SECTION 2

1. INTRODUCTION

- 1.1. This submission serves as a Bid Specification Document for the appointment of a Contractor needed to perform the construction work activities for the project: The reconstruction of the 3 kV DC traction, and AC distribution substations between the Anglers Train Station and Houtheuwel Train Station. The project's desired outcome is a fully operational 3 kV DC Traction, and AC Distribution Substations between Anglers Train Station and Houtheuwel Train Station, which comply with all applicable PRASA/Transnet specifications, equipment specifications or manuals, technical standards, regulations, laws of the land and international laws.
- 1.2. The section between the Anglers Train Station and Houtheuwel Train Station has four (4) 3kV DC Traction Substations, and three (3) AC Distribution Substations, which form an integral part of the electrical traction and distribution power network in the Gauteng South Region. The electrical substations are critical power supply points for the traction power supply, Signal Cabin, Telecommunication systems, High Mast lights in the yards, PRASA offices, Security systems, Guardrooms, Depots, Train station buildings, and Train Station Platforms.
- 1.3. The information gathered from substation yards during inspection indicates that all substations equipment and conductors for both DC traction substations and AC distribution substations between the Anglers Train Station and Houtheuwel Train Station have been vandalised beyond economical repair, this includes ESKOM and Municipalities' supply points. Therefore, the reconstruction of all substations on this corridor is a major priority for the Electrical Infrastructure department to provide a reliable power supply for train operations and associated services.
- 1.4. The scope of work in this bid specification will cover the following traction and distribution substations:
 - 1.4.1. List of traction substations covered in this bid specification.
 - a) Anglers 3kV DC Traction Substation, single unit at 88kV nominal voltage.
 - b) Stretford 3kV DC Traction Substation, single unit at 88kV nominal voltage.
 - c) Residencia Tie-Station; and
 - d) Houtheuwel 3kV DC Traction Substation, single unit at 88kV nominal voltage.
 - 1.4.2. List of the AC Distribution Substations covered in this bid specification.
 - a) Stretford 88kV/6.6kV Distribution Substation (inside traction substation);
 - b) Houtheuwel Tie-Station; and
 - c) Houtheuwel 88kV/6.6kV Distribution Substation (inside traction substation).

- 1.5. The scope of work will include design, detailed project specification document, and execution of construction work activities.

1 OVERVIEW

Due to extensive overhead traction cable theft and infrastructure damage, in November 2019, Metrorail was forced to suspend its train services. The sustained vandalism and theft of overhead and signalling infrastructure prevented the reinstatement of train services. The vandalised assets include train stations, power supply systems such as overhead traction equipment (OHE), substations, and signalling systems.

The declaration of a national state of disaster on 15 March 2020 and the lockdown from 26 March 2020 due to the COVID-19 pandemic resulted in all commuter rail services being prohibited for the duration of the lockdown at level 5. This resulted in a total loss of fare revenue for three months. Crime increased exponentially after the announcements, with the unprecedented destruction of the national rail network.

Furthermore, most of the insulators were obsolete and Porcelain insulators are easy to vandalise, therefore antivandal-proof insulators are proposed in the specification. The latest bond specification requirements are bolted bonds, by implementing this project will assist PRASA to comply with RSR requirements. Lastly, all traction substations will be constructed with 6 MVA traction transformer/s, which will increase available power capacity in the section and be able to accommodate Electric Module Unit (EMU) sets.

2 KEY OBJECTIVES OF THE RFP

The objectives of the project are outlined in detail in the following sections:
