B. REQUEST FOR PROPOSAL FOR THE APPOINTMENT OF SPECIALIST CONSULTANT TO ASSIST WITH THE DEVELOPMENT OF THE SPACE INFRASTRUCTURE HUB (SIH) PHASE 1 MISSION USER REQUIREMENTS SPECIFICATION

1. BACKGROUND TO SANSAS

The South African National Space Agency (SANSAS) has a mandate, as outlined in the South African National Space Agency Act, 2008 (Act No 36 of 2008), to coordinate and integrate national space science and technology programmes and conduct long-term planning and implementation of space-related activities in South Africa, for the benefit of the citizens of South Africa.

The Space Infrastructure Hub (SIH) was approved by the Presidential Infrastructure Coordinating Commission Council (PICC) as Strategic Integrated Project (SIP) No. 22: Digital Infrastructure (Government Gazette No. 812 of 24 July 2020).

2. SCOPE OF WORK (TERMS OF REFERENCE)

The South African National Space Agency (SANSAS) seeks the services of a specialist consultant to assist with the development of the Mission User Requirements Specification (URS) in its Earth Observation programme. The appointed consultant will collaborate closely with the SANSAS Earth Observation and Portfolio Management divisions to develop a set of mission-specific user requirement definitions that will inform the mission specifications of the first SANSAS space mission for the Space Infrastructure Hub Strategic Infrastructure Project (SIP22).

The Consultant will use the information synthesised from the recent SANSAS Thematic User Requirements process to finalise a comprehensive set of User Requirements reflecting first order mission needs and aims. Mission specific user requirements will be derived based on example products and algorithm classes, informing the spacecraft, payloads/sensors, data products and other appropriate mission parameters. The Consultant will also be expected to participate in SANSAS Concurrent Design Engineering Facility (CDEF) sessions focussed on conceptual mission definition. The provider is expected to work closely with the SANSAS team, communicating on a weekly basis. The work will be conducted over a four month period ending in March 2023.

Duties include (but not limited to):

- Identifying and efficiently documenting the first order high level mission requirements e.g. sensor type, ranges of potential spatial and temporal needs, ranges of appropriate sensor spectral and radiometric requirements etc. The available synthesis of the thematic user requirements will be used for this purpose and to inform.
- Summarise, across the nine key thematic areas identified, the major use cases, user archetypes and potential high order impact from the mission (given the existing international mission landscape). This information is

available from the thematic user requirements study, and will primarily need further synthesis and some user transactional testing.

- Identify, across the major thematic areas, appropriate examples of the key product classes required to address thematic user needs. This information is also mostly available from the thematic user requirements study, but will require some specialist refinement and optimisation based on the identified mission solution space.
- Identify, from the key example product classes across the thematic areas, the scientific requirements with regards to appropriate representative examples of biophysical and/or object based algorithm classes and atmospheric correction procedures.
- Identify, across the thematic areas, any critical sensor, spacecraft and or data handling requirements needed to meet the scientific and associated product needs.
- Describe, from the science requirements, a range of mission requirements with respect to, key mission parameters including (but not limited to) spectral resolution, spatial resolution, revisit, radiometric sensitivity, etc. These can be derived primarily using available information in public space on similar and highly complementary sensor types. These mission requirements should be stated across a range of threshold, breakthrough and goal type scenarios, with some informed with regard to the South African space industry's current capabilities.
- Provide an overarching synthesis of prioritised mission aims and associated threshold, breakthrough and goal mission requirements.
- Participation in SANSA's Concurrent Design Engineering Facility (CDEF) sessions, which will focus on conceptual mission definition development (in parallel with the above requirements development).
- Attending up to four (4) in-person meetings/work session at SANSA headquarters in Pretoria. The logistic price per session to be proposed as separate optional line item in the tender.

The ideal Consultant will have:

- Substantial (several missions) previous experience of developing earth observation user requirements and mission specifications within a South African context.
- Substantial (>10 years) experience of the South African space industry and knowledge of its current offerings and capabilities with regards to sensor systems and satellite buses.
- Ability to communicate with a diverse set of Earth Observation specialists and stakeholders.
- Good knowledge of broad Earth Observation markets i.e. knowledge and experience of commercial and freely available satellite data, products and the use of these in various economic sectors such as agriculture, water, and infrastructure monitoring.
- Effective communication skills.
- Excellent report writing skills.

- Own provision for any and all computer, software and internet equipment or facilities used by the supplier in the execution of this tender (except where equipment/software are unique to the SANSA process and therefore customer furnished).

Service providers are requested to provide quotation for this assignment for a period of four (4) months.

Key deliverables (invoiceable) are anticipated to be:

Deliverable 1 Start + 2 weeks: Detailed table of contents and short workplan

Deliverable 2 Start + 6 weeks: Draft URS document v1.0 with gap & effort identification

Deliverable 3 Start + 10 weeks: Draft URS document V2.0 with $\pm 80\%$ completion

Deliverable 4 Start + 12 weeks: Preliminary URS document with any additional CDEF considerations

Deliverable 5 Start + 14 weeks: Final URS document deliverable

C. EVALUATION CRITERIA

SANSA promotes the concept of “best value” in the award of contracts, as opposed to merely looking for the cheapest price, which does not necessarily provide the best value. Best value incorporates the expertise, experience and technical proposal of the organisation and individuals who will be providing the service and the organisational capacity supporting the project team.

