour, equipment, materials, safety, protection and incidentals necessary to complete the work as specified, as well as all communication and submissions required.

PG.8.6.10 Connect to Existing Stormwater pipe

The unit of measurement shall be number (no). The length of the solid pipe built into a existing pipe shall not exceed 1m. Connection into existing stormwater pipe must be done using a 110mm Ø bore drill bit, clear must be taken not to damage the pipe. The tendered rate shall cover for the supply, laying, cutting and joining of the pipe into the pipe, all supervision, plant, labour, equipment, materials, safety, protection and incidentals necessary to complete the work as specified, as well as all communication and submissions required.

PG.8.6.6 Supply and install 750Ø manhole ring (300mm depth)

The unit of measurement shall be metre (no). The tendered rate shall cover for the supply, laying and joining of the rings, all supervision, plant, labour, equipment, materials, safety, protection and incidentals necessary to complete the work as specified, as well as all communication and submissions required.

PG.8.6.7 Supply and install 750Ø manhole ring (500mm depth)

The unit of measurement shall be metre (no). The tendered rate shall cover for the supply, laying and joining of the rings, all supervision, plant, labour, equipment, materials, safety, protection and incidentals necessary to complete the work as specified, as well as all communication and submissions required.

PG.8.6.8 Supply and install Polymer type 2A and type 2B frame and covers

The unit of measurement shall be metre (no). The tendered rate shall cover for the supply, laying and joining, all supervision, plant, labour, equipment, materials, safety, protection and incidentals necessary to complete the work as specified, as well as all communication and submissions required.

SECTION 11: EXCAVATION

PS EB.5.1.1 Supply, Backfilling and Compaction of trenches, reinstatements, undermining using material from stockpile

The contractor shall prepare, shape and compact layers (as specified by the Engineer) to a minimum density of 95% MOD AASHTO using material from stockpile on site.

PS EB.5.1.2 Supply, Backfilling and Compaction of trenches, reinstatements, undermining using imported material

The contractor shall supply, load, haul, deposit and spread backfill material as well as compact layers (as specified by the Engineer) to a minimum density of 95% MOD AASHTO using material supplied by the contractor.

MEASUREMENT AND PAYMENT

PS EB.8.3 Supply, Backfilling and Compaction of trenches, reinstatements, undermining using material from stockpile

The unit measurement for backfilling and compaction shall be the cubic metre (m3). The quantity measured shall be calculated from within the neat outlines of the length, width and height over which the backfilling is constructed. The tendered rate shall include for preparing the work areas, placing and compaction to 95% MOD AASHTO.

PS EB.8.4 Supply, Backfilling and Compaction of trenches, reinstatements, undermining using imported material

The unit measurement for backfilling and compaction shall be the cubic metre (m3). The quantity measured shall be calculated from within the neat outlines of the length, width and height over which the backfilling is constructed. The tendered rate shall include for supplying the material, preparing the work areas, placing and compaction to 95% MOD AASHTO

SECTION 12: GUARDRAILS, HANDRAILS AND CONCRETE POSTS

Add new clause

PS EH.3.1.1 Supply and install steel handrail between 35mm-70mm diameter

Steel handrails shall be of hot-dipped galvanized steel, straight or curved, size between 35mm – 70mm diameter and threaded both ends to allow for connection of sockets and end cap.

Add new clause

PS EH.3.1.2 Supply and install timber handrail (76mm X 114mm)

Handrails shall be of H3 treated timber, straight, size 76mm X 114mm.

Add new clause

PS EH.3.1.3 Supply and install steel socket between 35mm-70mm diameter.

Sockets shall be of hot-dipped galvanized steel, size between 35mm – 70mm diameter and threaded to allow for connection of steel handrails.

Add new clause

PS EH.3.1.4 Supply and install steel end cap between 35mm-70mm diameter.

Steel end caps shall be of hot-dipped galvanized steel, size between 35mm – 70mm diameter and threaded to allow for connection to steel handrails.

Add new clause

PS EH.3.2.1 Supply and install precast concrete handrail post (1300mm X 80mm X 210mm)

Precast concrete handrail posts (30MPa) shall be constructed as indicated on EThekwini Standard drawing 38581, dimensions of the post are 1300mm X 80mm X 210mm, reinforced with galvanized R10 bars.

Add new clause

PS B.3.11 Remove damaged handrail (horizontal sections, vertical sections and end bars) completely.

Where specified, the Contractor shall remove:

All damaged handrails of any size, comprising of material such as steel or timber. All materials must be removed and dumped at an official municipal dump site. Included in this item is the cautious removal of bolts or grouting that is assembling the handrail and handrail post, and ensure that no damage is made to the handrail post during the removal. Work of such nature to be undertaken by the contractor will be on a written site instruction basis with pre-measurements.

Add new clause

PS B.3.12 Remove damaged concrete handrail post (1300mm X 80mm X 210mm) completely.

Where specified, the Contractor shall remove:

All damaged concrete handrail post. All materials must be removed and dumped at an official municipal dump site. The handrail post must be removed neatly and ensure that there is no damage to the existing ground levels that could prevent re-installation of new handrail post on same position. Included in this item is the saw cutting and breaking of the base, and cautious removal of concrete and grouting that is assembling the handrail post and handrail, and ensure that no damage is made to the handrail during the removal. Work of such nature to be undertaken by the contractor will be on a written site instruction basis with pre-measurements.

