TECHNICAL SPECIFICATION

APPOINTMENT OF A SERVICE PROVIDER FOR THE HYBRID VAN REPLACEMENT.

1 INTRODUCTION AND BACKGROUND

Hybrid vans are used in the regions by stations for connectivity, news, streaming and SABC Sport. Stations regularly organise various types of live broadcast and promotional activities in rural areas and other towns in their area of broadcast coverage. Many of the rural areas with loyal audiences are based in areas without resources such as electricity supply and broadcast connectivity infrastructure (Network coverage).

It is necessary for the SABC to have the right resources when visiting these areas. In this case, the main resource includes a hybrid van that is self-powered to be able to provide connectivity. Therefore, an all-in-one vehicle is required as a solution to achieve these requirements. Additionally, due to the lack of electrical power infrastructure in the province where most of these broadcasts are conducted, a suitable power generator to power the related equipment.

SABC platforms need to remain competitive on quality of signal and reliability of equipment. An interruption of signal in the Outside Broadcast (OB) compromises the SABC revenue generation, listenership, brand, and sponsorships. These regional offices should be able to support huge events independently, effectively, and efficiently. This proposed solution will ensure that the hybrid vans are modified to be used for multifunction's (Radio & TV)

To this end, an RFP for the appointment of a service provider for the Hybrid Van Replacement has been issued.

2 SCOPE OF WORK

- Latest IP workflows which is modern way of sending high quality Video and audio over network.
- Remote broadcast allowing SABC TV and Radio to take advantage of available Hybrid Vans in the regions to deliver Highest quality picture over Internet.
- Bonded LTE & Satellite to deliver Video over IP, NDI and SRT low latency streams for SABC TV Sport and SABC TV News.
- Hybrid Van to be able to send up to 4 streams of independent video that can be mixed and manipulated in JHB without the production crew traveling to the OB point.
- To be used by radio stations for live streams and broadcast from areas where there's no connectivity as it bonds satellite and LTE.

CERTIFICATE OF INDEPENDENT BID DETERMINATION

- 1.0 This Standard Bidding Document (SBD) must form part of all bids¹ invited.
- 2.0 Section 4 (1) (b) (iii) of the Competition Act No. 89 of 1998, as amended, prohibits an agreement between, or concerted practice by, firms, or a decision by an association of firms, if it is between parties in a horizontal relationship and if it involves collusive bidding (or bid rigging).² Collusive bidding is a *per se* prohibition meaning that it cannot be justified under any grounds.
- 3.0 Treasury Regulation 16A9 prescribes that accounting officers and accounting authorities must take all reasonable steps to prevent abuse of the supply chain management system and authorizes accounting officers and accounting authorities to:
 - a. disregard the bid of any bidder if that bidder, or any of its directors have abused the institution's supply chain management system and or committed fraud or any other improper conduct in relation to such system.
 - b. cancel a contract awarded to a supplier of goods and services if the supplier committed any corrupt or fraudulent act during the bidding process or the execution of that contract.
- 4.0 This SBD serves as a certificate of declaration that would be used by institutions to ensure that, when bids are considered, reasonable steps are taken to prevent any form of bid-rigging.
- 5.0 In order to give effect to the above, the attached Certificate of Bid Determination (SBD 9) must be completed and submitted with the bid:

¹ Includes price quotations, advertised competitive bids, limited bids and proposals.

² Bid rigging (or collusive bidding) occurs when businesses, that would otherwise be expected to compete, secretly conspire to raise prices or lower the quality of goods and / or services for SABCs who wish to acquire goods and / or services through a bidding process. Bid rigging is, therefore, an agreement between competitors not to compete.

--	--

1. BACKGROUND

Foreign suppliers with no local footprint (i.e. the foreign supplier doesn't have a branch or representative registered here in RSA) do not need to submit a tax clearance certificate.

No.	Question	Yes	No
1.	Are you a resident of the Republic of South Africa (RSA)?		
2.	Do you have a branch in the RSA?		
3.	Do you have a permanent establishment in the RSA?		
4.	Do you have any source of income in the RSA?		
5.	Are you liable in RSA for any form of taxation?		

These suppliers are also exempted from registering on the National Treasury's Central Supplier Database.

In order to ascertain whether you are a supplier with no local footprint and that no tax clearance certificate is required, please answer the following pre-award questionnaire in the table below: *Please mark the applicable column (Yes/No) with an 'X'*

If the answer is 'No' to all of the above, then it is not a requirement to obtain a tax clearance certificate / tax clearance system pin code from SARS.

Yours faithfully

For Supplier:

The supplier hereby confirms that the questions above were answered truthfully and were fully understood.
