1. INTRODUCTION AND PURPOSE

The City of Tshwane Metropolitan Municipality (CoT) hereby invites interested persons and entities to submit proposals for the Long-Term Lease and Development of a strategically significant portfolio of industrial land, comprising Erven 128, 129, and 130 Ga-Rankuwa Industrial.

PROPERTY INFORMATION	EXTENT (Approximately)	ZONING
Erf 128 Ga-Rankuwa Industrial	26 544m ²	Industrial 1
Erf 129 Ga-Rankuwa Industrial	23 573m ²	Industrial 1
Erf 130 Ga-Rankuwa Industrial	22 682m ²	Industrial 1
Total	72, 799 m²	

Group Property Department is intending to promote the highest and best utilisation of the City's property assets and to create an opportunity for economic development, revenue generation through leasing property assets by way of public tender based on opportunities depicted by current and anticipated market demands and trends.

This initiative forms a critical component of the City's broader asset optimisation and revenue enhancement strategy.

Historically, the Ga-Rankuwa Industrial Precinct has functioned below its potential, representing a significant untapped economic asset within a region characterised by high population density and a robust labour force. This tender is a deliberate intervention to correct historical under-investment and activate a key township economy node, aligning with the City's commitment to spatial justice and inclusive economic growth.

City of Tshwane Owned

The City owned properties as highlighted above are situated within a strategically positioned industrial and nodal corridor in the Ga-Rankuwa region. The area is characterized by its established manufacturing base and its role as a central hub within the broader district. The neighbourhood is identified as designated industrial precinct, which is integrally connected to adjacent zones such as Shatterpunt and the MINACO Contratt industrial estate. This entire cluster falls under the larger umbrella of the SAB District Odi, indicating it is part of a significant, master-planned development area within the municipality.

Adjacent Land Use and Neighbouring Properties

The subject properties are enveloped by a concentration of private industrial enterprises, confirming the area's primary function as a manufacturing and logistics hub. The immediate context is defined by operational factories rather than vacant land, creating a mature industrial environment. Key neighbouring private properties that define this character include Gmail Professional Factory, Song Garantorico, Universal Paper & Plastics, and the MINACO Contratt complex. This proximity to active production facilities underscores the area's entrenched role in the local supply chain and industrial economy.

Nature of Industrialism and Economic Character

The prevailing industrialism within the area is diverse, spanning light to medium manufacturing sectors. The presence of "Universal Paper & Plastics" points towards core manufacturing and raw material processing, while facilities like "Song Garantorico" suggest consumer goods production. This combination creates a synergistic ecosystem where related industries benefit from co-location, potentially sharing suppliers, logistics networks, and a skilled labour pool. The economic character

is fundamentally production-oriented, with a clear focus on the transformation of materials into finished goods for the market.

Development Potential

Given the established industrial context, the ideal development pathway for the subject properties is to enhance and modernize the existing ecosystem. The most strategic interventions would involve filling identified gaps in the local supply chain, thereby adding value for the surrounding businesses. The highest and best use would likely be the development of a modern Logistics and Distribution Hub to serve the warehousing and freight management needs of the existing manufacturers. Alternatively, the properties are well-suited for a Specialized Supplier Park with units designed to house Tier-2 and Tier-3 businesses that supply the larger anchors like MINACO Contratt. A complementary development could include commercial and workforce amenities, such as retail outlets and restaurants, to serve the substantial employee base generated by the neighbouring factories, thereby improving the overall functionality and appeal of the industrial corridor.

The subject properties are situated in a pivotal urban core within the City of Tshwane's northern development corridor. The area is poised for transformative growth, driven by its proximity to a large residential catchment, major institutions such as the Tshwane University of Technology and the Dr. George Mukhari Hospital, and strategic transport linkages including the R80 and N4 highways. The proposed alienation for industrial development is designed to yield significant mutual benefits for the local community and the municipal fiscus. Through bringing this strategically located land into productive use, the municipality aims to catalyse private sector investment in manufacturing, logistics, and support industries. This is anticipated to stimulate meaningful job creation, foster skills development within the local community, and sustainably expand the municipal revenue base through long-term lease rentals, property rates, and service charges.

2. OBJECTIVE

Ga-Rankuwa is established as a critical township economy and emerging industrial node within the City of Tshwane's Region 1, strategically positioned to function as a major employment hub for the surrounding communities of Ga-Rankuwa, Soshanguve, and Mabopane. The area benefits from direct access to the R80 highway, a crucial arterial route that provides a direct link to the N4 Platinum Corridor and the established Rosslyn Automotive Hub. This connectivity is further reinforced by the presence of major institutional anchors, including the Tshwane University of Technology (Ga-Rankuwa Campus) and the Dr. George Mukhari Hospital, which provide a stable ecosystem of knowledge, skills, and services.