EH.5 CONSTRUCTION

Add new clause

PS EH.5.3 Supply and install steel handrail between 35mm-70mm diameter

In order to match the existing, the Contractor shall be required to supply and install hot-dipped galvanised steel handrails of size between 35mm – 70mm diameter. The steel handrails may be of straight or curved shape where necessary, and must be threaded on both ends to allow connection. The steel handrail shall be connected with a steel socket and closed with a steel end caps. The handrail must be grouted and assembled with the precast concrete handrail post and ensure that the handrail does not move from position.

Add new clause

PS EH.5.3.1 Supply and install precast concrete handrail post (1300mm X 80mm X 210mm)

In order to match the existing, the Contractor shall be required to supply and install precast concrete handrail posts (30MPa), shall be constructed as indicated on EThekwini Standard drawing 38581, dimensions of the post are 1300mm X 80mm X 210mm, reinforced with galvanized R10 bars. The handrail post shall have a 900mm show in height, and must be encased on a concrete 20MPa base with dimensions 300mm long X 300mm wide X 600mm deep.

PS EH.5.3.3 Supply and install polymer handrail post (1300mm X 80mm X 210mm)

In order to match the existing, the Contractor shall be required to supply and install precast polymer handrail posts , shall be constructed as indicated on EThekwini Standard drawing 38581, dimensions of the post are 1300mm X 80mm X 210mm, reinforced.

Add new clause

PS EH.5.3.2 Supply and install steel socket between 35mm-70mm diameter.

In order to match the existing, the Contractor shall be required to supply and install a hot-dipped galvanized steel sockets of size between 35mm – 70mm diameter. The socket shall be threaded in order to allow connection of steel handrails. The sockets shall be screwed and tack welded to the handrail on each connection.

Add new clause

PS EH.5.3.3 Supply and install steel end cap between 35mm-76mm -114mm diameter.

In order to match the existing, the Contractor shall be required to supply and install a hot-dipped galvanized end caps of size between 35mm – 70mm diameter. The end cap shall be threaded in order to allow connection to steel handrails. The end caps shall be screwed and tack welded to the handrail on each connection.

Add new clause

PS EH.5.4 Supply and install recovered horizontal handrail

In order to match the existing, the Contractor shall be required to re- install handrails. The handrail must only be connected at a centre position of the handrail post in order to ease connection and allow installation of bolts and washer. The thandrail shall be drilled and mounted on the handrail post using bolts and washers (M14x100). In areas where an additional washer of bigger size is required for installation, the Contractor shall supply and install the bigger washer at no additional costs .

PS EH.5.5 Supply and install recovered vertical handrail

In order to match the existing, the Contractor shall be required to re- install handrails. The handrail must only be connected at a centre position of the handrail post in order to ease connection and allow installation of bolts and washer. The thandrail shall be drilled and mounted on the handrail post using bolts and washers (M14x100). In areas where an additional washer of bigger size is required for installation, the Contractor shall supply and install the bigger washer at no additional costs

Add new clause

PS EH.5.5 Remove existing paint and re-paint steel or timber handrails

The contractor will be required to remove paint by suitable methodology (approved by engineer) such, that the existing paint is adequately removed so that the new application of Bituminous Aluminum Paint will yield the desired results (minimum 10 year life). Where the rails are still in their original galvanized state, the contractor is required to clean them using materials approved by the engineer before painting. Included in this item is the labour, equipment, materials and protection.

Add new clause

PS EH.5.6 Remove existing paint and re-paint steel or concrete handrail post.

The contractor shall be required to remove paint by suitable methodology (approved by engineer) such, that the existing paint is adequately removed so that the new application of White Reflective Paint will yield the desired results (minimum 5 year life). Where the posts are still in their original state, the contractor is required to clean them using tools/materials approved by the engineer before painting.

MEASUREMENT AND PAYMENT

PART EH: STEEL GUARD RAILS AND CONCRETE MEDIAN BARRIERS

EH. 8.1 Steel Guardrails

- (a) The unit of measurement shall be the linear metre of guard rail and shall cover the following:
 - (i) All bolts, nuts and washers.
 - (ii) Hot dip galvanizing as specified; and
 - (iii) Supply of precured rails where necessary
- (b) End wings shall be measured separately, and the rate shall include all bolts, nuts and washers and hot dip galvanizing as specified.
- (c) Precast concrete posts including bolt holes, reinforcement, excavation, 50mm concrete blinding, compaction of backfill shall measured for each unit post number.
- (d) Anchor Blocks

The rate for anchor blocks shall include all excavation, materials and shuttering.

Add New Clause

PS EH.8.1.1 Supply and install Fishtail type

The unit of measurement shall be the number for every unit of Fishtail supplied and installed as and when requested by the engineer or his or her representative. The contractor will be required to supply and install fishtail type to existing or newly installed guardrails. The tendered rate shall include the compensation for the supply and install, including safety, communication, submissions and all related costs.

PS EH.8.1.2 Supply and install bullnose type

The unit of measurement shall be the number for every unit of bullnose type supplied and installed as and when requested by the engineer or his or her representative. The contractor will be required to supply and install bullnose type to existing or newly installed guardrails. The tendered rate shall include full compensation for the supply and install, including safety, communication, submissions and all related costs.

PS EH.8.2 Removing damaged guardrails to depot yard.

