INTRODUCTION

1.1 SCOPE OF THIS EMPR

This Environmental Management Programme (EMPr) has been compiled to address the potential environmental impact that might occur during the PLC refurbishment of the Spencer Substation in the Northern Portfolio. This document serves as the environmental specification to NTCSA personnel and contractors with regards to addressing the environmental issues identified prior to and during the construction phase. It is the responsibility of the Project Manager (PM), Contractors and the Environmental Practitioner to ensure compliance with all the environmental specifications in this document as well as the relevant legislation.

This EMPr should also ensure the sustainable management of the environment during the project. This EMPr must be viewed as a contract document to which all NTCSA employees and contractors involved should adhere to.

NB: This EMPr document will only cater for the scope of work contained in it. Any activities outside the given scope of work will need to be addressed through the correct process (i.e. method statements).

1.2 ROLES AND RESPONSIBILITIES

Function	Roles and responsibilities
Contractor Environmental Officer (CEO) / Safety, Health and Environmental Officer (SHE)	The CEO / SHE ensures that all Sub-contractors working under the Principal Contractor abide by the requirements of the EMPr. The CEO / SHE's primary role is to coordinate the environmental management activities of the Contractor on site.

	Spencer Substation Environmental Management Plan	Document Identifier	559-824510295	Rev	1	
		Effective Date	July 2024			
		Review Date	July 2027			

	<ul style="list-style-type: none"> • Be on site throughout the duration of the project and be dedicated to the project. • Ensure all their staff are aware of the environmental requirements, conditions, and constraints with respect to all of their activities on site. • Implementing the environmental conditions, guidelines and requirements as stipulated within the EMPr and method statements. • Attend the site meetings. • Undertaking corrective actions where non-compliances are registered within the stipulated timeframes. • Report back formally on the completion of corrective actions. • Environmental monitoring as required by applicable legislation. • Assist the SEA in maintaining all the site documentation. • Prepare the site inspection reports and corrective action reports for submission to the SEA; and • Assist the SEA with the preparing of the monthly report.
Eskom Senior Environmental Advisor (SEA)	<ul style="list-style-type: none"> • To ensure that a practical environmental management programme (EMPr) for the construction phase of a project is compiled and approved. • To ensure that all conditions as stipulated in the EMPr are met; and • To conduct audits, monitor and / or provide assurance before, during and post construction.
Project Manager/Site Manager	<ul style="list-style-type: none"> • Represents and act on behalf of NTCSA regarding the administration of contracts. • In consultation with the Planning Engineer, determines the scope of work. • Provide scheduling, aspects of co-ordination and estimating. • Ensure implementation of the project plan within cost, time, and quality constraints. • Ensure that implementation of EMPr is executed as planned. • Keep the asset owner informed of progress made during the life cycle of the project and

	Spencer Substation Environmental Management Plan	Document Identifier	559-824510295	Rev	1	
		Effective Date	July 2024			
		Review Date	July 2027			

	<ul style="list-style-type: none"> Ensure that conditions in this EMPr are fulfilled before the contractor occupies the site.
Contractor	<ul style="list-style-type: none"> To provide all necessary supervision during the execution of the project. He/ She should be available on site all the time. To appoint a competent Environmental / Safety Health and Environment Officer. To implement the projects as per the approved project plan. To ensure that implementation is conducted in an environmentally acceptable manner. To fulfil all obligations as per the agreed contract; and To inform and educate all employees about the environmental risks associated with the different activities that should be avoided during the construction process and lessen significant impacts to the environment.

1.3 LEGISLATIVE CONTEXT

The following environmental acts were considered in the compilation of this EMPr:

- National Environmental Management Act, 1998 (NEMA) (Act No 107 of 1998), and all amendments and supplementary listings and/or regulations.
- National Environmental Management: Waste Act, 2008 (NEMWA, Act 59 of 2008);
- National Environmental Management Act: Biodiversity, 2004 (NEM:BA) (Act No. 10 of 2004) and amendments.
- The National Environmental Management: Protected Areas Act, 2003 (Act No. 57 of 2003) and its Regulations.
- The National Environmental Management: Air Quality Act, 2004 (Act 39 of 2004).
- National Forest Act, 1998 (NFA) (No 84 of 1998).
- National Veld and Forest Fire Act, 1998 (Act No. 101 of 1998).
- National Heritage Resources Act, 1999 (Act 25 of 1999).

	Spencer Substation Environmental Management Plan	Document Identifier	559-824510295	Rev	1	
		Effective Date	July 2024			
		Review Date	July 2027			

- National Water Act, 1998 (Act 36 of 1998).
- The Occupational Health and Safety Act, 1993 (Act No. 85 of 1993).
- The National Fencing Act, 1963 (Act No 31 of 1963) as amended by Act 108 of 1991.
- The Conservation of Agricultural Resources Act, 1983 (Act 43 of 1983).
- South African National Standard (SANS) 10228 – The identification and classification of dangerous goods.

1.4 PUBLIC INVOLVEMENT

The potential environmental impacts associated with the proposed project are required to be considered in compliance with the Environmental Impact Assessment (EIA) Regulations of 2014 published in Government Notice R982 to R985 on 4 December 2014, in terms of Chapter 5 of the National Environmental Management Act, 1998 (Act 107 of 1998) (as amended). The above scope of work was assessed against the Listing Notices of the EIA Regulations 2014 and the following is noted:

All the required construction work will be done at an existing facility and the extension of the servitude by 10 metres has no impact on the environment, therefore, the project will not trigger any of the EIA listed activities.

The public participation process as prescribed in Chapter 6 of GNR No. R982 of December 2014 are also guided by relevant principles contained in Chapter 2 of NEMA and will not be required as the work does not trigger EIA activities.

DESCRIPTION OF THE PROJECT SITES

2 SITE LOCATION

Spencer Substation

3 SCOPE OF WORK

	Spencer Substation Environmental Management Plan	Document Identifier	559-824510295	Rev	1
		Effective Date	July 2024		
		Review Date	July 2027		

project consists of replacing 14 PLC links in the Northern Grid in 11 various substations Acornhoek, Foskor, Leseding, Marathon, Merensky, Pelly, Simplon, Senakangwedi, Spencer, Warmbad, Witkop. The current installed base consists of ETI 21/41, ETL- 41/81 and ETL-581/41

The ETL 41/81 have surpassed the manufactures recommended life span of 15 years by a further 7 years, the spares are not available and there are no skills to repair these PLC's. In addition, the harsh environmental conditions at the substations have further reduced the reliability of the electronic components. Due to the above, these PLC types need to be replaced
