

INTRODUCTION

T&SS is an essential and strategic link in the service provision of Eskom, who has the responsibility to operate and maintain an ever-increasing fleet of generation, transmission, and distribution assets. T&SS provides essential and strategic repair, maintenance, refurbishment, and related engineering services, at its workshop facility in Rosherville. There is a need to maintain the facility in clean conditions and upkeep its housekeeping.

SCOPE OF WORKS

Provide cleaning services for the following: -

1. Clean the workshop daily (e.g., Sweeping, Mopping, removal of foreign items, emptying of dust bins).
2. Dust off machinery, columns and walls as and when required.
3. Removal of general waste and contaminated waste.
4. Waste separation and classification into different types.
5. Supervisors to give instructions on how to dispose waste.
6. Obtain permission from T&SS supervisors to scrap unwanted waste/material.
7. Painting of floors as and when required using T&SS paint.
8. Maintain good housekeeping within the workshops.
9. Handling of hazardous chemicals waste.

GENERAL REQUIREMENTS

General Requirements are as follows: -

1. Use of correct PPE
2. Correct usage of signage when working
3. Working at heights training
4. Comply with ERI SHEQ requirement/specification.
5. Cleaning experience in workshop or warehouse.
6. Production Managers and service provider contract manager to conduct monthly inspections.
7. Compliance to ERI security protocols
8. Daily toolbox talk is compulsory.
