## SECTION 3: BACKGROUND, OVERVIEW AND SCOPE OF REQUIREMENTS

### 1 BACKGROUND

Attack simulation and threat hunting is a solution engineered to look for threat within the entire Transnet network before they can cause any harm to the environment.

Attack simulation and threat hunting is the practice of proactively searching for cyber threats that lurk undetected in a network. Cyber threat hunting digs deep to find malicious actors in your environment that have slipped past your initial endpoint security defenses. With Transnet now having to account for the exponential growth of mobile devices accessing its corporate network, as well as the security risks they bring, it is critical to have a tool that provides the visibility, hunts for threats, and offers compliance capabilities required to strengthen the company's monitoring platform.

### 2 EXECUTIVE OVERVIEW

Whereas Transnet is seeking a partner(s) to provide solutions for its for its Attack Simulation and Threat Hunting Solution nationally it also seeks to improve its current processes for providing these Services to its end user community throughout its locations.

The selected Service provider(s) must share in the mission and business objectives of Transnet. These mutual goals will be met by meeting contractual requirements and new challenges in an environment of teamwork, joint participation, flexibility, innovation and open communications. In this spirit of partnership, Transnet and its Service provider(s) will study the current ways they do business to enhance current practices and support processes and systems. Such a partnership will allow Transnet to reach higher levels of quality, service and profitability.

Specifically, Transnet seeks to benefit from this partnership in the following ways:

- 2.1 Transnet must receive reduced cost of acquisition and improved service benefits resulting from the Service provider's economies of scale and streamlined service processes.
- 2.2 Transnet must achieve appropriate availability that meets user needs while reducing costs for both Transnet and the chosen Service provider(s).
- 2.3 Transnet must receive proactive improvements from the Service provider with respect to provision of Services and related processes.
- 2.4 Transnet's overall competitive advantage must be strengthened by the chosen Service provider's leading edge technology and service delivery systems.
- 2.5 Transnet end users must be able to rely on the chosen Service provider's personnel for service enquiries, recommendations and substitutions.
- 2.6 Transnet must reduce costs by streamlining its acquisition of Services, including managed service processes on a Group basis.

### 3 SCOPE OF REQUIREMENTS

#### **Expected functional requirements for Threat Hunting and Attack Simulation solution:**

Comprehensive Threat Hunting and Attack Simulation Services should encompass the examination of various

entities and platforms, including Network Infrastructure, Endpoints, Cloud Infrastructure, Applications, Database, email Systems, User Accounts, Privileged Access and Third-Party Connections.

- ❑ **Automated ICT Asset Discovery:** The platform should automatically discover all ICT assets on the internal network gathering comprehensive information on users, hosts, network, primarily servers, and application configurations. Enable ongoing asset discovery and reconnaissance to map the external attack surface. Actively track and update information on web-facing assets. Present a visualization of the organization's assets from an adversary's perspective, emphasizing exploitable security gaps based on potential risk to the business.
- ❑ **Threat Intelligence Integration:** Capacity to integrate external threat intelligence feeds into the hunting and simulation process. Support for real-time updates and alerts based on the latest threat intelligence. Incorporate the latest credential threat intelligence to identify potential risks related to stolen or compromised credentials.
- ❑ **Detection Techniques:** Utilization of advanced detection techniques such as anomaly detection, signature-based detection and behavioral analysis. Ability to detect both known and unknown threats across all environments.
- ❑ **Attack Simulation:** Conduct simulated attacks to evaluate the resilience of Transnet's security infrastructure. Implement safe by design ethical hacking techniques to uncover the full attack kill chains, potential flaws and vulnerabilities within our network infrastructure. Conduct safe by design attacks aligned with OWASP and MITRE ATT&CK frameworks, specifically focusing on understanding the kill chain of external assets. Provide the capability to reveal complete attack kill chains, pinpoint their root cause and present a detailed analysis. This feature will enable focused efforts on addressing critical vulnerabilities promptly. Mimic various threat actor behaviors and tactics, including Advanced Persistent Threats (APT's) and insider threats. Continuously monitor real-world compromised credentials and safely test them against the complete attack surface in the production environment, simulating real-world attacker behavior. Emulate safe versions of the most destructive ransomware strains found in the wild. Understand vulnerabilities and lateral pathways ransomware would take to target critical assets and disrupt operations. Validate the efficiency of endpoint protection through the launch of initial exploitation, proprietary payload execution, encryption and data exfiltration all fully aligned with the MITRE ATT&CK framework
- ❑ **Compliance and Regulation:** Ensure compliance with relevant industry regulations (e.g GDPR, POPIA) and internal security policies. Capability to generate compliance reports and audit trails.
- ❑ **Incident Response Integration:** Seamless integration with Transnet's incident response processes and tools. Provide a step-by-step remediation guide prioritized based on true risk to the business. Enable the blocking of attack paths to assure that ransomware cannot propagate within the network. Facilitate a rapid validation – remediation cycle by defining effective remediation actions based on proven exposures. Utilize a guided remediation process to quickly fix and minimize the impact of potential compromises
- ❑ **Customization and Flexibility:** Ability to tailor threat hunting and simulation scenarios to Transnet's specific environment and security requirements. Support for customization of detection rules and algorithms.

