**1. BACKGROUND**

The Border Management Authority (BMA) is responsible for securing South Africa's borders by facilitating the legitimate movement of people and goods. To achieve this mandate, there is a need to enhance health surveillance and disease control by implementing the necessary health measures at Ports of Entry (PoE). Such measures include screening of travellers on arrival at the PoE, through thermal screening, visual observation and interviewing of travellers.

The International Health Regulations (IHR) 2005 require Members State to develop and maintain capacities for early detection and response to public health events and emergencies which may arise at the PoE. Furthermore, the COVID-19 pandemic highlighted the importance of early detection systems, such as thermal scanning technology, in managing the spread of infectious diseases. Thermal screening assist in early detection of individuals with elevated body temperatures, enabling proactive response and minimizing public health risks. In light of global health threats due to international travel and trade, there is a need for the BMA to enhance its capabilities in line with technological development by procuring walk-through thermal scanners at the identified PoE.

**1. PURPOSE**

The purpose of this terms of reference is to source competent service provider/s to supply, install and maintain two (2) walk-through thermal scanners at Cape Town and OR Tambo International Airports.

**3. OBJECTIVES**

- Enhance public health surveillance capacity at ports of entry.
- Improve PoE operational efficiency through automated screening and support integrated border

- Ensure compliance with international health regulations and technology standards.
- Ensure supply and delivery of walk-through thermal scanners as per the specifications.
- Installation of the scanners at the identified PoE in line with the relevant regulatory and safety standards.
- Ensure sustainable operation through training, support, and maintenance services.
