1. Purpose

This initiative seeks to source, implement and operationalise a strategic Data Masking capability to enable the Companies and Intellectual Property Commission (CIPC) to achieve comprehensive compliance with the Protection of Personal Information Act (POPIA). The objective is to safeguard personally identifiable information (PII) across all external-facing digital platforms, internal operational systems, and legacy environments. In doing so, the Data Masking solution ensures alignment with the dual imperatives of protecting individual privacy rights and enabling lawful public access to information, as prescribed by Section 1 of POPIA and Section 187(4)(c) of the Companies Act. Moreover, this initiative directly supports the execution of the CIPC POPIA Implementation Plan by addressing key risk areas, notably the mitigation of unauthorised disclosures and the strengthening of data retention and lifecycle management practices.

The Data Masking initiative will be executed through a structured, phased approach aimed at enhancing CIPC's data privacy posture while ensuring alignment with legislative mandates and operational imperatives. The focus is on minimising the exposure of personally identifiable information (PII) and reinforcing compliance with POPIA and related statutes.

2. Background

In compliance with the Companies Act 2008, CIPC must provide the following services:

- Registration of corporate entities and intellectual property rights;
- Maintenance of accurate, up-to-date and relevant information concerning companies, corporate entities and intellectual property rights, and the provision of that information to the public and to other organs of state;
- The promotion of education and awareness of company and intellectual property laws, and related matters;
- The promotion of compliance with the Companies Act, and any other applicable legislation;
- Widest possible enforcement of the Companies Act;
- Promotion of the reliability of financial statements by monitoring compliance;
- Promoting voluntary resolution of disputes arising in terms of the Companies Act; and
- Research and reporting on matters of national policy and intellectual property law.

The focus of Data Masking is on minimising the exposure of personally identifiable information (PII) and reinforcing compliance with POPIA and related statutes.

3. Scope of Work

3.1 Background and Current State Overview

In its statutory role under the Companies Act, CIPC processes and discloses sensitive PII in maintaining corporate and intellectual property registers. While certain functions are exempt from specific POPIA provisions, public disclosures remain subject to Conditions 7 and 8, requiring appropriate security safeguards and processing limitations. The POPIA Implementation Plan (Section 3.7) identifies unmasked disclosures of PII, such as identity numbers, as the most material compliance risk, potentially exposing the Commission to identity theft, corporate hijacking, and significant legal liability.

A phased deployment of an enterprise-grade Data Masking solution, targeting full POPIA compliance, must be sourced, implemented, maintained and supported. The solution will address three core areas:

- a) External Platforms – Masking PII in public registers and electronic disclosure certificates.

NB: Please note that all bidders will be subjected to the compulsory briefing

- b) Internal Systems – Enforcing role-based access to sensitive PII in line with security safeguard requirements.
- c) Data Retention – Applying compliant retention and disposal practices for non-essential PII.

3.2 Business Problem

Despite CIPC's compliance endeavours, the inadequate systematic Data Masking solution constitutes significant legal and operational exposure. POPIA Conditions 7 and 8 require that all processing, especially public disclosures, must incorporate appropriate safeguards and adhere to data minimisation principles.

A proactive solution is therefore imperative, not only to close the remaining compliance gaps but to safeguard institutional integrity, enable secure service delivery and align CIPC with global best practices in data privacy and protection.

3.3 Requirements

A. Functional Requirements

Requirement	Compliance (Yes/No)	Description	Page Reference
Data Masking		Mask all PII in electronic disclosures, public registers, and legacy systems. Implement dynamic masking for live production environments to mitigate leakage risks.	
Exceptions Management		Unmask the director's ID numbers on new company registration certificates. Grant exemption to law enforcement agencies (e.g., SAPS, SIU, NPA) under POPIA Section 6.	
Role-Based Access Control (RBAC)		Restrict access to PII such as bank details and salary data strictly to authorised HR and Finance staff, minimising exposure risk.	
Information Inventory		Maintain a comprehensive inventory classifying PII by type, purpose, and storage location.	
Retention and Disposal		Enforce retention rules per POPIA Section 14, destroy non-essential PII (e.g., CVs) and retain statutory registers indefinitely. Retain financial records for 7 (seven) years	
Incident Response		Establish breach detection and containment protocols, integrated into CIPC's overall Incident Response Plan	

B. Technical Requirements

Requirement	Compliance (Yes/No)	Description	Page Reference
Compatibility		Full interoperability with SQL, Informix, Oracle , and the current CIPC application stack. Must support both on-premises and cloud workloads.

3.5 Future Vision / Target State

In alignment with CIPC's mandate to uphold public trust while safeguarding personal information, the future state envisions a secure, compliant, and operationally efficient data masking ecosystem embedded into all relevant business processes and systems.

This target state is driven by three core strategic outcomes:

1. Uncompromised Regulatory Compliance

- All Personally Identifiable Information (PII) is masked, tokenised, or encrypted following POPIA, applicable legislation, and international best practice standards.

NB: Please note that all bidders will be subjected to the compulsory briefing

- Exceptions for unmasking are strictly governed by documented protocols and audit trails, applicable only to new company registration certificates and law enforcement exemptions under POPIA Section 6.
- 2. **Seamless Business Operations**
 - Dynamic data masking ensures that authorised CIPC staff and external stakeholders receive the exact level of detail required for their role, no more, no less, eliminating unnecessary exposure of sensitive information.
 - Systems interoperability ensures full compatibility with CIPC's SQL, Oracle, Informix, and other core platforms, maintaining performance even under peak processing loads.
- 3. **Trusted Public Engagement**
 - Public-facing platforms continue to deliver transparency in corporate registers while safeguarding identity data from misuse, thereby strengthening CIPC's credibility and reducing reputational risk.
 - Citizens, businesses, and international partners recognise CIPC as a benchmark for ethical data stewardship in the African corporate governance landscape.

1. This Standard Bidding Document (SBD) must form part of all bids¹ invited.
2. Section 4 (1) (b) (iii) of the Competition Act No. 89 of 1998, as amended, prohibits an agreement between, or concerted practice by, firms, or a decision by an association of firms, if it is between parties in a horizontal relationship and if it involves collusive bidding (or bid rigging).² Collusive bidding is a *per se* prohibition meaning that it cannot be justified under any grounds.
3. Treasury Regulation 16A9 prescribes that accounting officers and accounting authorities must take all reasonable steps to prevent abuse of the supply chain management system and authorizes accounting officers and accounting authorities to:
 - a. disregard the bid of any bidder if that bidder, or any of its directors have abused the institution's supply chain management system and or committed fraud or any other improper conduct in relation to such system.
 - b. cancel a contract awarded to a supplier of goods and services if the supplier committed any corrupt or fraudulent act during the bidding process or the execution of that contract.
4. This SBD serves as a certificate of declaration that would be used by institutions to ensure that, when bids are considered, reasonable steps are taken to prevent any form of bid-rigging.
5. In order to give effect to the above, the attached Certificate of Bid Determination (SBD 9) must be completed and submitted with the bid:

¹ Includes price quotations, advertised competitive bids, limited bids and proposals.

² Bid rigging (or collusive bidding) occurs when businesses, that would otherwise be expected to compete, secretly conspire to raise prices or lower the quality of goods and / or services for purchasers who wish to acquire goods and / or services through a bidding process. Bid rigging is, therefore, an agreement between competitors not to compete.
