1. PURPOSE

- 1.1 To appoint a suitable service provider to provide and support a Library Management Software solution that provides for the seamless continued operation of the Department of Forestry, Fisheries and the Environment's libraries to best practice local and international library standards, methods and procedures for a period of five (05) years.

2. INTRODUCTION AND BACKGROUND

- 2.1 As with all efficient and effective modern libraries, the Department of Forestry, Fisheries, and the Environment's (DFFE) libraries rely on computerised library management systems to manage asset collections as well as relationships with their users, colleagues and other libraries. Library management systems help libraries keep track of their document inventory and loans and user profiles, sometimes for multiple physical locations. This type of software is used by research and academic libraries, as well as public or private libraries. Library users can use library management systems to find, reserve, and loan documents while library staff employ it to manage the acquisition, cataloguing, and inventory of documents.
- 2.2 In summary, modern Library Management Software systems assist in managing Library assets by creating and maintaining a single database with the details of all library items – making information in the library more accessible and keeping track of library asset movement.
- 2.3 The DFFE libraries use Library Management Software systems to assist its Librarians in: cataloguing books, journals, reports and online resources; cataloguing using barcodes; printing books labels; generating current awareness reports; generating and printing accession registers; generating book borrower statistics; generating library reports; generating books on loan reports; generating overdue books reports; keeping track of each item issued to each borrower; sending automatic reminders for outstanding books to borrowers; [facilitating and managing intra- and inter-library loans] and, facilitating stock takes and compiling stocktaking reports.
- 2.4 The use of modern Library Management Software systems greatly improves the efficiency of Librarians and, hence, the current human resourcing of the DFFE libraries is based on the use of such systems.
- 2.5 To provide an insight into the size of the DFFE libraries, the following table provides data as of January 2023:

DFFE Library	Collection size (books, journals, reports, and online resources)	No of Librarians
Head Office, Environment House, Pretoria	10200 Books (hard copies); 487 E-journals (active full-text, non-open access journals); and 127 E-book	2 Librarians + 1 (Intern)
Records Management Section	10 000 records	3
Forestry Library (Pretoria, Hamilton Street)	18 419 reports	1
Fisheries Library (Cape Town)	3 800	2
Totals	42 419	9

a. For contracts with a Rand value up to R50 000 000, a maximum of 20 points may be allocated for specific goals as contemplated above, provided that the lowest acceptable tender scores 80 points for price.

i. The applicable formula to be used is $P_s = 80[1 - (P_t - P_{min})/P_{min}]$. Provided:

P_s = Points scored for price of tender under consideration.

P_t = Price of tender under consideration; and

P_{min} = Price of the lowest applicable tender.

10. BID SUBMISSION REQUIREMENTS

10.1 Bidders should ensure that the following submission requirements, which will be needed for evaluation purposes are included in their bid proposal and are as follows:

- 10.1.1 The service provider must compile and submit a table of contents which will indicate where each document is in the proposal.
- 10.1.2 The service provider must label and organise all components of the submitted bid in order to facilitate the four (04) phases of bid evaluation.
- 10.1.3 The service provider must pay detailed attention to the provision of the information required for an efficient, effective and fair functionality evaluation (Phase 3). In this regard:
 - (a) The quality of the Library Management Software Solution will be evaluated using the number of verifiable reviews of the software by reviewers that are independent of the service provider and software vendor and/or details of South African globally rated universities' libraries, Metropolitan public libraries, and/or government department or State Science Council libraries who have used the software for over five (05) years. An 'independent review' can take any form (e.g. it can be part of a magazine article; web review; screen grab; trade publication; newsletter; formal letter; etc.). This notwithstanding, the reviews must be of a nature that they can be verified with the reviewer by the Department . Thus, the Department does not require bidders to specifically approach reviewers to provide them with reviews. Rather, the department expects that qualified bidders will, as a matter of course, keep records of published reviews of their product and it is these reviews that will be considered when evaluating functionality. Where contact details of respected Libraries using the software for over five (05) years are submitted, such libraries must be operational and able to confirm the number of years of software use.
 - (b) The experience of the service provider (bidder) will be evaluated using the number of contactable written references that confirm the successful completion of similar projects by the bidder. These references must specify the role played by the service provider in the listed projects or assignments, the project value and the duration of the project (start and end date). Unlike the independent reviews of the software solution detailed in (a) above, these contactable written references must be signed letters on company letterheads dealing with the quality of the bidder's service delivery.

- (c) For the purpose of this project, the 'Project Manager' is the person who will be the bidder's member of staff who will be accountable for the efficient and effective implementation of the project as a whole and the 'Team Leader' will be the bidder's staff member responsible for leading all 'on-site' physical work (e.g. installation, data migration, testing, training and maintenance). The experience and track record of the service provider's responsible Project Manager and the project implementation Team Leader will be evaluated using the numbers of years these individuals have been involved in the provision, maintenance and support of Library management systems. This information should be clearly provided in the bid and verified by the inclusion of the curriculum vitae (CVs) for all service provider staff to be involved in the implementation of the project. The information in the CVs should highlight relevant experience and qualifications thereby demonstrating the required competency to undertake the project efficiently and effectively. Annexure B provides a CV template that details the minimum information requirements.
 - (d) The bidders understanding of the brief and approach to implementation will be evaluated based on the quality, detail and clarity of the submitted project plan. In order to achieve the maximum score for this evaluation criterion, the bidder's project plan must provide the evaluators with: a clear picture of how (e.g. methodology, tasks, assignments, etc.) and when (e.g. timescales, milestones) each deliverable will be delivered; an indication of who will be responsible for the management of the assignment as well as its execution; an understanding of how the allocation of team members to assignments relates to their experience in delivering such assignments.
- 10.1.4 The proposal shall consist of two (02) parts, namely the technical bid and the pricing bid (master and copy).
 - 10.1.5 Standard bidding documents (SBD1, 2, 3.3, 4, 8 and 9) completed and signed.
 - 10.1.6 Tax compliance status requirements and/or Central Supplier Database (CSD) number or report.
 - 10.1.7 Certified copies of identity documents of directors and shareholders of the company.
