CERTIFICATE OF INDEPENDENT BID DETERMINATION

1. This Municipal Bidding Document (MBD) must form part of all bids³ invited.
2. Section 4 (1) (b) (iii) of the Competition Act No. 89 of 1998, as amended, prohibits an agreement between, or concerted practice by, firms, or a decision by an association of firms, if it is between parties in a horizontal relationship and if it involves collusive bidding (or bid rigging).⁴ Collusive bidding is a *pe se* prohibition meaning that it cannot be justified under any grounds.
3. Municipal Supply Regulation 38 (1) prescribes that a supply chain management policy must provide measures for the combating of abuse of the supply chain management system, and must enable the accounting officer, among others, to:
 - a. take all reasonable steps to prevent such abuse;
 - b. reject the bid of any bidder if that bidder or any of its directors has abused the supply chain management system of the municipality or municipal entity or has committed any improper conduct in relation to such system; and
 - c. cancel a contract awarded to a person if the person committed any corrupt or fraudulent act during the bidding process or the execution of the contract.
4. This MBD serves as a certificate of declaration that would be used by institutions to ensure that, when bids are considered, reasonable steps are taken to prevent any form of bid-rigging.

³ Includes price quotations, advertised competitive bids, limited bids and BIDs.

⁴ Bid rigging (or collusive bidding) occurs when businesses, that would otherwise be expected to compete, secretly conspire to raise prices or lower the quality of goods and / or services for purchasers who wish to acquire goods and / or services through a bidding process. Bid rigging is, therefore, an agreement between competitors not to compete.

**TERMS OF REFERENCE FOR APPOINTMENT OF SERVICE PROVIDER TO UNDERTAKE REHABILITATION,
PROJECT MANAGEMENT AND ENGINEERING DESIGN FOR INTEGRATED WASTE MANAGEMENT FACILITY AT
KYA SANDS LANDFILL SITES FOR A DURATION OF THREE (3) YEARS.**

1. BACKGROUND

Kyasands landfill site is an old landfill that was decommissioned in 2010 by Pikitup after it reached its life span (landfill airspace) and five years was spent on efforts to rehabilitate the land. According to the Department of Water Affairs Minimum Requirements Section 12.1 of 1998 "Closure is the final step in the operation of a landfill. To close a landfill properly, however, closure must be preceded by rehabilitation, to ensure that the site is environmentally acceptable. The site must also be rendered suitable for its proposed end-use, as determined during permitting and set out in the End-use Plan (see Section 8.2.4) of the Minimum Requirements. Where bad practice has occurred, this must be rectified by means of remedial measures".

The decommission of the landfill site is guided but not limited to the following legislation (National Environmental Management Act 107 of 1988, National Environmental Management: Waste Act 2008, National Environment Management: Air Quality Act, National Water Act and Occupational Health and Safety Amended Act 181 of 1993.)

The landfill is bisected by the North Riding Stream (or Kyasands Spruit according to some sources). It is closely bordered by the Kya Sand industrial area to the west, the Bloubostrand residential suburb to the east, the Hoogland industrial area to the south and mostly small holdings to the north which have been infested by the ever-growing informal settlement.

Kyasands informal area has been plagued by an extensive amount of illegal dumping activities during the past years. The extent of dumping has had a direct impact on the environment and attracted the attention of the Bloubostrand community including business within the area, to an extent that business was threatening to pull out of the area. The conditions in Kyasands informal settlements are further perpetuated by some residents within the Informal Settlement that are soliciting a nominal fee from informal rubble removal businesses to dispose of in the area. The informal settlement land is owned by both municipal and provincial government and some parts which are privately owned. Some of the issues are beyond Pikitup to resolve within a short space of time since there are major issues of lawlessness that exist in the informal settlement and its surroundings.

The old Kyasands landfill that was decommissioned in 2010 has been vandalized and the palisade wall has been removed and is now reopened by the "Waste Lords" and used as a dumping site with dumping reaching over 50m high. Additionally, the "Waste Lords" have started an additional 7 illegal dumping sites in the Kyasands / Msawawa areas. It is estimated that the illegal dumping is done by anywhere from 100-300 trucks per day. Most of the illegal

dumping is done by commercial waste management companies and they are dumping builders' rubble and chemical waste. There is also illegal dumping by small bakkie loads by informal waste removal companies.

Due to insufficient waste disposal facilities in the area, excessive illegal dumping is encountered, covering a vast area of approximately 5-10ha, within the Kyasands Informal Settlement. As a result, the natural watercourse traversing the western border of the closed Kyasands landfill site has been impacted negatively (mixed waste dumped in the stream).

The waste that is dumped across Kyasands is continuously burnt and then covered over with building rubble for the next layer of waste. Smoke across the valley of the Jukskei has dropped air quality in the Fourways/Cedar Lakes/Bloubosrand area to below 35% affecting up to 80,000 residents.
