1.1. DESCRIPTION

This work is for Thermal imaging on LV 400V panels and Ultrasound scanning on Medium voltage panels to determine when and where maintenance is needed, for electrical panels installations. Arcing, destructive corona or tracking, hot spots and mechanical looseness all produce detectable ultrasound that warn of impending failure. All panels scanned must include test results analysis and recommendations if there are developing faults. This includes determining hot spots with a thermal imaging camera, supply results showing the real image and scanned

All test results must be submitted on hard and soft or Electronic copy.
