A Respondent's compliance with the minimum functionality/technical threshold will be measured by their responses to Annexure B.

Respondents are to note that Transnet will round off final technical scores to the nearest 2 (two) decimal places for the purposes of determining whether the technical threshold has been met.

The minimum threshold for technical/functionality [Step Two] must be met or exceeded for a Respondent's Proposal to progress to Step Three for final evaluation

6.3 STEP THREE: Evaluation and Final Weighted Scoring

a) **Price Criteria** [Weighted score 80 points]:

Evaluation Criteria	RFP Reference
• Commercial offer	Section 4
• Commercial discounts ¹	Section 4
• Price adjustment conditions / factors	

Transnet will utilise the following formula in its evaluation of Price:

$$PS = 80 \left(1 - \frac{Pt - P_{min}}{P_{min}} \right)$$

Where:

Ps = Score for the Bid under consideration
 Pt = Price of Bid under consideration
 P_{min} = Price of lowest acceptable Bid

b) **Specific Goals** [Weighted score 20 point]

- Specific goals preference points claim form
- Preference points will be awarded to a bidder for attaining the specific goals requirements in accordance with the table indicated in Section 4.1 of the specific goals Claim Form.

6.4 SUMMARY: Applicable Thresholds and Final Evaluated Weightings

Thresholds	Minimum Threshold
Technical / functionality	80

Evaluation Criteria	Final Weighted Scores
Price	80
Specific goals - Scorecard	20
TOTAL SCORE:	100

¹ Only unconditional discounts will be taken into account during evaluation. A discount which has been offered conditionally will, despite not being taken into account for evaluation purposes, be implemented when payment is effected

6.5 STEP FOUR: Price Negotiations (if applicable)

- Respondents are to note that Transnet may not award a contract if the price offered is not market related. In this regard, Transnet reserves the right to engage in PTN with the view to achieving a market-related price or to cancel the tender. Negotiations will be done in a sequential manner i.e.:
 - first negotiate with the highest ranked bidder or cancel the bid, should such negotiations fail,
 - negotiate with the 2nd and 3rd ranked bidders (if required) in a sequential manner.
- In the event of any Respondent being notified of such short-listed/preferred bidder status, his/her bid, as well as any subsequent negotiated best and final offers (BAFO), will automatically be deemed to remain valid during the negotiation period and until the ultimate award of business.
- Should Transnet conduct post tender negotiations, Respondents will be requested to provide their best and final offers to Transnet based on such negotiations. Where a market related price has been achieved through negotiation, the contract will be awarded to the successful Respondent(s).

6.6 STEP FIVE: Objective Criteria (if applicable)

Transnet reserves the right to award the business to the highest scoring bidder/s unless objective criteria justify the award to another bidder.

6.7 STEP SIX: Award of business and conclusion of contract

- Immediately after approval to award the contract has been received, the successful bidder(s) will be informed of the acceptance of his/their Bid by way of a Letter of Award. Thereafter the final contract will be concluded with the successful Respondent(s). where applicable.
- Alternatively, acceptance of a letter of award by the Successful Respondent. will constitute the final contract read together with their RFQ response and the Standard Terms and Conditions. This will be stated in the letter of award.

1 OVERVIEW OF THE WORK**1.1 Executive Overview**

Transnet Port Terminals is a division of Transnet SOC Limited whose core business is to provide cargo handling to a wide spectrum of customers, including shipping lines, freight forwarders and cargo owners. Operations are divided into five major business segments, namely containers, bulk, break bulk, automotive and national port authority. All divisions operating under one umbrella, Richards Bay is one of Transnet Bulk and Break Bulk handling terminal divided into two namely, DBT and MPT. DBT comprise of conveyor belts, ship loaders, ship unloaders, stackers and conveyor belt systems infrastructure for import, export and stacking of bulk commodities like coal, chloride, magnetite, and Sulphur to list few. MPT handles a mixture of commodities with the use of road truck transport, skips, forklifts, mobile ship loader cranes, ship unloader mobile cranes, straddlers and many more.

Technical consumables (cable ties, rust removing lubricants, electric fuses, cutting discs, drill bits etc.) plays a very critical role for the repairs and services to be carried out successfully during maintenance services. Inconsistent supply of technical consumables can negatively impact effective execution of maintenance and repairs services in plant engineering operations. For an example, cable ties improve quality of work in organizing electrical harnesses, avoiding close contact of hydraulic hoses with moving or rotating components in mechanical mechanisms. It is therefore, of high importance to ensure that continuous supply of technical consumables is always in place to effectively carryout maintenance and improve plant performance. TPT Richards Bay facilitates its inventory management through a local store, which source these technical consumables for use at the point of need.

- 7.2 If it is found to be that the Bidder / Supplier made an incorrect statement on this subject, the Bidder / Supplier can be rejected from the registration process or removed from the Bidder / Supplier database, if already registered, for such reason (refer to the Breach of Law Form contained in the applicable RFX document.)
