TERMS OF REFERENCE:

FOR THE PROVISION OF CYBER SECURITY MONITORING AND MANAGED DETECTION AND RESPONSE SERVICES FOR THE SACAA FOR A PERIOD OF THREE (3) YEARS

1. INTRODUCTION

The South African Civil Aviation Authority (SACAA) is an agency of the Department of Transport (DoT), established in terms of the Civil Aviation Act, 2009 (the Act) (Act No.13 of 2009), which came into effect on 31 March 2010. The Civil Aviation Act provides for the establishment of a stand-alone authority, mandated with controlling, promoting, regulating, supporting, developing, enforcing, and continuously improving levels of safety and security throughout the civil aviation industry.

The SACAA's mandate is to administer civil aviation safety and security oversight in the Republic of South Africa, in line with the Act and in accordance with the Standards and Recommended Practices (SARPs) prescribed by the ICAO.

The above is achieved by complying with the SARPs of the ICAO while considering the local context. The SACAA, as prescribed by the Civil Aviation Act as well as the Public Finance Management Act (PFMA), 1999 (Act No.1 of 1999), is a Schedule 3A public entity.

2. BACKGROUND

The SACAA hereby invites qualified and experienced service providers to submit bids for the provision of Cyber Security Monitoring and Managed Detection and Response (MDR) services, delivered 24/7/365, for a period of three (3) years.

The SACAA has already made a significant investment in Trend Micro's cybersecurity ecosystem, including endpoint, server, network, email, identity, cloud, and SIEM capabilities within the Trend Vision One platform. To uphold principles of responsible public sector financial management and eliminate unnecessary or wasteful expenditure, SACAA intends to leverage these existing security technologies rather than onboard new or duplicated toolsets.

Instead of procuring a traditional Security Operations Centre (SOC) which would introduce additional costs through duplicated SIEM platforms, overlapping monitoring tools, and redundant

analytics systems, SACAA aims to establish a **Cyber Risk Operations Center (CROC)** operating entirely on its existing Trend Micro technologies.

The CROC model integrates:

- **Trend Micro – Managed Detection and Response (MDR)** to provide 24×7 monitoring, alert correlation, investigation, threat hunting, and guided response; and
- **Trend Vision One Platform Administration**, delivered by local South African personnel, to ensure continuous sensor health, configuration governance, policy optimisation, automation playbook development, and operational reporting.

This approach ensures that SACAA maximises the value of its technology investment while enhancing national cyber resilience, consolidating operational visibility, and strengthening its defensive posture. Trend Vision One will serve as the **sole SIEM, data lake, correlation engine, investigation platform, response orchestration system, and SOAR automation layer**, thereby removing the need for any third-party SIEM expenditure.

3. INVITATION TO BID

The purpose of this Request for Proposal (RFP) is to solicit proposals from potential bidder(s) for the Provision of Cyber Security Monitoring and managed detection and response services for the SACAA for a period of three (3) years.

The required services shall be for a period of three (3) years.

5. SCOPE OF WORK

SACAA requires a comprehensive, always-on cyber defence capability that provides continuous monitoring, threat detection, investigation, incident response assistance, cyber risk management, and user-awareness upliftment. The service must be delivered entirely through Trend Micro technologies and must utilise SACAA's existing deployed security stack.

The required services must support a Cyber Risk Operations Center (CROC) model that replaces the need for a traditional SOC.

5.1. Monitored Environment – Critical Systems

The service provider must monitor, ingest, analyse, and correlate security telemetry from SACAA's Azure, cloud, and on-prem environments, including but not limited to:
