RFP GPAA 07/2026: DEVELOPMENT OPERATIONS (DEVOPS) SUPPORT SERVICES

Prospective bidders are hereby informed of an amendment to the functionality evaluation criterion relating to **Company Experience in Provision of DevOps Services in a Pension Administration Environment**.

The bidder must complete the template (refer to 12.1.1) listing all clients where DevOps services were rendered in the last ten (10) years, including details of the projects undertaken during that period. The current scoring table contains categories for experience exceeding ten (10) points. However, as the **maximum score allocated to this criterion is 10 points**, bidders can achieve the full score by demonstrating **more than seven (7) years' experience**.

The criterion is therefore amended as follows:

Years of Experience	Points
Less than five (5) years	0 Points
More than five (5) years, up to seven (7) years	5 Points
More than seven (7) years	10 Points

Maximum Points: 10

All other terms and conditions of **RFP GPAA 07/2026: Development Operations (DevOps) Support Services** remain unchanged.
