GRID:

- with Drain strainers that is animal safe as per specification.

About this Item

- **【Composite Resin Drain Filter】** This High quality composite resin is different from previous metal products. Don't worry about rust, it is lighter than similar metal products, but it is also strong and durable, which is strong enough to withstand more pressure and won't easily damage..
- **【Protect the Drainage System】** Drainage grade is dense and reasonably sized, so this flat drain cover can drain quickly without clogging. It protects your drainage system by blocking large rocks and debris before they can enter and clog your pipeline..
- **【Wide Application】** Our drain grade is easy to install (No Screws Or Bolts). Thus, It can be installed and detached easily. Apply to hotel kitchen, bathroom, outdoor gardens, plantations, courtyard, school, pools, walkways and other drainage projects..
- **【Drain Strainer Size】** The manhole cover can be cut according to your needs. Composite resin manhole covers are available in a variety of sizes for you to choose from (19.7x5.9x0.79in, 19.7x7.9x0.79in, 19.7x7.9x0.98in), 19.7x7.9x1.18in, 19.7x7.9x1.57in, etc.) .
- **【Durable】** sturdy high polymer plastic creates a hard and durable structure. light weight, good quality, service life up to 15 years. After the limit test, the truck is still intact after being pressed..
- Imported from UK (Sizes & Specifications are based on the UK Market).

Product advantages:

1. High density, waterproof and flame retardant,
2. Low temperature resistance, no deformation,
3. Corrosion resistance,
4. Load-bearing and pressure resistance,
5. Anti-skid,
6. Self cutting, easy installation
7. Use channel drainage grilles to protect your drainage system .

Product name: Resin Manhole Cover/ Sewer Grate /Outdoor Drain

Application: Hotel kitchen, bathroom, outdoor gardens,

PIPE:

- Laying of pipe to connect with new drain systemt and current main drain.
- 33M Pipe 250mm U PVC

CONNECTING:

- 2 x Y junction

ADDITIONAL:

- There should be a slope from South to North.
- There should be a 12 month gaurantee
- Bidder should be able to work around daily activities of animals in camps where drains will be installed.
- Bidder should know biosecurity measures of animal facilities and food producing entities.
- Bidder should provide at least 3 reputable refrences where similar work was done to the amount of at least R100 000.00 with photos and contact details.
- Structure will have to be SPCA approved.
