Introduction

The purpose of this document is to initiate the process of seeking a service provider for the supply of a Vehicle Tracking, Fleet Management System and Fuel Management System.

The municipality has 230 (two hundred and thirty) vehicles in its fleet that require new units.

New Technologies have become available which can assist the municipality in managing their vehicles and service delivery times.

NOTICE NO: 175/2023

SUPPLY, DELIVERY AND INSTALLING OF HIRED UNITS FOR LIVE VEHICLE TRACKING/ FLEET MANAGEMENT/ STOLEN VEHICLE RESPONSE / WITH ONGOING TRAINING AND SUPPORT AND FUEL MANAGEMENT SYSTEM FOR A PERIOD OF THREE (3) YEARS

TRANSACTION:

Appointment of an accredited service provider of a real time Vehicle Tracking and Fleet Management System with on - going training and support and Fuel Management System.

Objective of the Proposed Project

The main objective of this project is to assist the council to manage its vehicle fleet effectively and efficiently at all times.

Minimum Specifications and Accreditations

- For security reasons and to be compliant with forthcoming PSIRA legislation, foreign shareholding of the bidder is discouraged and should not exceed 25 percent.
- The control room should be inspected and approved by SAIDSA under the asset recovery class/category. This provides for minimum security and access standards.
www.saisda.co.za
- All technical work and new installations must be done at the Municipal Workshop in Jeffrey's Bay.
- System must be GPS/GPRS and live vehicle tracking must have pinpoint accuracy to within 5 metres. The municipal list of specified buildings/ locations will be provided, the service provider must then obtain coordinates and capture on system.
- System must provide the facility to live track multiple vehicles simultaneously in real-time and the user should be able to see whether the ignition is on or off.
- The system should be Multi users – web based preventing disruptive on-site visits by the successful bidder's staff to affect support by having to install software on-site.
- Users should be able to use the system and login using any internet enabled phone/ tablet/ laptop / desktop.
- The web application should as a standard be able to be used in a control room environment and contain the following bare minimum requirements :
 - a. No special software should have to be installed.
 - b. The IT department of successful bidder must provide one computer with two screens or two(2) TV's and internet access (will be provided by KLM), and install at KLM at the cost of the bidder.
 - c. Using a login the operator should be able to access the standard application that will open the following on the screen: a list of vehicles that gives vehicle description, **current location including street address and speed of the vehicle.**
 - d. On the other screen the operator should be able to select which vehicles will appear on a map giving an overview of selected vehicles **with the ability to zoom to street level.**

NOTICE NO: 175/2023

- e. A visual overview or “Bird’s Eye View” of the vehicles working in the municipal area to be permanently displayed on a big screen.
 - There should be 24/7 telephonic support and 24 Hour stolen vehicle response.

Full audit trail:

- a) Each and every user will be provided with a username and password.
 - b) Record to be kept of which device browser or operating system and IP address that accesses the web login to be recorded for any potential fraud investigations.
 - c) Any changes made to the system to be recorded.
 - d) Record to be kept of how many times users used the system in a month. This report must be emailed on a monthly basis to management or management must be able to pull the records via login at any given time.
- **Ease of use and training-** system should be user friendly and require minimal training. On-line tutorials to be available to keep the disruptive process of training staff and the associated logistical and other costs related to training to a minimum. When training is required this will be scheduled with the preferred bidder who will absorb these training costs as part of the awarding of this tender.
 - **Record Keeping:** permanent record of daily trip and speed reports to be kept for at least 5 years by the service provider. However these reports should be sent daily per email to the council creating a permanent record for the council as the reports will lie in their email inbox.
 - **Driver identification must be provided on request.** The system must work so that the operators / drivers are allocated to a vehicle on-line e.g. Code 8 driver can only drive the l.d.v and not the truck in his department that he has not been allocated to drive. The tracking unit thus incorporates an immobiliser that must be overridden with the tag.
 - **Ability to immobilise vehicles** - Specially selected staff must have higher authorisation levels that will allow them to immobilise vehicles at the push of a button.
 - An authorised user must be able to access and download computer generated installation certificates in pdf format for insurance purposes; for vehicles without requesting certificates from the service provider.
 - The system must have the ability to group vehicles per department. The Fleet manager should use his login to see all the municipalities’ vehicles, whilst the head of the parks department should only be able to track the parks department’s vehicles. Likewise the automated reports should also be able to be grouped and emailed accordingly.
 - Live alerts e.g. Tipping Alerts for tipper trucks should be able to be sent via sms or E-mail. Summarised reports with custom time frames should be emailed so that management can determine how many times, when and where the suction system (P.T.O) was engaged on a suction truck.

