- h. **Driver identification must be provided on request.** The system must work so that the operators / drivers are allocated to a vehicle on-line e.g. Code 8 driver can only drive the l.d.v and not the truck in his department that he has not been allocated to drive. The tracking unit thus incorporates an immobiliser that must be overridden with the driver's tag.

Likewise, the automated reports should also be able to be grouped and emailed accordingly.

- Over speeding alarm with special emailed reports plus live alert to control room whether this is done by a municipal control room or the successful bidders' company control room or both. The bidder should be prepared to setup a WhatsApp group between their control room and the council.
- Creation of Control Centres / Integration of Fleet management and associated solutions into existing Municipal Control Centres:
 - a) The units in the vehicles are to be used to enhance service delivery.
 - b) The Municipal Manager can decide to put up a small control centre for instance at the Traffic Department and have panic buttons installed in the traffic officers' vehicles to alert this control centre if in danger. The successful bidder must assist in setting up this control centre and train these control centre staff as part of the bid at no extra cost.
 - c) Panic button / Call back number (optional) that sends the vehicles location map link to various selected cell phones and control room when pressed must form part of every vehicle installation.

CERTIFICATE OF INDEPENDENT BID DETERMINATION - COMPULSORY

1 This Municipal Bidding Document (MBD) must form part of all bids¹ invited.

2 Section 4 (1) (b) (iii) of the Competition Act No. 89 of 1998, as amended, prohibits an agreement between, or concerted practice by, firms, or a decision by an association of firms, if it is between parties in a horizontal relationship and if it involves collusive bidding (or bid rigging).² Collusive bidding is a *pe se* prohibition meaning that it cannot be justified under any grounds.

3 Municipal Supply Regulation 38 (1) prescribes that a supply chain management policy must provide measures for the combating of abuse of the supply chain management system, and must enable the accounting officer, among others, to:

- a. take all reasonable steps to prevent such abuse;
- b. reject the bid of any bidder if that bidder or any of its directors has abused the supply chain management system of the municipality or municipal entity or has committed any improper conduct in relation to such system; and
- c. cancel a contract awarded to a person if the person committed any corrupt or fraudulent act during the bidding process or the execution of the contract.

4 This MBD serves as a certificate of declaration that would be used by institutions to ensure that, when bids are considered, reasonable steps are taken to prevent any form of bid-rigging.

5 In order to give effect to the above, the attached Certificate of Bid Determination (MBD 9) must be completed and submitted with the bid:

¹ Includes price quotations, advertised competitive bids, limited bids and proposals.

² Bid rigging (or collusive bidding) occurs when businesses, that would otherwise be expected to compete, secretly conspire to raise prices or lower the quality of goods and / or services for purchasers who wish to acquire goods and / or services through a bidding process. Bid rigging is, therefore, an agreement between competitors not to compete.
