PART C2. SCOPE OF WORK AND BILLS OF QUANTITY

C2.1 SCOPE OF WORK

BACKGROUND

The below work should be delivered in sequential phases, with the earlier phases informing subsequent phases,

REVENUE OPTIMISATION PROJECT (*The Turnaround Strategy*)

1. PURPOSE

The project purpose [*The Revenue Optimization Project*] is aimed at assisting the municipality with regards to data cleansing in order to determine the collectable and uncollectable amounts as well as proposals for write-offs where necessary particularly on the household debts; through ensuring that the municipality has a reliable revenue data and physical visits of the unmatched and deceased to inform final write off amount recommended on the outstanding debt. Experience has shown that revenue for clients with incorrect / incomplete contact information cannot be collected on time or not be collected at all. Currently minimal collections also do contribute to the municipality's cash flow to an extent where the municipality is having shortfall for normal operations.

The indigent status of each consumer (where applicable) also needs to be reviewed by either physical audit or external verification checks so that if a household is found to have provided fraudulent information to the municipality regarding any material condition for registration as an indigent such person should be removed from the register of indigents. The municipality also needs assistance in updating its current indigent policy.

2. CURRENT STATE

The municipality is currently confronted with continuous increase of historical debt and current debt to a certain extent but, in a nutshell, the value of these debtors is very questionable and cannot currently be justified.

Also, the ongoing growth of debtor listing to all the areas under the municipality's jurisdiction requires a clear set of rules and procedures in relation to naming conventions (farms, suburbs, and extensions), debtor groupings, the linking of services and service infrastructure and data loading authority levels to protect the data purity and continued completeness.

Data integrity within the municipal debtors' book is very questionable and thus some debtors are not even aware of the outstanding debt. The invoices and statements might be going to incorrect addresses, which is resulting in further fruitless expenditure therefore the municipality is not just losing from the revenue collections but again must bear losses on the administration of these debtors.

Municipal consumer debt has several potential impacts. It can cripple the cash position of this municipality and, therefore, its ability to fulfil constitutionally mandated responsibilities. Outstanding payments also represent foregone resources that could be used to improve the living conditions of the poor. Possible reasons as to why this type of debt arises are various and our municipality needs to find out.

The current basic challenge is that presently the municipality is that the data is not reasonably arranged and managed with much needed and imperative information for collection purposes missing, there is a definite need to identify incomplete, incorrect, inaccurate, irrelevant etc. parts of the data and then replacing, modifying or deleting the incorrect data which will: -

- Boost or support effective debt collection procedures
- Result in accurate debtor's book and
- Shall provide the basis of the indigent register

3. SCOPE OF WORK

- (a) The ideal service provider must have innovative ideas which will assist in revenue management and improve the municipality's low collections from its debtors.
- (b) Assistance is also required to perform a door-to-door survey to ascertain critical billing information particularly for the unmatched and deceased that will come out of the desktop exercises that will be concluded during the 1st Phase of this project. The requirement here is that local labour must be used for this door-to-door survey.

The following information will be verified and obtained from each property per site visit where applicable: -

✓ Access to property	✓ Is property accessible, if not reason
✓ Property information	✓ Erf No, Physical address & property usage
✓ Occupant information	✓ Name, ID, contact details and other relevant information
✓ Owner information	✓ Name, ID, contact details and other relevant information
✓ Electricity Meter	✓ Serial number and reading, faults
✓ Water meter	✓ Serial numbers, reading, faults
✓ Refuse Bin information	✓ Number of bins per property

The Data Loggers for the above exercise will carry tablets, will be programmed with the required information as agreed and will be linked to a specific location providing the street address and location.

Fieldworkers for the above will need to be employed from the local community and the fieldwork needs to be completed within a period of 4 - 6 months from awarding the contract

The fieldworker to follow the pre-determined sequence of steps to collect the above data

Assess / establish the current situation regarding revenue management within the municipality by: -

- Analyze the arrear debt in the municipal books to determine whether there are accounts that are untraceable, inaccurate, etc. and require some writing offs or any adjustments.
- Clearly determine collectable vs uncollectable where there is almost zero chance of recovering monies owed (& so that our resources are not wasted by focusing on debt that is highly uncollectable)

And amongst other activities, the service provider will also be expected to have: -

Data Cleaning ability capabilities that will be able to incorporate an ability to work with SG codes, link it on General Ledger Account Level and map it in a geospatial software to illustrate revenue leakage also i.e. not billing for all services and structures not billed at all.

- Ensure/demonstrate skills transfer during project execution.
- Set up management reports/structure for revenue management reporting to internal stake- holders
- Identify and assist with other key areas that may affect revenue management within the municipality.

**THE MAXIMUM PERIOD OF COMPLETION FOR THE ABOVE PHASE OF THE PROJECT SHOULD AT LEAST BE 2
– 3 months MAXIMUM FROM DATE OF THE APPOINTMENT!**

1. PERIOD / DURATION OF THE PROJECT

The service provider must enter into a nine (09) months service level agreement with The Emakhazeni Local Municipality for provision of the services.

The contract between Emakhazeni Local Municipality and the successful bidder shall officially commence from the date of signing the Service Level Agreement relating to the appointment of Service Providers which will be signed between the service provider and the Municipality

2. TERMS AND CONDITIONS OF THE PROPOSAL

Appointment will be made in terms of the Emakhazeni Local Municipality's Procurement Policy.

3. NON-APPOINTMENT

The Emakhazeni Local Municipality reserves the right not to make an appointment should find that bidding parties do not meet the specified criteria.

4. COMPLETION

Projects will not be paid for unless the required services have been correctly delivered.

5. COURTESY

Prior to the commencement of works, the successful bidder shall arrange through the office of the municipality and/or the appointed Project/Programme Manager to be introduced to the appropriate Municipal structures and to be briefed upon any sensitivities that need to be observed.

6. COST OF THE PROJECT

- License fees applicable to creating and maintaining client online portfolios.
- Tender rates must be submitted on the Pricing Schedule hereto attached. Any alternative offers, deviations from the specifications, or explanatory notes must be submitted separately.
