## THE NATIONAL INDUSTRIAL PARTICIPATION PROGRAMME

### INTRODUCTION

The National Industrial Participation (NIP) Programme, which is applicable to all government procurement contracts that have an imported content, became effective on the 1 September 1996. The NIP policy and guidelines were fully endorsed by Cabinet on 30 April 1997. In terms of the Cabinet decision, all state and parastatal purchases / lease contracts (for goods, works and services) entered into after this date, are subject to the NIP requirements. NIP is obligatory and therefore must be complied with. The Industrial Participation Secretariat (IPS) of the Department of Trade and Industry (DTI) is charged with the responsibility of administering the programme.

### 1. PILLARS OF THE PROGRAMME

- 1.1 The NIP obligation is benchmarked on the imported content of the contract. Any contract having an imported content equal to or exceeding US\$ 10 million or other currency equivalent to US\$ 10 million will have an NIP obligation. This threshold of US\$ 10 million can be reached as follows:
- (a) Any single contract with imported content exceeding US \$10 million; or
  - (b) Multiple contracts for the same goods, works or services each with imported content exceeding US \$3 million awarded to one seller over a 2 year period which in total exceeds US \$10 million; or
  - (c) A contract with a renewable option clause, where should the option be exercised the total value of the imported content will exceed US \$10 million.
  - (d) Multiple suppliers of the same goods, works or services under the same contract, where the value of the imported content of each allocation is equal to or exceeds US\$ 3 million worth of goods, works or services to the same government institution, which in total over a two (2) year period exceeds US\$10 million.
- 1.2 The NIP obligation applicable to suppliers in respect of sub-paragraphs 1.1 (a) to 1.1 (c) above will amount to 30 % of the imported content whilst suppliers in respect of paragraph 1.1 (d) shall incur 30% of the total NIP obligation on a *pro-rata* basis.
- 1.3 To satisfy the NIP obligation, the DTI would negotiate and conclude agreements such as investments, joint ventures, sub-contracting, licensee production, export promotion, sourcing arrangements and research and development (R&D) with partners or suppliers.
- 1.4 A period of seven years has been identified as the time frame within which to discharge the obligation.

## **2 REQUIREMENTS OF THE DEPARTMENT OF TRADE AND INDUSTRY**

- 2.1 In order to ensure effective implementation of the programme, successful bidders (contractors) are required to, immediately after the award of a contract that is in excess of **R10 million** (ten million Rands), submit details of such a contract to the DTI for reporting purposes.
- 2.2 The purpose for reporting details of contracts in excess of the amount of R10 million (ten million Rands) is to cater for multiple contracts for the same goods, works or services; renewable contracts and multiple suppliers for the same goods, works or services under the same contract as provided for in paragraphs 1.1.(b) to 1.1. (d) above.

## **3 BID SUBMISSION AND CONTRACT REPORTING REQUIREMENTS OF BIDDERS AND SUCCESSFUL BIDDERS (CONTRACTORS)**

- 3.1 Bidders are required to sign and submit this Standard Bidding Document (SBD 5) together with the bid on the closing date and time.
- 3.2 In order to accommodate multiple contracts for the same goods, works or services; renewable contracts and multiple suppliers for the same goods, works or services under the same contract as indicated in sub-paragraphs 1.1 (b) to 1.1 (d) above and to enable the DTI in determining the NIP obligation, successful bidders (contractors) are required, immediately after being officially notified about any successful bid with a value in excess of R10 million (ten million Rands), to contact and furnish the DTI with the following information:
- Bid / contract number.
  - Description of the goods, works or services.
  - Date on which the contract was accepted.
  - Name, address and contact details of the government institution.
  - Value of the contract.
  - Imported content of the contract, if possible.
- 3.3 The information required in paragraph 3.2 above must be sent to the Department of Trade and Industry, Private Bag X 84, Pretoria, 0001 for the attention of Mr Elias Malapane within five (5) working days after award of the contract. Mr Malapane may be contacted on telephone (012) 394 1401, facsimile (012) 394 2401 or e-mail at [Elias@thedti.gov.za](mailto:Elias@thedti.gov.za) for further details about the programme.

## **4. PROCESS TO SATISFY THE NIP OBLIGATION**

- 4.1 Once the successful bidder (contractor) has made contact with and furnished the DTI with the information required, the following steps will be followed:
- a. the contractor and the DTI will determine the NIP obligation;
  - b. the contractor and the DTI will sign the NIP obligation agreement;
  - c. the contractor will submit a performance guarantee to the DTI;
  - d. the contractor will submit a business concept for consideration and approval by the DTI;
  - e. upon approval of the business concept by the DTI, the contractor will submit detailed business plans outlining the business concepts;
  - f. the contractor will implement the business plans; and
  - g. the contractor will submit bi-annual progress reports on approved plans to the DTI.