The contractor will be required to remove damaged insitu guardrails and transport them to the Roads and Stormwater maintenance depot. The tendered rate shall include full compensation for the removal, transportation and disposal to a depot, specified by the Engineer/Technologist/Technician, including safety,

communication, submissions and all related costs.

PS EH.8.2.1 Remove damaged concrete posts to spoil.

The contractor will be required to remove damaged concrete posts and dispose off them to an approved dump site. The tendered rate shall include full compensation for the removal, transportation and disposal to a municipal dump site, including safety, communication, submissions and all related costs.

PS EH.8.5 Removal of base plates to spoil (steel)

The unit of measurement will be number (no.)

The contractor will be required to remove damaged base plates and dispose of it at an approved dump site or re-use at other locations where required and instructed by the engineer. The tendered rate shall include full compensation for the removal, transportation and disposal to a municipal dump site, including safety, communication, submissions and all related costs.

PS EH.8.1.14 Supply and install steel base plates for the posts

The unit of measurement will be number (no.)

The contractor will be required to supply and install steel base plates for the posts over the bridges, where instructed by the Engineer. The tendered rate shall include the full compensation for the supply and install, including safety, communication, submissions and all related costs.

PS EH.8.6 Supply and install precast concrete posts

The unit of measurement will be per unit number (no.)

The contractor will be required to supply and install precast concrete posts. A 50mm thick blinding layer shall be placed at the base of the excavation on which the post must be placed. The concrete post sizes are 300mm and 400mm, and shall be priced separately in the bill of quantities. The tendered rate shall include full compensation for the supply and install, including safety, communication, submissions and all related costs..

Add new clause

PS B.8.6.1 Remove damaged handrail (horizontal sections and end bars) completely.

The unit of measurement shall be the linear metre of handrail (m), and the rate shall cover the cost of dismantling all damaged handrails of any size comprising of material such as steel or timber, cutting of steel handrails where necessary, loading, transportation, offloading and disposal at an approved municipal tip. Work of such nature to be undertaken by the contractor will be on a written site instruction basis with pre-measurements.

Add new clause

PS B.8.6.2 Remove damaged concrete handrail post (1300mm X 80mm X 210mm) completely.

The unit of measurement shall be each unit number (no) of precast concrete post, and the rate shall cover the cost to remove all damaged concrete handrail post neatly and ensure that there is no damage to the existing ground levels that could prevent re-installation of new handrail post on same position, loading, transportation, offloading and disposal at an approved municipal tip. Work of such nature to be undertaken by the contractor will be on a written site instruction basis with pre-measurements.

PS EH.8.7 Supply and install reflective plates

The unit of measurement will be per number (no)

Where instructed by the engineer or his representative, the contractor will supply and install reflective plates. The type of reflective plate will be specified by the engineer or his representative. The tendered rate shall include full compensation for supply and install, safety, communication, submissions and all related costs.

PS EH.8.8 Ramped approach-end section

The contractor will be required to construct a ramped approach-end section as per specification. The tendered rate shall include full compensation for the supply and installation of all material, including safety, communication, submissions, and all related costs.

Add new clause

PS EH.8.10 Remove existing paint and re-paint steel or timber handrails

The unit of measurement shall be the linear metre of handrail (m), and the rate shall include the cost of manufacturing, loading & transportation to site, removing of existing paint, re-painting, labour, supervision, equipment, materials and protection.

Add new clause

PS EH.8.11 Remove existing paint and re-paint steel or concrete handrail post.

The unit of measurement shall be each unit number (no) of handrail post, and the rate shall include the cost of manufacturing, loading & transportation to site, removing of existing paint, re-painting, labour, supervision, equipment, materials and protection.

SECTION 13: MILL AND REPLACE

A4.3.6.2 Milling machine

The milling machine shall be capable of milling out either bituminous surfacing layers or unstabilised/stabilised pavement layer materials, or a combination of both simultaneously, to the depth specified in the Contract Documentation or as instructed by the Engineer.

The direction and speed of the milling machine and the speed of rotation of the milling drum shall be adjustable to deliver the required material properties. The machine shall be capable of making a neat vertical cut at the outer edges when milling. The Contractor shall inspect the milling machine's cutting tools, also known as picks, regularly and replace them as required whenever uneven or ineffective milling occurs, or when the gradation of the milled material is adversely affected.

The milling machine shall be equipped with a self-loading conveyor belt which can be easily removed and installed and adjusted for slope and direction.

A4.3.7.4 Milling

Before milling may be commenced, the surface of the existing road shall be cleaned of all vegetation, dirt, recent fuel spillage, road studs and any other foreign material.

Where the milled material is to be re-used in road pavement layers, the Contractor shall execute trial milling on the various materials to be milled. Trial milling shall consist of milling one strip not longer than 40 m. Trial milling shall not be required for material that is to be milled to spoil or re-used for general filling purposes. During the trial milling, the Contractor shall vary the speed of the milling machine, the speed of rotation of the milling drum and the milling depth, to select the desired optimum milling operation parameters to provide the required material quality and to prove that the milling machine is fit for purpose. The Engineer shall instruct the depth of milling the layer(s) after the trial milling.

Care shall be exercised to avoid damage to any concrete elements such as bridge expansion joints and joint nosings, manholes, kerbing, kerb inlets and any other roadside furniture during the milling and the excavation. Damage caused to any element forming part of the permanent works shall be repaired at no cost to the Employer.