The industrial property market in Ga-Rankuwa is currently characterised by growing demand for affordable, well-located industrial space. This demand is primarily driven by Small, Medium and Micro Enterprises (SMMEs) and light manufacturing firms seeking viable alternatives to saturated and higher-cost industrial nodes like Rosslyn and Pretoria West. This trend is underpinned by the broader economic imperative to localise supply chains, reduce operational costs, and foster resilient industrial networks. The comprehensive development of this precinct is therefore essential for

generating sustainable employment opportunities close to where people live, directly addressing the spatial legacy of apartheid and actively fostering inclusive economic growth.

Ga-Rankuwa is strategically well-positioned for accelerated industrial growth, a trajectory supported by committed public sector investment in strategic infrastructure. Key projects such as the planned K217 road are designed to significantly enhance multi-modal connectivity to the N4, thereby improving freight mobility and regional integration. The presence of a large, youthful population and proximate educational institutions provides a consistent pipeline of talent, ranging from semi-skilled labour to technical graduates. To fully capitalise on this considerable potential, challenges such as targeted infrastructure upgrades and the need for focussed skills development programmes must be collaboratively addressed. With coordinated public-private planning and investment, Ga-Rankuwa is primed to become a premier node for SMME-driven industrialisation and innovation within Tshwane.

STRATEGIC PRIORITY/PILLARS

The successful development of this precinct is expected to align with and advance the following strategic pillars of the City:

- **SMME Development and Light Manufacturing Advancement**

The development should prioritise the creation of affordable, high-quality industrial space tailored for emerging manufacturers, fabricators, and logistics operators. The objective is to foster a supportive and integrated ecosystem for black-owned and local industrial enterprises, enabling them to participate meaningfully in the mainstream economy.

- **Township Economy Revitalization and Local Beneficiation**

A core outcome of the project must be the creation of substantive local employment opportunities for semi-skilled and skilled workers residing in the surrounding townships. The development agreement will be structured to promote local beneficiation, enterprise development, and the empowerment of the local community through its supply chain and operational phases.

- **Logistics, Distribution and Automotive Support Services**

The development must leverage the precinct's superior proximity to the R80 and N4 corridors to establish modern logistics and distribution hubs. These facilities will serve to support the broader automotive, manufacturing, and retail value chains operating across the Rosslyn-Pretoria North corridor, positioning Ga-Rankuwa as an integral link in the regional logistics network.

3. REGIONAL SPATIAL ANALYSIS

The Ga-Rankuwa Industrial Precinct constitutes an integral component of the northern economic corridor of Tshwane, a strategic regional growth zone explicitly prioritised in the Regional Spatial Development Framework (RSDF) for its potential to drive economic inclusion and reverse spatial inequalities. This corridor, which extends from Akasia through Rosslyn to Soshanguve and Ga-Rankuwa, is anchored by large-scale manufacturing in Rosslyn but requires the activation of supporting nodes like Ga-Rankuwa to provide broader-based employment, SMME incubation, and

logistical support. The precinct is therefore strategically positioned to function as a critical employment hub for the surrounding residential areas, which are characterised by high population densities but have historically suffered from a deficit of local economic opportunities.

Spatially, the precinct sits at the heart of a major urban confluence, facilitating a synergistic relationship between industrial production, residential housing, and labour supply. The surrounding urban fabric, comprising the established townships of Ga-Rankuwa, Soshanguve, and Mabopane, provides a substantial and readily accessible labour pool alongside an emerging consumer market. Contemporary spatial policy direction strongly emphasises the need for strategic densification and economic diversification along this corridor to enhance spatial integration and economic inclusivity. Consequently, the Ga-Rankuwa node is envisaged to play a catalytic role in advancing Tshwane's regional spatial vision by consolidating industrial activity, unlocking significant private investment in supporting land uses, and improving economic connectivity between the northern townships and the metropolitan core.

Metropolitan Nodes:

The subject site is located within the Ga-Rankuwa Industrial Precinct, which is formally identified in the Tshwane RSDF (Region 1) as a Major Employment Opportunity Area. This designation underscores its importance within Tshwane's broader northern metropolitan development zone, marking it for strategic industrial expansion with a specific focus on SMME support, light manufacturing, and logistics. Its parallel status as an Urban Core in the Metropolitan Spatial Development Framework (MSDF) further highlights that Ga-Rankuwa is targeted for significant social and economic restructuring, with the industrial area positioned as a primary catalyst for this transformative agenda.

Neighbourhood Nodes:

The properties benefit from a highly strategic location, situated adjacent to the Ga-Rankuwa CBD and in immediate proximity to major residential townships and social facilities, including the Tshwane University of Technology and the George Mukhari Hospital. These neighbouring areas provide the essential human capital and support services required to sustain a vibrant industrial base. The close proximity of these educational institutions, retail centres, and public transport facilities reinforces the site's intrinsic role as a dynamic interface between employment and community activity. This context naturally enables the seamless introduction of complementary land uses such as convenience retail, logistics support services, and commercial functions, which will collectively strengthen Ga-Rankuwa's position as a well-balanced and integrated employment and service node.

