Total suspended solids	<10% of the ambient
Turbidity	4 NTU
Salinity	>33 - <36 psu
Dissolved Oxygen	Not < 5 mg. l-99% of the times and Not <6 mg.l-195% of the time

Is amended as:

Substance/Parameter	Limit
Temperature	2°C above ambient
pH	7.3 - 8.2
Total Suspended Solids	43 mg/l
Turbidity	20 NTU
Salinity	36 psu
Dissolved Oxygen	75% saturation

In reaching this decision the Department took, *inter alia*, the following into consideration:

1. The information contained in the application for the amendment, dated 19 October 2020.
2. The environment and the rights and interests of interested and affected parties are not likely to be adversely affected by this decision.
3. The Estuarine Impact Assessment Report dated July 2016.
4. All other conditions contained in the Coastal Waters Discharge Permit issued on 07 March 2018 and the addendum issued on 5 December 2019 still remain unchanged and enforceable.
