## 5.10 ENVIRONMENTAL

### ENVIRONMENTAL GUIDELINES AND LIMITATIONS FOR DEVELOPMENT SITES

#### CHECKLIST.

#### **DEVELOPMENT REFERENCE: Potential development site Lodge or Tented Camp ANDOVER NR**

*The purpose of providing the information below, is to guide potential developers during the very first phase of the process to prepare realistic business proposals. The guidelines is not at all intended, nor has the powers to replace any Environmental Impact Assessment legislation or processes. It rather aims at providing a framework in layman's terms according to which development proposals should be invited. The outcome of an impact assessment remain the final authority.*

*Making this information available early during the process, reduces the risk of failure due to environmental parameters not considered during the conceptual phase, and encourages sustainable development.*

<b>ENVIRONMENTAL ITEM</b>	<b>Sub-section</b>	<b>Environmental related details to describe characteristics of site</b>
<b>Protected area relevant to proposal.</b>		<i>Andover Nature Reserve</i>
<b>Location of proposed site on Protected Area.</b>		<i>The proposed site is situated along the Northern Banks of the Timbavati River. (24°33'40.75" Latitude 31°10'8.91" Longitude), approximately 5km eastwards along the R 531 from the Northern Entrance Gate of this Nature Reserve).</i>
<b>Proposed development description.</b>		<i>A nature based 16 to 24 bed catered lodge is envisaged. The site provide for and area of approximately 25 hectares within which specific options for the suitable locality of facilities could be considered.</i>
<b>PA Zonation and permissible activities.</b>		<i>The proposed site is situated within the Primitive Zone. Access to the site is possible via the R531 (very close proximity) or internally via a however bad condition track road from the Main Camp and River crossings is at times impossible. Only Small permanent "touch the earth lightly structures" will be permitted in accordance with the zonation of the area. No disturbing audible operations will be permitted. The footprint of the proposal should be restricted to the minimum and the essential surface area required for operations. All facilities is to be designed to blend into the environment with restricting the need to remove large trees or shrubs, and needs to be addressed during Environmental Impact Assessment processes.</i>
<b>Pre-development site properties.</b>		<i>This site has two aspect properties to it, (i) A portion of the site was previously developed (brown site) and used as a Ranger Picket site. These may serve as reception, staff, security, etc. structures. (ii) A portion of the site was previously disturbed during development which was discontinued due to failing processes (brown site). (iii) The rest of the proposed area in a natural undisturbed condition (green site).</i>
<b>Terrain properties.</b>		<i>Whilst the site is relatively level in the North in the vicinity of the discontinued field ranger picket site, the terrain slopes gently in a Southerly direction towards the Timbavati River and a minor tributary thereof. Elevation varies between 540 to 520 meters above sea level.</i>
<b>Climate.</b>		<i>The area is generally warm and hot with high humidity in summer. Avg. maximum temperature of 30° Celsius in January and 27° Celsius in July apply. Frost is seldom experienced however temperatures below 0° Celsius do occur. Average rainfall is approximately</i>

		<i>780 millimetres annually mainly received in the form of thunderstorms.</i>
<b>Geology and soils.</b>		<i>The site is underlain by swazian granite, providing for well drained sandy soils. However multiple seepage areas (lateral water drainage= wetlands) occur. Access within the site will require careful planning as it is significantly affected during wet conditions. Although soils are general not very deep successful establishment of large trees on the site is fluctuating.</i>
<b>Flora.</b>		<i>Situated within the Savannah biome, the area is characterized by a tall grassy ground layer and distinct upper layer of trees and shrubs. On the site itself, shrub vegetation is more dominant than large trees. Vegetation should be kept intact as far as possible to make use of shade and landscaping potential.</i>
<b>Fauna.</b>		<i>Although buffalo and leopard are the only two of the big five permanently present, lion and elephant do in instances enter the area breaking through fences. Primates and scavengers occur and facility design and management must consider mitigating human/animal conflict. Continuous interaction with smaller fauna, such as poisonous snakes, spiders, scorpions, mosquito's and ticks is evident. The site is situated within malaria area.</i>
<b>Services.</b>		
	<b>Access</b>	<i>The site can relatively easy be accessed via a two track road, (distance of 150 meter from the main tar road) The rest of the area envisaged is within 700 meters from the main tarred R 531 (Orpen Road). This close access to the main road has the benefit of easier access to tourism venues in the surrounds, however MTPA management will need to implement additional measures to control access in and out of the Protected area. Access to the site is initially relatively easy however needs appropriate planning to avoid seepage (wetland) areas. Aerial access to the site (ie. helicopter) is restricted due to falling within a military airspace controlled zone.</i>
	<b>Electricity or power supply to operations</b>	<i>No electricity for development purposes is present on site, however an Eskom powerline is running next to the R 531, which may be considered by the developer at his/her own cost. Sub-surface distribution will apply and will be required to follow existing disturbances such as roads, fencing etc. Solar and gas running of proposed operations is preferred.</i>
	<b>Water provision</b>	<i>Water provision is not secured at present. Water provision (Drilling and equipping of boreholes) and</i>

