SECTION H : MBD9 : CERTIFICATE OF INDEPENDENT BID DETERMINATION

Section 4 (1) (b) (iii) of the Competition Act No. 89 of 1998, as amended, prohibits an agreement between, or concerted practice by, firms, or a decision by an association of firms, if it is between parties in a horizontal relationship and if it involves collusive bidding (or bid rigging).² Collusive bidding is a per se prohibition meaning that it cannot be justified under any grounds.

Municipal Supply Regulation 38 (1) prescribes that a supply chain management policy must provide measures for the combating of abuse of the supply chain management system, and must enable the accounting officer, among others, to:

- take all reasonable steps to prevent such abuse;
- reject the bid of any bidder if that bidder or any of its directors has abused the supply chain management system of the municipality or municipal entity or has committed any improper conduct in relation to such system; and
- cancel a contract awarded to a person if the person committed any corrupt or fraudulent act during the bidding process or the execution of the contract.

The following MBD serves as a certificate of declaration that would be used by institutions to ensure that, when bids are considered, reasonable steps are taken to prevent any form of bid-rigging.

In order to give effect to the above, the following Certificate of Bid Determination must be completed and submitted with the bid. The undersigned, in submitting the accompanying bid, in response to the invitation for the bid do hereby make the following statements that I certify to be true and complete in every respect:

SECTION 7: SCOPE AND SPECIFICATION OF REQUIRED SUPPLY / SERVICES

BACKGROUND

With Cyber risks and the threat landscape constantly evolving, it is essential for the eThekweni Municipality to ensure that it maintains a good Information Technology security posture (attack surface growing) that will enable the achievement of service delivery objectives reliant on digital systems and ensure adequate protection of information held and processed. Noting that technology alone does not provide adequate protection as employees or users of systems can be tricked or fall victim to cyber threats if they cannot spot and avoid targeted, sophisticated, and socially engineered cyber-attacks, that bypass security systems. Hence the need to ensure that users of systems are well educated in security best practices and good cyber-safety habits.

Currently eM does not have a comprehensive enterprise cyber security e-learning platform that educates, evaluates and provides risk status on employees' cybersecurity awareness and training across many elements, ensuring that employees or end-users are knowledgeable on approved ICT policies, and on how to safeguard against cyber threats like phishing, ransomware, malware, social engineering scams, baiting, latest threat trends and many more risks associated with utilising technology resources, so as to maintain the confidentiality, integrity and availability of sensitive information and systems.

Driven by that commitment to improve the security posture and ensure that users protect the privacy of information and are resilient to cyber-attacks through providing them with the right cybersecurity awareness education and assessments that are interactive and engaging to change behaviour and instil good security best practices and culture, ensuring that users are less vulnerable to fall for the different cyber threats, and measure success.

The Municipality is inviting bids from accredited cyber security awareness computer-based training providers, with proven business model, track record, expertise, customer-base and with an enterprise solution that is a leader in the space of computer-based training to provision, roll-out, integrate and support a comprehensive e-learning platform for developing security skills through practical, interactive and engaging training, including evaluation and reporting of skills and risk posture for users. The platform must be comprehensive, integrated, and interactive and easy to use and administer, and effectively enhance eThekweni Municipality's users' capabilities to effectively defend against security breaches and proactively identify and report suspected and actual cyber threats or risks.

A) SCOPE OF SUPPLY / SERVICES

The end goal is for the eThekweni Municipality to be able to effectively assess and practically train, evaluate and report on cyber security skills, reinforce compliance, and report on the risk posture for all employees on cyber security training and knowledge. Utilising a comprehensive integrated enterprise online computer-based training platform that provides diverse, interactive, and engaging cybersecurity training for a large environment, with appropriate security training content that is large or unlimited and with assessments in different formats, covering many elements of cybersecurity, with real-time intelligent or advanced reporting capabilities for all activities to measure success providing meaningful metrics and indicators. To aid in building concrete cyber-hygiene skills, empower and embed best security practices, improve end-user behaviour, in turn reduce human risks related to computer usage in an entertaining and positive way that is memorable, ensuring users can safely interact with digital technologies in and out of the workplace avoiding cyber threats.
