

CLARIFICATION QUESTION AND ANSWERS:

QUESTIONS 1 - 4

BALKFONTEIN PUMPS DOORNHOEK FEEDER STRENGTHENING – FS047

UPLOADED ON ESKOM TENDER BULLETIN and NATIONAL TREASURY E-TENDER BULLETIN on

17 OCTOBER 2023

	Supplier Question	Response from Technical Representative
1	On page 4, mandatory criteria, it states that the tenderer should have 2 MV authorised personnel - if the tenderer has 1 MV authorised person (with a valid auth), and another, whose MV authorisation has expired 23August 2023 - and a request has been submitted to FS FSO's on the 21/08/2023, and the tenderer hasn't received a response yet, is there a possibility that the tenderer may submit this proof, and still qualify as 2 MV authorised personnel?	The criteria specifies that the authorization needs to be valid! The person is not deemed authorized when he/she is in the process of being authorised, that means the person does not have the required authorization. It is always best to try and get people re-authorized before their authorization lapses because it may take time to get them reauthorized again, this outlook is also practiced within Eskom for personal who have or need to be authorised.
2	Still on page 4, if the ECB registration reads: Any electrical installation, supplied by single-phase electricity supply at the point of control, excluding specialized electrical installations. - will this be accepted?	I don't think a single phase one will be acceptable as they will be connecting a 3 phase MV cable into the indoor switch gear and doing a 3 phase MV cable termination on the first H pole DB1.
3	On page 13 - civil engineering resource, may this resource be outsourced?	We are looking for a contractor who has people with the required skill and proof of the skill as required, If they outsource a person or not we cannot have a say on that we just need the qualified person for the job available with the correct papers.
4	With reference to Page 4 point 3, it states that two MV authorisations are required, it doesn't specify an OU, so, I assume, that MV authorisations from any Ou will be accepted?	Please see page 3 point 5.1 of the criteria please.
