# INTRODUCTION

## INTRODUCTION TO THE NRF

The National Research Foundation Act as amended, Act 19 of 2018, establishes the National Research Foundation ("NRF") as the juristic legal entity that will contract with the awarded bidder. Please visit the NRF website (<https://www.nrf.ac.za>) for more information.

## BACKGROUND TO NRF-SAEON

The South African Environmental Observation Network (NRF-SAEON) is a business unit of the National Research Foundation (NRF) mandated with Long Term Environmental Observation to detect and understand the impacts of Global Change in South Africa.

NRF-SAEON coordinates an array of multidisciplinary observation platforms and research programs that are designed to monitor and understand Earth system dynamics and human induced changes to these over multiple scales. These initiatives are currently being advanced through the development of a coordinated sophisticated instrument network that must contribute quality, long-term environmental data for research that will ultimately guide evidence-based policy and decision-making. NRF-SAEON is committed to scientific excellence.

Seven NRF-SAEON nodes are strategically situated across geographic regions representing the country's major biomes.

Further information about NRF-SAEON can be found on [www.NRF-SAEON.ac.za](http://www.NRF-SAEON.ac.za)

## THE NEED FOR THIS PROCUREMENT WITHIN NRF-SAEON

NRF-SAEON requires a reputable service provider to service and maintain its fleet of sea-going and estuary vessels. The need to maintain the fleet is to ensure the safe and efficient functionality and legal operation of all fleet vessel that are required when undertaking research sampling in the shallow marine and coastal environment. This maintenance includes trailers, electronic and navigational equipment, and safety equipment as well as ad-hoc repairs

NRF-SAEON distributes the response to a clarification request to all respondents that have signed the briefing session attendance register) within 2 working days of receipt of the query. NRF-SAEON does not provide the origin of the request to any party.

#### Response preparation costs

The NRF/NRF-SAEON is not liable for any costs incurred by a bidder in the process of responding to this invitation, including on-site presentations.

#### Counter proposals

No counter proposals or variations are accepted.

#### Two folder electronic system

In the interests of transparent procurement, NRF-SAEON utilises the two-folder e submission system to

minimise any form of price bias in the technical selection phase. All responses must be submitted in two electronic folders as detailed on the lead page of this document.

#### Central Supplier Database registration

The NRF/NRF-SAEON is legislatively only allowed to contract with third parties registered on the National Treasury's Central Supplier Database. #### Collusion, fraud and corruption

Any effort by the bidder to influence evaluation, comparisons, or award decisions in any manner will result in the rejection and disqualification of the bidder concerned.

#### Fronting and Beneficial Ownership

The NRF supports the Government's broad based black economic empowerment recognising that real empowerment is through individuals and businesses conducting themselves in accordance with the Constitution and in an honest, fair, equitable, transparent, and legally compliant manner. Against this background, the NRF condemns any form of fronting/non-beneficial ownership. The NRF's evaluation committees conduct or initiate the enquiries/investigations to determine the accuracy of the third parties' representations. The third parties have the onus of proving that fronting does not exist. Where the NRF identifies a potential breach may exist, the NRF notifies the third parties of the allegation. The third parties have a period of 7 days from date of notification to provide evidence that such potential breach does not exist. The NRF, upon confirmation of fronting, will invalidate the contract, apply for the third parties to be restricted from conducting business with the public sector for a period not exceeding 10 years, and exercise any other remedies the NRF may have against the concerned third party.

#### Disclaimers

The NRF has produced this document in good faith. The NRF, its agents, and its employees and associates do not warrant its accuracy or completeness; make no representation, warranty, assurance, guarantee, or endorsements to any third parties concerning the document. ## Guidelines

