1 INTRODUCTION

1.1 BACKGROUND

- 1.1.1 A request from ICTM Telecoms received from Principal Engineer to form a task team, to research and compile a list of radio test instruments for the upcoming Digital Migration project. Digital migration project focuses on upgrading Transnet Radio Communication infrastructure, from the current RTO and Trunked radio systems to DMR and LTE technology.
- 1.1.2 The research findings are based to the current network and therefore changes when the DMR and LTE network has been fully designed and operational might be added.
- 1.1.3 The contents of this document are purely based on research of instruments that are currently in the market. It is an internet based research, as there was no formal demonstration or training acquired. Therefore, it would be advisable to acquire training and demonstration of the technologies and the testing instruments, before proceeding to the procurement of these instruments, to gain a more detailed insight on the operation, features of the instruments and those technologies.
- 1.1.4 The task team consisted of the following members:

Table 1: Task team members

No	Employee Name	Position	Department
1	Khunjulwa Mniniyo	Chief Engineering Technician	Quality Assurance
2	Nomaxabiso Mayoli	Senior Engineer	Operations & Maintenance
3	Nkosinathi Nyawose	Chief Engineering Technician	Operations & Maintenance
4	Bulelani Kovane	Engineering Technician	Operations & Maintenance
5	Lebohang Mphirime	Engineering Technician	Quality Assurance

2 SCOPE

- 2.1 This document covers the minimum requirements of radio test instruments required for DMR and LTE technologies that will be deployed for maintenance of Transnet radio infrastructure. Detailed requirements and information of these test instruments will be outlined in their respective specification documents.
- 2.2 The test and measurement instrument must be simple to operate and be ideally suited for South African climatic conditions.
- 2.3 The test instruments that will be listed in this document are as follows:
 - 2.3.1 Radio Communication Test Set
 - 2.3.2 Vector Signal Generator
 - 2.3.3 Vector Network Analyzer
 - 2.3.4 Portable Antenna Site Analyzer

4 CONCLUSION

Currently there's a number of OEMs for the test instruments listed in clause 2.3 of this document therefore the specifications of a particular instrument may slightly differ with each manufacturer. Thus, some instruments may not have the exact information in the tables 1 to 4 mentioned above specification but should however be compliant with Transnet's proposed digital radio systems.