**THE NATIONAL INDUSTRIAL PARTICIPATION PROGRAMME****INTRODUCTION**

The National Industrial Participation Programme (NIPP), which is applicable to all government procurement contracts that have an imported content, became effective on the 1 September 1996. The NIP policy and guidelines were fully endorsed by Cabinet on 30 April 1997. In terms of the Cabinet decision, all state and parastatal purchases / lease contracts (for goods, works and services) entered into after this date, are subject to the NIPP requirements. NIPP is obligatory and therefore must be complied with. The Industrial Participation Secretariat (IPS) of the Department of Trade and Industry (DTI) is charged with the responsibility of administering the programme.

**1. PILLARS OF THE PROGRAMME**

- 1.1 The NIPP obligation is benchmarked on the imported content of the contract. Any contract having an imported content equal to or exceeding US\$5 million or other currency equivalent to US\$5 million will have a NIP obligation. This threshold of US\$5 million can be reached as follows:
- (a) Any single contract with imported content exceeding US\$5 million.
  - or
  - (b) Multiple contracts for the same goods, works or services each with imported content exceeding US\$3 million awarded to one seller over a 2 year period which in total exceeds US\$5 million.
  - or
  - (c) A contract with a renewable option clause, where should the option be exercised the total value of the imported content will exceed US\$5 million.
  - or
  - (d) Multiple suppliers of the same goods, works or services under the same contract, where the value of the imported content of each allocation is equal to or exceeds US\$ 3 million worth of goods, works or services to the same government institution, which in total over a two (2) year period exceeds US\$5 million.
- 1.2 The NIP obligation applicable to suppliers in respect of sub-paragraphs 1.1 (a) to 1.1 (c) above will amount to 30% of the imported content whilst suppliers in respect of paragraph 1.1 (d) shall incur 30% of the total NIPP obligation on a *pro-rata* basis.
- 1.3 To satisfy the NIPP obligation, the DTI would negotiate and conclude agreements such as investments, joint ventures, sub-contracting, licensee production, export promotion, sourcing arrangements and research and development (R&D) with partners or suppliers.
- 1.4 A period of seven years has been identified as the time frame within which to discharge the obligation.

## 2. REQUIREMENTS OF THE DEPARTMENT OF TRADE AND INDUSTRY

- 2.1 In order to ensure effective implementation of the programme, successful bidders (contractors) are required to, immediately after the award of a contract that is in excess of **R10 million** (ten million Rands), submit details of such a contract to the DTI for reporting purposes.
- 2.2 The purpose for reporting details of contracts in excess of the amount of R10 million (ten million Rands) is to cater for multiple contracts for the same goods, works or services; renewable contracts and multiple suppliers for the same goods, works or services under the same contract as provided for in paragraphs 1.1.(b) to 1.1. (d) above.

## 3. BID SUBMISSION AND CONTRACT REPORTING REQUIREMENTS OF BIDDERS AND SUCCESSFUL BIDDERS (CONTRACTORS)

- 3.1 Bidders are required to sign and submit this Standard Bidding Document (SBD 5) together with their bid documentation at the closing date and time of the bid.
- 3.2 In order to accommodate multiple contracts for the same goods, works or services; renewable contracts and multiple suppliers for the same goods, works or services under the same contract as indicated in sub-paragraphs 1.1 (b) to 1.1 (d) above and to enable the DTI in determining the NIPP obligation, successful bidders (contractors) are required, immediately after being officially notified about any successful bid with a value in excess of R10 million (ten million Rands), to contact and furnish the DTI with the following information:
- Bid number;
  - Description of the goods or services;
  - Date on which the contract was awarded;
  - Name, address and contact details of the contractor;
  - Value of the contract; and
  - Imported content of the contract, if possible.
- 3.3 The information required in paragraph 3.2 above must be sent to the Department of Trade and Industry, Private Bag X 84, Pretoria, 0001 for the attention of Mr Elias Malapane within five (5) working days after award of the contract. Mr Malapane may be contacted on telephone (012) 394 1401, facsimile (012) 394 2401 or e-mail at [Elias@thedti.gov.za](mailto:Elias@thedti.gov.za) for further details about the programme.

## 4. PROCESS TO SATISFY THE NIPP OBLIGATION

- 4.1 Once the successful bidder (contractor) has made contact with and furnished the DTI with the information required, the following steps will be followed:
- a. the contractor and the DTIC will determine the NIPP obligation;
  - b. the contractor and the DTI will sign the NIPP obligation agreement;
  - c. the contractor will submit a performance guarantee to the DTI;