SANSA is committed to achieving Government's transformation objectives in terms of the Preferential Procurement Policy Framework Act.

The value of this bid is estimated not to exceed R1 million (all applicable taxes included) and therefore the **80/20** system shall be applicable.

The procedure for the evaluation of responsive tenders is **price, functionality (quality) and preference** method. The evaluation of the bids will be conducted in the following two stages:

- Firstly, the assessment of quality will be done in terms of the evaluation criteria (Table 3) and the minimum threshold of **85 points** explained below. A bid will be disqualified if it fails to meet the minimum threshold for functionality as per the bid invitation
- Thereafter, only the qualifying bids are evaluated in terms of the 80/20 preference points systems, where the 80 points will be used for price and the 20 points will be awarded to a bidder for attaining the B-BBEE status level of contributor in accordance with the Table below

1. Preference

(ORIGINAL/CERTIFIED B-BBEE STATUS LEVEL VERIFICATION CERTIFICATE/SWORN AFFIDAVIT MUST BE SUBMITTED IN ORDER TO QUALIFY FOR PREFERENCE POINTS FOR B-BBEE)

Calculation of points for B-BBEE status level contributor

Points will be awarded to a bidder for attaining the B-BBEE status level of contributor in accordance with the Table1 below

Table 1: B-BBEE level and points

B-BBEE Status Level of Contributor	Number of points (80/20 system)
1	20
2	18
3	14
4	12
5	8
6	6
7	4
8	2
Non-compliant contributor	0

2. Eligibility Criteria

To be eligible for the functionality, price and preferencing evaluation, the bidder must submit the following as per table 2 below.

If there is **“No”** on the Table 2 below, the bidder who didn't submit the required document (s) with their bid will be requested in writing to submit them within three (3) working days for inclusion in the Bid Evaluation Committee item, if a bidder fails to submit on the 3rd working day, the relevant bid will be rejected.

Table 2: Eligibility Criteria

Criteria	Attached (Yes/No)	Comments
CSD Registration Summary Report with a compliant tax status		

3. Quality/Functionality:

Scores will be tabulated to 100 points. Respondents must score **85 points** and over to be assessed on their financial offer and preference score.

The allocation of points for the evaluation of quality/functionality is set out in Table 3 below:

Table 3: Quality/Functionality Criteria

Criteria	Maximum Points
Experience of national user & mission requirements	50
Experience of the South African space industry and knowledge of its current offerings and capabilities	30
Knowledge of broad Earth Observation markets i.e. knowledge and experience of commercial and freely available satellite data, products and the use of these in various economic sectors	20
Total evaluation points for quality	100

Evaluation criteria 1: Substantial previous experience of developing earth observation user requirements and mission specifications within a South African context

Description: Evidence should include a very short description of involvement in previous relevant projects and initiatives. Contact details for references for previous projects should be provided.

Criteria	Maximum Points
Poor (Score= 0)	No previous experience of South African earth observation user and/or mission requirements
Limited (Score= 20)	Limited (1 mission) previous experience of South African earth observation user and/or mission requirements
Good (Score= 50)	Substantial (>1 mission) previous experience of South African earth observation user and/or mission requirements

Evaluation criteria 2: Substantial experience of the South African space industry and knowledge of its current offerings and capabilities with regards to sensor systems and satellite buses

Description: Evidence should include a very short description of involvement in previous relevant projects and initiatives, and/or very short statements on key industry capabilities to demonstrate knowledge.

Criteria	Maximum Points
Poor (Score= 0)	No previous experience of South African space industry and knowledge of its current offering & capabilities
Limited (Score= 20)	Limited (<10 years) previous experience of South African space industry and knowledge of its current offering & capabilities
Good (Score= 30)	Substantial (>10 years) experience of the South African space industry and knowledge of its current offerings and capabilities

Evaluation criteria 3: Knowledge of broad Earth Observation mission landscapes and markets i.e. knowledge and experience of commercial and freely available satellite data, products and the use of these in various economic sectors

Description: Evidence should include short statements of at least three examples of emerging recent developments or opportunities in the international Earth Observation mission landscape, with verifiable reference points such as web sites or reports.

Criteria	Maximum Points
Poor (Score= 0)	Poor or unevidenced knowledge of broad Earth Observation mission landscapes and markets i.e. < three or poorly evidenced mission examples.
Good (Score= 20)	Good knowledge of broad Earth Observation mission landscapes and markets i.e. three or more well evidenced mission examples.

D. PRICING SCHEDULE

Pricing Instructions

1. The Bidder must price all items;
2. Rates are to include all costs with no unspecified cost to allow for a fair evaluation.
3. Payment will be made based on the deliverables (proven progress) for the services rendered/goods received.
4. Payment will only be made on the basis of invoices provided.
5. Offer to be valid for 30 days from the bid closing date.
6. Quotation to include all cost inclusive of VAT and disbursements.
