SANParks requires a suitably, qualified, and experienced service provider to conduct a Business Impact Analysis to determine the criticality of business activities and associated resources required to ensure operational resilience and continuity of operations during and after a business disruption. Subsequently, based on the outcome of the BIA, develop a Business Continuity Plan for its Head-office in Groenkloof, Pretoria, to cover and plan for short and long-term disasters or other disruptions that may be caused by incidents such as pandemics, fire, floods, explosions, terrorism, extended power interruptions, and other natural or man-made disasters.

The macro-structure of the organisation is depicted below. Approximately 380 employees are situated at Head Office.

 - d. Identify facilities and equipment critical to business units and that which will be required for continuity purposes.
 - e. Identify and analyse third parties (suppliers) that are critical to the achievement of SANParks' business units' objectives.
 - f. Identify and analyse disastrous risk exposures that could disrupt / make business processes unavailable for an intolerable duration.
 - g. Identify recovery sites or alternative solutions suitable for the people, equipment and systems required in line with the BIA.

3.1.2 Develop a Business Continuity Plan for SANParks Head office, which outlines the management of immediate consequences of a disruption taking into consideration welfare of individuals, the prevention of further disruption to prioritised activities and the impact on the environment.

a) BCP's must outline:

- The purpose, scope and objectives of the plan.
- The roles and responsibilities of the response management team(s) who will implement the plan.
- The actions the response management team(s) will take to continue or recover prioritised activities within pre-defined thresholds and monitor the impact of the disruption and the organisation's response thereto.