- Panic button / Call back number (optional) that sends the vehicles location map link to various selected cell phones and control room when pressed.
- Vehicles without power: Battery powered GPS / GPRS units that do not need power and has a battery life of at least 1 year need to be installed on Yellow Metal / trailers etc. These vehicles installed with battery powered units must be viewed on the same platform so that the municipality at a glance can see where their resources are deployed.
- RF backup units: the successful bidder must have RF backup units available for high value assets.
- The system should have an "Expense report and capturing" module. This will be used to enter all costs relating to a vehicle e.g. fuel, tyres and services. The reports that will be sent will thus work out cost per km / show up consumption figures and differences etc. This will enable management at a glance to see big differences (where theft of fuel, tyres /abuse is occurring) between similar vehicles of the same make and model.

Standard system features should include:

- Two cameras on each truck one facing forward and one facing to the interior of the driver's cab.
- Over speeding alarm with special emailed reports plus live alert to control room whether this is done by a municipal control room or the successful bidders' company control room or both. The bidder should be prepared to setup a whatsapp group between their control room and the council.

 - a) The units in the vehicles are to be used to enhance service delivery.
 - b) The Municipal Manager can decide to put up a small control centre for instance at the Traffic Department and have panic buttons installed in the traffic officers vehicles to alert this control centre if in danger. The successful bidder must assist in setting up this control centre and train these control centre staff as part of the bid at no extra cost.
 - c) Panic button / Call back number (optional) that sends the vehicles location map link to various selected cell phones and control room when pressed must form part of every vehicle installation.
- Bidder must show a willingness to customise reports and execute the reasonable request within 60 days.

- Future Expansion: Integration with Cameras:

The login web GUI interface must make provision for integration with cameras as to live track a vehicle by pushing a button, by pushing an adjacent button you can live view inside and around the vehicle. MBD 9

CERTIFICATE OF INDEPENDENT BID DETERMINATION - COMPULSORY

1 This Municipal Bidding Document (MBD) must form part of all bids¹ invited.

2 Section 4 (1) (b) (iii) of the Competition Act No. 89 of 1998, as amended, prohibits an agreement between, or concerted practice by, firms, or a decision by an association of firms, if it is between parties in a horizontal relationship and if it involves collusive bidding (or bid rigging).² Collusive bidding is a *pe se* prohibition meaning that it cannot be justified under any grounds.

3 Municipal Supply Regulation 38 (1) prescribes that a supply chain management policy must provide measures for the combating of abuse of the supply chain management system, and must enable the accounting officer, among others, to:

- a. take all reasonable steps to prevent such abuse;
- b. reject the bid of any bidder if that bidder or any of its directors has abused the supply chain management system of the municipality or municipal entity or has committed any improper conduct in relation to such system; and
- c. cancel a contract awarded to a person if the person committed any corrupt or fraudulent act during the bidding process or the execution of the contract.

4 This MBD serves as a certificate of declaration that would be used by institutions to ensure that, when bids are considered, reasonable steps are taken to prevent any form of bid-rigging.

5 In order to give effect to the above, the attached Certificate of Bid Determination (MBD 9) must be completed and submitted with the bid:

¹ Includes price quotations, advertised competitive bids, limited bids and proposals.

² Bid rigging (or collusive bidding) occurs when businesses, that would otherwise be expected to compete, secretly conspire to raise prices or lower the quality of goods and / or services for purchasers who wish to acquire goods and / or services through a bidding process. Bid

rigging is, therefore, an agreement between competitors not to compete.
