

## Introduction

This document has been developed to set the standard technical evaluation criteria to be used when evaluating the tender submissions. This covers the technical evaluation for the supply and delivery of Personal Protective Equipment (PPE) for Eskom Rotek Industries (ERI).

This document contains the evaluation criteria to be used for evaluation of PPE tender.

## Evaluation criteria

Technical evaluation will be done in two phases.

The first phase includes the filling and returning the PPE category document attached in Annexure A confirming the type of PPE the tenderer can supply. In addition Distributors are required to submit a Letter of Agreement from their supplying Manufacturers confirming that they will source their products from them.

The second phase includes visiting the shortlisted tenderers' premises to confirm that their products (sample given for evaluation) indeed comply to the ERI Specification and SABS requirements. The tenderer will also have to prepare mandatory supporting documentation to be reviewed as part of the site visit. These include SABS/SANS certificates, material certificates, etc. Only original or certified copies that reflect the company's name where required will be accepted.

## Requirements

### a) Manufacturer requirements

Manufacturers are required to return the following:

#### Phase 1

- Completed Annexure A clearly stating the products they can manufacture and supply, also confirmation that their products comply with the ERI specification.

#### Phase 2

- Prepare samples for the products they have tendered for to be evaluated during the site visits.
- Prepare the required supporting documentation for review during the site visit.  
.QM58 document

The ERI Technical Evaluating team will inspect the samples provided for compliance with ERI's PPE Specification.

### b) Distributors requirements

Distributors are required to return the following:

#### Phase 1

- Obtain and submit a Letter of Agreement signed by the Manufacturer or a person in the similar level confirming that they will be sourcing their products from that Manufacturer.
- A completed Annexure A clearly stating products they are tendering for and confirmation that they comply with ERI's Specification.

#### Phase 2

- Request the Manufacturer to prepare samples for evaluation.
- Accompany the evaluation team to the Manufacturer's premises during the site visit.

- Ensure that the required supporting documentation is prepared before site visit and is available during the site evaluation.

NB: Sample evaluation will take place at the Manufacturer's premises, therefore the Distributor will have to arrange with the Manufacturer for that evaluation.

## **ANNEXURE A**

**NB: To be completed and sent back as part of the tender documents.**

<b>Company name</b>			
<b>Manufacturer/Distributor</b>			
<b>Name of Manufacturer to be used if you are a Distributor</b>			
<b>Letter of Agreement from Manufacturer attached (Yes/No) for Distributors only</b>			
Please indicate which products you are tendering for in the categories below by placing an (x) next to the product.
