SECTION 3: BACKGROUND, OVERVIEW AND SCOPE OF REQUIREMENTS

1 BACKGROUND

Eskom, the state-owned power utility, is the primary base load power producer and distributor in South Africa. This power is generated mainly from fossil fuels namely coal, totalling an annual 88m metric tonnes. Historically the power stations were constructed in close proximity to coal mines supplying coal to the power stations with overland conveyor systems being the primary method of transporting coal from the mine to the power station stockyards. Over recent years, the sources of coal supply to power stations have changed, resulting in a modal shift of transportation for several power stations to predominantly road. Although conveyors are still the major transporter, approximately 36Mtpa is currently transported by road, 3Mtpa by rail and the rest by conveyor system.

An important centre of Eskom's power production lies in the coal fields of Mpumalanga where nine coal-fired power stations have been constructed. Three power stations, namely Camden, Grootvlei and Komati were decommissioned in the late 1980's. Due to the country's increased demand for electricity, Eskom re-commissioned these stations on a short term and bring them back into operation and has now recently further extended their operations. It is estimated that a total of 32Mtpa of coal will be supplied by rail to five power stations in the area, namely Majuba, Camden, Tutuka Grootvlei and Hendrina.

The high tonnages of Eskom coal on the national and provincial roads are highly problematic to the South African community in terms of environmental impact and physical degradation of the road network. The Government, and in particular the Department of Public Enterprises, as the sole shareholder of Transnet and Eskom, has a social responsibility to move bulk and heavy products by rail, thereby easing the congestion on the South African road network, reducing the rapid deterioration of roads, and reducing the carbon emission levels generated through the road transportation of products from production areas to destinations.

For these reasons the government has made a strategic decision, requesting Eskom and Transnet Freight Rail, as the major stakeholders, to provide a joint strategy for the migration of at least 80% of coal tonnages, totalling 32Mtpa, from road to rail.

Transnet Freight Rail, the largest freight moving company in South Africa, wholly owned by RSA government has managed to generate significant rail volumes through its route-to-market capabilities created for customers to mass evacuate bulk commodities from origin to destination in domestic, regional, and international flows. This growth in rail volumes has been achieved through the introduction of supply chain solutions that create value to customers and give them competitive advantages.

An opportunity exists to sustain the existing containerised business by increasing the transportation of Eskom's coal, in open-top containers from coal mines to power stations in line with the 10-year demand file projections and commitments.

2 EXECUTIVE OVERVIEW

Whereas Transnet is seeking a partner to provide solutions for its Removal of coal at Grootvlei, it also seeks to improve its current processes for providing these Goods/Services to its end user community throughout its locations.

The selected Supplier/Service provider(s) must share in the mission and business objectives of Transnet. These mutual goals will be met by meeting contractual requirements and new challenges in an environment of teamwork, joint participation, flexibility, innovation and open communications. In this spirit of partnership, Transnet and its Supplier/Service provider(s) will study the current ways they do business to enhance current practices and support processes and systems. Such a partnership will allow Transnet to reach higher levels of quality, service and profitability.

Specifically, Transnet seeks to benefit from this partnership in the following ways:

- 2.1 Transnet must receive reduced cost of acquisition and improved service benefits resulting from the Supplier/Service provider's economies of scale and streamlined service processes.
- 2.2 Transnet must achieve appropriate availability that meets user needs while reducing costs for both Transnet and the chosen Supplier/Service provider(s).
- 2.3 Transnet must receive proactive improvements from the Supplier/Service provider with respect to supply/provision of Goods/Services and related processes.
- 2.4 Transnet's overall competitive advantage must be strengthened by the chosen Supplier/Service provider's leading edge technology and service delivery systems.
- 2.5 Transnet end users must be able to rely on the chosen Supplier/Service provider's personnel for service enquiries, recommendations and substitutions.
- 2.6 Transnet must reduce costs by streamlining its acquisition of Goods/Services, including managed service processes on a Group basis.

6.6 **STEP FIVE: Post Tender Negotiations (if applicable)**

- Respondents are to note that Transnet may not award a contract if the price offered is not market-related. In this regard, Transnet reserves the right to engage in PTN with the view to achieving a market-related price or to cancel the tender. Negotiations will be done in a sequential manner i.e.:
 - first negotiate with the highest ranked bidder or cancel the bid, should such negotiations fail,
 - negotiate with the 2nd and 3rd ranked bidders (if required) in a sequential manner.
- In the event of any Respondent being notified of such short-listed/preferred bidder status, his/her bid, as well as any subsequent negotiated best and final offers (BAFO), will automatically be deemed to remain valid during the negotiation period and until the ultimate award of business.
- Should Transnet conduct post tender negotiations, Respondents will be requested to provide their best and final offers to Transnet based on such negotiations. Where a market related price has been achieved through negotiation, the contract will be awarded to the successful Respondent(s).

 - (ii) if that Respondent does not agree to a market-related price, negotiate a market-related price with the Respondent scoring the second highest points or cancel the RFP;
 - (iii) if the Respondent scoring the second highest points does not agree to a market-related price, negotiate a market-related price with the Respondent scoring the third highest points or cancel the RFP.

If a market-related price is not agreed with the Respondent scoring the third highest points, Transnet must cancel the RFP.

- 1.2 The NIP obligation applicable to suppliers in respect of sub-paragraphs 1.1 (a) to 1.1 (c) above will amount to 30% of the imported content whilst suppliers in respect of paragraph 1.1 (d) shall incur 30% of the total NIPP obligation on a *pro-rata* basis.
- 1.3 To satisfy the NIPP obligation, the DTI would negotiate and conclude agreements such as investments, joint ventures, sub-contracting, licensee production, export promotion, sourcing arrangements and research and development (R&D) with partners or suppliers.
- 1.4 A period of seven years has been identified as the time frame within which to discharge the obligation.