Bulk Infrastructure Feedback:

Region 1 has been designated a priority area for infrastructure investment to support its rapid development trajectory and overarching economic importance to the city. The Ga-Rankuwa Industrial Precinct is currently served by existing bulk water and sanitation infrastructure; however, it is anticipated that upgrades or contributions will be required to support new large-scale industrial developments. The City's forward-looking infrastructure planning explicitly prioritises the northern corridor, with specific, high-impact projects like the K217 road being designed to enhance multi-modal connectivity and unlock latent economic potential. The Energy and Electricity Department

has provided preliminary confirmation that capacity can be allocated to support new industrial development, with all connection and reinforcement costs to be borne by the developer.

4. MICRO MARKET ANALYSIS

From a metropolitan economic perspective, Tshwane's key sectors include manufacturing, community services, finance, and trade. While Region 2 hosts the major Babelegi industrial area, Region 1, which encompasses Ga-Rankuwa is a strong and growing contender, contributing a significant 15.3% of the city's manufacturing Gross Value Added (GVA). This substantial share is largely attributable to the scattered but vibrant industrial activities within the area, the established Ga-Rankuwa Industrial Park, and positive spill-over effects from the world-class automotive industry centred in Rosslyn.

The micro-market surrounding the subject properties is an established and functional industrial environment characterised by a predominance of Small, Medium and Micro Enterprises (SMMEs) operating in light manufacturing, metal fabrication, automotive repairs, and logistics. Current market behaviour indicates a steadily increasing demand for affordable industrial land and facilities among emerging industrial operators and established SMMEs, particularly those seeking cost-effective alternatives to the premium-priced industrial zones of Rosslyn and Pretoria West. Empirical market evidence suggests that rental levels and land values in Ga-Rankuwa are typically 20-30% more competitive than in these established nodes, decisively positioning it as a cost-effective and strategic location for new industrial entrants, expansion projects, and supply-chain localisation.

The contribution of the "wholesale, retail trade and repair of vehicles" sector to the regional economy is significant and noteworthy. Regions 1 and 2, which include the Rosslyn and Ga-Rankuwa corridors, demonstrate robust output shares of 14.3% and 14.2% respectively, indicating a strong and deeply rooted market for automotive-related services, parts supply, and distribution. The subject properties are therefore exceptionally well-positioned to capture and catalyse further growth in these supporting sectors, leveraging their superior proximity to the R80 and N4 highway corridors to serve the broader regional automotive and manufacturing ecosystem.

A key structural advantage of the precinct is the presence of the Tshwane University of Technology and other Further Education and Training (FET) colleges, which provide a consistent and reliable pipeline of both skilled and semi-skilled labour, thereby supporting industries that require technical expertise and operational agility. The surrounding high-density residential communities provide a deep and stable labour catchment area, which has the dual benefit of reducing employee transport costs for businesses and increasing operational convenience. With planned public infrastructure upgrades and a renewed focus on public-private partnerships, the Ga-Rankuwa micro-market is poised for a new cycle of investment, growth, and maturation, making this tender a uniquely timely and strategic opportunity.

CERTIFICATE OF INDEPENDENT BID DETERMINATION

- 1 This Municipal Bidding Document (MBD) must form part of all bids¹ invited.
- 2 Section 4 (1) (b) (iii) of the Competition Act No. 89 of 1998, as amended, prohibits an agreement between, or concerted practice by, firms, or a decision by an association of firms, if it is between parties in a horizontal relationship and if it involves collusive bidding (or bid rigging).² Collusive bidding is a *pe se* prohibition meaning that it cannot be justified under any grounds.
- 3 Municipal Supply Regulation 38 (1) prescribes that a supply chain management policy must provide measures for the combating of abuse of the supply chain management system, and must enable the accounting officer, among others, to:
 - a. take all reasonable steps to prevent such abuse;
 - b. reject the bid of any bidder if that bidder or any of its directors has abused the supply chain management system of the municipality or municipal entity or has committed any improper conduct in relation to such system; and
 - c. cancel a contract awarded to a person if the person committed any corrupt or fraudulent act during the bidding process or the execution of the contract.
- 4 This MBD serves as a certificate of declaration that would be used by institutions to ensure that, when bids are considered, reasonable steps are taken to prevent any form of bid-rigging.
- 5 In order to give effect to the above, the attached Certificate of Bid Determination (MBD 9) must be completed and submitted with the bid:

¹ Includes price quotations, advertised competitive bids, limited bids and proposals.

² Bid rigging (or collusive bidding) occurs when businesses, that would otherwise be expected to compete, secretly conspire to raise prices or lower the quality of goods and / or services for purchasers who wish to acquire goods and / or services through a bidding process. Bid rigging is, therefore, an agreement between competitors not to compete.
