SECTION 3: BACKGROUND, OVERVIEW AND SCOPE OF REQUIREMENTS

1 BACKGROUND

1.1 Transnet SOC Limited is a logistics company, comprising of six (6) operating divisions (ODs) namely:

- 1.1.1 Transnet Freight Rail (TFR)
- 1.1.2 Transnet Rail Infrastructure Manager (TRIM)
- 1.1.3 Transnet National Port Authority (TNPA)
- 1.1.4 Transnet Port Terminal (TPT)
- 1.1.5 Transnet Pipelines (TPL)
- 1.1.6 Transnet Engineering (TE)
- 1.1.7 Transnet Property (TP)

1.2 TFR, the largest division of Transnet SOC Limited, has recently been split into two ODs namely, Transnet Rail Infrastructure Manager (TRIM) and Transnet Freight Rail (TFR). This separation is part of government's Rail Reform program, which was tabled in a white paper on National Rail Policy in 2022. The aim of Rail Reform is to revitalise the rail industry in South Africa and establish an efficient sector wherein various rail operators are granted access to provide superior and economical rail services. An essential element to attaining a reformed market is the establishment of a sustainable rail infrastructure manager, who possesses the capacity to invest in the future demands of the market to unlock growth for the economy at large and provide operators with a high-quality network.

1.3 As the world transitions into the Fourth Industrial Revolution, TRIM and TFR have embarked on digital transformation journeys to ensure sustainable business operations and growth. The Digital Transformation Strategy (DTS) is being implemented through the formation of strategic partnerships that foster local industrialisation, augment capacity, capability, and expertise available to improve service delivery, innovation, and value creation.

1.4 In response to the Digital Transformation Strategy, TRIM/TFR ICTM has aligned its operating model accordingly to deliver solutions that drive business value and enhance customer experience. Furthermore, ICTM has established programs to revitalise the role of information and technology systems in the organisation, reinvent information and operational technology delivery and future-proof the foundation to keep abreast of rapid technological advancement.

1.5 Successful achievement of the DTS objectives will require digital enablement of business process capabilities across the value chain. Currently a high percentage of business processes are supported by manual activities, resulting in substandard operational performance and dissatisfied customers. Digitalisation of

business process capabilities will support more effective decision-making, and operational efficiency and execution.

1.6 To enable the TRIM/TFR DTS, several programs have been identified to automate the TRIM/TFR value chain. The future ICT Reference Architecture (Fig 1) below provides an overview of the programs and the capabilities of the various programs.