### Converting to pdf

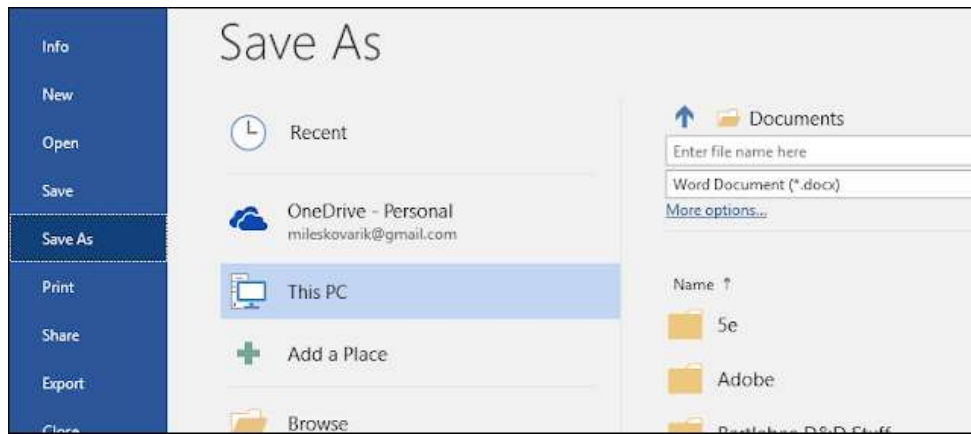

- If you have the desktop version of Microsoft Word, the easiest way to convert your document to PDF is right in Word itself.
- Open the document you want to convert, and then click the “File” tab.

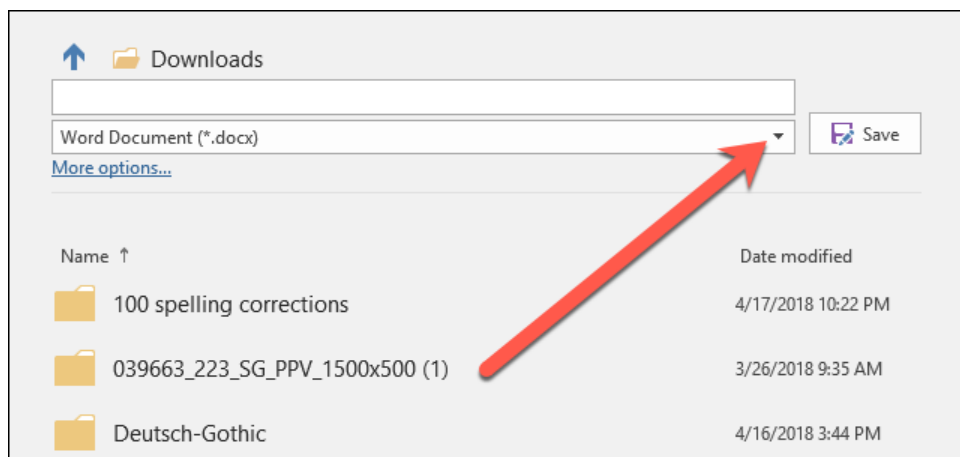

- On the backstage screen, select “Save As” from the list on the left.

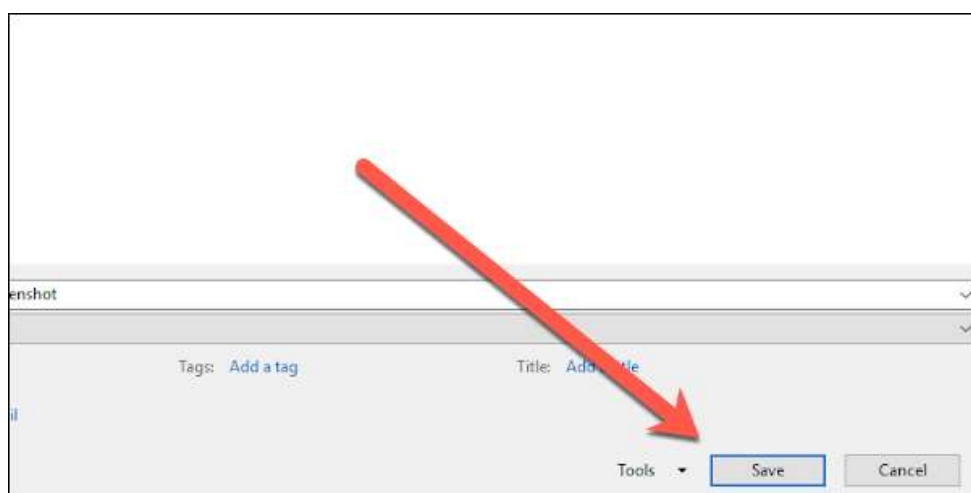

- On the Save As screen, select where you would like the PDF to be saved (OneDrive, This PC, a particular folder, or wherever).

- Next, click the dropdown arrow on the right side of the “Save as type” box, and select “PDF (\*.pdf)” from the dropdown menu.

- If you want to, you can change the filename at this time. When you're ready, click the “Save” button.

