Scope of Services

VMWARE SOFTWARE AND MAINTENANCE

VMWare software is currently the foundation of PetroSA's virtualized server environment. With **VMWare**, PetroSA is able to run multiple virtual servers on a single physical host thereby making more efficient use of the hardware.

The maintenance and support on the **VMware** licenses as listed below needs to be renewed. The licenses are currently used in production environments by the IS and DCS departments to support Business.

This will be required for a period of 36 months and all the end dates must be aligned – see Commercial Bid Analysis for licenses, duration (which includes re-instatement).

Please note that payments will be done on an annual basis.

Furthermore, PetroSA requires new licences with a 5 year Warranty and Support.

Typically, only VMware partners, resellers or distributors will be able to request the renewal.

Below is a list of licenses that are to be renewed:
