

TENDER CLARIFICATION

Integrated Physical Security System and maintenance support for thirteen (13) substations within Transmission Division

Clarification 04	Request For Proposal No. MWP2421TX
-------------------------	---

The following clarification is needed in response to queries and questions raised by Tenderers.

	<p>Following up on my previous email, I wanted to clarify the status of the documents titled "240-64139144 AC Boards and Junction Boxes for Substations," "240-60725641 Specification for Standard (19 Inch) Equipment Cabinets," and "240-139282493 Security Lighting for Eskom Applications." These documents are not included in the evaluation criteria. In light of this, could you please advise on the appropriate action regarding completing the schedules within these documents? There is no requirement to complete schedules within the mentioned documents. The only technical schedules to be completed are the ones included in the excel file attached (also included in the Annexures in the technical evaluation criteria (document number: 240-170000257).</p>
	<p>Given that there are numerous schedules and clauses that may not be applicable to our project or our role as contractors, such as in the case of the security lighting document where we are not responsible for supplying perimeter security lighting but rather integrating into Eskom's existing lighting, it raises the question of whether we should proceed with completing the entire document or simply initial it. Only complete the schedules in the excel file attached (also included in the annexures of the technical evaluation criteria document: 240-170000257).</p>
