

Annexure B1 - Technical Equipment Testing

- ACSA is going out on tender for display technologies. The purpose of the tender is to select a suitable bidder to provide the following services;
- Supply new display technologies that meet ACSA technical specifications. No brand name is specified, bidders are given an opportunity to propose their own brands.
- The tender is evaluated using the evaluation criterion that is in the tender document as well as the technical evaluation described in this document.
- Please note that the evaluation below will determine whether the proposed device will be suitable for use within ACSA. If the device does not pass the mandatory test below, the tenderer's bid will not move on to the next stage of the bidding process.
- The following activities will be performed on each screen. The testing is done to ensure that the proposed screens will work in the ACSA environment without any customization and complex configurations (simplicity). **The activities highlighted in red are mandatory and not negotiable.** The bidder will supply ACSA with one of each of their proposed devices.

All items in **RED** must be achieved to proceed to the next stage of evaluation.

Brand & Model	Loading Operation System (Windows Enterprise 64bit)	ACSA FIDS Client software installation and operation test	Internal PC removable with display still mounted	Display PC network bootable	Bracket type, flush wall, ceiling and floor mounting	Display screen PC drivers loaded successfully if applicable.	For LED's, Correctly scaling the required input from ACSA pc to display FIDS pages full screen.	Two-week operational test without failures.
Brand X	pass	pass	pass	fail	pass	pass	pass	

Only the bidders that pass the Functional/Technical Testing will be evaluated further under Pricing and BBBEE stage.

Confidential

After testing the screens for two weeks and evaluation on Price and BBEE, it will be decided which display technologies will be used at ACSA. A request for approval will then be sent to IT Architecture Council to approve the screen as a standard. Reliability testing cannot be performed, but all screens will come with a 3-year warranty as stipulated in the specification.