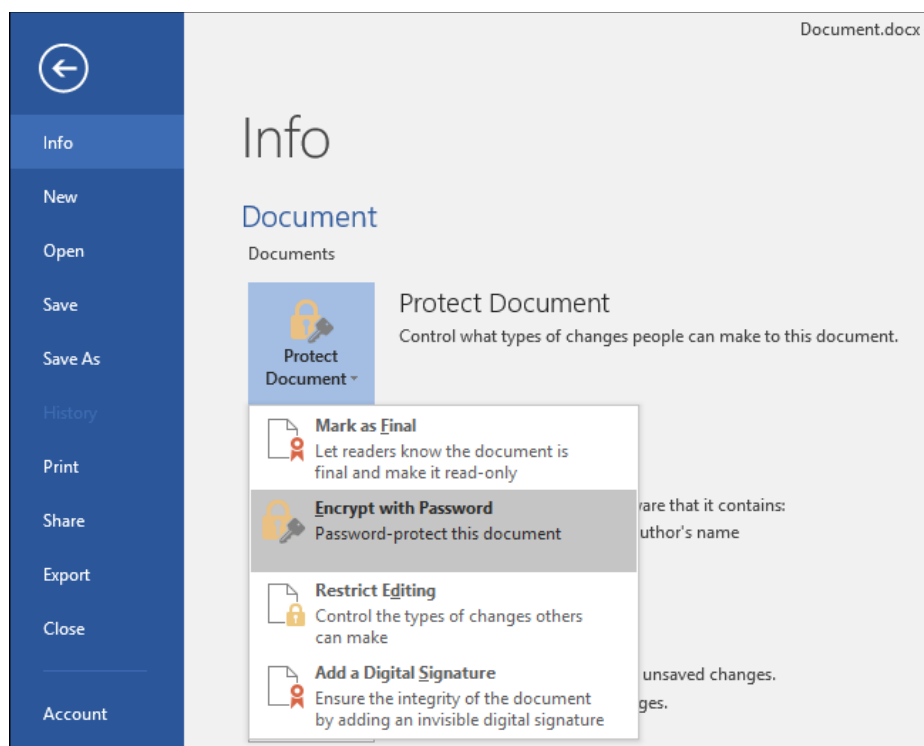

- After saving the PDF, you'll be returned to your Word document, and the new PDF will open automatically in your default PDF viewer.

## Password protecting files

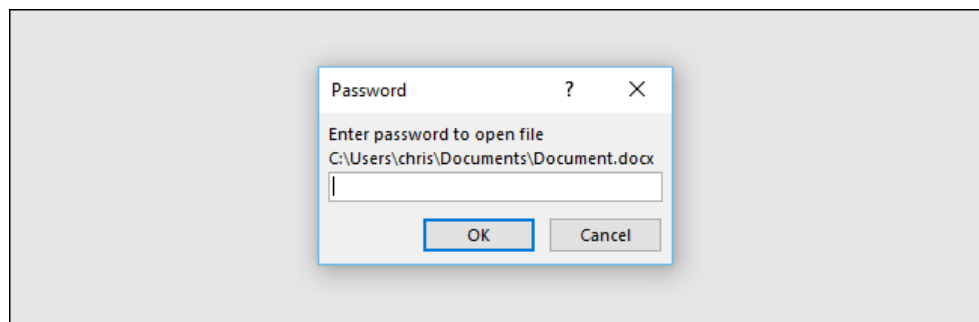

- To password protect an Office document, first open it in Word, Excel, PowerPoint, or Access. Click the “File” menu at the top-left corner of the screen. On the Info pane, click the “Protect Document” button and select “Encrypt with Password.”
- The button is only named “Protect Document” in Microsoft Word, but it’s named something similar in other apps. Look for “Protect Workbook” in Microsoft Excel and “Protect Presentation” in Microsoft PowerPoint. In Microsoft Access, you’ll just see an “Encrypt with Password” button on the Info tab. The steps will otherwise work the same.
- NOTE: If you only want to restrict editing of the document, you can choose “Restrict Editing” here, but as we said, that is not very secure and can easily be bypassed. You’re better off encrypting the entire document, if you can.

- Enter the password you want to encrypt the document with. You’ll want to choose a good password here. Weak passwords can be easily guessed by cracking software if someone gains access to the document.
- **Warning:** You’ll lose access to the document if you ever forget your password, so keep it safe! Microsoft advises you write down the name of the document and its password and keep it in a safe place.

