SECTION 3: BACKGROUND, OVERVIEW AND SCOPE OF REQUIREMENTS**1 BACKGROUND**

- 1.1 Transnet is transforming its business to a digital enterprise that will make use of digitization to improve digital processes and digitalization to realize innovative disruptions as depicted in Figure 1 below in order to enable the organization to grow the business core.

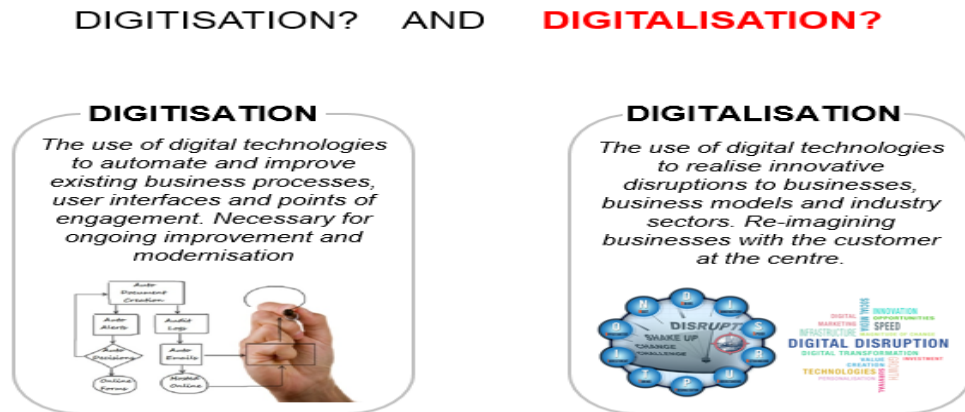

Figure 1: Digitization and digitalization required to accelerate digital business transformation

- 1.2 As Transnet prepares to embark on a new strategic journey to embrace digital growth and transformation to deliver on its mandate as a state-owned entity, it will be enabled through the network connectivity that is stable, scalable and reliable. The current Transnet network mainly experiences Layer 1, Layer 2 and Layer 3 challenges. At Layer 1, notably aging network copper and fibre infrastructure, including theft and vandalism of infrastructure.
- 1.3 Layer 2 is characterized by end of life switching equipment. Layer 3 is characterized by end-of-life routing equipment and failure of current network devices to support current business requirements. The enterprise network has proven to be unreliable and unstable to meet the current network demand and scalability for future growing demand. The current network design and configuration has inadequate capacity and redundancy.
- 1.4 The cabling infrastructure which is comprised of both fibre and copper has deteriorated extensively. The health report has identified the most common incidents contributing to the poor network performance to be the failure of customer edge (CE) routers linking to the WAN, unreliable power supply, copper cable theft and brittle and deteriorating cabling infrastructure for LAN.
- 1.5 In addition, the ODs have confirmed the following list of challenges experienced:
- Network active equipment carries the risk of reaching end of life and therefore unreliable;
 - Wireless connectivity needs to be redesigned to accommodate flexible business demand;
 - Lack of network visibility and proactive monitoring;
 - Complex network architecture. The current network design and configuration does not comply with industry best practices therefore causing management and technical support challenges;

- Heavy reliance on current outgoing service provider causing difficulty to transition to a different service provider;
 - Multicasting needs to be considered in the network architecture;
 - Quality of Service must be revised to accommodate multimedia traffic;
 - Lack of standardisation on network management tools; and
 - Transmission bandwidth limitations.
- 1.6 Transnet ICT is establishing a list of approved service providers that will be appointed on an Approved List ("Panel") that will participate in the provision and installation of NEC equipment from time to time over a three (3) year period. The following method will be used:

Utilisation of the Panel

- 1.7 An RFQ will be issued to all service providers on the Panel, with specifications on the type of network equipment required, where the preferred bidder will be awarded the business. Pricing will be for the provision and installation for specific configurations of NEC equipment. The Work Breakdown Structure for each project will be as follows:

No	Objective	Key Deliverable
1.	Procure equipment, cabinets and cables.	Buys equipment and material
2.	Install equipment and link it to the existing fibre network, do testing and Go live.	Implement network and do network testing
3.	Acceptance Testing, Network handover and Close Out and Post Implementation review.	Signoff and track benefits

2 EXECUTIVE OVERVIEW

Whereas Transnet is seeking a partner(s) to provide solutions for its General Network Equipment and Related Services nationally, it also seeks to improve its current processes for providing these Goods to its end user community throughout its locations.

