APPOINTMENT OF A SERVICE PROVIDER(S) TO CONDUCT PUBLIC PARTICIPATION FOR CAPEX PROJECTS ACROSS THE CITY OF JOHANNESBURG ON AS AND WHEN BASIS

INTRODUCTION AND BACKGROUND

Johannesburg Water (JW) has a high percentage of Unaccounted for Water due to aging infrastructure and ill use of water by residents. In response to the challenges above, JW continues to implement Infrastructure upgrading projects to minimise the continuous overflow of water as a result of ageing infrastructure. While the technical intervention is crucial to address these challenges, a social approach is also important by a social consultant to complement the work that will be undertaken by technical contractors. This will create an environment where the communities will be engaged in a language that they will understand. The engagement with stakeholders would elaborate the rationale behind projects that are implemented and the processes that are relevant for such projects to be implemented with minimal disruptions.

The public participation process normally includes the introduction of projects to relevant City of Johannesburg Regional Offices (Regional Director, Ward Governance and the Citizen Relationship and Urban Management (CRUM)), one-on-one meetings with the Ward Councillors (Cllrs), Stakeholder meetings and public meetings. The implemented projects need to be introduced within a specific period of time to avoid incidents of the company incurring costs of claims from contractors for not being able to commence with the works within the stipulated period. At times, JW implements a lot of projects in one Region within the same period, which makes it difficult for Stakeholder Relations Specialists to decide on how to support projects at the same time, as meetings sometimes happen at the same time. The current staff complement gets overwhelmed with the work given the complex nature of some of the Regions and communities which may result in more frequent visits to one project within a short space of time thereby delaying other projects to commence in time. It is against this background a need has been identified to get additional support from an external Service Provider to fill the gaps where the team cannot be able to fulfill some of the responsibilities. It should however be noted that the responsibility to manage and monitor the work of the Service Provider will still rest with the Stakeholder Relations Specialist for that Region.

SCOPE OF WORK

To have a dedicated service provider(s) who will assist with conducting public participation needs of the Stakeholder Relations and Communications Department. This will assist to ensure that public participation has been conducted with all the affected stakeholders prior to the commencement and construction of CAPEX projects; Introduce all the projects to the key stakeholders and solicit community and political buy- in;

Effectively engage with all the stakeholders and address their concerns prior to project start and to minimize possible future project stoppages. The successful service provider will be expected to introduce identified projects across the City of Johannesburg and liaise with the key affected stakeholders within the project implementation areas.

DELIVERABLES

The purpose of appointing a social consultant is to ensure that the project is transparent and supported by the stakeholders. To achieve this, the Community Participation Consultant must facilitate participation and consultation with key stakeholders, promote a positive climate for the project, and facilitate the flow of information between stakeholders, the client, and the project team.

To this end, the following summarised services will be required:

1. Stakeholder identification and compilation of an interested and affected parties database;
2. Briefings with Ward Councillor/s and / or Ward Committee/s;
3. Arrange, facilitate, minute and / or report on public meetings and ward public meetings;
4. Attend project meetings before, during and after introduction phase of the project;
5. One-on-one interviews with Key Stakeholders;
6. Assist with the recruitment and employment of Community Liaison Officer`s, local labour and SMME`s;
7. Assist contractor/s by facilitating issues with local stakeholders and challenges concerning labour and SMME`s related matters during the introductory phase of the projects.

PROCESS PLAN

The effective public participation intervention should be inclusive of engagement with all the key stakeholders in the particular wards, which will involve the community members in participating in issues that affect them and will have the following benefits other than consultation:

- Employing local people
- Capacitating young persons to be appointed on the program
- Purchasing of various material from local communities

Johannesburg Water acknowledges that public participation and consultation should be continuous during the project life cycle therefore it is important to identify the key stakeholders prior to commencement of the project. Due to enormous work involved in so doing and the capacity within the department, an independent Service Provider needs to be solicited. A thorough consultative process should be done with the leadership, all stakeholders and community at large to ensure buy-in and gather ideas from the community as to the best times of getting the relevant people.

TERMS OF REFERENCE FOR THE SERVICE PROVIDER

The following is expected from the Service Provider:

- 3 Municipal Supply Regulation 38 (1) prescribes that a supply chain management policy must provide measures for the combating of abuse of the supply chain management system, and must enable the accounting officer, among others, to:
 - a. take all reasonable steps to prevent such abuse;
 - b. reject the bid of any bidder if that bidder or any of its directors has abused the supply chain management system of the municipality or municipal entity or has committed any improper conduct in relation to such system; and
 - c. cancel a contract awarded to a person if the person committed any corrupt or fraudulent act during the bidding process or the execution of the contract.
- 4 This MBD serves as a certificate of declaration that would be used by institutions to ensure that, when bids are considered, reasonable steps are taken to prevent any form of bid-rigging.
- 5 In order to give effect to the above, the attached Certificate of Bid Determination (MBD 9) must be completed and submitted with the bid:

¹ Includes price quotations, advertised competitive bids, limited bids and proposals.

² Bid rigging (or collusive bidding) occurs when businesses, that would otherwise be expected to compete, secretly conspire to raise prices or lower the quality of goods and / or services for purchasers who wish to acquire goods and / or services through a bidding process. Bid rigging is, therefore, an agreement between competitors not to compete.