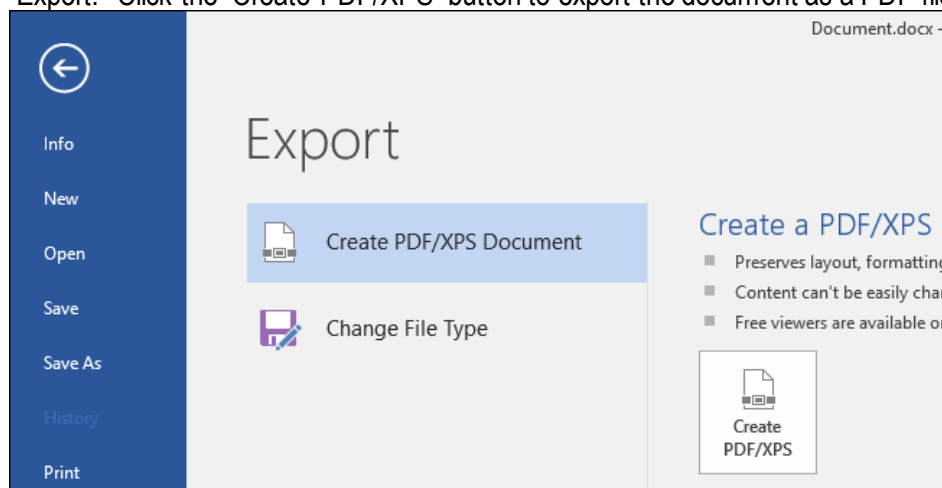

- When a document is encrypted, you'll see the "A password is required to open this document" message on the Info screen.
- The next time you open the document, you'll see an "Enter password to open file" box. If you don't enter the correct password, you won't be able to view the document at all.

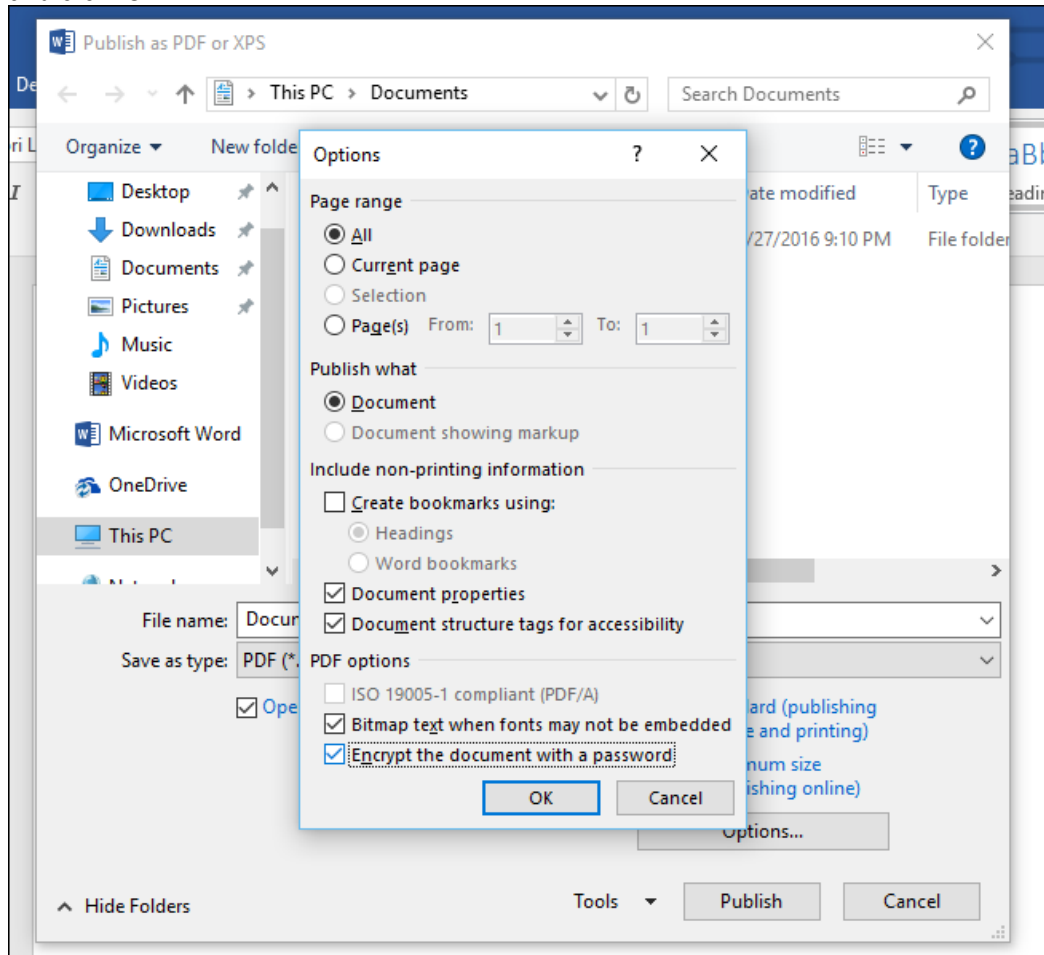

- To remove the password protection from a document, click the "Protect Document" button and select "Encrypt with Password" again. Enter a blank password and click "OK." Office will remove the password from the document.

### How to Create a Password Protected PDF File

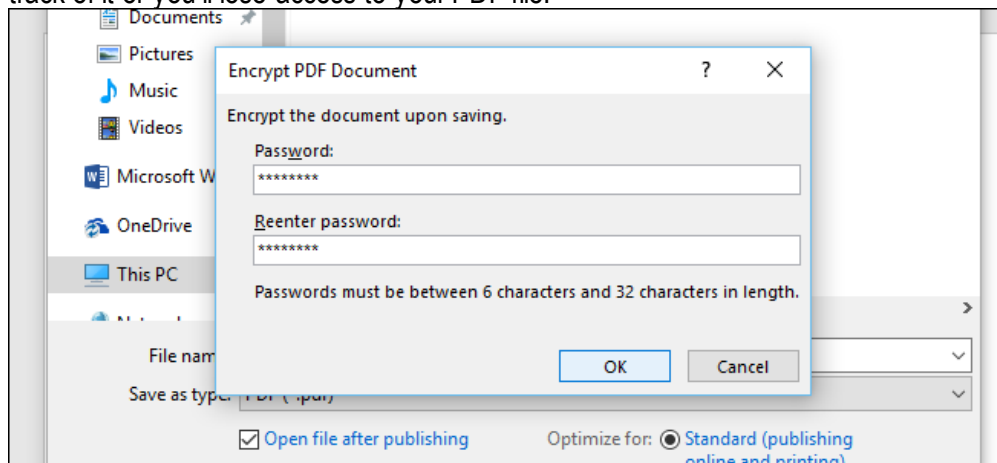

- You can also export an Office document to a PDF file and password protect that PDF file. The PDF document will be encrypted with the password you provide. This works in Microsoft Word but not Excel, for some reason.
- To do this, open the document in Microsoft Word, click the "File" menu button, and select "Export." Click the "Create PDF/XPS" button to export the document as a PDF file.

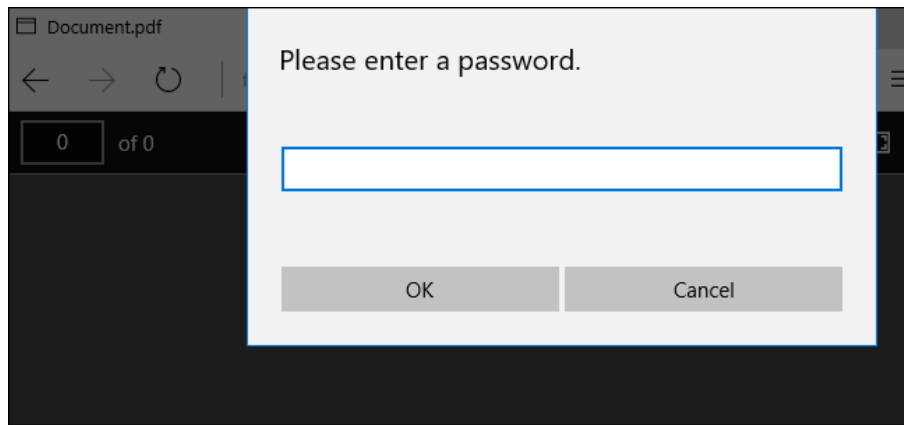

- Click the “Options” button at the bottom of the save dialog window that appears. At the bottom of the options window, enable the “Encrypt the document with a password” option and click “OK.”

- Enter the password you want to encrypt the PDF file with and then click “OK.”
- When you’re done, enter a name for the PDF file and click the “Publish” button. Office will export the document to a password-protected PDF file.
- **Warning:** You won’t be able to view the PDF file if you forget the password. Be sure to keep track of it or you’ll lose access to your PDF file.

- You’ll have to enter the PDF file’s password when you open it. For example, if you open the PDF file in Microsoft Edge–Windows 10’s default PDF viewer–you’ll be asked to enter the password before you can view it. This also works in other PDF readers.

### **Zipping your files.**

- Put all the files into a new folder
- Right-click on the folder to be sent
- Select "Send To" and then click "Compressed (Zipped) folder"
- The files will start compressing
- After the compression process is complete, attach the compressed file with the extension .zip to your email.

### **Keeping passwords safe.**

We recommend that you store the password either as a note on a hardcopy document which is then filed or stored safely or a softcopy that is saved in the bid response folder once the bid has been submitted or in line with your document management policy.