The selected Supplier/Service provider(s) must share in the mission and business objectives of Transnet. These mutual goals will be met by meeting contractual requirements and new challenges in an environment of teamwork, joint participation, flexibility, innovation and open communications. In this spirit of partnership, Transnet and its Supplier/Service provider(s) will study the current ways they do business to enhance current practices and support processes and systems. Such a partnership will allow Transnet to reach higher levels of quality, service and profitability.

Specifically, Transnet seeks to benefit from this partnership in the following ways:

- 2.1 Transnet must receive reduced cost of acquisition and improved service benefits resulting from the Supplier/Service provider's economies of scale and streamlined service processes.

- 2.2 Transnet must achieve appropriate availability that meets user needs while reducing costs for both Transnet and the chosen Supplier/Service provider(s).
- 2.3 Transnet must receive proactive improvements from the Supplier/Service provider with respect to supply/provision of Goods/Services and related processes.
- 2.4 Transnet's overall competitive advantage must be strengthened by the chosen Supplier/Service provider's leading edge technology and service delivery systems.
- 2.5 Transnet end users must be able to rely on the chosen Supplier/Service provider's personnel for service enquiries, recommendations and substitutions.
- 2.6 Transnet must reduce costs by streamlining its acquisition of Goods/Services, including managed service processes on a Group basis.

3 SCOPE OF REQUIREMENTS

3.1 CURRENT SITUATION

- a) The current Transnet network has proven to be inadequate to meet Transnet's network requirements to enable digital growth and transformation. The network is unstable, unreliable and unscalable contributing to poor Quality of Service and lack of IP-based traffic prioritization to all Transnet users across Transnet.
- b) The majority of the current problems experienced on the network are chronic due to the ailing network infrastructure and have caused performance unreliability and scalability challenges resulting in network outages that disrupt operations.
- c) These network vulnerabilities have occasionally caused significant operations downtime of business systems that are mission critical to the Transnet business and ultimately revenue and reputational loss, poor customer satisfaction, erroneous processes and extra burden on staff due to manual intervention.
- d) Transnet experienced network extended downtime due to network outages resulting in potential revenue loss due to unavailability of redundant links and switches.
- e) The success of digital transformation is reliant on a stable, scalable, flexible and reliable network infrastructure backbone. This implies that the current network cannot support the new digitalization initiatives that require high bandwidth to achieve the Transnet strategy.
- f) The digital growth opportunities identified in Transnet strategy to leverage and modernize freight and infrastructure related digital capabilities. The network capacity design and configuration does not meet the required demand to support the Digital Transformation strategy.
- g) An opportunity exists to have a better manageable network that subscribes to networking best architecture practices while restoring the reliability of the infrastructure to meet business needs.

3.2 SOLUTION DESCRIPTION

Figure 2 below depicts the envisaged high level TO-BE state of the Transnet network. The detailed architecture design diagram will be finalized with the appointed service provider post the site audit completion.

