SOUTH AFRICAN SOCIAL SECURITY AGENCY

**TERMS OF REFERENCE FOR CERTIFIED INFORMATION SYSTEMS AUDITOR (CISA)
TRAINING AND EXAM PACKAGE FOR 2 (TWO) OFFICIALS**

**APPOINTMENT OF A SERVICE PROVIDER TO PROVIDE QUOTATION (RFQ) FOR THE
PROVISION OF CERTIFIED INFORMATION SYSTEMS AUDITOR (CISA) TRAINING AND
EXAM PACKAGE FOR 2 (TWO) OFFICIALS.**

1. PURPOSE

1.1 The South African Social Security Agency (SASSA) invites qualified vendors to submit a request for quote (RFQ) through normal procurement process for the service of Certified Information Systems Audit (CISA) packages that include learning material, training and exams for 2 (two) Information Technology (IT) auditors.

2. BACKGROUND

2.1 Treasury regulations 27.2.6 stipulate that Internal Audit must be conducted in accordance with the standards set by the Institute of Internal Auditors (IIA SA), which we are full-time members of.

2.2 Professional Development Requirements:

The Internal Auditors are required, according to IIA standard 1230 and IT Audit Framework Standard 1006.3, to continually enhance their knowledge, skills, and competencies through ongoing professional development. This involves attending various training courses, conferences, seminars, and workshops to stay abreast of the latest developments in the field.

2.3 Current Composition of the Internal Audit Unit:

The Internal Audit unit presently consists of two IT auditors; whose primary responsibility is the execution of IT audit engagements. However, it is noted that they are not Certified Information System Auditors (CISA), indicating a potential gap in meeting the global standard for IT audit professionals.

2.4 Introduction to Certified Information Systems Auditor (CISA)

The Certified Information Systems Auditor (CISA) designation, issued by Information Systems Audit and Control Association (ISACA), is recognized as the global standard for professionals specialising in information systems auditing, control, and security. To obtain the CISA designation, individuals must undergo training in preparation for a comprehensive exam, showcasing their knowledge, technical skills, and proficiency in addressing the dynamic challenges faced by modern organisations.

2.5 Roles and Responsibilities of CISA Holders

CISA holders play a crucial role in various stages of the audit process. Before conducting audit testing, they evaluate a company's objectives, systems, and risks to comprehend potential vulnerabilities and strengths. Post-audit, CISA holders deliver audit results and provide recommendations to management. Additionally, they engage in ad-hoc projects, collaborate on review practices, develop risk strategies, conduct continuity planning, and monitor IT personnel. CISA holders may also contribute to drafting and maintaining up-to-date IT policies, standards, or procedures.

CISA holders may also provide support to IT teams, including providing advice and guidance on IT systems, processes, and procedures. They may also provide technical support during the implementation of new systems or processes. Finally, they may also act as project managers and lead teams on IT projects.

In essence, the inclusion of CISA holders in the Internal Audit unit can significantly enhance the effectiveness of the audit process, ensuring a comprehensive understanding of IT-related risks, robust evaluation of systems, and the ability to provide valuable recommendations to strengthen organizational controls. Therefore, there is a compelling case for the Internal Audit unit to consider certifying its IT auditors as CISA holders to align with industry standards and best practices.