The floor of a milled excavation shall have an even texture without any loose local areas. Loose areas shall be remedied as specified in the Contract Documentation or as instructed by the Engineer.

The floor of a milled excavation shall be tested in the longitudinal direction with a 3,0 m straight-edge, and in other directions with a straight-edge of such length as fits between the longitudinal sides of the excavation. The surface of the milled area shall not deviate by more than 7,0 mm from the bottom edge of the straight

edge.

A4.3.7.5 Safety at milled excavations

Milled excavations shall not be trafficked unless it is necessary to temporarily accommodate traffic. When shallow milled excavations need to be opened to traffic then all loose material shall first be removed, and all longitudinal and transverse joints caused by the milling excavation shall be tapered where the difference in level between the floor of the milled excavation and the existing road surface exceeds 25 mm. Transverse joints shall be tapered at a slope of 1,0 mm vertical to 20,0 mm horizontal. Longitudinal joints shall be tapered at a slope of 1,0 mm vertical to 5,0 mm horizontal. The tapers shall either be formed by cutting back the joint edges to the specified slope or by constructing a suitable asphalt wedge, which shall be bonded to the cleaned joint with a bituminous bond coat.

A4.3.7.6 Removal of asphalt material

Reclaimed asphalt material shall be removed separately from the existing road, either by excavating and breaking down the asphalt material into blocks using conventional road building equipment, or by milling off the asphalt material.

Where only part of the asphalt is to be milled off, the area to be milled shall be demarcated and the milling depth shall be specified. Milling shall not exceed the demarcated width by more than 50 mm or the specified depth by more than 5,0 mm.

Where the asphalt consists of layers of various mixes or grades, the results of the supplementary investigation will assist in deciding on the most appropriate milling strategy, namely whether to mill different asphalt layers separately (split milling), or to mill multiple asphalt layers together, or selective milling of non-compliant layers that must be discarded.

Contamination of the asphalt with underlying material, or unwanted damage to the underlying layer, during milling shall be avoided. The Contractor shall adjust and carefully control the depth of milling to prevent this by full time monitoring of the milled floor behind the milling machine.

Where the material is contaminated by the actions of the Contractor, it shall be replaced with other approved material at no cost to the Employer.

A4.3.7.13 Spoil of material

Material from the milling and/or excavations of existing road materials that is non-compliant for the earthworks and pavement layers or material that is not required for further use shall be loaded and hauled directly to approved spoil sites.

Paving blocks, and road edging not suitable for further use or that are not required in future construction shall be loaded and hauled to approved spoil sites. Services structures, and asphalt and concrete material on sidewalks in urban areas shall also be spoiled.

Spoil sites are to be identified by the Employer or by the Contractor.

Item	Description	Unit
C4.3.4	Saw-cutting existing materials within the following average depth ranges	
C4.3.4.1	Asphalt material:	
	a) Not exceeding 50 mm	metre (m)
	b) Exceeding 50 mm but not exceeding 100 mm	metre (m)
	c) Exceeding 100 mm	metre (m)

The unit of measurement shall be the metre of saw-cut. The length in each depth range shall be measured and paid separately.

The quantities shall be measured from the authorised length of saw-cut, and the depth specified or instructed by the Engineer.

The tendered rates shall include full compensation for saw-cutting the material.

Where asphalt and the underlying layer(s) are both to be saw-cut and the asphalt is less than 50 mm thick, separate measurement and payment shall not be made for the asphalt saw-cutting in item C4.3.4.1. The asphalt thickness shall then be added to the thickness of the material in items C4.3.4.2 and/or C4.3.4.3 as applicable.

Item	Description	Unit
C4.3.5	Providing the milling machine on the site	
C4.3.5.1	Small milling machine with a cutting width of 1,2 m or smaller	number (No)
C4.3.5.2	Large milling machine with a cutting width exceeding 1,2 m	number (No)

The unit of measurement shall be the number of milling machines provided on the site, or the number of times a milling machine is brought onto the site where it had to be removed temporarily with prior approval. De-establishment and subsequent re-establishment shall also only be measured if undertaken with prior approval.

The tendered rates shall include full compensation for establishment and for de-establishment of the milling machine.

Payment for returning the machine to the site after removal shall be made only where the removal was in accordance with the Contractor's approved programme of work and not for any other reason. Payment shall not be made for replacing any defective plant.

Payment shall also not be made for moving the milling machine around on the site.

Item	Description	Unit
C4.3.6	Milling and removal of existing asphalt layers with an average milling depth (Contractor takes ownership)	
C4.3.6.1	Not exceeding 50 mm	cubic metre (m3)
C4.3.6.2	Exceeding 50 mm but not exceeding 100 mm	cubic metre (m3)
C4.3.6.2	Exceeding 100 mm	cubic metre (m3)

Item	Description	Unit
C4.3.7	Milling and removal of existing asphalt layers with an average milling depth (Employer takes ownership)	
C4.3.7.1	Not exceeding 50 mm	cubic metre (m3)
C4.3.7.2	Exceeding 50 mm but not exceeding 100 mm	cubic metre (m3)
C4.3.7.2	Exceeding 100 mm	cubic metre (m3)

The unit of measurement for items C4.3.6 and C4.3.7 shall be the cubic metre of material milled from the existing pavement.

The quantities shall be computed in accordance with the authorised dimensions of the excavation. When instructed, split milling and removal of the different existing asphalt layers shall be measured individually.

The tendered rates for item C4.3.6 shall include full compensation for demarcating the excavation, for milling (excavating) the material, for loading and hauling to a site identified by the Contractor, and for spoil or re-use by the Contractor. All haul costs shall be included in the tendered rates of item C4.3.6.

The tendered rates for item C4.3.7 shall include full compensation for demarcating the excavation, for milling, loading, hauling and off-loading the material at a site designated by the Employer. Haul shall be measured from the point where the material is loaded to where it is off-loaded.

Trial milling shall be measured and paid for under items C4.3.6 or C4.3.7, and no separate payment shall be made for it.

Item	Description	Unit
C4.3.8	Milling and removal of existing asphalt layers with an average milling depth (Employer takes ownership)	
C4.3.8.1	Crushed stone material	cubic metre (m3)
C4.3.8.2	Cemented material	cubic metre (m3)
C4.3.8.2	Natural Gravel	cubic metre (m3)

The unit of measurement shall be the cubic metre of milled material.

The quantities shall be measured in place on the existing road before the excavation commences.

The tendered rates shall include full compensation for milling out and loading the material.

Trial milling shall be measured and paid for under item C4.3.8, and no separate payment shall be made for it.

A9.1.3.4 Weather limitations

Asphalt may be mixed and placed only under favourable weather conditions and shall not be mixed or placed when rain is imminent or during misty or wet conditions. The following wind and temperature conditions shall be applicable:

- 6°C and temperatures are rising with an allowable wind velocity of less than 25 km/h
- 10 °C with an allowable wind velocity of less than 55 km/h for layers paved > 30 mm thick
- 10 °C with an allowable wind velocity of less than 25 km/h for layers ≤ 30 mm thick

With falling air temperature, paving shall cease when the air temperature reaches 6 °C regardless of the wind velocity and may not be restarted before the temperature is definitely rising.

Where specifically ordered by the Engineer for emergency safety or traffic accommodation reasons, paving operations shall comply with the recommendations listed in: Sabita Manual 22: Hot Mix Paving in Adverse Weather.

The mixing and placing of asphalt shall not be permitted under the following conditions:

- The moisture content of the aggregate affects the uniformity of mix temperature
- Free water is present on the working surface, or if
- The moisture content of the upper 50 mm of a granular base layer exceeds 50 % of the optimum moisture content, as determined by the Engineer.

Immediately after a rainy spell on an existing partly cracked and/or highly permeable surfacing and/or primed base resulting in the trapping of moisture in the pavement structure. In such case the base shall be allowed to dry out to meet the above moisture content requirements prior to placing the asphalt layer.

A9.1.3.5 Surface requirements

Immediately before applying the specified bond coat the surface shall be broomed and cleaned of all loose or deleterious material before commencing with any paving. Where the prime coat (if any) has been damaged, it shall be repaired by hand brushing or spraying priming material over the damaged portions, which shall be allowed to cure prior to commencing paving. Where the surfacing is to be constructed on bridge decks, the concrete deck shall be thoroughly cleaned by washing and brushing to remove all loose material and curing compound and then allowed to dry prior to application of the specified bond coat.

The base or the subbase, as the case may be, (after the prime coat has been applied), shall be checked for smoothness and accuracy of grade, elevation, cross section as well as any visible damage. Any portion of the base or subbase layer not complying with the specified requirements shall be corrected with asphalt at the Contractor's own expense, until the specified requirements are met. The Engineer may however, in his sole discretion, allow minor surface irregularities to remain, provided that the final asphalt layer conforms to the requirements of the specification.

The asphalt used for the correction of the base or subbase, shall be the same mixture as specified for the surfacing, or as directed by the Engineer. The maximum size of aggregate used in the mix shall be dictated by the maximum required thickness of the correction layer in each case.

Notwithstanding these provisions, the Engineer reserves the right to order the removal and reconstruction of the layer, or of portions of the layer not complying with the specified requirements instead of allowing the correction of substandard work with asphalt material.

The prime coat shall be dry before further bond coats or layers are applied. No work shall commence with the application of the bond coat and/or the paving without the approval of the Engineer.

A9.1.6.7 Vehicles

The asphalt shall be transported from the mixing plant to the spreader in tip trucks that are in good condition having no oil leaks. They shall have tight, clean smooth beds and sides that have been treated to prevent adhesion of the mixture to the truck bodies. A thin film of soapy water, vegetable oil or approved release agents may be used to prevent adhesion, but petroleum products shall not be used for this purpose. The truck bins shall be designed to tip asphalt into the paver's hopper without spillage.

To minimize temperature loss, all vehicles used for transporting asphalt to the site shall be fitted with appropriate bin covers. Where the expected transport, and or, storage time of the asphalt is expected to exceed one hour in the truck, the use of thermal asphalt covers (canvas covers not acceptable) shall be obligatory.

A9.1.6.8 Material transfer vehicle

Where so specified, and provision thereof is included under Measurement and Payment, asphalt shall be transferred from the haul trucks into the paver hopper by means of a materials storage and transfer vehicle and no material shall be tipped directly from the truck into the paver with the exception of paving in restricted areas.

