

The range

The Air-Pot system is extremely flexible and can be purchased in a variety of different forms.

- As a kit – comprising walls, bases and fixings – for assembly into specific pot sizes.
- As a pre-sized Air-Pot wall for larger containers.
- Or as a roll of Air-Pot material for you customise to your own requirements

Purchase

This site is for commercial growers, distributors and retailers only who wish to purchase at least pallet/skid quantities. If you wish to view the wholesale price list please contact us for the password.

For prices in the USA please contact our US representative chris@air-pot.com

For smaller orders please visit our online store at air-pot.com/garden

Recycled Plastic Radical Design Reusable

The unique design of Air-Pot containers has evolved since 1990, constantly improving to guarantee that plants only develop healthy fibrous roots, with no circling.

Healthy roots mean faster growth and better uptake of nutrient and water. Made from recycled HDPE, the containers are sturdily built and reusable many times, even in tropical sunshine.
