SECTION 2

BACKGROUND OVERVIEW AND SCOPE REQUIREMENTS

1 INTRODUCTION AND BACKGROUND

Electrical, lighting & Power (EL&P) is one of the key functional areas within Facilities Management (FM) department at PRASA CRES. It responds to Electrical related maintenance requirements of the property portfolio including railway stations, workplace facilities, residential etc. Electrical maintenance supports PRASA entity operations towards the achievement of both the primary and secondary mandate taking full responsibility of all building assets in the Region.

The contract work consists of:

Unplanned /Emergency general electrical related repairs as and when required. (Refer to scope of work for details on page 5).

The contractor shall integrate the provision of his services into the general operation of the PRASA operational system which may require that the contractor co-operate with other contractors employed by PRASA.

2. OVERVIEW

PRASA seeks to benefit from this partnership in the following ways: **(Project)**

2.1.1 PRASA must receive reduced cost of acquisition and improved service benefits resulting from the Service Provider’s economies of scale and streamlined service processes.

2.1.2 PRASA must achieve appropriate availability that meets user needs while reducing costs for both PRASA and the chosen Service Provider(s).

2.1.3 PRASA must receive proactive improvements from the Service Provider with respect to provision of Services and related processes.

BID NUMBER: WCR/CRES/03/04/2024	

2.1.4 PRASA’s overall competitive advantage must be strengthened by the chosen Service Provider’s leading edge technology and service delivery systems.

2.1.5 PRASA end users must be able to rely on the chosen Service Provider’s personnel for service enquiries, recommendations and substitutions.

2.1.6 PRASA must reduce costs by streamlining its acquisition of Services, including managed service processes on a Group basis.

2.2 Status Quo

Electrical maintenance is the third highest of the Maintenance budget cost drivers due to the emergencies recorded on a monthly basis. Given our required resolution rate for emergencies within the specified time, contracts must be put in place to improve service levels.

The Region currently has only six qualified electrical artisans responsible for servicing the entire Region with more than 200 stations and excluding Workplace facilities.

2.3 Problem Statement

The Western Cape Region has been exposed to high rate of recurring theft and vandalism which resulted to non-functional and non-compliant PRASA assets that poses safety and health hazard to the commuters, PRASA personnel, stakeholders and community at large. Malicious damages to PRASA properties and assets further contributed to increasing amount of building failures and FM is unable to execute faults within the acceptable business turnaround time.

The existing six qualified electrical artisans within the Region are incapable to attend to major breakdowns of an emergency nature and unable to achieve the acceptable business turnaround time to execute emergency repairs and unplanned maintenance.

and comparison of tenders and recommendations for the award of a contract.

Grounds for rejection 5 Consider rejecting a tender if there is any effort by a *tenderer* to influence the processing of tenders or contract award.

Disqualification 6 Instantly disqualify a *tenderer* (and his tender) if it is established that the *tenderer* offered an inducement to any person with a view to influencing the placing of a contract arising from this invitation to tender.

Test for responsiveness 7 Determine before detailed evaluation, whether each tender properly received

Non-responsive tenders 10 Reject a non-responsive tender, and not allow it to be subsequently made responsive by correction or withdrawal of the non-conforming deviation or reservation.

Arithmetical errors 11 Check responsive tenders for arithmetical errors, correcting them as follows:

- Where there is a discrepancy between the amounts in figures and in words, the amount in words shall govern.
- If a bill of quantities applies and there is a discrepancy between the rate and the line item total, resulting from multiplying the rate by the quantity, the rate as quoted shall govern. Where there is an obviously gross misplacement of the decimal point in the rate, the line item total as quoted shall govern, and the rate will be corrected.
- Where there is an error in the total of the Prices, either as a result of other corrections required by this checking process or in the *tenderer's* addition of prices, the total of the Prices, if any, will be corrected.
