2.7	The aircraft will have to be calibrated again six months after an order has been issued and thereafter, after every six months for the duration of the contract. If another aircraft is used during the contract period, condition 2.6 will again apply. Costs thereof are for the bidder.
2.8	The aircraft has to be fitted with a flow meter, which can accurately measure the flow-rate of pesticides applied during aerial control operations.
2.9	The successful bidder should have the additional spray pump as a backup, because the conditions in which operations take place might necessitate the replacement of damaged or lost spray pumps.
2.10	It is expected of the successful bidder to have his/her services and equipment available within 7 days after acceptance of the bid. From then on, the service must be available on a 24-hour basis for the duration of the contract.

If any of the conditions are not complied to, the Department reserves the right to reject the bid.
2.16	Bidders will be considered based on an hourly-flying tariff and kilometer tariff. Flying hours will be calculated from and compensated according to tachometer readings from the base station (Gauteng) and back. Kilometer tariff will be calculated from the base station (Gauteng) and back.
