1. PURPOSE

- 1.1. The purpose of the TOR is to procure the services of a Professional Service Provider (PSP) to develop the national veldfire risk profile for a period of 12 months in line with research the Minister may commission to address the risk of veldfire [Section 30 of National Veld and Forest Fire Act, 1998 (Act no. 101 of 1998) (hereinafter referred to as the Act)] through, inter alia:
 - 1.1.1 Reduce Veld fire risk to support sustainable use and protection of natural resources;
 - 1.1.2 Create awareness and shared responsibility with stakeholders to minimize the risks; and
 - 1.1.3 Identify the Veldfire hot spot areas to be prioritised when implementing veldfire risk reduction measures.

2. INTRODUCTION AND BACKGROUND

- 2.1. The National Veld and Forest Fire Act 1998, Act no. 101 of 1998 (NVFFA) is the primary legislation regulating veldfire in South Africa. The purpose of the Act is to prevent and combat veld, forest, and mountain fires throughout the republic as well as to provide for a variety of institutions, methods, and practices for achieving the purpose.
- 2.2. These methods and practices include but are not limited to the formation of Fire Protection Associations (FPA), development and maintenance of a National Fire Danger Rating System (NFDRS), veldfire prevention through firebreaks, provision of veldfire risk profile, prescribed minimum requirements for firefighting, and enforcement mechanisms. Essentially, in this Act, obligations are placed on the landowners on which there is a risk of veldfire and citizens at large who may be affected by the risk of veldfire.
- 2.3. Veldfire, although it is vital in the management of the ecological ecosystem, is a natural hazard in South Africa. This assessment (risk profiling) addresses the requirement of the Department of Forestry, Fisheries, and the Environment (DFFE/ the Department) for a revision of the national veldfire risk classification developed in 2010.
- 2.4. As an Organ of the state responsible for the implementation of the Act, DFFE requires a risk assessment and veldfire risk maps according to the requirements as set out in the National Disaster Management Framework (NDMF).
- 2.5. This assessment should integrate with relevant provisions in the Act, for example, the fire danger rating system. It should provide an assessment at the policy level, to support operational assessments and mitigation plans in the provincial and local spheres of government. It should integrate with bioregional plans in terms of the National Environmental Management: Biodiversity Act as well as Integrated Development Plans.

- 2.6. DFFE is the custodian of the National Veld and Forest Fire Act 101 of 1998 (the Act) which seeks to prevent and combat veldfires country wide. The Act applies to all spheres of Government, the National, Provincial, and the Municipalities. Section 30 (1)(a) of the Act empowers the Minister to commission or carry out research into the prevention and combating of veldfires nationally. The Report and Risk Maps that will be generated by this project will be used to develop and implement veldfire risk interventions across the three spheres of Government.
- 2.7. The raw/processed data, soft copies of the veldfire risk classification report, risk maps with all related excel spreadsheets will be the property of the Department. The software that they used to prepare the risk maps will remain the property of the service provide. Therefore, the maps and the data sourced will remain the Department's IP, the Service Provider will retain the IP it used to process the data.
- 2.8. The Branch has the capacity to implement the output of this project. However, the Department does not have the capacity to develop the risk maps hence outsourced.

3. OBJECTIVES

- 3.1 The objectives of this project are:
- 3.1.1 To reduce the vulnerability and exposure of assets (social, economic, and environmental) to veldfire hazards,
 - 3.1.2 Identify veldfire hot spot areas,
 - 3.1.3 Develop veldfire risk maps, and
 - 3.1.4 Develop the veldfire risk management strategy based on identified assets at risk and the degree of risk evaluated.

4 SCOPE AND EXTENT OF WORK

- 4.1 The appointed service provider will assist DFFE with the preparation of a review of the veldfire risk profile that will be consistent with the Act and the policy foundation established in terms of the Constitution of the Republic of South Africa. The scope of the project is to:
- 4.1.1 Prepare a review and update of the veldfire risk profile developed in 2010 by the Council for Scientific and Industrial Research (CSIR) at the national, provincial, and local municipal levels;
 - 4.1.2 Develop and implement a key stakeholder Engagement Work Plan (SEWP), outlining a consultation methodology in detail as well as any plans for the facilitation of meetings or workshops that may be envisaged,
 - 4.1.3 Involve DFFE Officials throughout the project to ensure skills transfer; and

- 4.1.4 Undertake one (1) consultation per province and one (1) at the national level as shown in the below table:

Table 1 Provinces

#	Provinces

- 4.1.5 Integrate inputs received from key stakeholders where applicable, and

- 4.1.6 Prepare a methodology and a memorandum that will provide a set of guidelines to follow when interpreting risk mapping over a given area.

- 4.2 The service provider will identify towns where consultations will take place, and DFFE will secure suitable venues within the identified towns for all the consultative sessions as set out in paragraph 4.1.4 above.

- 4.3 The service provider must prepare and submit monthly progress reports on the project including PowerPoint presentations to the Department within 7 working days, at the beginning of each month.
