<b>Roadblock &amp; ANPR Module</b>			
<p>The Roadblock module allows for the extraction of outstanding Section 341 handwritten, Section 341 cameras, Section 56 summonses and Warrants of Arrest to create an offline database on a workstation for notice enquiries at roadblocks to trace offenders.</p> <p>An extract program is executed to create a file that contains data relating to all outstanding notices, depending on the parameters set when generating. The extract file created is copied or transferred to</p>			

<p>workstations used on the ANPR vehicle at roadblocks.</p> <p>Manual enquiries on outstanding notices are executed on the ANPR roadblock vehicle at any location outside the office. The offline database can also be used to generate new summonses for outstanding section 341 notices and to serve the summons on the offender by Traffic Officers while the offender is present at the roadblock.</p> <p>Together with this manual enquiry, new technology is used to automatically track vehicles by scanning the registration number plates of vehicles. (ANPR = Automatic Number Plate Recognition). A video camera, an ANPR camera, scans the registration number plate of an oncoming vehicle. The registration number is then fed into a workstation connected to the camera. Software “reads” the registration number and compares it against a database of outstanding fines, summonses and warrants of arrest. When a match is found, the workstation screen indicates to the operator that the number plate of a particular vehicle has registered positively. The vehicle is then stopped by a traffic officer. All of this happens within a matter of seconds. Depending on the nature of the offence, the motorist is requested to pay any outstanding notice. In the case of a warrant of arrest the motorist has the option of paying the fine amount as well as the contempt of court amount. If the offender cannot pay, he or she is arrested to appear in court.</p>

**CERTIFICATE OF INDEPENDENT BID DETERMINATION - COMPULSORY**

1 This Municipal Bidding Document (MBD) must form part of all bids<sup>1</sup> invited.

2 Section 4 (1) (b) (iii) of the Competition Act No. 89 of 1998, as amended, prohibits an agreement between, or concerted practice by, firms, or a decision by an association of firms, if it is between parties in a horizontal relationship and if it involves collusive bidding (or bid rigging).<sup>2</sup> Collusive bidding is a *pe se* prohibition meaning that it cannot be justified under any grounds.

3 Municipal Supply Regulation 38 (1) prescribes that a supply chain management policy must provide measures for the combating of abuse of the supply chain management system, and must enable the accounting officer, among others, to:

- a. take all reasonable steps to prevent such abuse;
- b. reject the bid of any bidder if that bidder or any of its directors has abused the supply chain management system of the municipality or municipal entity or has committed any improper conduct in relation to such system; and
- c. cancel a contract awarded to a person if the person committed any corrupt or fraudulent act during the bidding process or the execution of the contract.

4 This MBD serves as a certificate of declaration that would be used by institutions to ensure that, when bids are considered, reasonable steps are taken to prevent any form of bid-rigging.

5 In order to give effect to the above, the attached Certificate of Bid Determination (MBD 9) must be completed and submitted with the bid:

<sup>1</sup> Includes price quotations, advertised competitive bids, limited bids and proposals.

<sup>2</sup> Bid rigging (or collusive bidding) occurs when businesses, that would otherwise be expected to compete, secretly conspire to raise prices or lower the quality of goods and / or services for purchasers who wish to acquire goods and / or services through a bidding process. Bid rigging is, therefore, an agreement between competitors not to compete.