The materials storage and transfer vehicle shall be capable of storing and transferring the asphalt from truck to paver to ensure continuous paving. It shall contain an anti-segregation auger that remixes the asphalt just prior to delivery to the paver hopper in order to ensure a mix of uniform temperature.

A9.1.6.9 Mass-measuring device for asphalt mixes

Where payment per ton is specified, the Contractor shall keep available, at the mixing plant or on the site, a suitable calibrated mass-measuring device for measuring the mass of asphalt being delivered. The device shall be provided with a means of electronically recording and printing the type of mix, the mass, the time and the date. The printed data shall be submitted to the Engineer.

A9.1.6.10 Milling machine

Where so required and scheduled, the Contractor shall provide a suitably sized milling machine to mill off existing asphalt on bridge decks and or to mill an appropriate keyway at the approaches to bridge structures. The size of the milling machine shall be such as to allow milling adjacent to bridge nosings and any joints without damaging them.

A9.1.7.4 Transporting of asphalt

The mixture shall be transported from the mixing plant to the works in trucks complying with the requirements of Clause A9.1.6.7. Deliveries shall be made so that paving and rolling of all the mixtures prepared for a day's production, can be completed during daylight hours, unless artificial lighting, as approved by the Engineer, is provided. Any asphalt that has become cold or wet due to rain, or any other cause, shall be rejected. Hauling over asphalt that has not cooled to ambient temperature shall not be permitted.

A9.1.7.6 Placing the asphalt

The mixture shall be delivered to the paver in such a manner that the paving will be as continuous as possible with minimal stopping. Any lengthy delay in supply resulting in the asphalt mat cooling to below the appropriate compaction temperatures shall require that a construction joint be formed prior to recommencing with the paving operation.

The temperature of the mixture shall be controlled by measuring in a random pattern in the truck immediately before emptying and shall not be more than 10°C below the minimum mixing temperature, or above the maximum mixing temperature specified in Table A9.1.7-1. The adjustment of the screed, tamping bars. Feed-screws, hopper feed, etc., shall be checked frequently to ensure uniform spreading of the mix. If segregation or tearing occurs, the paving operations shall immediately be suspended until the cause is determined and corrected.

The addition or removal of material behind the paver shall not be allowed and the paver shall be capable of spreading the mixture to the levels that will provide the specified compacted thickness

Only minimal hand-working of the gap graded asphalt shall be permitted after discharge from the paver and before rolling and shall only be carried out with wooden spreaders. Workmen shall not be permitted to walk on un-compacted open graded asphalt.

Unless otherwise approved, paving shall commence at the bottom of the grades and the lower edges of super-elevated curves where the grades are steeper than 5 %.

Paving widths shall be so planned that longitudinal joints do not coincide with joints in lower layers of asphalt base, paver laid crushed stone bases or within the wheel paths of a lane.

Continuity of placing is especially important for open graded asphalt. Cutting of longitudinal joints shall be avoided when paving open-graded asphalt but where cutting is essential, only saw cutting shall be permitted. The existing layer edge shall be heated by approved means in order to ensure adequate longitudinal bonding of the asphalt between the two lanes.

Unless otherwise specified in the Contract Documentation the paver shall be equipped to provide automatic control of levels and cross section.

The mixer capacity and the operating speed of the paver shall be so coordinated so as to ensure continuous laying and thus avoid intermittent stopping of the paver.

Paving shall cease when rain starts falling or when the surfaces to be paved are visibly wet.

In all cases, including levelling courses, the paver shall be provided with approved skid beams with electronically controlled equipment that can ensure a constant cross-fall and can even out local irregularities. Asphalt shall be placed in restricted areas with the aid of smaller specially equipped pavers, hand tools or other approved equipment. All the requirements with respect to temperature, mix composition, uniformity, in-place properties etc. shall remain applicable but layer thickness and control shall be such that the requirements for compaction and surface tolerances can still be achieved.

A9.1.7.7 Compaction

The compaction requirements for each mix type shall be in accordance with the requirements listed in the relevant Sabita Manuals as listed in Clause A9.4.2 for the specific mix type prescribed. The sequence of rollers used in compaction shall be at the discretion of the Contractor provided that the completed pavement shall meet the required compaction, profile, and surface texture as specified. The paved layer shall be compacted as soon as possible after it has been laid by a combination of vibratory, static steel-wheeled and or pneumatic-tyre rollers in a sequence determined and approved during the laying of trial sections. Rolling shall commence, and be continued, only for so long as it is effective and does not have any detrimental effect.

Only steel-wheel rollers (non-vibratory) shall be permitted for the compaction of stone mastic asphalt as well as semi-open and open-graded mixtures, although rubber tyre rollers may be on standby if required. During rolling the roller wheels shall be kept moist with only sufficient water or an approved release agent to avoid picking up the material. The use of petroleum products or excesses of releasing agents (soap) to prevent pick-up shall not be permitted. The use of vibratory rollers shall not be permitted on bridge decks.

Rolling shall commence from the edges of the paved mat and progress towards the center. On areas of super elevated curves, or where the cross-fall exceeds 2 %, rolling shall commence on the low side and progress to the higher side, uniformly lapping each preceding track. During breakdown-rolling the rollers shall move at a slow but uniform speed (not to exceed 5,0 km/h) with the drive roller nearest the paver, unless otherwise specified on account of steep gradients.

Except for mixtures using warm mix asphalt technology, no movement of the asphalt layer shall occur under steel wheel rollers once the asphalt temperature has dropped to below 100°C.

For thin layer asphalt (less than 30 mm) the compaction requirements shall be in accordance with the method statement as assessed and approved in the accepted trial sections.

For open graded (Porous) asphalt the degree of compaction can be controlled indirectly by means of in-situ permeability tests calibrated during the trial section and by visual evaluation of the aggregate to prevent crushing.

The Contractor shall utilize an appropriate and calibrated nuclear gauge for process control during compaction operations. Notwithstanding this requirement, the acceptance control carried out to determine compaction shall still be based on cores taken from the compacted layer where the layer thickness is appropriate.

A9.1.7.9 Cutting of joints

All joints between adjacent sections of the work shall be formed by cutting back the edges of the paved layer in a straight line, either parallel or at right angles to the centerline, by a minimum of the width of the layer thickness being paved. Joints shall be neat and shall have the same texture and compaction level as the adjacent asphalt layer.

All joints shall be delineated by means of chalk lines prior to cutting. For sand skeleton mixes, such as semi-gap and fine continuously graded mixes, a cutting wheel may be utilized only if the layer is less than 50 mm in thickness and was paved within 24 hours. For all other mix types, layers in excess of 50 mm, or that have been left for longer than 24 hours, the joints shall be formed either by means of saw cutting, using carborandum blades, or by an appropriate milling machine. All material emanating from preparing the joint shall be removed and transported to an approved site for possible recycling or other appropriate use or disposal. No payment for any such removed asphalt shall be made.

On completion of preparing the joint, the adjacent surface shall be inspected to ascertain that there has been no damage caused to the adjacent layer. Any identified damage shall be appropriately repaired prior to commencement of paving any adjacent asphalt layer.

Whenever the paving operation ceases due to lack of supply of mix, and the temperature of the mat has reduced to below the appropriate compaction temperature, the Contractor shall form a proper transverse construction joint as specified.

Unless otherwise provided for, joints in the final layer of the surfacing shall correspond with the intended lane markings. Joints in lower layers shall be offset by not less than 150 mm from either side of the edges of any underlying substrate joint.

The allowable tolerances for joints shall be as specified in Clause A9.1.8.3.

A9.1.7.10 Treatment of joints for traffic accommodation

Where it is necessary to accommodate public traffic during paving operations and the difference in level between the new work and the existing road surface exceeds 25 mm, joints shall be treated as follows:

Transverse steps at the end of a day's work shall be tapered off at a slope of 1 vertical to 20 horizontal (1:20) to tie in with the existing surface. The tapered section shall be removed before surfacing is recommenced and a joint formed in accordance with Clause A9.1.7.7.

Longitudinal joints exposed to traffic shall be provided with a taper of compacted asphalt layer over the full length of the exposed joint. The width of the taper shall be at least 5 times the layer thickness. The tapered section shall be removed before surfacing is recommenced and a joint formed in accordance with Clause A9.1.7.7.

All costs involved in the provision and removal of these temporary ramps shall be deemed to be included in the rates tendered for the relevant asphalt pay item.

A9.1.7.11 Surfacing of bridge decks

The type and nominal thickness of the surfacing shall be as specified in the Contract Documentation. Before commencing with the construction of the surfacing, the actual levels of the bridge deck shall be determined by means of accurate levelling. The levels and grades to which the surfacing is to be constructed shall be as shown on the drawings or as indicated by the Engineer. If the levels of the concrete deck, as constructed by the Contractor deviate by more than the specified tolerances from the specified levels, he shall construct a levelling layer at his own cost. The nominal mean maximum particle size of the aggregate in the levelling layer shall be 10 mm.

A9.1.7.12 Asphalt temperature before opening to traffic

Newly paved asphalt shall not be opened to traffic until its surface temperature, as measured using a digital thermometer, has decreased to 50oC or less.

A9.1.8.2-Dimensional tolerances – overlays

Where asphalt is being placed for the purposes of rehabilitation or overlays, the following requirements shall be applicable, as relevant:

- a) When the overlay is constructed to specified levels on a layer that has also been constructed or milled to specified levels by the Contractor, all the tolerance requirements of Clause A9.1.8.1 shall be applicable.
- b) When the overlay is constructed to specified levels on an existing layer, or on a layer which has been constructed or milled by the Contractor, but which has not been constructed, or milled, to specified levels, all the tolerance requirements of Clause A9.1.8.1 shall be applicable, except for Clause A9.1.8.1c), which relates to thickness.
- c) When the overlay is not constructed to specified levels, the following tolerances shall apply:

The outer edges of the overlay shall nowhere be more than 15 mm inside or outside the lines shown on the drawings, or existing surface, and shall be parallel to the road centre line.

The minimum thickness shall be the specified nominal thickness.

The maximum thickness shall be the specified nominal thickness + 10 mm.

In the case of surfacing bridge decks, the difference in level between the new asphalt and any existing adjacent bridge joint or nosing shall not exceed 3,0 mm.

A9.1.8.3 Construction joints

All joints shall be cut back by at least the minimum of the layer thickness constructed. When measured with a 3,0 m straight edge at 10 m intervals longitudinally, and at 1,0 m intervals transversely, the level of the outer edge of the layer constructed shall not deviate by more than 2,0 mm from the level plane on 80 % of the measurements. In no instance shall the difference in level differ by more than 4,0 mm on base layers and 3,0 mm on surfacing layers. If these requirements are not met, the Contractor shall recut the joints, at his cost, in order to meet this specification.

