TERMS OF REFERENCE FOR THE APPOINTMENT OF A PANEL OF DENTAL LABORATORIES FOR GAUTENG HEALTH INSTITUTIONS AND TERTIARY ORAL HEALTH CENTRES FOR A PERIOD OF THREE YEARS.

1. Purpose

The purpose of this tender is to acquire service providers for the manufacturing of fixed dental prostheses, removable dental prostheses, maxillofacial prostheses, orthodontic fixed and removable appliances, implant prostheses, surgical guides and occlusal splints for Gauteng Department of Health and Tertiary Oral Health Centres for a period of three (3) years.

2. Background

2.1 Oral Health Centres

The dental schools of the Gauteng Department of Health (Sefako Makgato Health Sciences University, University of Pretoria and the University of the Witwatersrand) provide basic and specialized dental services to a vast population of patients in the greater Gauteng areas. Due to the high demand of prostheses fabrication and large patient volumes, the demand cannot be met by in-house laboratories. The prostheses and appliances required for patient treatment are highly specialized and requires very specific equipment for fabrication.

The tertiary oral health institutions of Gauteng Department of Health hereby requests the permission to obtain a panel of laboratories to assist in the fabrication of dental prostheses and appliances, assist in the overflow of in-house dental laboratory work and to secure contracts with laboratories and financial assistance herewith.

2.2 District Health Services

The Gauteng Department of Health provides basic and specialized Dental services to all patients referred. The Department has hundred (100) fixed Oral Health clinics, eighteen (18) dental clinics based in various prisons, three (3) satellite clinics and (10) mobile units. The services provided include, but not limited to, provision of dentures to the geriatric patients, disabled people and school children, and interceptive orthodontics.

3. Motivation

3.1 Oral Health Centres

The dental tertiary institutions of the Gauteng Department of Health have always utilised the services of external laboratories based on their location and the specific services that they render to supply a need in specialized dentistry. This year, there has been difficulties in the approval of payments to the laboratories that rendered such services. The bid application committee stipulated that there are irregularities in the request of payments and due to the large amounts paid to the outsourced laboratories, the contracts should be advertised. The bid application committee agreed with the need for this essential service but encouraged the tertiary institutions to use laboratories in the central service database and advertise a tender for such services.

There is a large patient pool serviced by the dental tertiary institutions that ranges from basic restorative treatment regimens to very complexed facial prosthetics for patients suffering from cancer. Although the training institutions are driven by refining techniques and training students on an undergraduate and postgraduate platform, the patients are always in the center of best practice and service rendering. The Dental schools have a high patient satisfaction rate, which is largely contributed by partnerships with specialized laboratories.

3.2 District Health Services

The dire need for the orthodontic treatment services and denture insertions is evidenced by the increase in the statistics reports for designated facilities. Furthermore, the availability of this tender has improved payment to the service providers and also this replaced the sundry method which was discontinued as per Treasury Regulations.

The projected number of denture needs in this financial year based on the current statistics will be in excess of four thousand (4000) patients or treatment procedures.

The availability of the contract will enable the clinicians to procure required dentures and consumables as and when required without any service delivery disruptions. This will significantly reduce patient's waiting times at various centres, thereby enhancing the patients' quality of life. In addition, this is in line with the Department's Oral Health Services and Dental Schools guidelines on provision of dental prostheses and dentures.

- 2 Section 4 (1) (b) (iii) of the Competition Act No. 89 of 1998, as amended, prohibits an agreement between, or concerted practice by, firms, or a decision by an association of firms, if it is between parties in a horizontal relationship and if it involves collusive bidding (or bid rigging).² Collusive bidding is a *pe se* prohibition meaning that it cannot be justified under any grounds.
- 3 Treasury Regulation 16A9 prescribes that accounting officers and accounting authorities must take all reasonable steps to prevent abuse of the supply chain management system and authorizes accounting officers and accounting authorities to:
 - a. disregard the bid of any bidder if that bidder, or any of its directors have abused the institution's supply chain management system and or committed fraud or any other improper conduct in relation to such system.
 - b. cancel a contract awarded to a supplier of goods and services if the supplier committed any corrupt or fraudulent act during the bidding process or the execution of that contract.
- 4 This SBD serves as a certificate of declaration that would be used by institutions to ensure that, when bids are considered, reasonable steps are taken to prevent any form of bid-rigging.
- 5 In order to give effect to the above, the attached Certificate of Bid Determination (SBD 9) must be completed and submitted with the bid:

¹ Includes price quotations, advertised competitive bids, limited bids and proposals.

² Bid rigging (or collusive bidding) occurs when businesses, that would otherwise be expected to compete, secretly conspire to raise prices or lower the quality of goods and / or services for purchasers who wish to acquire goods and / or services through a bidding process. Bid rigging is, therefore, an agreement between competitors not to compete.
