**DEPARTMENT OF
AGRICULTURE AND RURAL DEVELOPMENT**

TERMS OF REFERENCE

FOR

**SUPPLY, DELIVERY, OFFLOADING AND PACKING OF SEEDS AND SEEDLINGS
FOR LIMPOPO DEPARTMENT OF AGRICULTURE AND RURAL DEVELOPMENT
FOR A PERIOD OF THREE (03) YEARS.**

1. PURPOSE

To appoint suitable service providers who can supply, deliver, offload and pack seeds and seedlings for Limpopo Department of Agriculture and Rural Development (LDARD) for a period of three (3) years.

2. BACKGROUND

- 2.1** The Limpopo Province remarkably produces a wide variety of agricultural crop commodities under varying climatic conditions. It is one of the country's prime agricultural regions remarkable for the production of fruits and vegetables, cereals, tea and cotton. It is comprised of five District Municipalities, namely Vhembe, Mopani, Capricorn, Sekhukhune and Waterberg. In the north eastern side lies Vhembe and Mopani Districts which are dominated by horticultural crops whilst Waterberg and Sekhukhune appear to be on the south western part of Limpopo and are dominated by field crops.
- 2.2** Whilst the Province has isolated commercial system of production, it is mainly dominated by a food-based production system that is mainly characterised by smallholder agriculture. The latter is very critical in the sustainability of food production in both the rural communities and households. The commercial production contributes immensely to the gross domestic product of the Province. Despite the diversity of production scale, all the farmers of the Limpopo Province deserve some form of support from the Department of Agriculture and Rural Development (LDARD), in order to sustain and escalate crop production.
- 2.3** Among the main fruits produced are citrus, avocado, mango, macadamia, banana, guava, litchi, and table grapes. The Province produces more than 80% of the South Africa's tomatoes whilst other major vegetables include potato, cabbage, sweet potato, carrots, squashes, and beetroot. The field crops produced are maize, sorghum, wheat, millet, dry beans, soybeans, bambara nuts, groundnuts, cotton, tea, sunflower and other minor crops. The above scenario confirms the diversity of crop production in the Limpopo Province.
- 2.4** Successful crop production relies heavily on the correct selection and utilisation of production inputs, such as fertilisers, pesticides, seeds, fuel, electricity, water tariffs, etc. Very seldom, farmers are able to afford these inputs due to various circumstances; some of which are beyond their control. Recently, the global community experienced COVID-19, unexpected fuel price increases, and the tensions between countries that heavily produces some of these agricultural inputs. These factors are hitting hard on

the production costs of farming which ultimately results in food price increases. Some mechanisms are required to offset the negative impacts of production costs thereby enhancing community-based farming and local food production and thereby stimulate commercial crop enterprises. Therefore, through the conditional grant, Limpopo Department of Agriculture and Rural Development (LDARD) in collaboration with the Department of Land Reform and Rural Development (DALRRD) have committed to support crop farmers by providing seeds and seedlings. LDARD undertakes to contract external entities to supply, deliver and offload seeds and seedlings to support deserving farmers and projects.