4.2 The NIP obligation agreement is between the DTI and the successful bidder (contractor) and, therefore, does not involve the purchasing institution.

- 2 Section 4 (1) (b) (iii) of the Competition Act No. 89 of 1998, as amended, prohibits an agreement between, or concerted practice by, firms, or a decision by an association of firms, if it is between parties in a horizontal relationship and if it involves collusive bidding (or bid rigging).<sup>2</sup> Collusive bidding is a *pe se* prohibition meaning that it cannot be justified under any grounds.
  
- 3 Treasury Regulation 16A9 prescribes that accounting officers and accounting authorities must take all reasonable steps to prevent abuse of the supply chain management system and authorizes accounting officers and accounting authorities to:
  - a disregard the bid of any bidder if that bidder, or any of its directors have abused the institution's supply chain management system and or committed fraud or any other improper conduct in relation to such system.
  
  - b. cancel a contract awarded to a supplier of goods and services if the supplier committed any corrupt or fraudulent act during the bidding process or the execution of that contract.
  
- 4 This SBD serves as a certificate of declaration that would be used by institutions to ensure that, when bids are considered, reasonable steps are taken to prevent any form of bid-rigging.
  
- 5 In order to give effect to the above, the attached Certificate of Bid Determination (SBD 9) must be completed and submitted with the bid:

<sup>1</sup> Includes price quotations, advertised competitive bids, limited bids and proposals.

<sup>2</sup> Bid rigging (or collusive bidding) occurs when businesses, that would otherwise be expected to compete, secretly conspire to raise prices or lower the quality of goods and / or services for purchasers who wish to acquire goods and / or services through a bidding process. Bid rigging is, therefore, an agreement between competitors not to compete.

**General:** A robust container designed to store water which, when frozen or cooled to an appropriate temperature, provides the thermal inertia needed to maintain safe storage conditions for vaccines when carried inside a cooler-box.

**Performance:**

***Water filling requirements:*** Water-packs must be supplied with a **removable filling cap** and delivered empty. The recommended level for filling the water-pack must be clearly visible on the outside of the container and it must be possible to check the water level inside with the cap in place. Alternatively, the water-pack must be designed in such a way that it cannot be overfilled.

***Deformation:*** The water-pack must have effective reinforcement to restrain the walls against swelling. When frozen solid and laid flat on a flat surface, the pack must not exceed the unfrozen thickness by more than 25%. Deformation caused by ice expansion must be reversible –

when the water-pack thaws its thickness must return to the pre-frozen measurement.

**Robustness:** Water-packs must be able to withstand a two meter drop onto every face, edge, and corner when frozen to -20°C. After thawing they must then pass a leakage test. Water-packs must also be able to withstand a one meter drop onto every face, edge, and corner with the contents in the liquid state, at +5°C. They must have passed a leakage test.

**Leakage:** Unfrozen water-packs, including the cap must be able to resist a lateral force of 80 kg applied to either of the two main faces without leaking.

**Pack colour:** Water-packs must be having been constructed using uncolored translucent material.

**Physical characteristics:**

**Overall dimensions and weights:** The three water-pack types must conform to the dimensional and weight restrictions shown in the table above:

**Human factors:**

When water-packs are stacked and frozen in bulk they must not bond together.

**Materials:**

Water-pack and cap materials must resist UV degradation, must be easy to clean and must be selected with environmentally safe end-of-life disposal in mind. Manufacturer/ supplier must use materials that are known to be non-

		<p>toxic when incinerated at any temperature between 650°C and 1,200°C. Chlorinated plastics and composites containing epoxy resins are not permitted.</p> <p><b>Warranty:</b> The product is to be covered by a two year replacement warranty in the event of any failure arising from defective design, materials or workmanship.</p> <p><b>Servicing provision:</b> The product is to be designed to achieve a maintenance-free life of not less than 5 years, apart from routine cleaning and the requirement to fill the packs with tap water.</p> <p><b>Disposal and recycling:</b> The manufacturer is to provide information to the buyer on any hazardous materials contained within the product and suggestions for resource recovery/recycling and/or environmentally safe disposal.</p> <p><b>Instructions:</b> User and maintenance instructions must be in English and/ or any of the other South African official language. The instructions must state the rated water content of the water-pack, up to the fill line.</p> <p><b>Training:</b> The Service provider must provide once off onsite training supplemented by virtual platform, also provide training material such as videos and user guide manuals</p>	
--	--	--	--

		<p><b>Verification</b></p> <p>The verification of the correctness of the product/ equipment to be supplied will be with the WHO PQS verification Protocol/manual, thus the supplier must also supply a proof of WHO prequalification of the product supplied or to be supplied.</p>