Item	Description	Unit
C9.1.5	Asphalt surfacing	
C9.1.5.2	Rehabilitation	
(a)	Stone skeletal mix – continuously graded as defined (state layer thickness, binder type and design class/ level)	ton (t)
(b)	Stone skeletal mix – SMA as defined (state layer thickness, binder type)	ton (t)
(c)	Stone skeletal mix – gap graded as defined (state layer thickness and binder type)	ton (t)
(d)	Stone skeletal mix- open graded as defined (state layer thickness and binder type)	ton (t)
(e)	Sand skeletal mix – continuously graded as defined (state layer thickness, binder type, design class/ level)	ton (t)
(f)	Sand skeletal mix – gap graded mix (state layer thickness, binder type design class/level)	ton (t)
(g)	Any of the above mix types where the use of reclaimed asphalt has been specified (indicate maximum % reclaimed asphalt or binder replacement limits)	ton (t)
(h)	Certified: any mixes certified for specific applications by an approved agency as being fit for the purpose and as specified in the Contract Documentation.	ton (t)

The unit of measurement for payment items C9.1.4.1 and C9.1.5.1 shall be the square metre of asphalt constructed to the specified dimensions. The tendered rate shall include full compensation for producing the mixture, constructing the layer, process control testing as well as protection and maintenance as specified.

The unit of measurement for payment items C9.1.4.2 and C9.1.5.2 shall be a ton of asphalt placed at the specified compacted thickness. The tendered rate shall include full compensation for producing the mixture, constructing the layer, process control testing as well as protection and maintenance as specified. The quantity shall be determined by means of certified weighbridge tickets issued in respect of the asphalt mix used.

No payment shall be made for excess width and wastage of asphalt, including material cut back of joints, and the mass of such excess or wasted material shall be deducted from the recorded delivery for payment purposes. In addition, layers constructed in terms of items C9.1.4.2 and C9.1.5.2, no payment shall be made for asphalt in excess of the mean spread rate(s), which shall be determined as follows:

Item	Description	Unit
C9.1.7	Placing and compacting asphalt in restricted areas	
C9.1.7.1	Extra over payment items C9.1.4.1 and C9.1.5.1 (State layer thickness, mix class, binder type, nominal maximum particle size and placing technique (hand/paver))	square metre (m ²)
C9.1.7.2	Extra over payment items C9.1.4.2 and C9.1.5.2 (State layer thickness, mix class, binder type, nominal maximum particle size and placing technique (hand/paver))	ton (t)

Item	Description	Unit
C9.1.13	Placing and compacting asphalt in restricted areas	
C9.1.13.1	100 mm diameter	number (No)
C9.1.13.2	150 mm diameter	number (No)

SECTION 14: DAYWORKS

A1.2.3.11 Ordering of daywork

Daywork shall be undertaken strictly in accordance with the provisions of the Conditions of Contract. No daywork shall be undertaken unless specified by the Engineer. Such a written instruction shall include a full description of the work to be carried out. Before commencing any daywork the Contractor shall obtain the Engineer's agreement regarding the estimated duration of the dayworks, the numbers of each category of staff to be employed, the materials to be used and the construction equipment and vehicles that will be required to carry out the work.

The Contractor shall provide the Engineer with a daily report that records the actual duration, numbers of staff and materials, equipment and vehicles used each day for approval of the dayworks.

CONSTRUCTION/MEASUREMENT AND PAYMENT

C1.2.8 Dayworks

C1.2.8.1 Personnel

The unit of measurement for items C1.2.8.1(a) to C1.2.8.1(f) shall be the hour that the personnel are engaged on the work inclusive of transport to and from the site. Non-working hours for meal breaks, rest periods, transport breakdowns, lack of construction equipment or materials or any other reason shall not be measured. The contract rates shall include full compensation for all overhead charges and profit, leave pay, bonuses, subsistence, allowances, Employer's contributions, additional payment for overtime where applicable, insurances, housing, site supervision, provision and use of small hand tools and appliances, non-mechanical plant and equipment and consumable stores as well as for all administrative, supervisory, operative and contingent costs related to the supply of personnel.

C1.2.8.2 Construction equipment (specify size and/or model number)

The unit of measurement for items C1.2.8.2(a) to C1.2.8.2(g) shall be the hour that the construction equipment is engaged on the work inclusive of transport to and from the site. Non-working hours for operator meal breaks and rest periods, equipment breakdowns and maintenance, lack of materials or any other idle time or reason shall not be measured. The contract rates shall be an all-inclusive hire charge for the use of the construction equipment and operator and shall include full compensation for all administrative, supervisory, fuel, maintenance, operational, transportation, depreciation and any other contingent costs and profit relating to the operation of the construction equipment. The contract rates shall be based on the type and size of equipment that the Contractor intends to provide for the construction of the main Works

C3.4: PARTICULAR SPECIFICATIONS

In addition to the Standardized and Project Specifications the following Particular Specifications / Policies shall apply to this contract:

- C3.4.1 Part AH - OHSA 1993 Safety Specification
(26 Pages)
- C3.4.2 Standard Environmental Management Plan for Civil Engineering Construction Works
(24 Pages)

C3.5: CONTRACT AND STANDARD DRAWINGS