		<i>application for water use licensing will be the responsibility of the developer.</i>
	<b>Sewage disposal</b>	<i>Sewage disposal facilities is not in a usable condition. Sewage disposal should consider soil properties, which is well drained and within close proximity of the Timpbavati River. The presence of fauna (hippo, buffalo, and other game) must be taken into account during design as to avoid faunal access to such facilities.</i>
	<b>Waste disposal</b>	<i>Waste must be removed from the site to registered waste disposal site. Temporary storage of waste must be scavenger proof (ie. baboon proof bins). An approved waste management plan will be required.</i>
<b>Aesthetics</b>		<i>Development is to be designed and constructed to blend into the environment and be obtrusive to any other activity on the reserve. Due to environmental limitations wrt. landscaping, all designs should make best use of existing flora and landscape properties to sensibly suit the site. General height of large trees on site may not be exceeded. No Cut-and-fill construction will be permitted. It is envisaged that the placement of facilities would have least negative viewshed impact on adjacent development and activities.</i>
<b>Landscaping aspects.</b>		<i>Only indigenous species relevant to the site is permissible for landscaping purposes. Establishment of lawns is generally discouraged unless serving pre-consent environmental benefit purposes (ie. grassblock parking, surface stabilisation). Dual purpose infrastructure establishment is encouraged, (i.e. access road also serving as firebreaks, pipelines and subsurface powerlines along existing roads).</i>
<b>Specific legislation to be made aware of and of particular importance to mention.</b>		<i>Being situated within a Protected Area, all development requires pre-approval via the legislative EIA processes.  The site also falls within the Interface Catchment protection buffer zone of the Kruger National Park Note should be taken that the area fall within the Food and Mouth disease buffer zone. The lower part of the site is close to the Timbavati River and buffer areas in accordance with the National Water Act is relevant. Also, a number of wetlands occur and compliance with latter Act apply. It is also important that as an operator, you are familiar with the following legislations: NEMA-National Environmental Management Act, No 107 of 1998 NEMBA-National Environmental Management: Biodiversity Act, No. 10 of 2004</i>

		<p><i>NEMPAA-National Environmental Management: Protected Areas Act, No. 57 of 2003</i></p> <p><i>PFMA-Public Finance Management Act, No. 1 of 1999</i></p> <p><i>NHRA-National Heritage Resources Act, No. 25 of 1999</i></p> <p><i>MNCA-Mpumalanga Nature Conservation Act (Act No. 10 of 1998)</i></p> <p><i>MTPAA-Mpumalanga Tourism and Parks Agency Act (Act No. 5 of 2005)</i></p> <p><i>NTA-Tourism Act- (Act No. 3 of 2014)</i></p> <p><i>NWA-National Water Act (Act No. 36 of 1998)</i></p>
<b>Security.</b>		<p><i>Security of the proposed lodge during all phases of being established will be responsibility of the developer/operator. Several options of securing the site may be considered (i.e. sensitively positioned electrified wires, silent alarm sensors in units). All persons or vehicles entering or exiting the reserve will be subjected to ad-hoc security checks/search processes.</i></p>
<b>Additional notes</b>		<p><i>Due to the close proximity of the R 531, traffic is audible at the Field Ranger Picket, and it is likely that guest accommodation would be better suitable for placement lower down towards the Timbavati River and the tributary.</i></p> <p><i>No persons will be allowed to overnight at the site during the construction phase, other than a maximum of two suitably qualified security guards. Staff accommodation limited to</i></p> <p><i>Operations will have to comply with The Andover Nature Reserve opening and closing hours. Specific additional details to the site should be mentioned (ie. camping of labour during construction phase may not be permitted due to dangerous game presence and security).</i></p>

## 6. BACKGROUND AND CURRENT TOURISM TRENDS

**Andover Nature Reserve** is an unspoiled Nature Reserve, situated amidst the Kruger National Park and Sabi Sands.

The 7 000 hectares reserve is home to **zebra, giraffe, kudu, bushbuck**, and other small antelope. The highlight though is the occasional sighting of rhino, buffalo and lion - they tend to visit from neighboring nature reserve, Sandringham, spend a few days within Andover and then return to their side of the fence.

Andover is considered an excellent example of a **“truly wild”** and undeveloped area that gains from its proximity to the Kruger as migratory [wildlife](#) follow routes they have followed for years, ignoring manmade boundaries.

The reserve does not cater for huge numbers of visitors. It has but four Rondavels, guesthouse for four people and a caravan park for eight people – making it an attractive option for those who enjoy privacy and solitude. The aim of the Tented Bush Camp is to give patrons an experience of accommodation right inside the bush with a game viewing sight every morning.

The Kruger National Park receives 1.4 million visitors annually and it is at close proximity to Andover Nature Reserve.
