6 TRANSNET'S LIST OF EXCLUDED TENDERERS (BLACKLIST)

No Tender shall be awarded to a Tenderer whose name (or any of its members, directors, partners or trustees) appear on the Register of Tender Defaulters kept by National Treasury, or who have been placed on National Treasury's List of Restricted Suppliers. Transnet reserves the right to withdraw an award, or cancel a contract concluded with a Tenderer should it be established, at any time, that a tenderer has been restricted with National Treasury by another government institution.

6.2 All the stipulations on Transnet's restriction process as laid down in Transnet's Supply Chain Policy and Procurement Procedures Manual (CPM included) are included herein by way of reference. Below follows a condensed summary of this restriction procedure.

- 6.6 A Service Provider or Contractor to Transnet may not subcontract any portion of the contract to a blacklisted company.
- 6.7 Grounds for blacklisting include: If any person/Enterprise which has submitted a Tender, concluded a contract, or, in the capacity of agent or subcontractor, has been associated with such Tender or contract:

6.9 Companies associated with the person/s guilty of misconduct (i.e. entities owned, controlled or managed by such persons), any companies subsequently formed by the person(s) guilty of the misconduct and/or an existing company where such person(s) acquires a controlling stake may be considered for blacklisting. 1. BACKGROUND

Transnet Pipelines (TPL) is the largest multi-product pipeline operator in Southern Africa, maintaining and operating a network of 3114 km of pipeline infrastructure across five provinces in South Africa. TPL plays a key role in the country's economy, with the core strategic objective of ensuring petroleum product security of supply for the inland market and gas security of supply for the KwaZulu-Natal market using environmentally responsible methods while ensuring optimal efficiencies.

TPL currently transports:

- More than 80% of all refined products to the inland market
- More than 70% of all jet fuel required at OR Tambo International Airport
- 100% of crude requirements for the National Petroleum Refiners of South Africa (Natref). This project benefit is linked to meeting that 100% crude requirement for Natref.
- 500 million cubic metres per annum of methane-rich gas requirements to KwaZulu-Natal from Secunda
- 100% of Tarlton Distribution Terminal volumes

The pipeline network consists of three intakes located in Durban, Sasolburg and Secunda. The pipeline is laid within servitudes which traverse through various properties and the pump stations and delivery depots are located in rural, industrial and suburban areas along the pipeline routes. The pipelines range from 6" (150mm) to 24" (600mm) in diameter and conform to ASME B31.4. Pressure in the pipeline network is monitored on a 24 hour-a-day, 365 days-a-year basis at the control centre at the National Operating Centre (NOC).

2. PURPOSE

The purpose of this scope is to outline the works required by a competent pump repair company to fully repair defective single-stage and multi-stage API610 mainline pumps within Transnet Pipelines that are critically required to be repaired within a 2-week turnaround time on a 3-year contract basis. Severity and complexity of defects will differ for each pump repair which cannot be foretold upfront, therefore the contractor must be equipped with enough manpower, correct machinery and facilities to manage major pump repairs.

A defective pump will be collected from the Pinetown workshop at 10B Kirk Road Pinetown, by the contracted company, however in an emergency situation it may be required that the repair company collect the pump from the TPL depot with a crane mounted truck. The pump will be stripped, assessed and a full report will be sent to TPL rotating specialist identifying the items to be replaced or repaired. TPL specialist will conduct a site inspection at the repair workshop of the stripped pump and confirm refurbishment requirements.

All repairs and assembly of the pump will be carried out by the repair company and activities will include but not limited to the following items in the scope below.

Where TPL can free issue components it will be done so to reduce repair time and cost.

3. HIGH LEVEL SCOPE

- Contractor to collect pump from TPL workshop or pump station, as advised by TPL.
- Strip pump and shaft, assess all components including casing and send report to TPL stating replace or repair components.
- Assemble shaft and pump including but not limited to the following:
 1. Hard chrome and grind shaft back to original size, repair thread damage.
 2. Machine and line-bore pump casing
 3. Manufacture new impeller.
 4. Manufacture new large eye case wear ring.
 5. Manufacture new large eye impeller wear ring.
 6. Manufacture new center stage piece.
 7. Manufacture new impeller stage piece.
 8. Manufacture new balance sleeve on shaft.
 9. Manufacture new stage-piece balance in casing.
 10. Manufacture new throat bushes.
 11. Supply new radial white metal bearings.
 12. Repair radial white metal bearings
 13. Supply new thrust bearings set of 2.
 14. Mechanical seals to be refurbished, list of types of seals in TPL below.
 15. Supply and machine new coupling and hub including bolt set, lock washer and nut.
 16. Machine all wear ring clearances.
 17. Balance fully assembled and machined shaft to 2960rpm(including coupling).
 18. Supply and install 2 x new cyclone separators.
 19. Supply and install 2 x new cyclone separator sight glasses.
 20. Supply and install 1 x new cyclone piping set.
 21. Supply and install 8 x new bearing housing bolts.
 22. Supply and install 14 x new bearing housing cap head screws.
 23. Supply and install 8 x new bearing housing dowel pins.
 24. New thrust bearing nut.
 25. Red oxide primer - paint the casing.
 26. Enamel Admiral grey painting of the casing..
 27. Supply and install new lube oil emergency bulbs.
 28. Supply and install new bearing housing fan.
 29. Supply and install new bearing housing fan cover and bolt set.
 30. Supply and install new bearing housing breather vents.
 31. Supply and install new bearing housing oil deflectors - brass.
 32. Supply and install new casing gasket.
 33. FAT (Factory Acceptance Testing) at the contractor workshop for TPL to witness, vibration and bearing temperature levels, seals and casing leaks as well as flow rate and pressure delivered by the pump.
 34. Transport pump to and from TPL workshop or pump station, as advised by TPL.

35. If required, repair contractor to laser align pump in its operational position and monitor pump for 4 hours to ensure commissioning is successful, ensuring vibration levels remain below 2.5mm absolute value and bearing temperatures normalize and do not spike over the alarm and trip set points. Laser alignment and commissioning report to be handed over to TPL Specialist with all commissioning information for record purposes.
36. Any leaks from the casing will require the pump to be removed from operation and rectified at the contractor's expense.
37. Mechanical seals have a leakage allowance of 20 drops a minute from the drain hole, should the drip rate exceed this amount, the seal must be repaired or replaced at contractor's expense.

6. COMPULSORY SITE VISIT

- It is compulsory for any company bidding to provide services to repair API 610 pumps for Transnet Pipelines, to attend a site visit to the Pinetown workshop to fully understand the scope as outlined above with reference to multi-stage high pressure petroleum pumps and to view the type of pumps we will require to be repaired.

7. ADDITIONAL INFORMATION

- Service providers to include additional information/activities not listed on the repair scope above as an annexure. Additional items listed will not be considered during the evaluation process.
- Transnet Pipelines will provide detailed drawings which are available for information purposes for casings, shafts, wear-rings and most of the pump components. TPL will not have every drawing for every pump component.
- Service provider will be responsible to reverse engineer any component without an attached drawing as per original component supplied with the pump.

- Each pump repair will be unique in its approach as defects differ from repair to repair. Therefore, each repair will be task based and rate per item billed for. It must be noted that quantities of components will differ from pump to pump due the size and number of stages etc.
