1 Introduction

The South African Post Office sorting machines make use of the Image printers to bar code the mail volumes that get processed on the final sorting machines in order to meet and maintain the delivery standards through the reduction of manual sortation.

1.1 Purpose of document

The purpose is to document the technical specifications of the water base 9030 inkjet printers ink modules for the letter Integrated reader video (IRV) sorting machines

1.2 Specifications

1.2.1 9030 Image printer Ink Module Specifications

Ink module type: IC60,

Nine Solenoid Electrovalve in the ink circuit

and Five Solenoid Electrovalve in the Print head

1.2.2 Quantities

Five (5) 9030 printer Ink Circuit to be serviced and repaired

1.3 Delivery Lead Time

The successful service provider should deliver required quantities in four week's time after receiving the purchase order. The bidder must provide confirmation letter on the bidder's letterhead confirming that they will meet the lead time.
