T1.2. PROJECT DESCRIPTION

DESCRIPTION OF THE WORKS

Department of Forestry, Fisheries and the Environment (DFFE), invites suitably qualified contractors with a CIDB registered grading designation of **2CE or higher** to assist DFFE with the implementation of Wetlands rehabilitation projects in five provinces, for a minimum period of one (1) year to a maximum period of five (5) years.

INTRODUCTION AND BACKGROUND

The Expanded Public Works Programme (EPWP) was adopted by the South African government in 2004 in line with the broader strategy of addressing structural poverty in South Africa (DEA, 2014). It is a nationwide government-led initiative aimed at drawing a significant number of unemployed South Africans into productive work in a manner that would enable them to gain skills and increase their capacity to earn income.

The EPWP advances the principle of government expenditure, across all three spheres (National, Provincial and Local Government) to provide employment opportunities and skills development to the unemployed. The Department of Forestry, Fisheries and the Environment (DFFE) has, through the Environmental Programmes (EP) Branch, implemented natural resource management programmes which are in line with the EPWP through seeking ways to address environmental challenges as per the DFFE' strategic objectives.

The EPWP provides the basis against which these programmes aim to ensure the provision of decent work and sustainable livelihoods with a specific focus on integrated landscape management that supports resilient communities and the environment. Therefore, the programmes aim to target households in line with the EPWP principals on poverty and unemployment at local municipal level.

The EP Branch targets certain categories of people, specifically, the previously disadvantaged, i.e., women, youth, and people with disabilities, as well as undertake labour-intensive work which is environmentally related in its nature.

The purpose of the EP Branch is to provide management, operational oversight and to support sustainable livelihoods for local people through integrated landscape management that strives to establish resilient social-ecological systems and fosters equity in access to ecosystem services. The specific objectives are as follows:

- To enhance the rehabilitation and maintenance of degraded ecosystems and the delivery of ecosystem goods and services.
- Job creation and Economic development.
- Skills development; and
- Strengthening support for Small Medium and Micro Enterprises (SMMEs).

In line with objectives mentioned above, the EP Branch has developed a plan to quantify work in terms of Wetland rehabilitation in South Africa.
