## 2. TENDER SUBMISSION

Transnet has implemented a new electronic tender submission system, the e-Tender Submission Portal, in line with the overall Transnet digitalization strategy where suppliers can view advertised tenders, register their information, log their intent to respond to bids and upload their bid proposals/responses on to the system.

a) The Transnet e-Tender Submission Portal can be accessed as follows:

Log on to the Transnet eTenders management platform website (<https://transnetetenders.azurewebsites.net>);

- Click on "ADVERTISED TENDERS" to view advertised tenders;
- Click on "SIGN IN/REGISTER – for bidder to register their information (must fill in all mandatory information);
- Click on "SIGN IN/REGISTER" - to sign in if already registered;
- Toggle (click to switch) the "Log an Intent" button to submit a bid;
- Submit bid documents by uploading them into the system against each tender selected.
- **Tenderers are required to ensure that electronic bid submissions are done at least a day before the closing date to prevent issues which they may encounter due to their internet speed, bandwidth or the size of the number of uploads they are submitting. Transnet will not be held liable for any challenges**

**experienced by bidders as a result of the technical challenges. Please do not wait for the last hour to submit. A Tenderer can upload 30mb per upload and multiple uploads are permitted.**

- b) Each company must register its profile using its company details and use the corresponding registered profile to log an intent to bid as well as submitting any bid.
- c) Transnet will not accept a bid or will disqualify a bidder who submits a bid in the Transnet e-tender submission through another bidders'/Company's profile. In other words, each bidder must register the intent to bid and submit its bid through its own profile under the same company name that will eventually bid for the tender. No company shall submit a bid on behalf of another company regardless of the company being a subsidiary or holding company.
- d) In case of a Joint Venture, any of the parties/companies to the Joint Venture may use its registered profile to submit a bid on behalf of the Joint Venture.
- e) The tender offers to this tender will be opened as soon as possible after the closing date and time. Transnet shall not, at the opening of tenders, disclose to any other company any confidential details pertaining to the Tender Offers / information received, i.e. pricing, delivery, etc. The names and locations of the Tenderers will be divulged to other Tenderers upon request.
- f) Submissions must not contain documents relating to any Tender other than that shown on the submission.

## SECTION 1

### 1. Description of the *works*

#### 1.1 Executive overview

At Richards Bay Terminals, the current water supply system relies on a single source from the Transnet National Ports Authority (TNPA). Any pressure loss or breakdown in this supply leads to operational interruptions, causing lost time and potential delays in vessel loading. The existing system lacks sufficient backup capacity, making the terminal vulnerable to disruptions that impact productivity and efficiency.

To mitigate this risk, the project involves the installation of new booster pumps and replacement of HDPE water lines. This upgraded system will ensure continuous water supply even during TNPA source failures, allowing uninterrupted vessel loading operations. The new booster pumps and reservoir will become the primary system, while the existing pump will remain on standby for redundancy.

#### 1.2 The *Employer's* objectives

The service provider is required to do the following:

- 1.2.1 Maintain vessel loading capabilities even during water supply disruptions by providing a backup water reserve.
- 1.2.2 Replace damaged pipe network and booster pumps to enhance durability and performance.
- 1.2.3 Establish a standby system (existing pump) to ensure fail-safe operations in case of primary system failure.
- 1.2.4 Transition to the new booster pump and reservoir as the permanent primary system while keeping the old system as a backup.