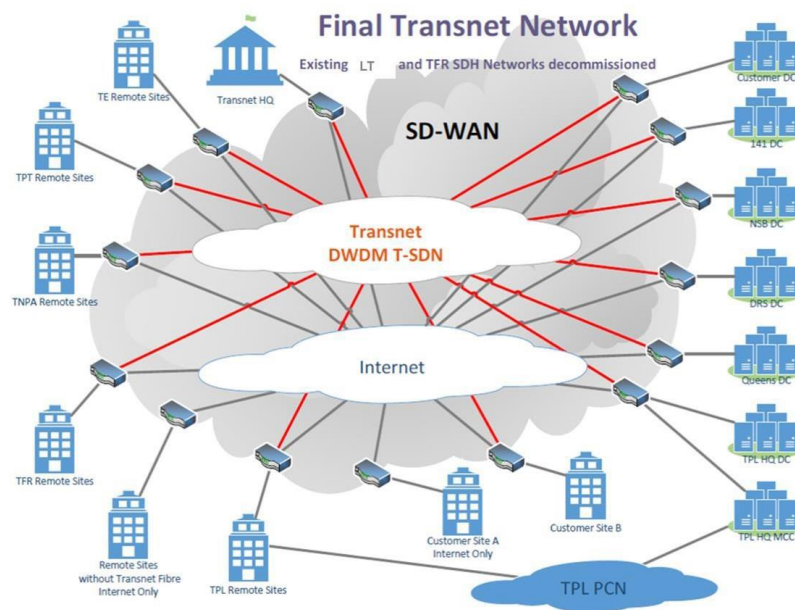

Figure 2: The high level envisaged TO-BE state of the Transnet network

THE NATIONAL INDUSTRIAL PARTICIPATION PROGRAMME**INTRODUCTION**

The National Industrial Participation Programme (NIPP), which is applicable to all government procurement contracts that have an imported content, became effective on the 1 September 1996. The NIP policy and guidelines were fully endorsed by Cabinet on 30 April 1997. In terms of the Cabinet decision, all state and parastatal purchases / lease contracts (for goods, works and services) entered into after this date, are subject to the NIPP requirements. NIPP is obligatory and therefore must be complied with. The Industrial Participation Secretariat (IPS) of the Department of Trade and Industry (DTI) is charged with the responsibility of administering the programme.

1. PILLARS OF THE PROGRAMME

- 1.1 The NIPP obligation is benchmarked on the imported content of the contract. Any contract having an imported content equal to or exceeding US\$5 million or other currency equivalent to US\$5 million will have a NIP obligation. This threshold of US\$5 million can be reached as follows:
- (a) Any single contract with imported content exceeding US\$5 million.
 - or
 - (b) Multiple contracts for the same goods, works or services each with imported content exceeding US\$3 million awarded to one seller over a 2 year period which in total exceeds US\$5 million.
 - or
 - (c) A contract with a renewable option clause, where should the option be exercised the total value of the imported content will exceed US\$5 million.
 - or
 - (d) Multiple suppliers of the same goods, works or services under the same contract, where the value of the imported content of each allocation is equal to or exceeds US\$ 3 million worth of goods, works or services to the same government institution, which in total over a two (2) year period exceeds US\$5 million.
- 1.2 The NIP obligation applicable to suppliers in respect of sub-paragraphs 1.1 (a) to 1.1 (c) above will amount to 30% of the imported content whilst suppliers in respect of paragraph 1.1 (d) shall incur 30% of the total NIPP obligation on a *pro-rata* basis.
- 1.3 To satisfy the NIPP obligation, the DTI would negotiate and conclude agreements such as investments, joint ventures, sub-contracting, licensee production, export promotion, sourcing arrangements and research and development (R&D) with partners or suppliers.
- 1.4 A period of seven years has been identified as the time frame within which to discharge the obligation.

2. REQUIREMENTS OF THE DEPARTMENT OF TRADE AND INDUSTRY

- 2.1 In order to ensure effective implementation of the programme, successful bidders (contractors) are required to, immediately after the award of a contract that is in excess of **R10 million** (ten million Rands), submit details of such a contract to the DTI for reporting purposes.
- 2.2 The purpose for reporting details of contracts in excess of the amount of R10 million (ten million Rands) is to cater for multiple contracts for the same goods, works or services; renewable contracts and multiple suppliers for the same goods, works or services under the same contract as provided for in paragraphs 1.1.(b) to 1.1. (d) above.

3. BID SUBMISSION AND CONTRACT REPORTING REQUIREMENTS OF BIDDERS AND SUCCESSFUL BIDDERS (CONTRACTORS)
